REPORT ON THE WORKING OF THE LICENSED WAREHOUSE AND FIRE-BRIGADE ACT, 1893, IN CALCUTTA DURING THE YEAR 1897-98.

No. 4187M.—The 12th July 1898.—The following report is published for general information.

H. H. RISLEY,
Secretary to the Government of Bengal.

No. 465J., dated Calcutta, the 27th June 1898.

From—R. T. GREER, Esq., I.C.S., Offg. Chairman of the Corporation of Calcutta,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit the following report under section 41 of Act I of 1893 (B.C.) of the warehouses in Calcutta for the year ended 31st March 1898.

2. During the year under report the fees under section 10 of the aforesaid Act continued to be levied at 7½ per cent. on the annual valuation of the warehouses.

3. The following statement describes the results of applications for licenses:—

Applications— Pending since last year.	Applications— Received during the year.	Total.	Nature of application.	No. sanctioned.	No. refused.	No. pending.
1	2	3	4	5	6	7
6	101	107	Hay, wood, &c.	100	1	6
2	7	9	Jute	3	5	1
8	108	116	.....	103	6	7

4. During the year under review 3 licenses were issued for 1895-96, 26 for 1896-97, and 580 for 1897-98. The following is a statement of the aggregate amount of receipts during the year:—

		Rs.	A.	P.
License fees for 1895-96	... ...	120	0	0
Ditto for 1896-97	... ...	271	0	0
Ditto for 1897-98	... ...	24,292	8	0
Mutation fees and fines	... ...	697	8	0
	Total	25,381	0	0

5. Of 583 licenses for warehouses in 1896-97, 536 were renewed, 14 cancelled as vacant or unoccupied, or not assessable under the Act, while the license fees of 33 remained unrealised at the close of the year.

6. The following statement shows the receipts and disbursements of the Warehouse Fund during the year 1897-98:—

Receipts.	Amount.	Total.	Disbursements.	Amount.	Total.
1	2	3	4	5	6
	Rs. A. P.	Rs. A. P.		Rs. A. P.	Rs. A. P.
To Jute warehouse license fees ...	24,683 8 0		By contribution to the Fire-brigade (exclusive of Rs. 23,497-8 paid from General Fund).	23,497 8 0	
,, miscellaneous receipts and fines.	697 8 0	25,381 0 0			23,497 8 0
Balance at commencement of the year—			Balance at close of the year—		
Cash in the Bank of Bengal	20,527 8 9		Cash in the Bank of Bengal...	23,426 8 9	
,, with Treasurer	14 8 0		,, with Treasurer	9 0 0	
	20,542 0 9			23,435 8 9	
Due to General Fund	1,365 0 0	19,277 0 9	Due to General Fund	2,275 0 0	21,160 8 9
Total ...	.....	44,658 0 9	Total ...	.....	44,658 0 9

7. Appended is a list of warehouses licensed in 1897-98.

List of Warehouses other than Jute licensed in 1897-98.

WEATHER AND CROP REPORT.

For the week ending the 11th July 1898.

Burdwan.—Rainfall at Sadar 4·30, Kalna 2·32, Katwa 2·91, Raniganj 3·23. Weather rainy. Cultivation of paddy progressing. A few cases of cattle-pox reported. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	11½ to 16	per rupee.
Kalna	11 to 12½	
Katwa	12	
Raniganj	12¾	

Birbhum.—Rainfall at Sadar 8·29, Rampur Hât ·85. Weather hot and cloudy. Transplantation of paddy continues. Paddy seedlings and sugarcane doing well. Prices stationary. Fodder sufficient.

Bankura.—Rainfall at Bankura 1·76, Vishnupur 1·25. Weather generally cloudy and sultry. Transplantation of *aman* and *aus* paddy progressing. No cattle-disease reported. Price of common rice at Bankura 14 seers and at Vishnupur 12½ seers per rupee.

Midnapore.—Rainfall at Sadar 7·39, Contai 2·59, Tamluk 3·92, Ghatal 5·66. Prospects of indigo and sugarcane good. *Aus* damaged by floods. *Aman* may benefit. Ploughing and sowing in progress. Prices of common rice:—

	Srs.	
Sadar	13	per rupee.
Contai	13 to 14	
Tamluk	11½	
Ghatal	12 to 13	

Hooghly.—Rainfall at Sadar 1·04, Serampore 1·93, Jahanabad 3·44. Jute, *aus*, and sugarcane doing well. More rain required for transplantation of *aman* paddy.

Howrah.—Common rice sells from 10½ to 12½ seers per rupee. Rainfall at Sadar 3·68, Ulubaria 1·74. Weather hot and cloudy. Rainfall in Ulubaria has hitherto been very short, but no complaints have been received. Sowing of *aman* still going on. In places transplantation has commenced. Jute and sugarcane doing well. Fodder and water available. Common rice sells at 10½ to 12 seers per rupee.

24-Parganas.—Rainfall at Sadar 4·45, Barasat 3·06, Basirhat 2·19, Diamond Harbour 2·65. Weather hot, rainy and cloudy. Jute and *aus* doing well. Weeding of jute and *aus* and sowing of *aman* going on. Fodder and water sufficient. Cattle-disease diminishing. Common rice sells as follows:—

	Srs.	
Sadar	10 to 12	per rupee.
Barasat	12	
Basirhat	13	
Diamond Harbour	11	

Nadia.—Rainfall at Sadar 1·70, Meherpur 1·94, Chuadanga 4·52, Ranaghat 1·39, Kushtia 1·53. Weeding still in progress. *Aman* being transplanted. Standing crops doing well. Common rice selling at 10 to 12½ seers per rupee. Fodder and water sufficient. No cattle-disease.

Murshidabad.—Rainfall at Sadar 2·02, Kandi 1·22, Jangipur 2·62. Weather seasonable. Transplantation of *aman* going on. *Bhadoi* and jute plants doing well. State of indigo and mulberry favourable. Fodder and water sufficient. No cattle-disease reported. Paddy plants in some of the fields in Jalangi thana have been destroyed by a species of insect called *karapoka*. These insects are said to abound in fields that have not received the flood-water for some time. Common rice sells as follows:—

	Srs.	
Sadar	12½	per rupee.
Kandi	13	
Jangipur	14	

Jessore.—Weather hot, close and very damp. Rainfall at Jessore 5·02, Jhenida 2·33, Magura 3·21, Narail 4·92, Bangaon 2·45. Standing crops doing well. Weeding going on, Cattle-disease reported from Muhammadpur. Fodder and water sufficient. Common rice sells as follows:—

			Srs.	
Jessore	...	...	10½ to 13	per rupee.
Jhenida	...	...	11	
Magura	...	...	11½ to 12	
Bangaon	...	...	11½ to 12½	
Narail	...	...	11-6¼ ch.	

Khulna.—Rainfall at Sadar 5·43, Bagerhat 1·89, Satkhira 2·46. Weather seasonable. Cultivation of *aman* paddy going on. Fodder and water available. Common rice sells as follows:—

					Srs.	
Sadar	...	...	...	...	10½ to 13	per rupee.
Bagerhat	...	...	...	...	12	
Satkhira	...	...	...	...	13	

Rajshahi.—Rainfall at Sadar ·99, Nator ·45, Naugaon 1·34. Prospects of standing crops good. No cattle-disease. Fodder and water sufficient. Common rice sells from 10 to 13 seers per rupee.

Dinajpur.—Average rainfall 1·99. Weather seasonable. Condition of standing crops good. Jute on low lands being cut. Transplantation of *aman* going on. No cattle-disease. Fodder and water ample. Rice sells at 13 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 1·57, Alipur Duars 3·36. Weather hot. Cultivation of *haimanti* paddy going on. Prospects of standing crops favourable. Price of common rice from 7 to 14 seers a rupee. Fodder and water sufficient.

Darjeeling.—Rainfall at Darjeeling 9·43, Kurseong 6·75, Siliguri 3·06. Weather seasonable. *Hills—Bhutta, bara marua, chota marua*, and potatoes progressing well. *Terai.*—Jute, *bhadoi*, and sugarcane doing well; *haimanti dhan* not yet transplanted. Coarse rice sells as follows—

Hills—9 to 11 seers per rupee.
Terai—13 to 16 „ „ „

Bhutta sells from 16 to 24 seers per rupee.

Rangpur.—Rainfall at Sadar 1·04, Gaibanda 1·16, Nilphamari 3·81, Kurigram 1·66. *Aus* is being harvested. Transplantation of winter rice going on. More rain wanted. Prospects fair. Common rice selling at 10½ to 13 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall ·73. Ploughing of land for *aman* continues. Sowing of *aman* going on. Fodder and water sufficient. Common rice from 9 to 12¾ seers a rupee.

Pabna.—Rainfall at Sadar ·57, Sirajganj ·83. Weather partially cloudy and rainy. Prospects of standing crops good. More rain wanted. No change in the price of common rice.

Dacca.—Rainfall at Sadar ·35, Manikganj 1·26, Munshiganj ·53, Narainganj ·75. Weather seasonable. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice 10 to 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 2·71, Kishorganj 2·29, Jamalpur 1·47, Netrokona 2·49, Tangail 2·05. Daily showers. Crops all doing well. Fodder and water-supply sufficient. Condition of cattle good. Common rice selling as follows:—

Sadar	...	...	...	10½ seers per rupee.
Kishorganj	...	...	...	9 „ „
Netrokona	...	...	...	

Faridpur.—Rainfall at Sadar 3·73, Goalundo 2·70, Madaripur 1·98. Weather rainy and damp. Prospects of crops favourable. Common rice sells at 11½ seers per rupee.

Backergunge.—Rainfall at Sadar 2·10. Weather showery. Prospects of crops fair. Common rice sells from 8 to 13 seers per rupee.

Tippera.—Rainfall at Sadar 1·99, Chandpur 2·07, Brahmanbaria 1·36. Weather seasonable. Agricultural operations in progress. State of standing crops good. Fodder and water sufficient. Common rice sells at 8¾ to 11 seers per rupee.

Noakhali.—Rainfall at Sadar 3·22, Feni 6·07. Prospects of crops good. *Aus* partly damaged by excessive rain. Cattle-disease continues at Ramganj. Fodder and water sufficient. Price of rice 9 to 11 seers per rupee.

Chittagong.—Rainfall 1·77. Weather seasonable. *Aus* being still sown and transplanted. Prospects fair. Rice selling at 10 seers per rupee.

Patna.—Rainfall at Sadar 2·80, Barh ·57, Bihar 1·01, Dinapur 1·97, Hilsa 2·45, Bikram 1·31. More rain wanted for transplantation of paddy. Transplantation of *marua* and sowing of Indian-corn continue. *Bhadoi* crops which have already germinated are doing well. Prices almost stationary. Common rice selling at 14½ seers per rupee in Patna. Fodder and water for cattle sufficient.

Gaya.—Rainfall at Sadar 1·64. Sowing of paddy and transplanting of *marua* continue. Common rice selling at 14 seers per rupee.

Shahabad.—Rainfall at Sadar 2·91, Buxar 1·62, Sasaram 5·87, Bhabua 5·81. *Bhadoi* sowing continuing. No cattle-disease. Fodder and water sufficient. Prices steady.

Saran.—Rainfall at Sadar 3·72, Siwan 2·44, Gopalganj ·80. Weather showery. Rain insufficient in north. Indigo and sugarcane very good. *Makai* sowings nearly finished. More rain wanted for paddy sowings. Fodder and water sufficient. Average price of common rice 12·4 seers and of *makai* 21·10 seers, against 7·13 seers and 10 seers per rupee respectively last year.

Champaran.—Rainfall at Motihari 1·09, Bettiah ·66, Barharwa ·66, Bagaha 3·06, Ramnagar 3·87. Weather hot and cloudy. Weeding of *bhadoi* and transplantation of winter rice going on everywhere. Rain has done good to standing crops. Fodder and water ample. Price of common rice at Sadar 11½ seers, against average 13 7/8 seers per rupee.

Muzaffarpur.—Rainfall at Sadar 1·80, Hajipur 1·24, Sitamarhi 2·22. *Bhadoi* crops doing well. Transplanting of *marua* and paddy taken in hand. Prospects good so far, but more rain wanted for transplantation of the rice crop. Prices are—common rice 11 to 13 seers, wheat 14 and 15 seers, barley 22½ and 23 seers, *makai* 20 seers, gram 18 to 20 seers, and *rahar* 22 to 23 seers per rupee.

Darbhanga.—Rainfall at Sadar 1·48, Samastipur 3·47, Madhubani 1·45. Weather cloudy and hot. Prospects of standing crops good. Sowing of *bhadoi* and winter rice crops going on. Fodder and water sufficient. Common rice sells at Sadar 11 seers per rupee.

Monghyr.—Rainfall at Sadar 2·18, Begusarai 1·05, Jamui 1·09. Weather hot and cloudy with occasional showers. Sowing of *bhadoi* paddy going on. State of standing crops good. More rain wanted everywhere. No cattle-disease. Common rice sells as follows:—

Monghyr	...	...	...	12 to 14 seers	per rupee.
Begusarai	...	...	...	11 to 13 „	„
Jamui	...	...	...	14 „	„

Bhagalpur.—Rainfall at Sadar 3·29, Banka ·99, Supaul 1·43, Madhipura 2·84 Weather seasonable. Transplantation of *bhadoi*, *marua* and winter rice going on. Cattle disease continues at Pratabganj in the Supaul subdivision. Fodder and water sufficient Price of common rice stationary.

Purnea.—Rainfall at Sadar 1·23, Kishanganj 1·69, Araria 2·38. Weather hot and cloudy. Transplantation of *aghani* rice going on. *Bhadoi* paddy and jute doing well Rain much wanted now. Cattle-disease reported from a few villages in thana Matiari and outpost Sikti. Fodder and water sufficient. Common rice selling as follows:—

Sadar	...	...	...	15	seers per rupee.
Kishanganj	...	...	...	14	„
Araria	...	...	...	15	„

Malda.—Rainfall at Sadar 1·27, Chanchal 1·11, Shibganj ·54, Gajole 1·05. Weather variable with occasional showers. *Bhadoi* paddy and jute thriving well. Transplanting of winter rice has commenced. Price of common rice 12 seers per rupee. No want of fodder.

Sonthal Parganas.—Average rainfall 2·45. Maize and paddy seedlings promising well. Transplantation of paddy begun. Fodder sufficient. Price of rice 12½ to 15 seers, and of maize 18 to 22 seers per rupee.

Cuttack.—Rainfall at Sadar ·84, Jajpur 1·95, Kendrapara 2·98, Banki 2·01. Weather showery and cloudy, but more rain wanted soon. *Sarad*, *beali*, jute, and sugarcane growing. Cotton being plucked. Condition of cattle generally good, but disease still continues in places. Fodder sufficient. Common rice sells as follows:—

			per rupee.
	S.	ch.	
Cuttack	13	2	
Jajpur	15	12	
Kendrapara	17	1	
Banki	15	12	

Balasore.—Rainfall at Sadar ·82. Sugarcane and jute crops and paddy seedlings growing well. Price of rice varies from 13 to 18 seers per rupee in the interior. Rice sells at 14 to 16 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rainfall at Angul 1·9, Khondmals 1·77. More rain wanted in Angul. In Khondmals the rainfall has been favourable to the crops, and transplanting is going on there. Coarse rice sells at 20 seers per rupee in Angul and 12 seers per rupee in Khondmals.

Puri.—Rainfall at Puri 2·08, Khurda 2·00. Young *sarad* plants are growing well. Weeding of *beali* goes on. *Mandia* being transplanted. Sugarcane promises well. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

			per rupee.
	Srs.	ch.	
Puri	11	13	
Khurda	13	12	
Interior of district	14-7 to 15-12		

Hazaribagh.—Weather seasonable. Rainfall at Sadar 1·07, Giridi 4·55. Ploughing and sowing still going on. Standing crops good. Rice selling at 10 to 12 seers per rupee.

Lohardaga.—Rainfall at Sadar 1·12. Sowing continues. State of standing crops good. Rice sells at Ranchi 11 seers per rupee, and in the interior from 11 to 16 seers per rupee. Cattle-disease dying out. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—Rainfall at Sadar 5·00. Weather seasonable. Heavy rain everywhere *Bhadoi* sowings in full swing. Standing crops good. Rice sells from 11 to 14 seers per rupee.

Manbhum.—Rainfall at Sadar 4·19, Gobindpur 4·18. Weather seasonable. Prospects of crops good. Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar 12 seers and at Gobindpur 11 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall at Chaibassa 4·55. Rice plentiful, 12 to 14 seers per rupee. Information from other stations not received.

General Summary.—There was rain in all parts of the Province during the week, and the general agricultural prospects are favourable. Cultivation of winter rice is progressing, but more rain is required in some districts for purposes of transplantation. Early rice and jute are doing well, and the reports of the *bhadoi* crops in Bihar are good. Damage to early rice is reported to have been done by floods in Midnapore and by excessive rain in Noakhali. In Murshidabad the paddy plants in some of the fields in police-station Jalangi have been destroyed by insects. Sugarcane and indigo crops are promising. No important change in the price of rice is reported. There is plenty of fodder everywhere. Cattle-disease is still reported from some districts.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 12th July 1898.

M. FINUCANE,
Secretary to the Govt. of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of June 1898.

	Inches.	Date.	Hour.
The mean pressure of the month	29·533		
The average pressure of June from 24 years' registers ...	29·549		
The highest pressure in the month	29·723	1st	10
The lowest pressure in the month	29·263	16th	16
The range of pressure	0·460		
	Hours.		
The total number of hours of bright sunshine during the month	126·6		
The maximum possible number of hours of sunshine ...	403·4		
	⊖		
The mean temperature of the month	84·6		
The average temperature of June from 24 years' registers ...	85·0		
The highest temperature in the month	97·3	22nd	
The lowest temperature in the month	71·7	1st	
The range of temperature during the month	25·6		
The mean daily range of temperature	12·6		
The greatest range of temperature in one day	22·8	1st	
	Per cent.		
The mean humidity of the month	83		
The average humidity of June from 24 years' registers ...	81		
	Inches.		
The mean vapour tension of the month	0·981		
The average vapour tension of June from 9 years' registers ...	0·998		
The mean cloud proportion of the month	6·95		
The average cloud proportion of June from 21 years' registers ...	6·99		
	Ins.		
The total rainfall of the month	9·15		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	8·81		
The average fall of June from 48 years' registers	12·08		
The greatest fall in 24 hours	3·31	30th	
	Days.		
The number of rainy days in the month	16		
The average number of rainy days in June from 24 years' registers	19		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	145·0		
The mean difference of sun and air temperatures	54·2		
The greatest sun temperature	159·5	12th	
The greatest excess of sun over air temperature	66·1	12th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	76·3		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	2·3		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	3·9	4th and 5th	
	Miles.		
The mean movement of the wind per day	134·3		
The greatest movement of the wind in one day	344·0	18th	
The greatest movement of the wind in one hour	21·0	18th, 1 to 2 p.m.	

The number of hours with winds from each of the 8 points—
N. 10, N.E. 39, E. 129, S.E. 190, S. 159, S.W. 150, W. 28, N.W. 7, Calm 8.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·5° higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,

METEOROLOGICAL OFFICE, GOVT. OF INDIA, *For Meteorological Reporter to the Govt. of India.*
Calcutta, the 11th July 1898.

Results of the Meteorological Observations taken at the Alipore Observatory from 3rd to 9th July 1898.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·30
The total fall from 1st January to 9th July 1898	20·77
The average fall of the corresponding period for 24 years, Surveyor-General's Office	24·93

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers.

RESOLUTION ON THE REPORT ON THE LEGAL AFFAIRS OF THE GOVERNMENT OF BENGAL FOR THE YEAR 1897-98.

No. 3211J.

RESOLUTION.

JUDICIAL.

Dated Calcutta, the 9th July 1898.

READ—

The report on the Legal Affairs of the Government of Bengal for the year 1897-98.

Read also—

The reports of the two previous years, and the orders of Government recorded thereon.

Mr. Wilkins was in charge of the office of Legal Remembrancer from the beginning of the year to the 26th April. Mr. Pratt officiated as Legal Remembrancer from the 27th April to 18th November 1897 and from the 17th February 1898 to the end of the year. During the interval, from 19th November 1897 to 16th February 1898, Mr. B. L. Gupta officiated. The report is submitted by Mr. Brett, the present Officiating Legal Remembrancer. No case of great importance to the Government was decided during the year.

2. Of the three cases shown last year as pending before the Privy Council, one is still undisposed of. Two analogous cases relating to proceedings under the Land Acquisition Act of 1870 have been decided in favour of the Secretary of State. The land in question had been road-way for very many years, but it was argued for the claimant that, as it had been broken up on acquisition before the actual award of compensation for other plots of the estate was made, it had acquired value, and compensation for it should,

therefore, have been granted. The Privy Council, however, confirming the decision of the High Court, held that the right of compensation attached at the time of acquisition, that any change in the condition of the land between such time and the actual award of compensation could not be taken into account, and that no compensation was, therefore, payable.

3. The table below compares the results of Government litigation in all the Civil Courts of Bengal during 1897-98, with those of the two preceding years :—

	Original suits.			Appeals— Before Lower Courts.			Appeals— Before High Court.			Total.			Remarks.
	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Decided in favour of Government.	106	118	143	20	35	51	21	14	33	147	167	227	
Decided against Government.	36	54	36*	15	7	10†	20	6	3	71	67	49	* There were four sets of analogous cases, one set consisting of three and three sets of two each.
Compromised, remanded or withdrawn.	47	24	29	3	2	1	5	3	4	55	29	34	† In the 10 appeals decided against Government; there were two sets of analogous appeals, one of five and the other of two cases.
Percentage in favour of Government.	74·6	72·8	82·1	57·1	83·3	91·1	84	73·6	91·6	72·7	74·5	82·3	

Excluding cases under the Land Acquisition Act, the figures are as follows :—

	Original suits.			Appeals— Before Lower Courts.			Appeals— Before High Court.			Total.			Remarks.
	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	1895-96.	1896-97.	1897-98.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Decided in favour of Government.	88	103	121	20	35	51	21	14	21	129	134	193	
Decided against Government.	34	37	26	15	7	(a)10	19	5	3	68	49	39	(a) In the 10 appeals decided against Government, there were two sets of analogous appeals, one of five and the other of two cases.
Compromised, remanded or withdrawn.	45	19	27	3	2	1	5	2	3	53	23	31	
Percentage in favour of Government.	72·1	79·2	82·3	57·1	83·3	91·1	87·5	73·6	91·3	71·2	77·4	83·5	

There was an increase compared with last year under all heads.

4. In the High Court 33 cases were decided in favour of, and 3 against, the Government, and 4 were compromised, remanded or withdrawn. The percentage of successful cases, 91·6, is higher than in either of the two preceding years, and is certainly satisfactory. In the Lower Appellate Courts the percentage of successful cases was 83·6. The Legal Remembrancer, it is noted, in showing the percentage of successful cases, counts two or more analogous cases decided against the Government as one case. The same method of calculation should apparently be adopted for cases decided in favour of the Government, in order that the correct percentage of success may be obtained. In the Courts of first instance 31 cases are shown as having been decided against Government. Details are given of only 27 of these; of 4 no mention is made. In the case of Jodhan Patidar *versus* the Secretary of State, the Collector will be asked to explain how the sum in question came to be wrongfully demanded, and why the mistake, when discovered, was not corrected before recourse was had by the plaintiff to the Civil Court. It would seem also that in the two suits of Jagannath Prasad and Mookhram and another *versus* the Secretary of State, the plaintiffs need not have been forced to resort

to the Civil Court. The attention of the Revenue Department will be drawn to the case of Saduddin *versus* the Secretary of State. The Legal Remembrancer is requested to obtain and submit a copy of the decision of the Munsif of Barrabazar in the suit brought by Government against Sarat Chandra Sarkar and another. The percentage of successful cases in the Courts of first instance was 82·1. This exceeded the percentage of either of the two preceding years.

5. The following statement shows the result of Court of Wards' litigation during the last three years:—

	1895-96.	1896-97.	1897-98.
1	2	3	4
Decided in favour of the Court of Wards ...	1,839	2,206	3,041
Decided against the Court of Wards ...	149	162	183
Compromised, remanded or withdrawn ...	188	159	249
Percentage decided in favour of the Court of Wards.	92·5	93·1	94·3

If no allowance is made for analogous cases, the percentage of successful cases in the High Court was only 48. This is a very small percentage, but the number of cases was small.

In the Lower Appellate Courts the percentage, 76·5, is more satisfactory.

In the Courts of first instance 95·7 per cent. of the cases out of a total of 3,246 cases were successful. This result is approximately the same as in the previous year. Most of the cases were, as usual, of a petty nature.

6. The following table shows the amount due under decrees which was realised by Government during the year, as compared with the two previous years:—

	1895-96.	1896-97.	1897-98.
1	2	3	4
	Rs.	Rs.	Rs.
Brought forward from last year	28,692	41,435	43,057
Decreed during the year	38,496	22,196	33,311
Total amount due	67,188	63,631	76,368
Amount realized	25,753	20,574	21,084
Percentage of amount recovered to total amount due	38·3	32·3	27·6

The percentage of realisation was lower than in either of the two previous years. The outstanding balance is divided among many districts, the principal reasons given for failure to realise being that appeals are pending against the decrees or that the judgment-debtors are paying by instalments or have died without leaving property. Greater exertion to realise from the judgment-debtors who have property is evidently needed in some districts and should be made. In the revised rules for the conduct of civil suits now under the consideration of Government, it is prescribed that enquiry shall always be made as to whether there are grounds for proceeding against the defendant or plaintiff, as the case may be, under sections 477, 483 or 380 of the Civil Procedure Code. The large amounts outstanding suggest that sufficient use has not hitherto been made of these sections.

7. The realisations under decrees granted to the Court of Wards during the last three years are shown below:—

	1895-96.	1896-97.	1897-98.
	Rs.	Rs.	Rs.
Brought forward from last year ...	7,31,944	7,05,029	5,89,238
Decreed during the year	2,27,507	1,23,285	3,06,483
Total amount due ...	9,59,451	8,28,314	8,95,721
Amount realized	2,54,422	2,39,076	2,70,616
Percentage of amount recovered to amount due	26·5	28·8	30·2

The percentage of recoveries was a trifle better than in the previous years, but cannot be regarded as satisfactory. The Lieutenant-Governor regrets again to observe that seven districts have failed to submit their reports despite successive reminders. This will be brought to the notice of the Board of Revenue.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Superintendent and Remembrancer of Legal Affairs and to the Solicitor to Government for information.

Ordered also that a copy of this Resolution be forwarded to the Revenue Department of this Government and to the Board of Revenue for information.

Ordered also that a copy of the Report and of the Resolution be submitted to the Government of India in the Home Department for information.

Ordered also that a copy of the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

Chief Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 18th July 1898.

Burdwan.—Rainfall at Sadar ·33, Kalna 2·00, Katwa 2·52, Raniganj 1·24. Weather rainy. Cultivation of paddy continues. Fodder and water sufficient. A few cases of cattle-disease reported. Common rice selling as follows:—

	Srs.	
Sadar	11 to 16	per rupee.
Kalna	11 to 12½	
Katwa	12⅝	
Raniganj	13	

Birbhum.—Rainfall at Sadar 2·44, Rampur Hât ·84. Weather rainy. Transplantation of paddy continues. Paddy seedlings and sugarcane doing well. Price of rice at Sadar 12 seers and at Rampur Hât 13 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Bankura 1·70, Vishnupur 1·79. Weather cloudy with occasional light showers. Transplantation of paddy going on. Fodder and water sufficient. No cattle-disease. Price of common rice at Bankura 14 seers and at Vishnupur 12½ seers per rupee.

Midnapore.—Rainfall at Sadar ·51, Contai 1·76, Tamluk 1·24, Ghatal ·06. Prospects of indigo and sugarcane good. In flooded parts fresh seedlings are being prepared. Prices of common rice:—

	Srs.	
Sadar	12	per rupee.
Contai	13 to 14	
Tamluk	11¾	
Ghatal	12 to 13	

Hooghly.—Rainfall at Sadar ·72, Serampore 1·50, Jahanabad 1·68. Jute, *aus*, and sugarcane plants are doing well, but for the transplantation of *aman* more rain is wanted. Common rice sells from 10 to 12 seers per rupee.

Howrah.—Rainfall at Sadar 1·02, Ulubaria 2·05. Weather cloudy with occasional showers. Sowing of *aman* continues in places. Transplantation of *aman* going on. Jute and sugarcane doing well. Fodder and water sufficient. Common rice sells at 11 to 12 seers per rupee.

24-Parganas.—Rainfall at Sadar 3·64, Barasat 2·63, Basirhat 4·10, Diamond Harbour 2·54. Weather rainy and cloudy. Jute and *aus* doing well. Weeding of jute and *aus* and transplanting of *aman* going on. Fodder and water sufficient. Cattle-disease diminishing.

Common rice sells as follows:—

	Srs.	
Sadar	10 to 12	per rupee.
Barasat	12	
Basirhat	14⅜	
Diamond Harbour	11	

Nadia.—Rainfall at Sadar 2·15, Meherpur 1·67, Chuadanga 1·22, Ranaghat ·87, Kushtia 2·08. Weeding of *aus* and transplanting of *aman* continue. Prospects of standing crops fair. Common rice selling at 10 to 12½ seers per rupee. Fodder and water sufficient. No cattle-disease.

Murshidabad.—Rainfall at Sadar ·51, Kandi ·67, Jangipur ·47. Weather seasonable. Transplantation of *aman* going on. State of indigo and mulberry hopeful. *Bhadoi* and jute plants are doing well. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	
Sadar	12	per rupee.
Kandi	13¾	
Jangipur	14	

Jessore.—Rainfall at Jessore 4·22, Jhenida 4·75, Magura ·76, Narail 2·91, Bangaon ·81. Weather cloudy, rainy and damp. State and prospects of standing crops good. Weeding of *aus* and *aman* still going on. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Jessore	11 to 13	per rupee.
Jhenida	11	
Magura	11½ to 12	
Bangaon	11½	
Narail	11-6¾ ch.	

Khulna.—Rainfall at Sadar 3·54, Bagerhat 2·99, Satkhira 3 85. Weather seasonable. Cultivation of *aman* paddy going on. Fodder and water available. Common rice sells as follows:—

	Srs.	
Sadar	10½ to 13	per rupee.
Bagerhat	12½	
Satkhira	13	

Rajshahi.—Rainfall at Sadar 1·69, Nator 4·43, Naugaon 1·30. Prospects of crops good. No cattle-disease. Fodder and water plentiful. Price of rice ranges from 10 to 12¾ seers per rupee.

Dinajpur.—Average rainfall 6·58. Weather seasonable. Cutting of jute commenced. Transplanting of *aman* progressing vigorously. No cattle-disease. Fodder and water ample. Rice sells at 14 seers per rupee.

Darjeeling.—Rainfall at Darjeeling 13·64, Kurseong 12·56, Siliguri 8·36. Weather seasonable. *Hills—Bhutta*, potatoes and *marua* progressing well. *Terai*—Jute, *bhadoi*, and sugarcane doing well. Coarse rice sells as follows:—

Hills—9 to 11 seers per rupee.
Terai—13 to 15 „ „ „

Bhutta sells from 16 to 24 seers per rupee.

Rangpur.—Rainfall at Sadar 10·48, Nilphamari 10·42, Gaibanda 12·47, Kurigram 2·41. *Aus* is being harvested. Transplantation of winter rice is in progress. Cutting of jute commenced in places. Prospects fair. Common rice selling at 10½ to 13 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 3·66. Ploughing of land for *aman* continues. Sowing of *aman* going on. Cutting of *aus* commenced. Fodder and water sufficient. Common rice selling from 10½ to 13½ seers per rupee.

Pabna.—Rainfall at Sadar 4·18, Sirajganj 1·64. Weather cloudy and rainy. Crop prospects excellent. Common rice 10 to 11½ seers per rupee.

Dacca.—Rainfall at Sadar 5·44, Manikganj 1·57, Munshiganj 2·95, Narainganj 5·57. Weather cloudy and rainy. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice 10 to 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 6·44, Kishorganj 1·36, Jamalpur 2·00, Netrokona 2·10. Weather cloudy and showery. Crops all doing very well. Fodder and water-supply ample. Condition of cattle good. Common rice selling at 10 to 11 seers per rupee at Sadar and 9 to 12 seers in subdivisions.

Faridpur.—Rainfall at Sadar 2·00, Goalundo ·80, Madaripur 2·25. Weather damp and rainy. Prospects of crops good. *Aus* paddy being harvested in places. Fodder and water sufficient. Common rice sells at 11 to 12½ seers per rupee.

Backergunge.—Rainfall at Sadar 4·78. Weather rainy. Prospects of crops fair. Common rice sells from 9 to 13 seers per rupee.

Tippera.—Rainfall at Sadar 5·10, Chandpur 5·74, Brahmanbaria report not received. Weather seasonable. Paddy and jute crops doing well. No cattle-disease. Fodder plentiful. Rice sells at 9 to 11 seers per rupee.

Noakhali.—Rainfall at Sadar 15·44, Feni 5·24. Prospects of crops good. Cattle-disease disappeared. Fodder and water sufficient. Price of common rice 9 to 10 seers per rupee.

Chittagong.—Rainfall 9·97. Weather seasonable. Sowing and transplanting of *aus* finished. Cultivation for *aman* commenced. Prospects fair. Rice selling at 10 seers per rupee.

Patna.—Rainfall at Sadar 4·96, Barh 8·39, Bihar 4·51, Dinapur 9·85, Hilsa 2·82, Bikram 9·33. Copious rainfall facilitated transplantation of paddy, which has begun. *Bhadoi* crops doing well. Prices stationary. No cattle-disease. Fodder and water for cattle sufficient.

Gaya.—Rainfall at Sadar 4·52. Sowing of paddy and *bhadoi* and transplanting of *marua* continue. Common rice selling at 13½ seers per rupee.

Shahabad.—Rainfall at Sadar 8·14, Sasaram 6·01, Buxar 4·96, Bhabua 1·05. Transplantation of *marua* and paddy continuing. *Bhadoi* doing well. Cattle-disease in Dinara and Nasriganj in the Sasaram subdivision. Prices steady.

Saran.—Rainfall at Sadar 5·71, Siwan 2·44, Gopalganj 4·75. Weather showery. Indigo and sugarcane very good. Weeding of *makai* going on. Fodder and water sufficient. Average price of common rice 12·9 seers and of *makai* 21·12 seers per rupee, against 8·5 seers and 9·11 seers respectively last year.

Champaran.—Good rain all over the district. Motihari 3·41, Bettiah 18·74, Barharwa 11·46, Bagaha 6·67, Ramnagar 7·72. Weather cloudy and rainy. Weeding of *makai* nearly finished. Transplantation of paddy and *marua* going on briskly. *Bhadoi* crops doing well. Fodder and water ample. Indigo manufacture going on everywhere. Price of common rice at Sadar 11½ seers per rupee.

Muzaffarpur.—Rainfall at Sadar 7·07, Hajipur 4·99, Sitamarhi 4·97. The rain has been very beneficial to the *bhadoi* crops, and has greatly facilitated the transplanting of the rice crop, which is being vigorously pushed on everywhere. Prospects are very hopeful. Prices are—common rice 11 to 13 seers, wheat 14 and 15 seers, barley 22 and 22½ seers, *mákai* 20 seers, gram 17½ and 18 seers, and *rahar* 21½ and 22 seers per rupee.

Darbhanga.—Rainfall at Sadar 1·88, Samastipur 1·77, Madhubani ·92. Weather cloudy with frequent showers. Prospects of standing crops good. Transplantation of *marua* and paddy in progress. Fodder and water sufficient. Common rice sells at 11 seers per rupee at Sadar.

Monghyr.—Rainfall at Sadar 2·66, Begusarai ·98, Jamui 3·08. Weather seasonable. Transplantation of winter paddy commenced. Prospects of standing crops fair. More rain wanted in Begusarai subdivision. No cattle-disease. Common rice sells as follows:—

Monghyr	...	...	...	12 to 14 seers	per rupee.
Begusarai	...	...	...	11 to 13½ „	„
Jamui	...	...	...	14 „	„

Bhagalpur.—Rainfall at Sadar 2·54, Banka 1·85, Madhipura 4·08, Supaul 5·28. Weather seasonable. Transplantation of paddy in progress. Cattle-disease continues at Pratabganj in the Supaul subdivision. Fodder and water sufficient. Price of common rice steady.

Purnea.—Rainfall at Sadar 3·73, Kishanganj 13·98, Araria 7·20. Weather hot and cloudy. Recent rain benefited standing crops. Transplantation of *aghani* rice going on. More rain wanted. Cattle-disease reported from Matiari, Sikti and Raniganj in Araria subdivision. Thirty-two cases of *Kaladukh* reported from 13 villages in outpost Bhatgaon in Kishanganj subdivision. Fodder and water sufficient. Rice sells as follows:—

Sadar	...	...	...	15	seers per rupee.
Araria	...	...	...	15	„
Kishanganj	...	...	...	14	„

Malda.—Rainfall at Sadar 1·97, Chanchal 4·14, Shibganj 2·90, Gajole 2·92. *Bhadoi* paddy coming in ear in some places. Transplanting of winter rice going on. Jute doing well. Price of coarse rice stationary at 12 seers per rupee. Fodder sufficient.

Sonthal Parganas.—Weather rainy and cloudy. Average rainfall 2·5 Transplantation of paddy in progress. Prospects favourable. Fodder sufficient. Price of rice 13 to 15 seers, and of maize 18 to 22 seers per rupee.

Cuttack.—Rainfall at Sadar ·54, Jajpur 1·31, Kendrapara ·66, Banki 1·96. Weather showery and cloudy. *Sarad*, *bsali*, and sugarcane growing. Cotton being plucked. Condition of cattle generally good, but disease still continues in places. Fodder sufficient. Common rice sells as follows:—

					S.	ch.	
Cuttack	...	...	...	...	12	8	per rupee.
Jajpur	...	...	....	...	15	12	
Kendrapara	...	...	...	...	17	1	
Banki	...	...	...	...	15	12	

Balasore.—Rainfall at Sadar ·65. Paddy seedlings, sugarcane, jute and other standing crops growing well. Puddling commenced. Price of rice varies from 13½ to 18 seers per rupee in the interior. Rice sells at 13½ and 16 seers per rupee at Balasore and Bhadrak respectively.

Angul.—Rainfall at Angul 1·91, Khondmals 2·87. More rain wanted in Angul. Preparation of land and transplantation of paddy in progress. Cultivation of *bhadoi* crops continues. Rice sells at 20 seers per rupee at Angul and 12 seers per rupee at Khondmals.

Puri.—Rainfall at Puri ·88, Khurda 3·02. Young *sarad* plants growing well. Weeding of *beali* goes on. *Mandia* being transplanted. Sugarcane promises well. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Puri	11	13	per rupee.
Khurda	13	12	
Interior of district	14-7 to 15-12		

Hazaribagh.—Rainfall at Sadar 5·31, Giridi 1·11. Weather cloudy and showery. Ploughing and sowing in progress. Rice selling at 10 to 12 seers per rupee.

Lohardaga.—Rainfall at Sadar 8·47. Sowing continues. Lands are being prepared for transplantation. State of standing crops good. Rice sells at Ranchi 12 seers per rupee, and in the interior from 12 to 16 seers per rupee. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—Rainfall at Sadar 1·85. Weather seasonable. *Bhadoi* and paddy sowings continue. Condition of standing crops good. Rice sells from 11 to 14 seers per rupee.

Manbhum.—Rainfall at Sadar 6·43, Gobindpur 3·81. Weather seasonable. Prospects of crops good. Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar 12 seers and at Gobindpur 11 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 1·05. Rice plentiful—12 to 14 seers per rupee. Prospects good.

General Summary.—There was good and sufficient rain during the week except in parts of Orissa and South-West Bengal, where more rain is required. The rain has facilitated the transplanting of the winter rice and *marua* seedlings, which is being vigorously pushed on. The prospects of early rice, jute and other autumn crops are favourable. Indigo and sugarcane crops are also promising. The cutting of early rice and jute has commenced in places in Northern and Eastern Bengal. Prices are practically stationary. Fodder-supply is generally sufficient. Cattle-disease has disappeared from Noakhali and Lohardaga. It is still reported from Burdwan, the 24-Parganas, Shahabad, Bhagalpur, Purnea, and Cuttack.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 19th July 1898.

M. FINUCANE,
Secretary to the Govt. of Bengal.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JUNE 1898.

At the beginning of the month of June pressure was everywhere in excess of the normal, the difference being most marked in the north of the province. The distribution over the Bay was extremely uniform, and wind direction was generally normal except off Diamond Island, where north-west winds prevailed. Weather which had been slightly unsettled at the end of the previous month became finer, and rainfall was light and scattered. A sharp fall of pressure began about the 4th of the month, decreasing from north to south, and the readings began to approach the normal. Pressure gradients became gradually steeper near the south of the Bay, and general conditions were such as usually precede the slow advance of the monsoon current. Though the sea, however, was rough at Colombo, and the pressure differences between the south and the head of the Bay were increasing, the actual advance of the moisture-laden masses of air forming the monsoon current was slow, and fine weather continued to prevail over the province.

The general direction of the isobars had remained practically unchanged during the early period of the month, a shallow diffused area of low pressure having maintained its position over Orissa, Chota Nagpur and Bihar. Into this shallow depression was drawn from all sides the winds which drew their over increasing moisture from the advancing monsoon. The first signs of the approaching rainy season appeared in a few heavy showers which were precipitated from the moisture-laden air in the north of the province on the 10th and 11th of June, and whose early occurrence was partially due to the formation of a small local depression in Bihar.

The disturbances, however, which heralded the actual burst of the monsoon began to form off the Orissa Coast on the 13th of the month. From the 13th to the 14th, this depression developed into a well-marked cyclonic storm of moderate intensity, the centre being at a point at some distance to the south-east of Gopalpur.

During the 14th the storm which had not increased in depth passed slowly to the north crossing the coast in the immediate neighbourhood of False Point. The winds to the front of the advancing storm were as usual of moderate force, but in the southern quadrant strong westerly gales were experienced. During the 15th the depression which remained unchanged in form and intensity still continued to move slowly in a northerly direction, but assuming a curved path probably owing to the influence of the hills in the interior of Orissa emerged again on the evening of that day. As the direction in which it had now been deflected was more easterly, the centre on the morning of the 16th was almost directly over Saugor Island.

During the next three days the storm continued to move in a direction almost due north with extreme slowness and little change in depth; so tenacious in fact was the storm which in this as in other respects (though not in intensity) resembled closely the corresponding storm of 1893, that it did not finally break up until it struck the lower ranges of the Himalayas on the 19th of the month. Heavy rainfall accompanied the storm, especially on the western and eastern fringes, but Calcutta, which lay almost on the central line of the path, received but little rain. Bihar too was only slightly affected, and though heavy rain fell in North Bengal, Darjeeling reported a comparatively small rainfall. The heaviest falls took place in the district round Bankura, and one of the unfortunate results of the storm was the heavy flooding of the Midnapore district, and the consequent loss of life and property which the inhabitants suffered.

With the final disappearance of the storm, weather became gradually more settled, but heavy rain continued to fall for the next few days in North Bengal, Assam and Burma. Pressure did not recover, however, till the 23rd June, when there was a general rise, especially in the north of the province. The defect had, however, been so considerable that even now readings were everywhere below the normal. From this date, however, with slight local variations a gradual rise took place until on the 25th, barometer readings differed but slightly from the normal except in Burma. Owing to the deficiency of pressure in Burma, a change had taken place in the relative distribution; and the isobars which up to this time had been running steadily from south-west to north-east now followed a direction from west to east across the Bay. With the rising barometer and the falling off in the monsoon current weather became comparatively fine, though heavy rainfall continued in Burma and Assam. Pressure changed but little during the latter days of the month, though small oscillations were frequent. A gradual change in relative distribution had, however, been taking place, and on the 20th of June with high readings in the south of the Bay, and a comparatively low barometer in the north, conditions had again become favourable for the advance of the monsoon current, and though rainfall was still scattered, some heavy falls were reported, and signs were not wanting that bad weather would soon again become general.

Pressure.—Though pressure was high at the beginning of the month, it soon fell to the normal, about which position it oscillated till the storm of the 13th, where a sharp fall took place. After this it remained low, and it was only towards the latter part of the month that a recovery took place. Mean pressure of the month was consequently below the normal everywhere.

Temperature was in defect at the beginning of the month, but soon began to rise except in South-West Bengal, so that for the period from the 1st to the 10th, readings were generally in excess except in the last-mentioned district. From this date onwards a general fall took place, till on the 18th mean temperatures were everywhere below the normal, and continued to be so till the final disappearance of the storm. With the passing away of the disturbed weather, temperature again began to rise; and as this increase continued steadily and for the most part generally till the 28th, heat soon became excessive, as much as 11° above the normal being recorded at Gaya. On the 29th the rise in temperature received a check, and on the 30th readings, though slightly irregular, did not differ much from the normal. The result of these variations has been that for the month average temperature has been slightly in defect in the central and south-west parts of the province, as likewise in the greater part of North Bihar, while elsewhere the average has been above the normal. Where there has been defect in normal mean temperature it has been almost invariably due to a corresponding defect in both day and night temperature, and a similar remark applies to cases of excess, so that the regions of high and low normal mean temperatures coincide almost exactly with those of high and low maximum and minimum, respectively.

Rainfall.—Taking the six divisions of the province we find that rainfall has been considerably above the average in four of them, *i.e.*, South-West Bengal, North Bengal, East Bengal, and Chota Nagpur, while in Bihar and Orissa it has fallen short by twenty and twenty-five per cent., respectively. The abundant rain which has been received has brought up the average rainfall for the six months from the 1st of January to practically to normal amount for South-West and North Bengal and Chota Nagpur, but the other divisions are still deficient for this period, more especially Orissa, where the percentage is only 65.

The abundant rainfall in Bengal and Chota Nagpur was distributed fairly evenly over the whole country, with the exception that in South-West Bengal, the districts in the immediate vicinity of Calcutta and also Jessore and Khulna received less than usual, while in North Bengal, Darjeeling fell considerably below the average. The actual returns for the month are South-West Bengal 124 per cent., North Bengal 114 per cent., East Bengal 122 per cent., and Chota Nagpur 150 per cent.

Summary.—The greatest interest in the weather report for June naturally attaches to the circumstances attending the advance and development of the monsoon current in the Bay. For several years the setting in of the monsoon has been distinguished by somewhat unusual features. In the present year, however, the antecedent and accompanying weather conditions have been entirely normal. During the first-half of the month, the weather was distinguished by the high temperature characteristic of the last struggle of the hot weather for existence. South to south-east winds gradually obtained complete dominion over the province, while the ever increasing moisture, with which they had been reinforced from the south, brought about an almost complete saturation of the atmosphere. Cloud proportion steadily increased in amount, and finally the formation of a small cyclonic storm at the head of the Bay led to the precipitation of the moisture and the bursting of the monsoon over the province.

These were the leading features of the first-half of the month: during the latter half heavy rain fell up to the 21st or 22nd, while during the last nine days of the month there was a temporary lull, not amounting to an actual break, which, however, showed signs in the last days of the month of coming to an end and giving place to a further period of ordinary monsoon weather.

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	Actual rainfall of first six months of 1898 expressed as a percentage of the normal fall for the period.
South-West Bengal ...	120	16	2	64	88	124	95

	Inches.
The total fall of rain from 10th to 16th July 1898	3·83
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·86
The total fall from 1st January to 16th July 1898	24 60
The average fall of the corresponding period for 24 years, Surveyor-General's Office	27·79

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the New Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

ROAD CESS.

Dated Calcutta, the 23rd July 1898.

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 409L.F, dated 16th July 1898, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 31st March 1898.

RESOLUTION.—The Lieutenant-Governor directs that the Accounts of the receipts and expenditure of the several District Road Committees in Bengal, for the 4th quarter of the year 1897-98, be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded for information to the—

Commissioners of the Rajshahi, Chittagong, Bhagalpur, and Chota Nagpur Divisions;
Superintending Engineer of the Northern Circle;
Inspector of Works, Eastern and Western Circles;
Financial Department of this Government.

By order of the Lieutenant-Governor of Bengal,

R. B. BUCKLEY,

Secy. to the Govt. of Bengal.

W. H. MICHAEL,

Offg. Accountant-General, Bengal.

IRRIGATION OPERATIONS OF CANALS IN BENGAL DURING THE RABI SEASON OF 1897-98.

No. 804*I*.

GOVERNMENT OF BENGAL—IRRIGATION DEPARTMENT.

Dated Calcutta, the 21st July 1898.

RESOLUTION.

READ—

Statement No. II, showing the crops irrigated in canal districts in Bengal during the *rabi* season of 1897-98.

OBSERVATIONS.—The area irrigated during the *rabi* season of 1897-98 was 111,539 acres against 235,020 acres in the previous year, showing a decrease of 123,481 acres, but the year 1896-97 was an exceptional one in which the largest area yet recorded was obtained. Compared with the five years prior to 1896-97, the area of the year under review was only slightly less than the average.

2. The decrease in area between this and the previous year was not due so much to any special cause, such as seasonable rainfall, as to a return to a normal state of affairs after an extraordinary year due to the failure of rainfall and the pressure of famine.

3. In the areas commanded by the Midnapore and Saran Canals, there was no demand for canal water during the season.

4. The principal *rabi* crops irrigated from the Sone Canals were sugarcane, wheat, barley, gram and various pulses, opium, mustard and other crops classed under the head miscellaneous.

5. From the Orissa Canals the principal crops irrigated were dulwa rice, sugarcane, gram, cotton and indigo, and of these the dulwa rice gave the largest area. The crops irrigated from the Eden Canal in the Burdwan and Hooghly districts were potatos and onions only which covered an area of 847 acres.

6. The details of the increase or decrease in the irrigation of the *rabi* crops from the canals in each district during the year 1897-98, compared with the previous year, are given in the following statement:—

District.	Canal.	Rabi season.		More.	Less.

Calcutta,
The 21st July 1898.

WEATHER AND CROP REPORT.

For the week ending the 25th July 1898.

Burdwan.—Rainfall at Sadar 2·17, Kalna ·63, Katwa 2·09, Raniganj 2·24. Weather hot. Cultivation of paddy going on. More rain wanted in places. Fodder and water sufficient. A few cases of cattle-pox reported. Common rice selling as follows:—

	Srs.	
Sadar	11 to 17	per rupee.
Kalna	10½ to 13	
Katwa	12⅝	
Raniganj	12½	

Birbhum.—Rainfall at Sadar 3·15, Rampur Hât 1·22. Weather very hot and cloudy. Transplantation continues. Prospects good. Prices steady. Fodder sufficient.

Bankura.—Rainfall at Bankura ·92, Vishnupur 1·83. Weather hot and generally fair. Rain urgently needed for transplantation. No cattle-disease reported. Fodder and water sufficient. Common rice selling at 14½ seers per rupee at Bankura and 12½ seers at Vishnupur.

Midnapore.—Rainfall at Sadar 1·98, Contai 1·77, Tamluk 3·32, Ghatal 2·35. Prospects of indigo and sugarcane good. Transplantation of paddy seedlings commenced. Egra in Contai reports cultivation impeded for want of rain. Common rice selling as follows:—

	Srs.	
Sadar	12	per rupee.
Contai	13 to 14	
Tamluk	11⅝	
Ghatal	10 to 13	

Hooghly.—Rainfall at Sadar 1·27, Serampore 1·14, Jahanabad 2·53. Jute, *aus*, and sugarcane doing well. Very little progress in the transplantation of *aman*. Common rice sells from 10 to 13 seers per rupee.

Howrah.—Rainfall at Sadar 2·94, Ulubaria 1·84. Weather seasonable. Transplantation of *aman* going on. More rain wanted at Ulubaria. *Aus*, jute and sugarcane progressing favourably. Fodder and water sufficient. Common rice sells at 10 to 12 seers per rupee.

24-Parganas.—Rainfall at Sadar ·74, Barasat 1·44, Basirhat 1·90, Diamond Harbour 1·79. Weather rainy and cloudy. *Aus* plants growing well. Transplantation of *aman* going on. Rain wanted in places in the Diamond Harbour subdivision. Cattle-disease reported from police-station Rangafula in Diamond Harbour. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	10 to 12	per rupee.
Barasat	12	
Basirhat	14⅜	
Diamond Harbour	11	

Nadia.—Rainfall at Sadar 1·36, Meherpur ·91, Chuadanga 1·45, Ranaghat 2·28, Kushtia ·95. Weather hot and cloudy. Standing crops doing well. Common rice selling at 10 to 12½ seers per rupee. Fodder and water sufficient. Cattle-disease reported from thanas Tehatta and Chuadanga.

Murshidabad.—Rainfall at Sadar 3·04, Kandi 2·68, Jangipur 1·91. Weather very hot. Transplantation of *aman* going on. *Bhadoi*, indigo, mulberry and sugarcane doing well. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	
Sadar	12	per rupee.
Kandi	13¾	
Jangipur	13½	

Jessore.—Rainfall at Jessore ·56, Jhenida ·89, Magura ·06, Narail ·83, Bangaon 1·87. Weather hot and cloudy. State and prospects of the standing crops good. More rain wanted for the development of the young paddy plants. No cattle-disease reported Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Jessore	11 to 13	per rupee.
Jhenida	11	
Magura	11 to 12	
Bangaon	11½ to 12½	
Narail	11-6¾ ch.	

Khulna.—Rainfall at Sadar 1·34, Satkhira 2·16, Bagerhat 1·71. Weather hot. Transplantation of *aman* going on. Prospects of *aus* good. Fodder and water available. Common rice sells as follows:—

	Srs.	
Sadar	11 to 13	per rupee.
Satkhira	13	
Bagerhat	12	

Rajshahi.—Rainfall at Sadar 2·23, Nator 2·22, Naugaon ·92. Standing crops doing well. Transplantation of *ropa* paddy going on. No cattle-disease. Fodder and water ample. Common rice sells from 11 to 14 seers per rupee.

Dinajpur.—Average rainfall 1·63. Weather very hot. Cutting of jute and transplantation of *aman* going on. Harvesting of *bhadoi* commenced. No cattle-disease. Fodder and water sufficient. Rice sells at 13 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 3·46, Alipur Duars 4·92. Weather hot. A break in the rains. Harvesting of *bhadoi* paddy going on. Transplantation of *haimanti* paddy continues. Condition of standing crops favourable. No want of fodder and water. Common rice sells from 10 to 14 seers per rupee.

Darjeeling.—Rainfall at Darjeeling 11·07, Kurseong 22·67, Siliguri 12·99. Weather seasonable. *Hills*—*Haimanti dhan* and *bara marua* being transplanted; *bhutta*, potatoes and *chhota marua* being harvested. *Terai*—Jute, *bhadoi*, and sugarcane doing well; *haimanti dhan* being transplanted. Coarse rice sells as follows:—

Hills—9 to 11 seers per rupee.
Terai—13 to 15 „ „ „

Bhutta sells from 16 to 28 seers per rupee.

Rangpur.—Rainfall at Sadar 1·65, Gaibanda 1·62, Kurigram 1·71, Nilphamari ·83. Harvesting of *aus* and transplantation of *aman* going on. Cutting of jute commenced in places. Prospects fair. Common rice selling at 10½ to 13 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 1·06. Ploughing of lands for *aman* continues. Sowing of *aman* and cutting of *aus* going on. Fodder and water sufficient. Common rice selling from 10½ to 13½ seers per rupee.

Pabna.—Rainfall at Sadar nil, Sirajganj ·94. Weather hot and cloudy. State and prospects of crops good. Common rice 9 to 11½ seers per rupee.

Dacca.—Rainfall at Sadar 2·45, Manikganj 2·52, Munshiganj 3·55, Narainganj ·50. Weather very hot. Prospects of standing crops appear good. River gradually rising. Fodder available. No cattle-disease. Common rice 10 to 12 seers per rupee.

Mymensingh.—Rainfall at Sadar 1·70, Netrokona 6·01, Jamalpur 2·37, Kishorganj 1·20, Tangail 3·36. Weather hot and moist. Crops doing very well. Condition of cattle good. Rice selling at 10 to 11 seers per rupee at Sadar and 9 to 12 seers in subdivisions.

Faridpur.—Rainfall at Sadar 1·69, Goalundo 1·62, Madaripur 4·95. Weather very hot and steamy. Prospects of crops good, but more rain urgently wanted. Fodder and water sufficient. Common rice sells at 11 to 13 seers per rupee.

Backergunge.—Rainfall at Sadar ·19. Weather hot. Prospects of crops fair. More rain wanted. Common rice sells from 9 to 13 seers per rupee.

Tippera.—Rainfall at Sadar ·41, Brahmanbaria 1·80. Weather close and somewhat hot. Prospects of paddy and jute favourable. Fodder sufficient. Cattle-disease reported from thana Bancharampur. Rice sells at 9 to 10 seers per rupee.

Noakhali.—Rainfall at Sadar ·26, Feni 2·93. Reaping of *aus* commenced. Prospects good. Cattle-disease reported from Ramganj. Fodder and water sufficient. Price of common rice 9 to 12 seers per rupee.

Chittagong.—Rainfall 1·56. Weather seasonable. *Aus* thriving except in Kutabdia. Cultivation of *aman* in progress. Prospects good. Rice selling at 10 seers per rupee. Water and fodder sufficient.

Patna.—Rainfall at Sadar 4·10, Barh ·65, Bihar 3·20, Dinapur 5·65, Hilsa 5·0, Bikram 1·99. Transplantation of paddy going on. *Bhadoi* crops doing well. Prices stationary. No cattle-disease. Fodder and water for cattle sufficient.

Gaya.—Rainfall at Sadar ·74, Jahanabad 1·77, Aurangabad ·71, Nawada 4·69. Paddy being transplanted. *Bhadoi* crops doing well. Common rice selling at 13 seers per rupee.

Shahabad.—Rainfall at Sadar 1·10, Bhabua 3·19, Buxar 1·45, Sasaram 4·70. Sugarcane excellent. *Bhadoi* being weeded. Transplantation of paddy continues. No cattle-disease. Common rice sells at 12 to 14 seers per rupee at Sadar.

Saran.—Rainfall at Sadar 5·60, Siwan 2·65, Gopalganj 3·70. Weather sultry. Indigo and other standing crops very good. Weeding going on. Paddy being transplanted. Fodder and water sufficient. Average price of common rice 12·9 seers and of maize 20·12 seers, against 8 and 9 seers per rupee, respectively, last year.

Champaran.—Rainfall at Motihari 3·17, Bettiah ·92, Bagaha ·40, Ramnagar 1·38. Weather hot and cloudy. Prospects of standing crops very hopeful. Transplantation of paddy and *marua* and weeding of *bhadoi* crops continue. Indigo manufacture still going on. Fodder and water sufficient. Price of common rice 11½ seers per rupee, against average 13½ seers.

Muzaffarpur.—Rainfall at Sadar 2·39, Hajipur 2·14, Sitamarhi ·87. Transplantation of paddy in progress. *Bhadoi* crops doing well. Prospects hopeful. Prices are—common rice 12 to 13 seers, wheat 15 to 16 seers, barley 22½ to 23 seers, *makai* 20 seers, gram 18 to 19 seers, and *rahar* 22 to 22½ seers per rupee.

Darbhanga.—Rainfall at Sadar 2·61, Samastipur ·83, Madhubani 2·80. Weather hot. Prospects of standing crops good. Sowing of *bhadoi* completed. More rain urgently needed for transplantation of paddy. Fodder and water sufficient. Common rice sells at Sadar 11 seers per rupee.

Monghyr.—Rainfall at Monghyr 1·70, Begusarai 2·20, Jamui 3·23. Weather hot and cloudy with occasional showers. Transplantation of winter rice going on. *Bhadoi* crops doing well. More rain wanted. No cattle-disease. Common rice sells as follows:—

Monghyr	...	...	...	12 to 14 seers	per rupee.
Begusarai	...	...	...	11 to 13 „	„
Jamui	...	...	...	14 „	„

Bhagalpur.—Rainfall at Sadar ·41, Banka 4·18, Madhipura 1·29. Weather very hot. Rain is urgently needed everywhere for the transplantation of the rice crop. No cattle-disease reported. Prices unchanged.

Purnea.—Rainfall at Sadar ·42, Kishanganj 2·22, Araria 3·44. Weather hot. Transplantation of *aghani* rice going on. More rain wanted. *Bhadoi* paddy in south of district suffering for want of rain. Cattle-disease still reported from Matiari, Raniganj, and Sikti in Araria subdivision. Fifteen fresh cases and three deaths from *Kaladukh* reported during the week. Fodder and water sufficient. Common rice selling as follows:—

Sadar	...	...	...	14	seers per rupee.
Kishanganj	...	...	...	14	„
Araria	...	...	...	16	„

Malda.—Rainfall at Sadar ·65, Chanchal ·50, Shibganj ·88, Gajole ·40. Weather very close and hot. Transplantation of winter rice progressing slowly for want of sufficient rain *Bhadoi* paddy, jute and Indian-corn doing well. Common rice selling at 12 seers a rupee. No want of fodder.

Sonthal Parganas.—Weather rather warm. Average rainfall 1·43. Transplantation of paddy in progress. Prospects of Indian-corn and indigo very favourable. Fodder sufficient. Price of rice 13 to 15 seers, and of maize 18 to 21 seers per rupee.

Cuttack.—Rainfall at Sadar 2·50, Jajpur 1·91, Kendrapara 5·34, Banki 2·04. Weather showery and cloudy, but more rain wanted. *Sarad*, *beali*, and sugarcane growing. Cotton being plucked. Condition of cattle generally good, but disease still continues in places. Fodder sufficient. Common rice sells as follows:—

					S.	ch.	
Cuttack	...	...	...	...	13	2	per rupee.
Jajpur	...	...	...	...	15	12	
Kendrapara	...	...	...	...	18	6	
Banki	...	...	...	...	15	12	

Balasore.—Rainfall at Sadar 2·68. More rain wanted. Paddy seedlings, sugarcane, jute and other standing crops are growing well. Puddling continues. Weeding of *bonli* commenced. Price of rice varies from 14 to 17 seers per rupee in the interior. Rice sells at 13½ and 16 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rainfall at Sadar 1·65, and at Khondmals 2·66. Puddling and transplantation of paddy slowly progressing for want of rain. Coarse rice sells at 20 seers per rupee at Angul and 12 seers at Khondmals.

Puri.—Rainfall at Puri 1·66, Khurda ·67. Weeding and transplanting of paddy crops going on. State of *mandia* and sugarcane crops good. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	ch.	
Puri	11	13	per rupee.
Khurda	13	12	
Interior of district	14-7 to 15-12		

Hazaribagh.—No rain at Sadar, Giridi 1·8. More rain wanted for transplanting. Prospects good. Rice selling at 10 to 12 seers per rupee.

Lohardaga.—Rainfall at Sadar 1·38. Transplantation commenced. State of standing crops good. Rice sells at Ranchi 11 seers per rupee, and in the interior from 12 to 16 seers per rupee. Cattle-disease reported from the interior. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—Rainfall at Sadar 5·00. Weather seasonable. Good rain in the interior. Transplantation of paddy has commenced. Crop prospects good. Prices stationary.

Manbhum.—Rainfall at Sadar 5·63, Gobindpur 1·13. Weather seasonable. Prospects of crops on ground good. Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar 12 seers and at Gobindpur 11 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 4·95. Prospects good. Rice plentiful—12 to 14 seers per rupee.

General Summary.—There was general but moderate rain during the week. In many districts more rain is required for the transplantation of the winter rice seedlings. The prospects of early rice, jute and other *bhadoi* crops and of sugarcane and indigo are favourable. The harvesting of early rice and jute is going on in some parts of Northern and Eastern Bengal. The price of rice is generally steady, but much above the normal. There is no want of fodder in any district, but cattle-disease is reported from several districts.

The mean relative humidity		% 87
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office		86
The total fall of rain from 17th to 23rd July 1898		Inches. 0·86
The average fall of the corresponding period for 24 years, Surveyor-General's Office		2·83
The total fall from 1st January to 23rd July 1898		25·46
The average fall of the corresponding period for 24 years, Surveyor-General's Office		30·62

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers; t, thunder; <, lightning.

Bengal Central Railway for the month of May 1898 ...	1496
Weekly return of Traffic Receipts on Indian Railways ...	1498

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met at the Councils Chamber on Saturday, the 23rd July, 1898.

Present:

The Hon'ble SIR JOHN WOODBURN, K.C.S.I., Lieutenant-Governor of Bengal, *presiding.*
The Hon'ble SIR CHARLES PAUL, K.C.I.E., *Advocate-General.*
The Hon'ble H. H. RISLEY, C.I.E.
The Hon'ble RAI DURGA GATI BANERJEA, BAHADUR, C.I.E.
The Hon'ble NAWAB BAHADUR SYUD AMEER HOSSEIN, C.I.E.
The Hon'ble M. FINUCANE, C.S.I.
The Hon'ble W. B. OLDHAM, C.I.E.
The Hon'ble R. B. BUCKLEY.
The Hon'ble C. W. BOLTON, C.S.I.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH, C.I.E.
The Hon'ble M. C. TURNER.
The Hon'ble NORENDRA NATH SEN.
The Hon'ble SALIGRAM SINGH.
The Hon'ble KALI CHARAN BANERJEE.
The Hon'ble SURENDRANATH BANERJEE.
The Hon'ble JATRA MOHAN SEN.
The Hon'ble T. W. SPINK.
The Hon'ble RAJA SHASHI SHAKHARESWAR ROY BAHADUR, of Tahirpur.

NEW MEMBER.

The Hon'ble RAJA SHASHI SHAKHARESWAR ROY BAHADUR, of Tahirpur took his seat in Council.

BACTERIOLOGICAL EXAMINATION OF SUSPECTED PLAGUE CASES.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Will the Government be pleased to state whether, with the exception of the Kapalitola case, any other case of plague has been subjected to the bacteriological test? If so, will the Government lay on the table the results of such examination? If not, having regard to the strong differences of opinion as to the existence of the plague in Calcutta, and the fact that the bacteriological test is the only true test in these cases, and that in its absence mistakes have been committed—eleven cases having been officially eliminated from the returns after being inserted therein—will the Government be pleased to make arrangements for the regular bacteriological examination of at least a few cases every week by an experienced and competent bacteriologist?

The Hon'ble MR. RISLEY replied:—

"In addition to the Kapalitola case, eight cases of plague have been subjected to the bacteriological test by the Health Officer of Calcutta. In five of these the plague bacillus was found. The record of the experiments is technical, and no useful purpose would be served by publishing it. Thirty other cases were examined after death by the Professor of Pathology, Medical College, and the plague bacillus was traced in most of the important organs. These enquiries will be continued. In the case of living persons bacteriological examination is inadmissible, because of the danger of converting a simple bubonic attack into a septicæmic one by pricking or incising the buboes."

HOME SEGREGATION OF PLAGUE CASES.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Will the Government be pleased to state whether, out of the 176 cases of plague (*vide* Plague Returns, 13th July) which have occurred in Calcutta, there has been any case which has been traced to *contact* and whether there has been any instance in which a case of plague having occurred, it has been followed by similar cases in the same house, within the admitted incubation period? If there have been no such cases and if the plague so far during the past three months has not been found to be infectious, will the Government be pleased to direct that home segregation be allowed in accordance with indigenous customs, such as are observed in cases of small-pox, the patient being confined to a room in the house to which all access on the part of the other members is forbidden and the house itself to all intents and purposes is segregated?

The Hon'ble MR. RISLEY replied:—

"In ten instances a case of plague has been followed by similar cases in the same house. The Government is not prepared to modify the existing practice in respect of segregation."

HOME TREATMENT OF PLAGUE CASES.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Whether, having regard to the non-infectious character of the disease as it prevails in Calcutta, to the necessity of absolute rest in plague cases as emphasized in General Gatacre's report quoted in the margin and the danger of removing patients to a hospital, will the Government be pleased to permit patients being treated in their own houses which may not have been previously licensed on the recommendation of competent authorities or under such safeguards as it may prescribe?

"No fact in the clinical phenomena of plague remains more indelibly impressed on the mind than the extremely frequent and alarmingly sudden and unexpected death of patients, who are apparently well on the road to recovery. The pulse may be normal in frequency and force, the temperature normal for some days, and yet some slight exertion, such as sitting up prematurely in bed, may lead to fatal syncope, and nothing was found in two such cases in the heart itself to account for the result." (Page 59.)

"The success of any treatment depends on early and good nursing and keeping the patient lying down until the temperature has been normal for at least four days. The injudicious breach of this rule, namely, that the patient should not even sit up for any purpose, led to the death of twenty convalescents by syncope in spite of urgent and repeated warnings." (Page 59.)

The Hon'ble MR. RISLEY replied:—

"Under Plague Regulation No. 9 the Health Officer has discretion to deal with such cases and to grant a license at once. But if the premises require structural alterations in order to render it possible to isolate the patient in the upper storey or on the roof, it will not be possible for him to license them. People will therefore do well to apply for licenses beforehand. The instances given in my reply to Question No. II show that it is not correct to describe plague as non-infectious."

FISH AND MEAT DIET IN THE ALIPORE JAIL.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

(*a*) Will the Government be pleased to state whether it is the case that the dietary allowance of fish or meat allowed to prisoners twice a week in the Alipore Jail has been discontinued since the 15th March last? If so, will the Government be pleased to state the reasons for discontinuing this concession?

(*b*) Having regard to the outbreak of the plague and the necessity of keeping the prisoners in a suitable condition of bodily health and strength, will the Government be pleased to direct that the dietary allowance of meat and fish twice a week should again be continued to the prisoners in the Alipore Jail?

The Hon'ble Mr. BOLTON replied:—

"Meat or fish is not included in the ordinary diet sanctioned for prisoners in this Province. It may, however, be issued in place of part of the ration of dâl under certain circumstances, viz., (*a*) when the fortnightly weighments show that an unusual proportion of the prisoners are losing weight, (*b*) when there are symptoms of scurvy among the prisoners, or (*c*) when the number of cases of dysentery is unusually large and is increasing.

"Last year on account of the prevailing scarcity a large proportion of the newly-admitted prisoners were in poor health, and it was then considered advisable in the Alipore as well as in the other Jails of the Province to issue meat or fish twice a week. In March last, Dr. Comins issued a Circular, directing the discontinuance of fish or meat in the ordinary ration, having previously satisfied himself that the general health of the prisoners was so satisfactory that any addition to the ordinary diet was no longer necessary.

"That the discontinuance of the meat or fish ration has not been followed by any bad effects is shown by the facts that the sickness and mortality in the Alipore Jail have been lower during the last six months than during the corresponding period for many years, and that the great majority of the prisoners are steadily gaining weight.

"All the prisoners in the Jail are inspected every week by the Medical Officer, and it is open to him to order an extra diet of meat, fish, milk, or other articles if he considers them necessary. This discretionary power is largely used; there are at present 67 prisoners in the Alipore Jail getting an extra allowance of fish, meat, or milk, exclusive of those in hospital.

"As the general health of the prisoners in the Alipore Jail is at present exceptionally good, there is no reason for incurring the very considerable additional expense which would be caused by the addition of meat or fish to the ordinary ration.

"It is hoped that the precautions which have been taken will guard against an outbreak of plague in the Alipore Jail."

ALLEGED DEATHS FROM STARVATION IN THE CHITTAGONG DISTRICT.

The Hon'ble BABU JATRA MOHAN SEN asked—

(*a*) Has the attention of the Government been drawn to the reports which have appeared in the *Jyoti* newspaper, published in Chittagong, regarding the prevalence of acute distress in the Chittagong district, caused by the failure of crops, the survey operations, and the recent cyclone? Is it the case, as

reported in the *Jyoti* of the 14th July, that two persons, Meher Ali's daughter, living at Baraitali, and the daughter of Anwar Ali of Jaldi, have actually died of starvation; and that, as also reported in the *Jyoti* of the 16th and the 23rd June, 4 cases of death by starvation have occurred at Kotpara, Bagmara, and Katharia; that further owing to the severity of the distress, one Budhni sold her child, 4 years old, for five rupees, as reported in the *Jyoti* of the 16th June, and that a man named Pitambar Dhupo of Padua (*vide* the *Jyoti* of the 9th June), no longer able to obtain food for his family, in sheer desperation murdered his wife, mother, and daughter and then attempted to commit suicide, which case is now under trial?

(*b*) Will the Government be pleased to lay on the table any report which it may have received from the Chittagong authorities in connection with the prevailing distress?

(*c*) Having regard to the severity of the crisis, will the Government be pleased to state what relief has been afforded by the local officers, and whether it is in contemplation to afford any further relief?

The Hon'ble MR. FINUCANE replied:—

"(*a*) The attention of Government was drawn to certain allegations as to the prevalence of distress in Chittagong, contained in the issue of the newspaper *Jyoti* for the 2nd June, and a report was called for from the local officers, funds being at the same time placed at their disposal for the relief of distress if necessary. The Collector reports that some of the villages in which distress is alleged to prevail lie far outside the area affected by the recent storm-wave. Enquiry was made in June, and it was found that the allegations as to the occurrence of deaths from starvation were incorrect, and in one instance were believed to have been based on the statements of a school-boy, made without any knowledge or enquiry. The village panchayets and the chaukidars denied that any deaths from starvation had occurred.

"In villages lying within the Satkania thana, in which severe distress was alleged to exist, the distribution of relief was stopped in the end of May under the Commissioner's orders, on the ground that it was no longer required; while it is reported by the Assistant Engineer in charge of the repairs of the Kutubdia Embankments that he can employ many more labourers on that work than the number who now seek employment on it. The Collector of Chittagong has recently been on tour in the areas alleged to be distressed.

"(*b*) The reports received from the Commissioner and Collector are laid on the table.

"(*c*) The measures of relief taken were described in a Resolution, dated 28th March, 1898, which was published in the Gazette of 30th idem. It is reported that of the allotment of Rs. 1,25,000 made for Land Improvement Loans during the financial year 1897-98, the sum of Rs. 9,369 remained unexpended on the 1st April, 1898. An allotment of Rs. 11,750 was at the disposal of the Commissioner of Chittagong for distribution in the shape of Land Improvement and Agricultural Loans during the present financial year. Government has no information which would lead it to suppose that that sum will be insufficient, and no applications have been received for further allotments."

No. 9740, dated Chittagong, the 2nd July, 1898.

From—G. E. MANISTY, Esq., Offg. Commissioner of the Chittagong Division,
To—The Secretary to the Government of Bengal, Revenue Department.

WITH reference to your letter No. 373T.—R. of 23rd June 1898, forwarding copies of the *Jyoti* of 2nd June 1898, and the *Bengalee* of 11th instant, and calling for a report as to the cases of starvation and distress mentioned in them, I have the honour to report as follows.

2. The article in the *Bengalee* is practically a translation of the *Jyoti* article, and gives no other names of villages or persons. On receipt of your letter (on 25th June) I suggested to the Collector that local enquiry might be made by the Assistant Superintendent of Police, and also by

Mr. Ward, Assistant Collector. Mr. Anderson had, however, previously ordered enquiry into the *Jyoti's* statement by the Police Inspector.

3. I beg to enclose copies of the Inspector's diaries of 24th and 25th June and of extracts relating to the said article from the Collector's No. 826G. of 28th June. It appears from these that there have been no deaths from starvation. The Collector does not consider the villages named as nearly so badly affected by the cyclone and storm-wave as other parts more to the south (outpost Jaldi and thana Chakaria). Indeed he says of the four villages mentioned in the *Satkania* thana that they were "far outside the track of the storm-wave" and "are not suffering from the consequences of the cyclone." This is somewhat significant, as I had, towards the end of May, induced the Collector to put a stop to what seemed to me waste of Famine Fund money in the Satkania thana. Apparently there was some connection between this and the publication of the article in the local *Jyoti*. The Assistant Engineer, Mr. J. B. Ralph, who acquired great experience in the Bombay Famine and has periodically visited and critically noticed the storm-wave area when supervising embankment repairs in Kutubdia island since December last, has informed me that from the time of his very first visit he has never come across a single child showing the unmistakable signs of starvation. I attach great weight to his opinion, because it is absolutely independent and based on actual experience of what starvation is; besides which he has been and still is employing labour all round Kutubdia island. So early as December last he tells me he could not get enough labour locally and had to use imported labour to some extent, owing to the fact, generally told him in the locality, that the men by going elsewhere to work could get their wives and children fed gratuitously (from the Famine Fund) on the adjoining mainland in Satkania thana. I fear the prolonged distribution of gratuitous relief by the Satkania Tahsildar and his subordinates, long after the Subdivisional Officer of Cox's Bazar had said no further relief was wanted in *his* part of the submerged area, has induced people now to still try and get assistance, though not warranted by their condition.

4. The Collector is about to start on tour in the parts which he considers worse than those named in the *Jyoti*, and, if he finds any distress such as private local charity is not likely to relieve, I will report to you on the subject. I may mention that the Assistant Engineer says he can give work to many more men if they want it on the Kutubdia embankment.

5. The newspapers are returned as requested.

BENGAL POLICE.

Extract from the Diary of Inspector Protab Chandra Sen of the Chittagong B Division, dated 24th June 1898.

Diary.	District Superintendent's remarks.
Reached Bagmara Ghat at 7 A.M., with Head-Constable Gagan Chandra De and Constable Shuk Raj. From 7½ A.M. up to 1 P.M. visited Bagmara, Badhkhola, and Palgram, and held conversations with the people of the locality, but no evidence was found to show that any man died by starvation. The people complained that they are now in great difficulty and want aid from Government. Among the crowds I found several men who recently returned from Arracan after earning money and wanted relief from Government. The panchayet of Bagmara stated that the people of his village and other neighbouring villages lying on the sea-shore suffered a great deal from cyclone; still they did not get any assistance from Government. The relief work was not done by the Police, and so I cannot say anything about the complaints. The panchayet has submitted a written petition, which I shall submit with my report, for information. I do not understand why the people did not complain before the Magistrate just after the cyclone, if they did not get any Government aid.	

BENGAL POLICE.

Diary of Inspector Protap Chandra Sen of the Chittagong B. Division, dated the 25th June 1898.

Diary.	District Superintendent's remarks.
In the morning visited Kalipore and other neighbouring villages No man died by starvation in the locality, as I was informed by the villagers, but the people told me that they want aid from Government. I saw the Sub-Registrar of Kalipore. He was a relief officer for sometime after the cyclone, and has also much local experience. He said that he has received no information about the death of any man by starvation, and no aid will be required for the labouring classes. He is also of opinion that the people of the middle and begging classes are in little difficulty now. As they do not get any assistance from their neighbours, and especially the begging class, people do not get sufficient rice now by begging. Returned to Palagram at 12 A.M., and met with one Bhairab Chandra Sikdar of Boilsori. He is a man of low birth (Malakar by caste). He is known to be a petty talukdar and money-lender. His son, Sashi Kumar Malakar, is now a student of third class, Chittagong Government School. This boy gave information to the editor of *Jyoti* (Chittagong local paper) that the people are now dying by starvation, and the editor published the same in his paper of the 2nd and 16th June 1898. The boy has gone to Chittagong, and so I could not see him. I asked the boy's father, Bhairab Shikdar, if he can prove the above allegations He said in presence of several respectable gentlemen that he has no evidence to support the above statement, and he also gave a written petition to me stating that he cannot say if the deaths were due to any disease or to any other causes. The rumours were spread out that some men died by starvation, and so his son gave information to the editor without making any enquiry how the people met their deaths. His son believed what he heard from the people. Neither he nor his son saw them before or at the time of their deaths. I am now enquiring about all recent deaths in the locality. I have come to know from the village panchayets, chaukidars, and other people of the locality that no deaths were due to starvation. I give below the names of persons who recently died in the locality:— Ramgati of Bagmara died of chronic pain. Majhernessa, daughter of Anwarali, Kutpara, died of fever. Fakir Chand Dhupee of Kathoria died of dropsy. Almajan, daughter of Barkat Ali, Kathuria, died of fever. Tanda Mia, son of Amanali, Kathoria, died of fever. The relations of the deceased stated before the Head-Constable of Banskhali that the deaths were due to starvation, but the Head-Constable did not believe their statements. It has been proved by the village panchayats and other people that Barkat Ali has lately purchased 14 kanis of paddy lands, and Amanali is plying boat at Arracan and is selling rice and *dhán*. The conditions of the other men are not so bad. Bhairab Sikdar's son, Sashi Kumar, induced the people of the locality to report to the Police that the people were dying by starvation. The people did so with the hope of getting Government aid, and the object of Sashi in inducing the people was simply to take credit among the uneducated mass of people and specially among his tenants. * * * * * *	

Extract from the Chittagong Collector's No. 826 G, dated 28th June, 1898, to the Commissioner of the Chittagong Division.

3. Distress is said to prevail in four villages in thana Satkania, namely Sukchari, Kalanjan, Amirabad, and Padua. These villages lie far inland in a sheltered valley, were far outside the track of the storm-wave, and, if owing to the high price of rice, any of the poorer people are finding it hard to make ends meet, it is the duty of their richer neighbours to help them. At all events, I do not think that money collected for the relief of famine in foreign countries should be applied to supplement or supplant private charity in such villages. Doubtless there is hardly a village in the district where widows and orphans are not feeling

the pinch of two bad seasons and consequent high prices. I would not on that account advise the spending of public money upon them. These villages are not suffering from the consequences of the cyclone.

No. 13. In only two of these villages suspension and remission of revenue has been recommended.

4. Distress is also said to exist in six villages in thana Banskhali, namely Baichari, Kathoria, Bagmara, Kotpara, Manikpathan, and Chechuria. These villages were affected by the storm-wave, though by no means to so deplorable an extent as villages further south. When the statement appeared in the *Jyoti* I directed the police to enquire and report. Unfortunately, in my absence in camp, a head-constable was told off to report—an obviously injudicious proceeding where it is to the interest of the people to have relief operations started. An Inspector is now enquiring into the alleged cases of starvation, and I am expecting his report daily.

ALLEGED REDUCTION OF EDUCATIONAL GRANTS IN CHITTAGONG.

The Hon'ble Babu Jatra Mohan Sen asked—

(*a*) Is the Government aware that the Commissioner of the Chittagong Division has directed a considerable reduction of educational grants made by the District Board of Chittagong in respect of the middle class English and vernacular education on the ground that such reduction is necessary to meet the charges incurred to repair the damages caused by the late cyclone? As the effect of this order, which has been or is proposed to be adopted by the District Board, will be to deal a heavy blow at the interests of education in the district, will the Government be pleased to direct a re-consideration of this order?

(*b*) Will the Government be pleased to advance money from the Provincial funds or recommend the District Board the raising of a loan to repair the damages caused by the cyclone?

The Hon'ble Mr. Risley replied:—

"The Government has no information on the subject of the alleged reduction of educational grants in Chittagong. The powers of the Commissioner in respect of the estimates of the District Board are defined in sections 48 and 49 of the Bengal Local Self-Government Act of 1885. Under section 50 of the same Act, the District Board has power to borrow from Government or from the public subject to the provisions of the law relating to the raising of loans by local authorities."

RELAXATION OF PLAGUE REGULATIONS.

The Hon'ble Babu Norendra Nath Sen said—

Government is, no doubt, aware that the conservancy of Calcutta is seriously suffering from the flight of dhangars, mehters, carters, &c. In view of the danger threatened by this state of things to the health of the Town, and also in view of the suspected cases of plague being, even at the end of over three months, still of a sporadic character, and showing not the least sign of infectiousness, should not Government be pleased to further relax the plague regulations, at least in favour of those men, who are so indispensable to sanitation, in order to induce them to return to their work?

The Hon'ble Mr. Risley replied:—

"The conservancy employés have been informed that if they are attacked by plague they will be removed to special isolation sheds. No further relaxation of the rules is necessary."

CONNECTION BETWEEN DRAINAGE AND FEVERS.

The Hon'ble Babu Norendra Nath Sen said—

Government is, no doubt, aware that the underground drainage system was strongly condemned as positively calculated to give rise to fevers of the most pernicious type by some of the highest medical authorities of the time (such as Drs. Monat, Chevers, &c.), when the scheme was under consideration, and that the late Health Officer of Calcutta, Dr. Simpson, in all his reports, used to draw serious attention to the most unsatisfactory condition into which the sewers of Calcutta had already fallen, and to the still more alarming state into which they were drifting, causing both increased humidity and contamination (with poisonous gases and liquids) of the subsoil of the Town, to which he attributed the increased prevalence of fevers of all kinds. Would it not be worth investigating how far the measures that are at present being taken by the Municipality are calculated to remove the evils complained of by Dr. Simpson, and also inquiring if the fevers now occurring in Calcutta, having some of the symptoms of plague, are not in reality malarious fever of a malignant type (such as devastated Ula, Santipore, Kalna, Burdwan, &c., more than thirty-five years ago); the sewer gases, according to medical authorities, aggravating the typhous condition, and causing enlargement of glands?

The Hon'ble Mr. Risley replied:—

"The new drainage scheme is calculated to remove the evils complained of by Dr. Simpson. The results quoted in my reply to the Hon'ble Babu Surendranath Banerjee's first question prove that the disease referred to is true plague and not merely malarial fever of a malignant type."

CLINICAL REPORTS AND BACTERIOLOGICAL EXAMINATION IN PLAGUE CASES.

The Hon'ble Babu Norendra Nath Sen asked—

Will the Government be pleased to state if detailed clinical reports have been kept of the cases that have been pronounced and suspected as plague, and has any bacteriological examination been made and recorded of any other than the first case at Kapalitola, and have the microscopical specimens been preserved, so that they might at any time be seen by any expert bacteriologist?

The Hon'ble Mr. Risley replied:—

"Detailed clinical reports have been kept of all plague cases, and microscopic specimens have been preserved in most of the cases referred to in my answer to the Hon'ble Babu Surendranath Banerjee's Question No. I."

BASIS OF DIAGNOSIS IN SUSPECTED PLAGUE CASES.

The Hon'ble Babu Norendra Nath Sen said—

Dr. Cook, the present Health Officer of Calcutta, has recently declared that bacteriological examination, even in undoubted cases of plague, does not give positive results. If so, on what was the diagnosis of the cases, reported as plague, based?

The Hon'ble Mr. Risley replied:—

"The statement alleged to have been made by Dr. Cook has been imperfectly understood. What he meant was that while the discovery of the bacillus in a doubtful case would prove it to be a case of plague the fact that the bacillus was not found in an undoubted case would not prove the case not to be one of plague.

"The diagnosis of the cases reported as plague was based in the first instance on clinical symptoms, and was confirmed in thirty-five cases by bacteriological examination, and in about the same number by pathological appearances."

APPOINTMENT OF A BACTERIOLOGIST FOR CALCUTTA.

The Hon'ble BABU NORENDRA NATH SEN asked—

Will the Government be pleased to state whether a competent bacteriologist should not be employed permanently in Calcutta for making bacteriological examinations of the soil, water and air, and of specific diseases, whenever they break out?

The Hon'ble MR. RISLEY replied:—

"The question of employing a bacteriologist permanently in Calcutta is under consideration."

CONTINUANCE OF PLAGUE EXPENDITURE.

The Hon'ble BABU NORENDRA NATH SEN said—

Considering the erratic and somewhat fitful course pursued by the plague in Calcutta so far, and having regard to the smallness of the ravage done by the disease, both in seizures and mortality, and considering also that the citizens of Calcutta have cheerfully and loyally assisted the authorities, and have established and are maintaining ward, caste, and private hospitals out of their private purse, will the Government be pleased to state if it is still necessary to keep up the present heavy plague expenditure, knowing, as we do, that it must eventually fall on the rate-payers of Calcutta, unless the Government be pleased to bear a reasonable share of it?

The Hon'ble MR. RISLEY replied:—

"In view of the possibility that plague may increase in the cold weather, it is not advisable at present to make any material reduction in the establishment employed on the prevention of plague."

DAMAGE BY FLOODS IN THE MIDNAPORE DISTRICT.

The Hon'ble BABU NORENDRA NATH SEN asked—

Will the Government be pleased to state what amount of damage has been done by the overflow of the river Cossye in the Midnapore district, and the flooding of the streams of Rupnarain and Damodar by the recent heavy rains, and how many human lives have been destroyed in consequence, and likewise what steps have been taken by the Government to afford succour and relief to the sufferers from the floods?

The Hon'ble MR. FINUCANE replied:—

"Reports have been received by Government of extensive floods in the Midnapore district caused by a sudden rise in the river Cossye between the 16th and 18th of June. Exact details of destruction of life and private property have not yet been received, but the damage done to the Government embankments in the Ghatal subdivision and to the Midnapore Canal and its distributaries is estimated at two lakhs of rupees. The Collector reports that he has been distributing relief out of money at his disposal, and Government has also intimated its readiness to furnish further funds should they be required."

PLAGUE INSPECTOR OF DACCA.

The Hon'ble MR. RISLEY gave the following reply to Question No. III, asked by the Hon'ble BABU SURENDRANATH BANERJEE at the Council meeting of the 16th April, 1898 :—

"The name of the gentleman appointed as Plague Inspector of Dacca was Lomax, not Connan, as stated in my reply of the 16th April. He possessed no technical qualifications, nor were any required for the duties assigned to him. The pay of the post was Rs. 250. It has since been abolished and a Health Officer has been appointed under the Plague Regulations. The services of the Engineer Secretary were not dispensed with. He applied to the Commissioners for two years' leave without pay, and this was granted to him."

STATEMENT AS TO THE COURSE OF BUSINESS.

The Hon'ble THE PRESIDENT said:—"Gentlemen, I understand that it is the custom in this Council, at the commencement of each session, that the President should make a statement of the business before the Council. The statement on this occasion shall be a very short one. Two Bills will presently be brought forward for consideration, the object of which will be fully explained by the Hon'ble Member in charge. I may only very briefly say that the design of one of them is to shorten the language used in Bills and Acts of this Council, and the object of the other is to enable the Port Commissioners to give a higher insurance to the owners of goods conveyed by their railway to the docks. It may perhaps interest the Council if I should say, in a few words, in supplement to what has been said in answer to questions to-day, that for five consecutive days there has not been a single case of plague in Calcutta. I can only say that in these circumstances I personally regard the situation as most hopeful."

AMENDMENT OF THE CALCUTTA PORT ACT, 1890.

The Hon'ble MR. RISLEY, moved for leave to introduce a Bill to amend the Calcutta Port Act, 1890, He said :—

"The necessity for this Bill, which is somewhat of a technical character, arose from a change in the system of dealing with exports for shipment which was introduced in July, 1897. Up to that time the bulk of the exports for shipment not loaded in the stream was received in the jetties, and for every consignment of exports the shipper obtained a receipt which was treated by Steamer Companies practically equivalent to what is known as a Mate's receipt. It was expected that the goods thus delivered at the jetties would be put on board their steamers, and this receipt was accepted as sufficient to enable them to grant bills of lading on the goods, which were then negotiated in the ordinary way. When the goods had been received in the Port Commissioners' sheds the liability of the Commissioners' was, under section 112 of the existing Port Act, the liability of a bailee as defined in section 151 of the Contract Act; that is to say, they were expected to take as much care of the goods in their custody and charge as ordinarily prudent and reasonable men would take of their own property, and they were responsible only for any acts of neglect on the part of their servants which were proved against them. The goods while in the jetty sheds were insured by the shippers. In July, 1897, a great change took place. It was then ordered by the Port Commissioners as the result of a very elaborate discussion between them and the Chamber of Commerce as the representative of the mercantile community, that all exports should in future be shipped from the docks and not from the jetties. In the case of exports received direct at the docks no difficulty arose. The liability of the Port Commissioners in that case was precisely the same as it had been all along in respect of such exports when received at the jetties. But it was an essential part of the arrangement between the mercantile community and the Port Commissioners; it was a condition upon which the change was accepted as a beneficial and desirable change by the mercantile community that the Port Commissioners should accept absolute, unlimited liability for goods in transit between

the jetties and the docks. It was obviously for the convenience of shippers that they should not be compelled to cart their exports all the way to the docks themselves. It was agreed, therefore, that the Port Commissioners should accept these exports at the jetties in order to ship them from the docks, and that all the while during the transit from the jetties to the docks they should accept in respect of these goods not merely the limited liability of a bailee, but absolute liability for loss by fire or any other cause. Shortly after this change was made and this undertaking given by the Port Commissioners, the question of their powers under their own Act to accept this liability was raised, and it was held that they were not empowered to accept this liability at all; that section 112 did not enable them to go beyond the liability imposed on them as an ordinary bailee. They suggested, therefore, that the Act should be amended in order in the first place to meet this extended liability, and that was the immediate purpose of the present Bill. But Hon'ble Members to whom the Bill has been circulated will see that the amended section as it has been drafted goes a considerable way beyond what would be necessary merely for the purpose of enabling the Port Commissioners to assume full liability for goods in transit from the jetties to the docks. It enables them, with the previous sanction of the Local Government and under such circumstances and conditions as the Local Government may prescribe, to enter into agreements relating to animals or goods landed for import or received for export or for carriage by railway, which may impose upon the Commissioners a greater responsibility than that imposed by sub-section (*1*), and every such agreement must be in writing and must be signed by or on behalf of the Port Commissioners. The reasons for going beyond the amendment necessary to meet the particular case are these: that the trade of Calcutta is developing considerably; that it is in many respects altering its channels, and it is impossible to foresee what its course may be in future It will be exceedingly inconvenient if the trade were to take a turn which would require responsibility, other than that of an ordinary bailee, to be assumed in respect of classes of goods other than exports in transit from the jetties to the docks, and if in that case legislation had to be resorted to in a hurry. An illustration of this is the following case. Under section 113 of the Port Act, when goods are landed and notice is given to the consignee, the Port Commissioners are responsible for two clear days for whatever may happen to those goods. If within those two days the consignee does not remove the goods, he has to pay rent for storage room, and he also has to take responsibility for whatever may happen to the goods. In 1894, when the customs law had recently been changed, it was found impossible to clear goods within two clear working days, which were ordinarily accepted as what is called "free" days. The Port Commissioners, therefore, proposed to grant a third free day. Legal opinion was taken, and it was held by the Advocate-General that it was not in the power of the Commissioners to undertake the risk for a third day. This is the sort of case which this additional provision in the Bill ought to cover. Sub-sections (*2*) and (*3*) of section 112, which are proposed to be inserted in the Port Act, have been framed so that in future the Port Commissioners may, with the previous sanction of the Local Government, and under such circumstances and conditions as it may prescribe, enter into special agreements of the kind there referred to, and every such agreement must be in writing and signed by or on behalf of the Port Commissioners. It is considered that this will be sufficient to prevent the Port Commissioners from assuming any undue liability. The opportunity has been taken to re-enact section 112 of the Port Act. That section of the present Act is imperfectly worded and is obscure, although legal authorities are understood to agree that it means merely that the Port Commissioners assume the liability of bailees under the Contract Act; but it is considered desirable to make the section perfectly clear and to refer also to the Railways Act of 1890, because the Port Commissioners act as a railway when transporting exports from the jetties to the docks, and in certain cases in sending imports from the docks to the jetties.

"I think this Bill is one which may be fairly accepted by the Council, and I understand that the commercial community are absolutely unanimous in desiring that it should be passed. The arrangements under which exports are now shipped from the docks and are excluded from the jetties was the subject of much controversy at the time, and it was accepted by the shipping interest on-

the strength of the promise given by the Port Commissioners that they would accept the further liability which the Bill enables them to undertake."

The Motion was put and agreed to.

The Hon'ble MR. RISLEY further said:—"In order to expedite the passing of this Bill, I have the honour to apply to the President to suspend the Rules of business for the purpose of introducing the Bill."

The Hon'ble THE PRESIDENT said:—"In a matter of this sort where we are asked to confirm an arrangement of a commercial character agreed to by all parties, I think we may safely depart from the usual procedure and reduce the proceedings by one stage. I accordingly suspend the rules of business for the purpose of introducing this Bill."

The Hon'ble MR. RISLEY then introduced the Bill and moved that it be read in Council.

The Motion was put and agreed to, and the Bill was read accordingly.

BENGAL GENERAL CLAUSES BILL.

The Hon'ble SIR CHARLES PAUL moved for leave to introduce a Bill for further shortening the language used in Bengal Acts, and for other purposes. He said:—

"This Bill, is generally known as the Bengal General Clauses Act, and it indicates by its own designation its distinctive character. It defines once for all a number of expressions commonly used in the Acts of this Council. It enacts various rules of construction and common clauses, which are frequently required for interpretation in the working of legal enactments. For instance, in the 'general definitions' take the definition of 'immovable property.' The Bill says 'immovable property shall include all benefits that arise out of land and things attached to the earth or permanently fastened to anything attached to the earth.' By making a definition of immovable property, in any reference to the subject-matter which it includes, it is not necessary to name the various matters which it includes, but it will suffice to say that it includes all this. It, therefore, greatly lessens the cumbrous wording of the statute. Again, when in any Act a word in the singular is mentioned, it includes the plural; otherwise, in enacting a section, instead of only saying "any person,' you would have to say 'any person or persons." Take another instance. Permission is given to the Government to make rules and then to modify them, but the power once taken advantage of is gone. Rules once made, no further rules can be made, unless you add the word 'from time to time;' but under this Bill if those words are not mentioned it will be implied. If Hon'ble Members will look through this Bill, they will find a great many matters in regard to which the language of Acts will be shortened and their meaning made distinct. The reasons for this Bill are very fully stated in the Objects and Reasons: I need not, therefore, take up the time of the Council in putting other cases to illustrate the advantages to be derived from this Bill, which, however, is a Bill more or less of a formal character."

The Motion put and agreed to.

The Council was adjourned to Saturday, the 30th instant.

CALCUTTA;
The 2nd August, 1898.

F. G. WIGLEY,
Offg. Asst. Secretary to the Govt. of Bengal,
Legislative Department.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met at the Council Chamber on Saturday, the 30th July, 1898.

Present:

The Hon'ble SIR CHARLES PAUL, K.C.I.E., Advocate General, *presiding.*
The Hon'ble H. H. RISLEY, C.I.E.
The Hon'ble RAI DURGA GATI BANERJEA BAHADUR, C.I.E.
The Hon'ble NAWAB BAHADUR SYUD AMEER HOSSEIN, C.I.E.
The Hon'ble M. FINUCANE, C.S.I.
The Hon'ble W. B. OLDHAM, C.I.E.
The Hon'ble R. B. BUCKLEY.
The Hon'ble M. C. TURNER.
The Hon'ble KALI CHARAN BANERJEE.
The Hon'ble SURENDRANATH BANERJEE.
The Hon'ble JATRA MOHAN SEN.
The Hon'ble T. W. SPINK.
The Hon'ble RAJA SHASHI SHAKHARESWAR ROY BAHADUR, of Tahirpur.

LEASING OUT POUNDS.

The Hon'ble RAJA SHASHI SHAKHARESWAR ROY BAHADUR asked:—

Is the Government aware that under the existing practice of leasing out pounds to the highest bidders by auction, which obtains in almost all the districts of Bengal, the cattle while thus impounded not only suffer from neglect, but are positively starved by most of the pound-keepers? Is it not a fact that the practice has also in certain places resulted in the establishment of hired agencies by the pound-keepers for the wrongful impounding of cattle to make up their losses and secure a margin of profit upon the amount paid to the District Boards at the time of auction. If, however, the sum received on account of fines and the unclaimed proceeds of the sale of the cattle be applied to the maintenance of an establishment with fixed salaries, as contemplated by section 18 of the Cattle Trespass Act and section 56 of the Bengal Local Self-Government Act, could not the wrongful impetus now given to the pound-keepers by the auction system be materially lessened and thereby a standing source of grievance of the cultivators of Bengal removed? Will the Government therefore be pleased to institute an enquiry through the District Officers into the above and ascertain whether it is not desirable to introduce the system suggested above, which is not only compatible with the letter of the law as at present laid down, but in harmony with the spirit of the legislation referred to?

The Hon'ble MR. RISLEY replied:—

"No complaint has reached the Government of the ill-treatment of cattle by pound-keepers, nor has any instance of the employment of an agent for the wrongful impounding of cattle been brought forward. On the introduction of the Local Self-Government Act, the management of pounds was transferred to the District Boards, who have power either to let them in farm or to manage them through their own servants. In 1891 and 1892 the administration of pounds in Bengal formed the subject of a searching enquiry, and it was then shown that the discontinuance of the farming system would deprive the District Boards of net revenue amounting on a moderate estimate to between two and three lakhs of rupees; while it was doubtful whether the change would put a stop to the evils alleged to exist under the farming system. At the same time orders were issued providing for—

(*a*) the regular and systematic inspection of pounds by the officers of Government and of the District Boards;

(*b*) the grant of leases for a longer period than one year to persons of known solvency and respectability, residing in the neighbourhood of the pound leased;

(*c*) an alteration in the form of agreement, so as to define better the District Board's power of control; and lastly

(*d*) the introduction of such registers and forms of receipt as would enable a proper check to be kept over the pound-keepers, without making unduly close enquiry into the amount of the farmer's profits when the pounds are let in farm.

"Failing specific evidence of actual abuses, there do not appear to be sufficient grounds for further enquiry or for interfering with the discretion now vested in the District Boards."

AMENDMENT OF THE CALCUTTA PORT ACT, 1890.

The Hon'ble MR. RISLEY moved that the Bill to amend the Calcutta Port Act, 1890, be referred to a Select Committee consisting of the Hon'ble Mr. Oldham, the Hon'ble Mr. Turner, the Hon'ble Mr. Spink, and the Mover.

The Motion was put and agreed to.

BENGAL GENERAL CLAUSES BILL.

The Hon'ble SIR CHARLES PAUL introduced the Bill for further shortening the language used in Bengal Acts, and for other purposes, and moved that it be read in Council.

He said:—"Last Saturday I explained to the Council the objects and reasons for introducing this Bill. It is a very necessary and useful measure, and I trust the Council will allow the introduction of this Bill."

The Motion was put and agreed to, and the Bill was read accordingly.

The Council adjourned to Saturday, the 13th August, 1898.

CALCUTTA;
The 10th August, 1898.

F. G. WIGLEY,
Offg. Asst. Secy. to the Govt. of Bengal,
Legislative Department.

RESOLUTION ON THE INLAND EMIGRATION REPORT FOR 1897.

GENERAL DEPARTMENT.—EMIGRATION.

Calcutta, the 2nd August 1898.

RESOLUTION—No. 2421.

READ—

The Report of the Superintendent of Emigration, Calcutta, on Inland Emigration for the year 1897.

THE appointment of Superintendent of Emigration was held by Dr. Macleod from the 1st January to the 14th February, by Dr. W. Forsyth from the 15th February to the 15th May, and by Dr. C. Banks from the 16th May to the end of the year.

2. In consequence of the prevalence of cholera amongst emigrant coolies, Surgeon-Captain J. C. Vaughan was appointed temporarily in March 1897 to be an Assistant Superintendent of Emigration within the territories administered by the Lieutenant-Governor. The period of his appointment lasted until the 3rd August 1897.

3. The report, which is in the usual form, traces the journey from the recruiting grounds to the labour districts of each class of emigrants by the recognised methods of recruitment—

(*a*) by licensed contractors;
(*b*) by local agents of the employers of labour;
(*c*) by garden sardars;
(*d*) by the free system.

While recognising the value and importance of the detailed figures and accounts tracing the history of each emigrant to his place of destination, the submission of which cannot be dispensed with, the Lieutenant-Governor would be glad if in future reports an attempt could be made to embody in the annual account of emigration, something more than statistical statements, which are practically all that the present report contains. During the year under review many important matters of interest formed the subject of discussion between the Superintendent, the Tea Association and Government, and he would have been glad to have received a brief *resumé* of the questions discussed, the orders passed on them, and the results attained.

4. *Contractors' Emigrants.*—Three licensed contractors maintained depôts in the Suburbs of Calcutta during the year, employing 15 recruiters, against 12 in the preceding year, who registered between them 5,227 coolies, against 4,164 in 1896. Of these all but 55 were registered in the 24-Parganas, which shows clearly, as was noticed last year, that contractors depend largely on the numerous free emigration depôts in Calcutta for their supply of labour. Of the coolies registered 63 per cent. were natives of Bengal; 18 per cent. came from the Central Provinces; 14 per cent. from Central India; 1 per cent. from the North-Western Provinces; and only 0·76 per cent. from the congested districts of Bihar. These details, however, are based on the statements of the emigrants themselves, and cannot be regarded as absolutely correct. Out of 5,227 emigrants 5,223 arrived in the Calcutta depôts, their numbers being diminished by one desertion, one death, and two releases. To this number must be added 155 coolies who were already in the depôts on the first day of the year, and four children who were born in them, raising the total number of persons accommodated in the depôts to 5,382. Of these, 117 were discharged, 200 deserted, 37 died, and 99 remained over in the depôts at the close of the year. The percentage of sickness during 1897 rose as high as 1·82 against percentages of 0·42, 0·26, and 0·86 in the three previous years, while the death-rate per mille was 6·87 against 1·41. These figures show a considerable increase in both sickness and mortality during the past year. No case of small-pox or of chicken-pox occurred during the year, and although there were some cases of measles, there were no resulting deaths. Cholera broke out in one depôt at Intally, causing 15 deaths. The depôt was at once closed for a month and disinfected, while certain structural improvements were made; no fresh outbreak of the disease occurred after it was re opened. The unusual prevalence of sickness in all the depôts is attributed to the scarcity and high prices of food-stuffs. The emigrants not only

increased in numbers, but arrived at the depôts in generally poor health and lowered physical condition. The percentage of contracts for four years on the total number of contracts registered rose to 81 as against 46 in the previous year.

The emigrants despatched to Goalundo numbered 4,950, including the 78 who were despatched from Calcutta on the 31st December 1896. Of these, 3,467 emigrants were landed in Assam and 1,470 in Sylhet and Cachar.

5. *Special Local Agents.*—Eight special local agents were licensed, against seven in the previous year. Their recruiting operations, which were confined to the districts of Manbhum, Lohardaga, and the Sonthal Parganas, resulted in the enlistment of 15,471 emigrants, or an average of 1,933 to each agent, against 1,134 in the previous year. This large increase is attributed to the prevailing scarcity, which made people more willing to leave their homes. The proportion of labourers to dependants was approximately two to one. Of the entire number, Manbhum contributed no less than 73 per cent., Lohardaga 24 per cent., and the Sonthal Parganas 2 per cent. Of the total number of emigrants, 13,998 were registered for Assam, 915 for Cachar, and 558 for Sylhet. Of these 11,983 were despatched to Goalundo, where they arrived without casualty; while at Goalundo there were 31 releases, 2 desertions and 12 deaths, thus reducing the number of emigrants to 11,938, of whom 9,967 were embarked for Assam, 905 for Cachar, and 1,066 for Sylhet. Of the number despatched to Assam, 15 deserted and 69 died, 63 of the deaths being due to cholera—a lower percentage, however, than in the previous year. There were two deaths among the coolies despatched to Cachar. No casualty occurred among the emigrants embarked for Sylhet. Fifty-one emigrants left for Assam *viâ* Dhubri, and duly arrived at their destination.

6. *Certificated Garden Sardars.*—There were 4,439 certificated garden sardars and 65 sardarnis, against 4,748 sardars and 73 sardarnis in 1896. The marginal table gives the number for each of the last five years; the decrease during the last two years has not been accompanied by any decrease in the numbers of emigrants registered, which have in fact largely increased. No licenses of local agents were cancelled, but 14 certificates of garden sardars were withdrawn at the instance of the managers. The number of coolies registered by garden sardars and sardarnis amounted to 18,775 and 184, against 9,037 and 93 in the previous year. This large increase is obviously attributable to the scarcity and high prices which, as has been noticed, increased emigration by other methods. But whereas the number of emigrants registered in Bengal was greater by 9,831 than in the previous year, the increase being specially remarkable in the districts of Hazaribagh, Manbhum, and Lohardaga, the numbers registered in Bihar decreased by 2. It may be inferred, therefore, that the relief works organised in the area actually stricken by famine, completely effected their purpose. Of the 18,959 emigrants, 15,931 were registered for Assam, 988 for Cachar, and 2,040 for Sylhet. The total number of emigrants who left the districts of recruitment during the year for embarkation at Goalundo was 21,136, of whom one was released and 35 died at Goalundo. Of the remaining 21,100, 17,267 were embarked for Assam, 1,674 for Cachar, and 2,159 for Sylhet. After leaving Goalundo, there were 169 deaths and 10 desertions among the Assam coolies, thus reducing the number of emigrants who arrived at their destinations to 17,088, while 3,821 reached Cachar and Sylhet after losing 11 by death and one by desertion. Out of 6,726 sardari emigrants who were despatched to Assam *viâ* Dhubri, 148 died and 11 deserted previous to embarkation, while 150 emigrants were subsequently landed on account of sickness, and 71 died.

Years.	Number of—		Local agents.
	Sardars.	Sardarnis.	
1893 ...	4,762	104	127
1894 ...	5,274	156	138
1895 ...	5,317	164	172
1896 ...	4,748	73	164
1897 ...	4,439	65	119

7. *Free Emigrants.*—The figures as to free emigration, which are only approximately accurate, are derived from information received from the Emigration Agents at Goalundo and Dhubri as to the numbers passing through these ports. Their reports show that 46,940 free emigrants left the recruiting districts for Goalundo and 7,994 for Dhubri, giving a total of 54,934 against 59,014 in 1896. It is noticeable that while emigration under all other methods has increased, the numbers of free emigrants has declined, though still

considerably in excess of 44,960, the figure during 1895. Dr. Banks has not specially dealt with this point, but it seems probable that in a season such as that of 1897, larger numbers of intendin gemigrants were anxious to avail themselves of the help on the road, which is provided by the Emigration Agencies. Of those travelling *vid* Goalundo, 50 deserted, 78 died, and 69 were released on the way to, and at, Goalundo, the total casualties being 197, compared with 63, during 1896. Of the remaining 46,744 emigrants, adding one child born on the way to Goalundo, 22,707 were bound for Assam, among whom there were 4 desertions and 80 deaths against 60 in the previous year. Of the 8,280 and 15,757 free emigrants embarked for Cachar and Sylhet, 8,277 and 15,741 respectively reached their destinations. Out of 7,994 free emigrants who were despatched to Dhubri, 7,807 eventually arrived, the casualties numbering 187, against 224 in the previous year. In addition to this number, 19,759 free emigrants who embarked at Goalundo were landed at Dhubri for the purpose of executing contracts, bringing the actual number of arrivals at Dhubri to 27,566. Of the number embarked at Dhubri 25,963 executed labour contracts, and the 1,130 proceeded as free emigrants. Among these there were two desertions, 246 were landed *en route* on account of sickness, and 108 died, or a percentage of total casualties slightly higher than in 1896.

8. *Execution of Contracts.*—The following statement gives the figures connected with the execution of contracts under the Assam Labour and Emigration Act, 1882:—

Place.	Three years.				Four years.				Grand Total.
	Contractors' coolies.	Special local agents' coolies.	Garden sardars' coolies.	Total.	Contractors' coolies.	Special local agents' coolies.	Garden sardars' coolies.	Total.	
1	2	3	4	5	6	7	8	9	10
Assam	.....	187	7,730	7,917	2,794	9,142	560	12,496	20,413
Cachar	81	253	228	572	247	342	244	853	1,425
Sylhet	613	223	508	1,344	.....	161	530	691	2,035
Total for 1897 ...	694	643	8,496	9,833	3,041	9,645	1,334	14,040	23,873
Total for 1896 ...	1,639	187	943	2,769	1,400	5,716	4,607	11,723	14,492

23,873 contracts were executed during the year, of which 41 per cent. were for three years, and 59 per cent. for four years. In 1896 the number was 14,492, of which 19 per cent. were for three years and 81 for four years. Taking the figures for Assam, Cachar and Sylhet separately, 39 and 61 per cent. of the Assam contracts were for three and four years respectively. Of those for Cachar, 40 were for three and 60 per cent. for four years, while for Sylhet 66 per cent. were for three and 34 for four years.

9. *Offences connected with emigration and inspection of depôts.*—The quarterly returns of offences connected with emigration submitted by District Officers, and their annual reports of inspection of cooly depôts, are dealt with separately, and need not be noticed here.

10. *Summary.*—The following table summarises the statistics of emigrants registered to proceed during the year from the recruiting districts to the labour districts in Assam *vid* Calcutta, Goalundo and Dhubri:—

	1896.				1897.			
	Vid Calcutta.	*Vid* Goalundo.	*Vid* Dhubri.	Total.	*Vid* Calcutta.	*Vid* Goalundo.	*Vid* Dhubri.	Total.
1	2	3	4	5	6	7	8	9
Number registered through licensed contractors.	4,164	.....	.....	4,164	5,227	.....	.....	5,227
Number registered through special local agents.	.....	7,347	593	7,940	.....	11,881	3,590	15,471
Number registered through certificated garden sardars.	.....	7,145	1,985	9,130	.....	15,519	3,440	18,959
Free emigrants	... ...	53,260*	5,754	59,014	.....	46,940*	7,994	54,934
Total	4,164	67,752	8,332	80,248	5,227	74,340	15,024	94,591

* *N.B.*—These figures include the free emigrants who were landed at Dhubri for execution of contracts.

The number recruited under the free system, though greater than the number recruited under the other systems put together, was smaller than in the previous year; emigration under all other methods of recruitment increased. The result of the year's operations shows that the number embarked for the labour districts in Assam in 1897 amounted to 99,011, including the number left over in the previous year, against 84,717 in 1896, an aggregate increase very much smaller than might have been anticipated in all the circumstances of the year.

11. *Transport.*—Special attention was given during the year to the accommodation and feeding of emigrants during their voyage on the river steamers, and it is reported that all suggestions for improvement were promptly carried out by the Companies concerned. Dr. Banks in commenting upon the mortality from cholera, which, while not excessive, still bears a high proportion to the cases attacked, remarks that a less fatalistic method of treatment by the medical officers concerned might lead to a larger percentage of recoveries. The average length of the river journey to Assam is now from seven to eight days, and to Cachar and Sylhet from three to four days. The Lieutenant-Governor observes that out of the batch way-bills of emigrants proceeding *viâ* Goalundo only 86 per cent. and of those covering emigrants *viâ* Dhubri only 78 per cent. were eventually returned to the Superintendent. Although the figures show some improvement over those of the previous year, yet seeing that the return of these documents is prescribed by rule, and that they form the principal source of information as to the casualties occurring *en route* after the coolies are once landed, the Lieutenant-Governor would like the Superintendent of Emigration to report whether it is not feasible to ensure the return of a larger proportion.

12. *Casualties.*—With the increase in the number of emigrants despatched to the labour districts during the year under report, there has been also an increase in the total number of casualties, which amounted to 2,507, or 2·53 per cent., against 1,623, or 1·89 per cent., in 1896. Deaths from cholera amounted to ·99 per cent, against ·58 in the preceding year, while the mortality from other causes rose from ·09 per cent. in 1869 to ·12 per cent. in 1897. The number of casualties amongst free emigrants increased from 1·79 per cent. in 1896 to 2·53 per cent. in 1897. The number of deaths amongst this class of emigrants was greater by 243 than in the previous year, being ·98 per cent. in 1897 against ·50 per cent. in 1896.

13 *General.*—The subject of the general improvement of the conditions of emigration continues to occupy the attention of Government, and, as noted in the Resolution of the previous year, the report of the Labour Enquiry Commission was submitted with the views of Sir Alexander Mackenzie to the Government of India in December 1896. The matter is still under the consideration of that Government in connection with the amendment of Act I of 1882, but it is hoped that early conclusions may now be arrived at on the very important recommendations of the Commission.

14. Pending the decisions of the larger issues as to the amendment of the existing law, the improvement of the arrangements under the rules now in force has formed the subject of discussion. In addition to the measures mentioned in last year's Resolution as having been adopted on Dr. Vaughan's recommendations, the rules under Act I of 1882 and Act I (B.C.) of 1889 have now been revised, and a scheme devised for controlling the passage of emigrants with a view of securing a steady and regulated flow of traffic, and avoiding the periods of overcrowding which are liable to occur under the present system. The main feature of the scheme is the restriction of emigration under ordinary conditions to two main routes,—the one *viâ* Goalundo by which the majority of emigrants will travel, and the other *viâ* Jatrapur for the special convenience of coolies proceeding from districts north of the Ganges. When emigration has thus been brought into two main streams, over which a more efficient supervision can be exercised, it is proposed to have regular telegraphic communications between the different prescribed halting places, by which it will be possible to delay the departure of batches of coolies from one stage, until accommodation for their reception is ready at the next,

The halting-places will be selected at suitable stations with regard both to healthy accommodation and to the length of the journey. The introduction of the scheme has been delayed by the necessity for discussion with other Provinces, but the general assent of the Administrations of Assam and the Central Provinces has now been given; and as the rules were originally framed in consultation with the representatives of the Tea Association, the Lieutenant-Governor expects that the revised rules may obtain the approval of the Government of India before the next emigration season. Schemes for the segregation of infected batches of coolie emigrants and for the inoculation of emigrants against cholera are also being discussed in consultation with the Chief Commissioner of Assam, the Bengal Chamber of Commerce, and the Indian Tea Association. With the introduction of these measures, Sir John Woodburn hopes to see the rates of sickness and mortality among emigrant coolies reduced. The success of some of the proposals under consideration will depend upon the voluntary co-operation of the parties concerned, and he does not doubt that this will be willingly accorded, as the object which it is sought to attain is to the common advantage of all persons interested.

15. The survey of three several projects for the opening of the Chota Nagpur country by railway has been sanctioned by the Government of India, and is now being carried out. The completion of a railway in these regions will undoubtedly facilitate the supply of labour to Assam.

16. The thanks of the Lieutenant-Governor are tendered to Dr. Banks for the efficient and zealous discharge of his duties as Superintendent of Emigration, and to Dr. Vaughan for the thorough manner in which he performed the duties assigned to him and for the valuable suggestions he made towards securing the improved health and comfort of emigrants.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secretary to the Government of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 1st August 1898.

Burdwan.—Rainfall at Sadar 0·42, Kalna 1·15, Katwa 1·42, Raniganj 1·33. Weather hot and cloudy. Cultivation of paddy continues. More rain is urgently wanted everywhere. Sugarcane doing well. Fodder and water sufficient. A few cases of cattle-pox reported. Common rice selling as follows:—

	Srs.	
Sadar	11 to 17	per rupee.
Kalna	10½ to 12	
Katwa	12⅝	
Raniganj	12¼	

Birbhum.—Rainfall at Sadar ·57, Rampur Hât 2·42. Weather cloudy and rainy. Transplantation continues. Sugarcane doing well. Prices stationary. Fodder sufficient.

Bankura.—Rainfall at Bankura 1·16, Vishnupur 1·54. Weather hot and generally cloudy with occasional drizzling rain. More rain wanted for transplantation. Fodder and water sufficient. Common rice sells at 14 seers per rupee at Bankura and 13½ seers at Vishnupur.

Midnapore.—Rainfall at Sadar 2·62, Contai 1·84, Tamluk 3·56, Ghatal 0·96. Prospects of sugarcane and indigo good. Cultivation of paddy going on briskly and favourably in inundated tracts. It is retarded for want of rain in the south and the extreme north. Damage by grasshoppers reported from Sadar. Common rice selling as follows:—

	Srs.	
Sadar	12	per rupee.
Contai	12 to 14	
Tamluk	11 srs. 10 ch.	
Ghatal	12 to 13	

Hooghly.—Rainfall at Sadar ·79, Serampore 2·06, Jahanabad ·82. Jute, *aus*, and sugarcane doing well. More rain wanted for the transplantation of *aman* paddy. Common rice sells from 10½ to 12 seers per rupee.

Howrah.—Rainfall at Sadar 2·59, Ulubaria 1·18. Weather hot and cloudy. Transplantation of *aman* going on. *Aus*, jute and sugarcane progressing, but more rain is wanted. Supply of fodder and water sufficient. Common rice sells at 11 to 12 seers per rupee

24-Parganas.—Rainfall at Sadar 1·80, Barasat 4·23, Basirhat 3·57, Diamond Harbour 2·68. Weather rainy and cloudy. *Aus* and *jute* doing well. Transplantation of *aman* going on. More rain is wanted at the Sadar to complete transplantation. Cattle-disease reported from police-station Rangafula in Diamond Harbour. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	10 to 12	per rupee.
Barasat	11	
Basirhat	13	
Diamond Harbour	11	

Nadia.—Rainfall at Sadar 2·61, Meherpur 3·35, Chuadanga 2·37, Ranaghat 1·75, Kushtia 1·62. Weather hot and cloudy. Common rice selling at 10 to 12½ seers per rupee. Prospects of standing crops good. Fodder and water sufficient. No cattle-disease.

Murshidabad.—Rainfall at Sadar 1·70, Jangipur 0·39, Kandi not received. Weather seasonable. *Bhadoi* and jute plants doing well. Transplantation of *aman* paddy still going on. Prospects of indigo good. Mulberry hopeful. Fodder and water sufficient. No cattle-disease reported Common rice sells as follows:—

	Srs.	
Sadar	11	per rupee.
Jangipur	13⅓	

Jessore.—Rainfall at Jessore 2·77, Jhenida 0·79, Magura 1·67, Narail 4·14, Bangaon 1·97. Weather hot, close and cloudy with occasional light showers. State and prospect of standing crops good. More rain wanted for the development of the young paddy plants. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

		Srs.	
Jessore	... ...	11 to 13	per rupee.
Jhenida	... ...	11	
Magura	... ...	11 to 12	
Narail	... ...	12	
Bangaon	... ...	11½ to 12½	

Khulna.—Rainfall at Sadar 9·72, Satkhira 3·47, Bagerhat 3·88. Weather seasonable. Transplantation of *aman* going on. Prospects of *aus* good. Fodder and water available. Common rice sells as follows:—

		Srs.	
Sadar	... ...	11 to 13	per rupee.
Satkhira	... ...	13	
Bagerhat	... ...	12½	

Rajshahi.—Rainfall at Sadar 0·43, Nator 1·53, Naugaon 2·74. Prospects of crops good. Transplantation of *ropa* paddy continues. Cutting and steeping of jute commenced. No cattle-disease. Fodder and water plentiful. Common rice sells from 10 to 15 seers per rupee.

Dinajpur.—Average rainfall 2·10. Weather seasonable with occasional showers of rain. Cutting of jute and *bhadoi* in progress. Transplantation of *haimanti* in full swing. No cattle-disease. Fodder and water sufficient. Rice selling at 13 seers per rupee.

Jalpaiguri.—Rainfall at Sadar ·83, Alipur Duars 1·49. Weather hot and cloudy. Harvesting of *bhadoi* continues. Transplantation of *haimanti* going on. Condition of standing crops favourable. Fodder and water sufficient. Common rice sells from 7. 14 seers per rupee.

Rangpur.—Rainfall at Sadar 3·70, Gaibanda 2·25, Kurigram 0·16, Nilphamari 2·30. Harvesting of *aus* and transplantation of *aman* going on. Cutting of jute continues. Prospects fair. Common rice selling at 10½ to 13 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 1·38. Transplanting of *aman* has commenced. *Aus* is being reaped. Fodder and water sufficient. Common rice selling from 10½ to 13½ seers per rupee.

Pabna.—Rainfall at Sadar 2·14, Sirajganj 2·43. Weather cloudy and rainy. State and prospects of crops good. Common rice 10 to 12 seers per rupee. Some cattle-disease in Sirajganj subdivision now dying out.

Dacca.—Rainfall at Sadar 2·93, Manikganj 1·41, Munshiganj 2·22, Naraingani 3·02. Weather hot and cloudy. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice 10 to 12 seers per rupee.

Mymensingh.—Rainfall at Sadar 0·77, Netrokona 2·93, Jamalpur 2·72, Kishorganj 1·16, Tangail 0·65. Weather dull and showery. Crops doing well. More rain wanted in parts. Fodder and water ample. Common rice selling at 9 to 11 seers per rupee.

Faridpur.—Rainfall at Sadar 1·39, Goalundo 1·01, Madaripur ·84. Weather seasonable. Prospects good. Rice sells at 12 to 13 seers per rupee.

Backergunge.—Rainfall at Sadar 9·51. Weather showery. Prospects of crops fair. Common rice sells from 10 to 13 seers per rupee.

Tippera.—Rainfall at Sadar 2·87, Brahmanbaria 1·72, Chandpur 3·88. Weather seasonable. Agricultural operations continue. Prospects of standing crops favourable. Fodder sufficient. Rice sells at 9 to 11 seers per rupee.

Noakhali.—Rainfall at Sadar 9·49, Feni 3·51. Prospects of standing crops favourable. Cattle-disease disappeared. Fodder and water sufficient. Price of common rice 11 to 12 seers per rupee.

Chittagong.—Rainfall 8·21. Weather seasonable. *Aus* plantation thriving. Cultivation of *aman* in progress. Prospects favourable. Rice selling at 11 seers per rupee.

Bankipore.—Rainfall at Sadar 2·30, Barh 1·20, Bihar 2·10, Dinapur 2·14, Hilsa 4·45, Bikram 2·69. Transplantation of paddy going on, but more rain wanted. *Bhadoi* crops doing well. Prices risen slightly. No cattle-disease. Common rice sells in Patna at 14½ seers against 15 seers per rupee in previous week.

Gaya.—Rainfall at Sadar 1·86. Transplanting of paddy continues. *Bhadoi* crops doing well. Common rice selling at 13 seers per rupee.

Shahabad.—Rainfall at Sadar ·58, Buxar 1·21, Sasaram 2·69, Bhabua 3·89. Transplantation of paddy and weeding of *bhadoi* continue. Standing crops excellent. Common rice selling at 12 to 14 seers per rupee at Sadar.

Saran.—Rainfall at Sadar ·85, Siwan ·33. Weather sultry. Indigo and other standing crops very good. Paddy being transplanted. More rain wanted for low lands, especially in north. Fodder and water sufficient. Average price of common rice 12·13 seers, and of *makai* 21·3 seers against 13·3 and 19·9 seers normal prices.

Champaran.—Rainfall at Motihari ·25, Bettiah ·25, Burharwa 1·85, Bagaha and Ramnagar 1·00. Weather hot and cloudy. *Bhadoi* doing well. Transplantation of paddy going on. More rain wanted. Indigo manufacture nearly finished. Price of common rice unchanged. Fodder and water sufficient.

Muzaffarpur.—Rainfall at Sadar ·43, Hajipur 1·65, Sitamarhi ·29. Transplantation of paddy still in progress. *Bhadoi* crops doing well. Prices are—common rice 12 to 13 seers, wheat 15 to 16 seers, barley 23 seers, *makai* 21 seers, gram 19 seers, and *rahar* 22 seers per rupee.

Darbhanga.—Rainfall at Sadar 0·9, Samastipur ·26, Madhubani ·34. Weather cloudy with east wind. Transplantation of paddy is retarded for want of sufficient rain. Weeding of *makai* and *marua* in progress. Prospects of standing crops good. Fodder and water sufficient. Common rice sells at 11 seers per rupee at Sadar.

Monghyr.—Rainfall at Monghyr 0·74, Begusarai ·06, Jamui 4·02. Weather hot and cloudy with slight showers during latter part of the week. Transplantation of winter paddy going on. Standing crops doing well, but more rain is urgently wanted. No cattle-disease. Common rice sells as follows:—

Monghyr	...	...	...	11 to 14 seers	per rupee.
Begusarai	...	...	...	11 to 13 „	„
Jamui	...	...	...	14 „	„

Bhagalpur.—Rainfall at Sadar 3·92, Banka 0·49, Madhipura 0·43. Weather seasonable. More rain is wanted for the transplantation of winter rice seedlings. *Bhadoi* crops doing well. Cattle-disease reported from parts of the Supaul subdivision. Prices steady.

Purnea.—Rainfall at Sadar 3·18, Kishanganj 0·42, Araria 1·52. Weather hot and cloudy. Transplantation of *aghani* rice going on. Standing crops suffering for want of rain. More rain wanted throughout the district. Cattle-disease reported from Sikti and Matiari in Araria subdivision. Fodder and water sufficient. Common rice sells as follows:—

Sadar	...	...	...	14½ seers	per rupee.
Kishanganj	...	...	...	14 „	„
Araria	...	...	...	15 „	„

Malda.—Rainfall at Sadar ·80, Chanchal 1·94, Shibganj ·54, Gajolo 1·38. Weather hot and cloudy with occasional showers. *Bhadoi* paddy coming into maturity. Transplanting of winter rice progressing. More rain wanted. Common rice selling at 12 seers per rupee.

Sonthal Parganas.—Average rainfall 1·69. Rain wanted for transplantation of rice everywhere except in Dumka and especially in Jamtara, where rainfall was only 0·41. Prospects of maize and millets excellent. Fodder and water ample. Price of rice 13 to 15 seers, and of maize 18 to 22 seers per rupee.

Cuttack.—Rainfall at Sadar 1·18, Jajpur 3·37, Banki 4·57. Weather showery and cloudy, but more rain wanted. *Sarad*, *beali*, and sugarcane growing. Cotton being plucked. Condition of cattle generally good, but disease still prevails in places. Fodder sufficient. Common rice sells as follows:—

					S.	ch.	
Cuttack	...	...	...	...	13	2	per rupee.
Jajpur	...	...	...	...	15	12	
Kendrapara	...	...	...	...	17	1	
Banki	...	...	...	...	15	12	

Balasore.—Rainfall at Sadar ·94. More rain wanted. Puddling and transplantation of *sarad* continue. *Beali* being weeded. Sugarcane, jute, and other standing crops growing well. Price of rice varies from 13 to 18 seers per rupee in the interior. Rice sells at 13 and 16 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rainfall at Angul 2·15 and at Khondmals 4·65. Transplantation in progress. *Kuhari* being gathered. Rice sells at 20 seers per rupee at Angul and 12 seers at Khondmals.

Puri.—Rainfall at Puri 4·23, Khurda 4·21. Weeding and transplanting of paddy crops going on. Prospects of *mandia* and sugarcane crops good. Fodder and water sufficient. No cattle-disease reported. Price of common rice almost stationary.

Hazaribagh.—Rainfall at Sadar 1·31, Giridi 2·84. Drizzling rain. More rain wanted. Prospects of crops fair. Rice sells at 10 to 12 seers per rupee.

Lohardaga.—Rainfall at Sadar 3·96. Transplantation continues. State of standing crops good. Rice sells at Ranchi 11 seers per rupee, and in the interior from 12 to 16 seers per rupee. Cattle-disease reported from interior. Fodder and water sufficient.

Palamau.—Rainfall at Sadar 0·75. Weather seasonable. *Bhadoi* doing well. Paddy transplantation going on. Prices stationary.

Manbhum.—Rainfall at Sadar 2·44, Gobindpur 1·87. Weather seasonable. Prospects of crops on ground good. Transplantation of paddy in full swing. Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall ·25. More rain is needed. Rice plentiful—12 to 14 seers per rupee.

General Summary.—There was general rain in all parts of the Province during the week, but more rain is still wanted in many districts in the Burdwan, Patna, and Bhagalpur Divisions for purposes of transplantation. The condition of *bhadoi* crops and of sugarcane and jute is favourable. The transplantation of *paddy* is still going on, and the harvesting of early rice and jute is in progress. The prospects of indigo are good. Prices are almost stationary except in Patna, where they are reported to have risen slightly. The supply of fodder and water is sufficient. Condition of cattle is generally good, but disease is still prevailing in several districts.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 2nd August 1898.

M. FINUCANE,
Secretary to the Govt. of Bengal.

The total fall from 1st January to 30th July 1898	27·30
The average fall of the corresponding period for 24 years, Surveyor-General's Office	33·68

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; <, lightning.

WEATHER AND CROP REPORT.

For the week ending the 8th August 1898.

Burdwan.—Rainfall at Sadar 3·48, Kalna 6·66, Katwa 4·83, Raniganj 3·70. Weather seasonable. Crop prospects excellent. A few cases of cattle-pox still reported. Common rice selling as follows:—

	Srs.	
Sadar	11 to 17	per rupee.
Kalna	10½ to 12	
Katwa	12⅔	
Raniganj	12¼	

Birbhum.—Rainfall at Sadar 6·33, Rampur Hât 2·85. Weather cloudy and rainy. Transplantation continues. Prospects good. Price of rice at Sadar 12·12 seers and at Rampur Hât 13 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Bankura 1·67, Vishnupur 2·65. Weather variable. No rain during the first half of the week; some has fallen since, but more is wanted for transplantation. Sugarcane doing well. Fodder and water sufficient. No cattle-disease reported. Common rice sells at 13¾ seers per rupee at Sadar and 12½ seers at Vishnupur.

Midnapore.—Rainfall at Sadar 1·77, Contai ·85, Tamluk ·37, Ghatal ·78. Re-cultivation going on favourably in the flooded parts. Transplantation elsewhere much retarded for want of rain. Damage to paddy plants by grasshoppers reported from Gopiballavpur, and cattle-disease from Nayagram and Danton police stations. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	12	per rupee.
Contai	12 to 13	
Tamluk	11⅔	
Ghatal	12 to 13	

Hooghly.—Rainfall at Sadar 1·61, Serampore 2·69, Jahanabad 3·45. Transplantation of *aman* is being pushed on well in Jahanabad; large area in Serampore and Sadar left out for want of rain. Common rice sells from 10 to 12 seers per rupee.

Howrah.—Rainfall at Sadar 1·17, Ulubaria ·42. Weather cloudy with drizzling rain. Transplantation of *aman* going on, but more rain is urgently wanted. *Aus* doing well. Fodder and water sufficient. Common rice sells at 10 to 12 seers per rupee.

24-Parganas.—Rainfall at Sadar 1·87, Barasat 3·80, Basirhat 4·55, Diamond Harbour ·85. Weather rainy and cloudy. *Aus* and jute doing well. Transplantation of *aman* going on. More rain is still required in Diamond Harbour. Fodder and water sufficient. Cattle-disease reported from thana Sonarpur in the Sadar subdivision and some parts of the Basirhat and Diamond Harbour subdivisions. Common rice sells as follows:—

		Srs.	
Sadar	10 to 12	}	per rupee.
Barasat	10½		
Basirhat	13

	Srs.	
Sadar	11½	} per rupee.
Jangipur	13¼	
Kandi	13¾	

Jessore.—Weather hot, close and damp, with frequent light showers. Rainfall at Jessore 3·06, Jhenida 5·25, Magura 5·15, Narail 2·99, Bangaon 2·77. The rainfall during the week has been of much benefit to the standing crops. Harvesting of *aus* and manufacturing of indigo commenced in places. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Jessore	11 to 13	} per rupee.
Jhenida	11 to 12	
Magura	12	
Narail	12 5/16	
Bangaon	11½ to 12½	

Khulna.—Rainfall at Sadar 5·15, Satkhira 4·69, Bagerhat 5·34. Weather seasonable. Transplantation of *aman* going on. Prospects of *aus* good. Fodder and water available. Common rice sells as follows:—

	Srs.	
Sadar	11 to 13	} per rupee.
Satkhira	13	
Bagerhat	12½	

Rajshahi.—Rainfall at Sadar 5·13, Nator 1·25, Naugaon 2·97. Standing crops doing well. Transplantation of *aman* paddy continues. No cattle-disease. Fodder and water ample. Rice sells from 10 to 15 seers per rupee.

Dinajpur.—Average rainfall 5·13. Weather seasonable. Cutting and harvesting of jute and *bhadoi* paddy going on. Transplantation of *haimanti* paddy vigorously progressing. Cattle-disease reported from Thakurgaon subdivision. Fodder and water ample. Common rice selling at 13 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 3·00, Alipur Duars 4·53. Weather showery. Harvesting of *bhadoi* and transplantation of *haimanti* going on. Standing crops doing well. More rain wanted for the *haimanti* paddy. Fodder and drinking-water sufficient. Common rice sells from 7 to 14 seers per rupee.

Darjeeling.—Rainfall at Darjeeling 9·89, Kurseong 14·27, Siliguri 8·51. Weather seasonable. *Hills*—*Haimanti* paddy and *bara marua* being transplanted; potatoes being harvested; *bhutta* and *chhota marua* progressing. *Terai*—transplantation of *haimanti* paddy going on. *Jamira* paddy being reaped; jute, *bhadoi*, and sugarcane doing well. Coarse rice sells as follows:—

Hills—8 to 11 seers per rupee.
Terai—13 to 15 „ „ „
Bhutta sells from 16 to 28 seers per rupee.

Rangpur.—Rainfall at Sadar 2·52, Gaibanda 4·23, Nilphamari 3·80, Kurigram 3·08. Weather hot. Harvesting of *aus* and transplanting of *aman* going on. Prospects fair. Cutting of jute continues. Common rice selling at 10½ to 13 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 6·23. Transplanting of *aman* going on. *Aus* and jute being reaped. Fodder and water sufficient. Common rice selling from 10½ to 13½ seers and *aus* from 13½ to 15¾ seers per rupee.

Pabna.—Rainfall at Sadar 1·38, Sirajganj 6·79. Weather cloudy and rainy. Rivers falling and steeping of jute impeded at Sirajganj, otherwise prospects of crops good. Common rice sells from 9½ to 14 seers per rupee.

Dacca.—Rainfall at Sadar 10·77, Manikganj 3·48, Munshiganj 3·32, Narainganj 3·63. Weather hot and rainy. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice 10 to 13 seers per rupee.

Mymensingh.—Rainfall at Sadar 3·39, Kishorganj 5·33, Tangail 4·21, Netrokona 3·28, Jamalpur 6·74. Weather dull and showery. Prospects of all crops good. Transplantation of *aman* backward for want of heavy rain. Fodder and water ample. Common rice selling at 13 seers per rupee at Netrokona and 10 to 11 seers elsewhere.

Faridpur.—Rainfall at Sadar 6·07, Goalundo 4·71, Madaripur 5·78. Weather seasonable. Prospects of crops good. Rice sells from 11 to 13 seers per rupee.

Backergunge.—Rainfall at Sadar 3·40. Weather moist. Prospects of crops fair. Common rice sells from 10 to 13 seers per rupee.

Tippera.—Rainfall at Sadar 2·33, Chandpur 5·59, Brahmanbaria 3·64. Weather rainy and damp. *Aus* and jute being cut. *Aman* paddy doing well. Cattle-disease reported from thana Bancharampur. Fodder and water sufficient. Rice sells at 9 to 12 seers per rupee.

Noakhali.—Rainfall at Sadar 11·39, Feni 13·21. Prospects of crops good. Cattle-disease reported from Chagalnya. Fodder and water sufficient. Price of rice 9 to 13 seers per rupee.

Chittagong.—Rainfall 6·99. Weather seasonable. *Aus* plants thriving. Cultivation of *aman* in progress. Prospects favourable. Rice selling at 11 seers per rupee.

Patna.—Rainfall at Sadar 3·50, Barh 7·75, Bihar 2·98, Dinapur 3·55, Hilsa 3·5, Bikram 3·40. Transplantation of paddy going on. Prospects of *bhadoi* crops good. Prices slightly improved. In Patna common rice sells at 15 seers a rupee. Fodder and water for cattle sufficient.

Gaya.—Rainfall at Sadar 4·16, Jahanabad 10·55, Aurangabad 4·54, Nawada 2·95. Transplantation of paddy in progress. *Bhadoi* crops doing well. Common rice selling at 13 seers per rupee.

Shahabad.—Rainfall at Sadar 3·09, Buxar 1·60, Sasaram 7·29, Bhabua 3·85. Standing crops excellent. Transplantation continues. More rain wanted. *Sawan* being cut in places in Bhabua. Rice selling at 12 to 14 seers per rupee.

Saran.—Rainfall at Sadar 2·22, Siwan 2·09, Gopalganj 3·24. Weather seasonable. Indigo and other *bhadoi* crops very good. More rain wanted for transplantation of paddy Fodder and water sufficient. Average prices are—common rice 12·14 seers, and *makai* 20·15 seers per rupee.

Champaran.—Rainfall at Motihari 1·17, Bettiah 4·85, Burharwa 5·75, Bagaha ·66. Ramnagar 2·30. Weather cloudy and showery. Weeding of *bhadoi* and transplanting of *aghani* progressing. More rain required for the latter. *Bhadoi* crops doing well. *Kodo* millet being gathered. Cattle-disease reported from Mainatand in the Bettiah subdivision, Fodder and water sufficient. Price of common rice unchanged.

Muzaffarpur.—Rainfall at Sadar 5·88, Hajipur 1·9, Sitamarhi ·87. Prospects very hopeful. Transplantation of the rice crop is being pushed on everywhere. Prices are—common rice 11 to 13 seers, wheat 15 to 16 seers, barley 23 to 24 seers, *makai* 22½ seers, gram 20 seers, and *rahar* 22½ seers per rupee.

Darbhanga.—Rainfall at Sadar 2·04, Samastipur 6·26, Madhubani 3·81. Weather cloudy and rainy with east wind. *Bhadoi* much benefited by the rainfall of this week. Transplantation of paddy continues. More rain wanted for transplantation. Fodder and water sufficient. Common rice sells at Sadar 11 seers per rupee.

Monghyr.—Rainfall at Monghyr 2·96, Begusarai 2·53, Jamui 3·63. Weather hot in the beginning of the week; latterly rainy. Transplantation of winter paddy continues. Standing *bhadoi* crops doing well. No cattle-disease. Common rice sells as follows:—

Monghyr	...	...	...	12 to 14 seers	per rupee.
Begusarai	...	...	...	11 to 13 „	„
Jamui	...	...	...	14 „	„

Bhagalpur.—Rainfall at Sadar 2·57, Banka 2·21, Madhipura 2·34, Supaul 1·96. Weather seasonable. More rain needed in all parts to complete transplantation of paddy seedlings. Prospects of *bhadoi* crops continue favourable. Prices stationary.

Purnea.—Rainfall at Sadar 2·58, Kishanganj 3·48, Araria 7·96. Weather hot and cloudy. Harvesting of *bhadoi* rice and jute commenced. Transplantation of *aghani* rice still continues. More rain wanted. Standing crops flourishing. Cattle-disease still reported from Matiari, Ramganj and Sikti in the Araria subdivision. Fodder and water sufficient. Common rice sells as follows:—

Purnea	...	...	...	14½ seers per rupee.
Kishanganj	...	...	...	14 „
Araria	...	...	...	15 „

Malda.—Rainfall at Sadar 4·65, Chanchal 3·07, Shibganj 6·42, Gajole 2·42. Weather hot and cloudy with occasional showers. Transplantation of winter paddy continues. *Bhadoi* paddy is being harvested in some places. Price of coarse rice stationary at 12 seers per rupee. Fodder ample.

Sonthal Parganas.—Average rainfall 3·20. Transplantation of paddy going on briskly, but more rain is wanted in Pakour and parts of Jamtara. Price of rice 13 to 15 seers, and of maize 18½ to 24 seers per rupee.

Cuttack.—Rainfall at Jajpur 1·31, Banki ·39. Weather cloudy and showery, but more rain wanted. *Sarad* being transplanted. *Beali* in ear. Cotton being plucked. Sugarcane growing. Condition of cattle generally good, but disease still prevails in places. Fodder sufficient. Common rice sells as follows:—

					S.	ch.	
Cuttack	...	...	...	...	13	2	per rupee.
Jajpur	...	...	...	...	15	12	
Kendrapara	...	...	...	...	17	1	
Banki	...	...	...	...	15	12	

Balasore.—Rainfall at Sadar 4·11. Puddling and transplantation retarded till three days ago for want of sufficient rain. Weeding of *beali* continues. Sugarcane, jute and other standing crops growing well. Price of rice varies from 13 to 17 seers per rupee in the interior. Rice sells at 13 and 15 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rainfall at Angul ·77 and at Khondmals 1·58. Transplantation of winter rice retarded for want of sufficient rain. In Khondmals *makai* and *kuhari* crops are being gathered. Rice sells at Angul 20 seers per rupee.

Puri.—Rainfall at Puri ·89, Khurda 3·34. Weeding and transplanting of *sarad* paddy continue. *Beali* and *maudia* are growing well. Prospects of sugarcane good. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

					Srs.	ch.	
Puri	...	...	...	...	13	2	per rupee.
Khurda	...	...	...	...	13	2	
Interior of district	...	...	...	...	14 to 15	2 to 12	

Hazaribagh.—Weather cloudy with drizzling rain, Sadar ·96, Giridi 2·10. Transplantation still going on, but more rain wanted. Prospects of standing crops good. Rice sells at 10 to 12 seers per rupee.

Lohardaga.—Rainfall at Sadar 4·04. Transplantation continues. State of standing crops good. Rice sells at Ranchi 11 seers per rupee, and in the interior from 11 to 16 per rupee. Cattle-disease continues. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—Rainfall at Sadar 2·34. Weather seasonable. Transplantation of paddy continues. Standing crops in good condition. Rice sells at 13 to 15 seers per rupee.

Manbhum.—Rainfall at Sadar ·91, Gobindpur 1·90. Weather seasonable. Prospects of crops good. Cattle-disease reported from thana Topchanchi. Fodder and water sufficient. Average price of common rice at Sadar 12 seers and at Gobindpur 11 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 1·52. More rain is wanted. Prices stationary.

General Summary.—There was general rain during the week, though not in all cases sufficient. More rain is still required in several districts for the transplantation of the winter rice seedlings. The prospects of early rice and jute and of other *bhadoi* crops are generally favourable. Sugarcane and indigo crops are promising. Early rice and jute are being harvested in parts. The price of rice is still practically stationary. There is no want of fodder, but some cattle-disease is reported.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 9th August 1898.

M. FINUCANE,
Secretary to the Govt. of Bengal.

STOCKS OF RICE IN AND AROUND CALCUTTA.

M. FINUCANE,
Secretary to the Govt. of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of July 1898.

	Inches.	Date.	Hour.
The mean pressure of the month	29·529		
The average pressure of July from 24 years' registers ...	29·537		
The highest pressure in the month	29·635	20th	10
The lowest pressure in the month	29·345	2nd	16
The range of pressure	0·290		
	Hours.		
The total number of hours of bright sunshine during the month	99·7		
The maximum possible number of hours of sunshine ...	413·1		
	⊖		
The mean temperature of the month	82·6		
The average temperature of July from 24 years' registers ...	83·5		
The highest temperature in the month	92·1	25th	
The lowest temperature in the month	75·4	17th	
The range of temperature during the month	16·7		
The mean daily range of temperature	9·0		
The greatest range of temperature in one day	14·2	24th	
	Per cent.		
The mean humidity of the month	89		
The average humidity of July from 24 years' registers ...	85		
	Inches.		
The mean vapour tension of the month	0·990		
The average vapour tension of July from 9 years' registers ...	1·002		
The mean cloud proportion of the month	7·99		
The average cloud proportion of July from 21 years' registers ...	7·92		
	Ins.		
The total rainfall of the month	12·75		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	12·32		
The average fall of July from 48 years' registers	12·84		
The greatest fall in 24 hours	2·80	5th	
	Days.		
The number of rainy days in the month	28		
The average number of rainy days in July from 24 years' registers	25		
	⊙		
The mean maximum equilibrium temperature of solar radiation during the month	142·0		
The mean difference of sun and air temperatures	55·0		
The greatest sun temperature	154·2	28th	
The greatest excess of sun over air temperature	66·1	6th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	76·6		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	1·6		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	3·1	28th	
	Miles.		
The mean movement of the wind per day	99·7		
The greatest movement of the wind in one day	159·0	31st	
The greatest movement of the wind in one hour	15·0	6th, 6 to 7 p.m.	

The number of hours with winds from each of the 8 points—
N. 3, N.E. 21, E. 124, S.E. 184, S. 202, S.W. 160, W. 19, N.W. 0, Calm 31.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6° higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Calcutta, the 8th August 1898.

Abstract of the Results of the Barometric and Thermometric Observations taken at 10 a.m. at the Meteorological Office, Chowringhee, in the month of July 1898.

	Inches.	Date.
The mean pressure at 10 A.M. during the month	29·562	
The mean temperature at 10 A.M. during the month	85 2	
The highest temperature during the month	94·8	25th
The lowest temperature during the month	76·3	17th
The absolute range of temperature during the month	18·5	
The mean daily range of temperature during the month ...	11·1	
The greatest range of temperature in one day during the month ...	15·7	24th.
	%	
The mean 10 A.M. humidity during the month	85	
	Inch.	
The mean 10 A.M. vapour tension during the month	1·021	
The total rainfall of the month	12·35	
The greatest fall in 24 hours	2·53	17th
The number of rainy days in the month	19 days.

	Inches.
The mean pressure of the seven days	29·491
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29 580
	Hours.
The total number of hours of bright sunshine	21·1
The maximum possible number of hours of sunshine	91 6
The mean temperature of the seven days	83·7
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	82 9
The extreme variation of temperature	12 4
The maximum temperature	90 4
	Miles.
The highest velocity of the wind in one hour	12
	%
The mean relative humidity	88
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	87
	Inches.
The total fall of rain from 31st July to 6th August 1898	1·64
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3·75
The total fall from 1st January to 6th August 1898	28·94
The average fall of the corresponding period for 24 years, Surveyor-General's Office	37·43

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the New Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder.

WORKING OF THE LICENSED WAREHOUSE AND FIRE-BRIGADE ACT, I OF 1893, IN THE HOWRAH MUNICIPALITY DURING THE YEAR 1897-98.

No. 4949M.—The 13th August 1898.—The following report is published for general information in accordance with the provisions of section 41 of the Licensed Warehouse and Fire-brigade Act, I of 1893.

H. H. RISLEY,

Secy. to the Govt. of Bengal.

ANNUAL REPORT FOR 1897-98 UNDER THE LICENSED WAREHOUSE AND FIRE-BRIGADE ACT, I OF 1893, AS AMENDED BY ACT I OF 1894.

Dated Howrah, the 15th June 1898.

From—F. W. DUKE, Chairman of the Howrah Municipality,
To—The Magistrate of Howrah.

I HAVE the honour to report that 297 warehouses were licensed in 1897-98 of the 394 registered in this year, against 278 in 1896-97 of the 375 registered in that year; the details being as follows:—

YEAR.	Jute.	Cotton.	Straw.	Wood.	Rags.	Hay.	Total.	REMARKS.
1	2	3	4	5	6	7	8	9
Registered.								
1896-97 ...	30	37	91	213	1	3	375	Exemptions under Notification No. 2853M., dated the 14th August 1893, account for the difference between the number of registered and licensed warehouses.
1897-98 ...	30	39	92	230	..	3	394	
Licensed.								
1896-97 ...	26	31	46	171	1	3	278	
1897-98 ...	28	32	56	178	...	3	297	

2. The income from license fees during the year under report amounted to Rs. 5,388 of which Rs. 307 were collected on account of arrears for 1896-97, and Rs. 380 represent the increment from 19 new licenses, of which 6 were issued to docks, sawmills and workhops, which, though long in existence, had hitherto escaped registration. In the year 1896-97 the collection amounted to Rs. 4,239, of which Rs. 26 accrued from arrears of 1895-96. There was thus a substantial increase of Rs. 1,049 in the gross income of 1897-98 over the income of the previous year.

3. The demand, collection, remission, and balance for 1897-98 are shown in Appendix A, and the details of licenses granted in this year to jute and cotton warehouses are entered in Appendix B. Owing to the comparative unimportance of the 237 licenses granted for the storage of straw, wood, rags, and hay in 1897-98, against 221 in the preceding year, they have not been entered in Appendix B, and it may be noted that such licenses have only been levied under the Fire-brigade Act since July 1893, prior to which they were levied under section 261 of the Bengal Municipal Act.

4. There were 54 prosecutions which realised Rs. 45 against 53 in the previous year, which realised Rs. 313, but 28 of the prosecutions in the year under report were withdrawn on payment of fees and costs.

5. The expenditure incurred in assessing and collecting license fees amounted to Rs. 871—

	Rs.	A.	P.
Salary of General Supervisor and Assessor	600	0	0
Do. Inspector	120	0	0
Commission of do.	45	0	0
Peon	77	0	0
Contingencies	29	0	0
Total ...	871	0	0

6. The Fire-brigade establishment, as hitherto, remained under the control of the Commissioner of Police, Calcutta. The Fire-brigade Station in Howrah stands in a very central position, north of the Municipal Market, and from a wooden stage raised over it the whole town is overlooked. There were ten fires during the year, the details of which are given in Appendix C: besides these, there were thirteen other petty fires, at nine of which the Fire-brigade attended, and four of which were extinguished by the residents of the localities.

7. The Commissioner of Police demanded Rs. 3,446 for the maintenance of the Fire-brigade in 1897-98, and this amount was remitted to him during the year.

APPENDIX A.

Statement showing the demand, collection, remission, and balance in Howrah on account of contributions for the Fire-brigade during 1897-98.

CALCUTTA,
The 13th August 1898.

T. H. CLOWES,
Under-Secretary to the Government of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON EMIGRATION FROM THE PORT OF CALCUTTA TO BRITISH AND FOREIGN COLONIES FOR THE YEAR 1897.

GENERAL DEPARTMENT.—EMIGRATION.

Calcutta, the 16th August 1898.

RESOLUTION—No. 2596.

READ—

The Annual Report on Emigration from the Port of Calcutta to British and Foreign Colonies for the year 1897.

The appointment of Protector of Emigrants was held by Dr. R. Macleod from 1st January to 14th February 1897, when he retired from the service of Government. Dr. W. Forsyth held the appointment from 15th February to 15th May and Dr. C. Banks from 16th May to the end of the year. The duties of Medical Inspector were performed by Surgeon-Major A. W. D. Leahy throughout the year.

Administrative measures.

2. The administrative measures introduced during the year were of minor importance only. A short Act VII of 1897 was passed by the Imperial Council amending section 102 of the Indian Emigration Act, 1888. Authority was also given by the Government of India to the emigration of natives from the Ports of Calcutta, Bombay or Karachi, to labour for hire in British East Africa, on or in connection with the Uganda (Mombassa-Nyanza) Railway. An addition was made to Rule 178A of the rules under Act XXI of 1883 amplifying the test prescribed for lime-juice supplied for the use of Indian emigrants; and minor amendments and additions were made to Rules 6, 9, 11, and 19 under the same Act for the regulation of recruiters' licenses, sub-depôts, and registration of intending emigrants.

Requisition and despatch of labourers.

3. As in the previous year, there were six agencies at work—five British and one Dutch. The following table shows the demand and supply of labour to the different colonies, as compared with the preceding year 1896:—

Name of Colony.	1896.		1897.	
	Indent.	Supply.	Indent.	Supply.
1	2	3	4	5
Demerara	2,276	2,250	1,200	1,149
Trinidad	3,000	2,841	1,700	1,800
Mauritius	400	546	240	292
Natal	815	1,725	1,994	2,850
Fiji	1,166	1,128	1,300	1,287
Surinam	1,119	1,119	590	Supplied in January 1898.
Total ...	8,776	9,609	7,024	7,378

Terms of engagement of intending emigrants.

4. There was no alteration in the terms on which emigrants were engaged during the year.

Recruiting operations.

5. The number of licenses granted to recruiters was 539, of which 3 were cancelled on account of misconduct of the recruiters concerned. The emigrants registered during the period under review numbered 12,315. Of these 9 per cent. were recruited in Bengal, 10 per cent. in Bihar, 56 per cent. in the

North-Western Provinces, and 24 per cent. in Oudh, proportions which do not differ materially from those of the previous year.

History of intending emigrants subsequent to registration.

6. Of the emigrants accommodated in the sub-depôts, 2,677 never started for Calcutta; 2 died, 460 deserted, and 1,442 were rejected as unfit, showing a percentage of deductions of 21, as compared with 24 in 1896. Of the remainder, 153 remained in the sub-depôts at the close of the year and 239 were not accounted for. In the end, 9,411 or 75 per cent. of those recruited actually arrived in Calcutta, against a percentage of 71 in the previous year.

The total number of emigrants accommodated in the Calcutta depôts, including re-admissions from outside hospitals and those who remained over from the previous year, amounted to 9,809. Of these, 742 were rejected as unfit, 26 died, 69 deserted, 116 were sent to outside hospitals, and 600 were discharged for various reasons. The total number despatched to the colonies was 7,589 or 77 per cent. of the coolies brought to Calcutta, leaving 667 in the depôts at the close of the year for subsequent disposal.

Of the number embarked, 7,151 were Hindus and 438 Musalmans, the majority being classified as agriculturists and low caste labourers.

The Lieutenant-Governor notices with pleasure that the arrangements made for the accommodation of emigrants in the depôts at Garden Reach and for their food, clothing, medical care, and sanitary surroundings are reported to be satisfactory, and to compare favourably with those of five years ago. He himself was very favourably impressed at a recent visit to the Demerara Depôt so shortly after a period of famine in the regions of Upper India, from which the majority of the emigrants come; he expected to see brokendown peasants who had despaired of bettering their fortunes in their own country. He was surprised to find that the emigrants were the pick of the agricultural population, stout, sturdy men and women, robust in health and bright in spirit. The famine, indeed, as appears from the figures in paragraph 3, had no effect in increasing emigration to the colonies, and the Resolution recently published showed that its influence on inland emigration was much smaller than might have been expected.

In the Resolution on the report of last year, reference was made to the proposal that the rates of compensation awarded to persons rejected in Calcutta as unfit for despatch should be raised, and the opinion was expressed that the frequent award of compensation was much more needed than a further enhancement of the rates. The reduction in the percentage of rejections is satisfactory so far as it goes, but the Protector has not said what has been done towards giving effect to the wishes of Government in the matter of awarding compensation to persons who are brought down to Calcutta, at great inconvenience to them, and then rejected as unfit. Special attention is desired to this matter in the current year.

Sanitation and management of depôts.

7. The total number admitted into hospitals amounted to 489, of whom 26 died.

Embarkation of emigrants.

8. Of the 7,589 emigrants embarked, 15 per cent. were conveyed to Demerara (British Guiana), 24 per cent. to Trinidad, 4 per cent. to Mauritius, 38 per cent. to Natal, and 17 per cent. to Fiji. Seven sailing vessels and 9 steamers were employed to convey the emigrants, against 13 and 6 respectively in the previous year; the average number carried on each being 474 against 535 in 1896. The steamers were bound for Mauritius and Natal only; but the increased employment of steamers resulted in the reduction of the average duration of the voyage to 52 days against 68 days in the previous year, and of the average number of days each statute adult emigrant was at sea from 73 days to 61 days. The benefit of this marked shortening of the voyage was shown in the fall of the aggregate mortality on the 16 voyages to 58, from 129 during the 19 voyages of 1896. The mortality in 1897 was largely due to measles on the sailing vessels *Rhone*, *Clyde*, *Jura*, and *Ems*.

Returned emigrants.

9. Returned emigrants numbered 3,750, against 3,297 in 1896. Ninety-five deaths occurred on the return voyage, the highest mortality being on the ships *Clyde*, *Mersey*, and *Avon*, upon which 25, 21, and 19 deaths took place respectively. Chronic

disease and chest affections were prevalent, and on the *Mersey* there was an epidemic of measles.

The highest number of emigrants—2,608—returned from Demerara, while 1 only returned from the French colonies. The aggregate ascertained savings amounted to Rs. 4,51,863-6-3; the average per head being Rs. 120 against Rs. 5,74,882 9-3, or an average of Rs. 174 per head in the previous year. As in the previous year, the largest average savings per head, Rs. 212, were those of the returned emigrants from Trinidad. The smallest, averaging Rs. 23, were those of the emigrants returning from Mauritius. Demerara, which contributed two-thirds of the returning emigrants, sent each one off with savings aggregating Rs. 108.

Particulars of emigrants resident in the colonies.

10. This Government is not in possession of information absolutely up to date showing the numbers and condition of Indian emigrants resident in the different colonies, but the particulars extracted below as regards the principal colonies in which there is any considerable Indian population, are taken from the sources of information, available—principally from the reports received from the different colonies:—

Colony.	Average Indian population.	Average yearly number of emigrants arriving from India.	Average yearly number of emigrants returning to India.	Average savings of returned emigrants.
1	2	3	4	5
				£. s.
Demerara	111,000	5,234	2,014	10 18
Trinidad	78,000	2,556	760	13 8
Mauritius	113,000	4,242	1,278	2 3†
Natal	45,000	2,725	486	14 10
Fiji	10,000	1,204	676	10 7
Jamaica	14,000	330	145	7 9
Surinam	11,000	Not available.		
Réunion*	21,000			

* Emigration to this colony was suspended in 1882.
† Converted from rupees at 1s. 4d.

The figures are calculated on the average of the five years ending 31st December 1896, and are complete for the several colonies, covering emigrants from all parts of India.

Setting aside Jamaica, the number of emigrants to and from which in recent years has been inconsiderable, and Mauritius, the circumstances of which would appear to be singularly unfavourable, the average savings brought away by returning emigrants do not differ largely in amount. The subject is one of interest and importance, but sufficient information is not available for positive conclusions to be drawn. The Protector should therefore collect information as to the numbers of the resident Indian population in the different colonies, and the numbers of yearly immigrants and their savings, and should discuss in future reports the relative advantages offered by the different colonies as shown by the position and prospects of the resident emigrants, and the savings of those who return, so far as they can be ascertained.

Administration of estates.

11. The aggregate number of estates under administration was 654, valued at Rs. 76,186-9-5. Of these, 248 estates, valued at Rs. 29,764-9-1, were finally disposed of, the sum of Rs. 27,879-7-10 having been paid to the heirs in respect of 196 estates, and the sum of Rs. 1,885-1-3 standing at the credit of the remaining 52 estates having lapsed to the Indian and Colonial Governments concerned, owing in some cases

to absence of heirs, and in others to inability to trace them under the incorrect descriptive particulars furnished by the emigrants at the time of registration. Besides the final disposal of the 248 estates, heirs were traced in respect of 133 estates, valued at Rs. 20,860-14-9, and the sums due were in course of payment. The net result shows that the enquiries for heirs were completed in respect of 381 estates or 58 per cent. of the total number of estates under administration during 1897, against a percentage of 54 in 1896. The remaining 273 estates, valued at Rs. 22,561-1-7, were still under enquiry, being a percentage of 41 of the total number of estates under administration against 45 in 1896. Enquiries were as a rule made within reasonable periods, and the Protector acknowledges the assistance of District Officers in this connection.

Financial.

12. The financial results of the Colonial emigration operations, show a reduction in the receipts derived from the consolidated fee of Rs. 3 per head on each emigrant embarked, of Rs. 6,573-4-2, and in the charges, of Rs. 1,462; the year closing with a deficit of Rs. 3,883-0-9 against a surplus of Rs. 1,228-3-5 at the end of 1896. The Protector observes that the deficit was due to the fact that 2,587 fewer emigrants were despatched to the colonies than in 1896.

13. Dr. Banks has recorded his satisfaction with the manner in which work is carried on by the Emigration Agents, and to Dr. Banks himself the thanks of Government are due for the efficient manner in which he performed his duties as Protector of Emigrants during the year.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,
Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 15th August 1898.

Burdwan.—Rainfall at Sadar 1·87, Kalna 3·02, Katwa 1·36, Raniganj 11·80. Weather seasonable. Crop prospects excellent. Some cases of cattle-disease. Common rice selling as follows:—

	Srs.	
Sadar	11 to 17	per rupee.
Kalna	10½ to 12	
Katwa	12⅘	
Raniganj	12½	

Birbhum.—Rainfall at Sadar 7·23, Rampur Hât 7·19. Weather rainy. Heavy rain has done some injury to lowland paddy and sugarcane. Highland paddy promising. Transplantation nearly over. Prices steady. Fodder sufficient.

Bankura.—Rainfall at Bankura 7·22, Vishnupur 4·14. Weather rainy. The rainfall of the week was sufficient. Transplantation of high lands going on briskly. Fodder and water sufficient. No cattle-disease reported. Price of common rice at Bankura 13 seers and Vishnupur 12½ seers per rupee.

Midnapore.—Rainfall at Sadar 5·46, Contai 3·06, Tamluk 4·64, Ghatal 6·07. Weather cloudy. Recent rain has done much good to the cultivation. More rain wanted at Contai. Transplantation going on vigorously. In some places in Sadar paddy plants are being damaged by the grasshoppers. Prices of common rice—

	Srs.	
Sadar	12	per rupee.
Contai	12 to 14	
Tamluk	11⅖	
Ghatal	12 to 13	

Hooghly.—Rainfall at Sadar 1·39, Serampore 1·89, Jahanabad 3·95. Transplantation is being pushed on. Common rice selling from 10 to 12 seers per rupee.

Howrah.—Rainfall at Sadar 6·43, Ulubaria 3·08. Weather cloudy with rain almost every day. Transplantation of *aman* still going on. Condition of *aus* good. The recent rainfall has much improved the condition of the standing crops, but more rain is still wanted at Ulubaria. Fodder and water sufficient. Common rice sells at 10 to 12 seers per rupee.

24-Parganas.—Rainfall at Sadar 6·67, Barasat 1·94, Basirhat 3·09, Diamond Harbour 3·43. Weather seasonable. *Aus* and jute doing well. Transplantation of *aman* going on. More rain is still required in Diamond Harbour. River rising. Cattle-disease reported from Basirhat station and some parts of Diamond Harbour subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	10 to 12	per rupee.
Barasat	11	
Basirhat	13	
Diamond Harbour	11	

Nadia.—Rainfall at Sadar 1·15, Kushtia 1·24, Meherpur 1·86, Chuadanga 2·15, Ranaghat 2·32. The recent rain has done much good to the standing crops. Rice is in ear in places. Steeping of jute and cutting of indigo going on. Common rice selling at 10 to 11 7/8 seers per rupee. Fodder and water sufficient. Cattle-disease reported from thanas Chuadanga and Tehatta.

Murshidabad.—Rainfall at Sadar 6·28, Kandi 5·65, Jangipur 2·19. Weather seasonable. Transplanting of *aman* and harvesting of *bhadoi* going on. State of indigo and mulberry hopeful. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	
Sadar	12	per rupee.
Kandi	14	
Jangipur	13¼	

Jessore.—Rainfall at Jessore 5·73, Jhenida 2·07, Magura 6·21, Narail 1·47, Bangaon 6·24. Weather cloudy, damp and rainy. State and prospects of standing crops good. *Aus* being reaped in places. Manufacture of indigo going on. Rivers rising fast. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Jessore	11 to 13	per rupee.
Jhenida	12	
Magura	12 to 16	
Narail	12 5/8	
Bangaon	11½ to 12½	

Khulna.—Rainfall at Sadar 3·70, Bagerhat 3·10, Satkhira 3·95. Weather rainy and cloudy. Transplantation of *aman* going on. Harvesting of *aus* commenced. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	
Sadar	13 to 14	per rupee.
Bagerhat	12½	
Satkhira	13	

Rajshahi.—Rainfall at Sadar 1·18, Nator ·62, Naugaon 1·83. Prospects of crops good. Transplantation of *aman* paddy continues. Harvesting of *aus* paddy commenced. No cattle-disease. Fodder and water plentiful. Rice sells from 10 to 15 seers per rupee.

Dinajpur.—Average rainfall 1·61. Weather seasonable with occasional showers of rain. Cutting and harvesting of jute and *bhadoi* paddy going on. Transplantation of *haimanti* paddy vigorously progressing. Cattle-disease is reported to be still prevalent in the Thakurgaon subdivision. Fodder and water ample. Common rice selling at 13 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 3·82, Alipur Duars ·66. Weather cloudy and hot. Harvesting of *bhadoi* continues. More rain wanted for transplantation of *haimanti* paddy. Condition of standing crops favourable. Fodder and drinking-water sufficient. Common rice sells from 7 to 14 seers per rupee.

Darjeeling.—Rainfall at Darjeeling 5·01, Kurseong 8·11, Siliguri 5·75. Weather seasonable. *Hills*—transplanting of *dhan* and *bara marua* going on ; *bhutta* and *chhota marua* doing well. *Terai*—transplanting of *haimanti* going on ; *jumira* paddy being reaped; jute, *bhadoi*, and sugarcane doing well. Coarse rice sells as follows :—

Hills—8 to 11 seers per rupee.
Terai—12 to 15 „ „ „
Bhutta sells from 16 to 32 seers per rupee.

Rangpur.—Rainfall at Sadar 1·66, Gaibanda ·24, Kurigram ·44, Nilphamari ·62. Transplantation of *aman* and harvesting of *aus* going on. Cutting of jute continues. Prospects fair. Common rice selling at 10½ to 13 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 1·21. Transplanting of *aman* continues. *Aus* and jute being reaped. Fodder and water sufficient. Common rice selling from 10½ to 14½ seers per rupee.

Pabna.—Rainfall at Sadar 1·70, Sirajganj ·39. Weather cloudy and rainy. Prospects of crops good. No change yet in the price of common rice.

Dacca.—Rainfall at Sadar 1·82, Manikganj ·75, Munshiganj 2·43, Narainganj 2·31. Weather hot and rainy. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice 10 to 13 seers per rupee.

Mymensingh.—Rainfall at Sadar 1·57, Jamalpur 2·75, Netrokona 2·89, Kishorganj 1·21, Tangail 1·56. Weather rainy. Prospects of standing crops good. More rain wanted for *aman* paddy. Common rice selling at 9½ to 13 seers per rupee. Fodder and water sufficient.

Faridpur.—Rainfall at Sadar 1·22, Goalundo 3·76, Madaripur 6·33. Weather seasonable. Prospects of crops good. Rice 12 to 13 seers per rupee.

Backergunge.—Rainfall at Sadar 4·97. Weather wet. Prospects of crops fair. Common rice sells from 10 to 13½ seers per rupee.

Tippera.—Rainfall at Sadar 4·54, Brahmanbaria ·94. Weather rainy and damp. Jute and *aus* paddy being harvested. Prospects of *aman* paddy favourable. Cattle-disease reported from thana Kasba. Fodder plentiful. Rice sells from 10 to 16 seers per rupee.

Noakhali.—Rainfall at Sadar 7·51, Feni 3·09. Prospects of standing crops favourable. No cattle-disease. Fodder and water sufficient. Price of rice 9 to 13 seers per rupee.

Chittagong.—Rainfall 1·78. Weather seasonable. *Aus* crop thriving. Cultivation of *aman* in progress. Prospects good. Rice selling at 11 seers per rupee.

Patna.—Rainfall at Sadar 5·61, Barh 4·57, Bihar 2·30, Dinapur 4·20, Hilsa 3·15, Bikram 2·63. Transplantation of paddy going on. Prospects of *bhadoi* crops good. More rain wanted in Bihar subdivision. Prices slightly fallen. In Patna common rice sells at 15 seers a rupee. Fodder and water for cattle sufficient.

Gaya.—Rainfall at Sadar 7·88, Jahanabad 2·77, Aurangabad 2·13, Nawada 3·21. Transplantation of paddy in progress. *Bhadoi* crops doing well. Common rice selling at 13 seers per rupee.

Shahabad.—Rainfall at Sadar 3·97, Sasaram 5·80, Buxar 5·06, Bhabua 4·42, Dehri 7·61. Standing crops good. Transplantation of paddy continuing. Rice sells at Arrah 12 to 14 seers per rupee.

Saran.—Rainfall at Sadar 4·05, Siwan 2·27, Gopalganj 2·09. Weather showery Indigo generally good Other *bhadoi* crops very good. Good rain is falling. Ploughing and transplanting of *aghani* going on well. Average price of common rice 12·15 seers and, of *makai* 21·2 seers per rupee.

Champaran.—Rainfall at Motihari 1·34, Bettiah 3·12, Burharwa 1·78, Bagaha 1·37, Ramnagar ·18. Weather cloudy. Prospects of *bhadoi* crops very hopeful. Weeding still going on. Early rice being harvested. Transplantation of *aghani* paddy was retarded for want of rain, but the last two days' rain has facilitated this operation greatly. Cattle-disease in Mainatand. Price of common rice unchanged.

Muzaffarpur.—Rainfall at Sadar 2·05, Hajipur 4·88, Sitamarhi ·96. More rain wanted in Sitamarhi subdivision for transplanting rice, which is being retarded on account of insufficient rain; otherwise prospects good throughout the district, especially in the Sadar and Hajipur subdivisions Cattle-disease reported from Sinhar in Sitamarhi subdivision. Prices are—common rice 11 to 14 seers, wheat 15 to 16 seers, barley 25 seers, *makai* 22 seers, gram 18 to 20 seers, *rahar* 22 to 23 seers, and *marua* 25 seers per rupee.

Darbhanga.—Rainfall at Sadar 1·46, Samastipur 2·79, Madhubani 1·27. Transplantation of paddy in progress. More rain is urgently required all over the Madhubani subdivision. In some villages at head-quarters cattle-disease has broken out. Common rice at Sadar 10½ seers per rupee. New *marua* and *makai* are coming to market.

Monghyr.—Rainfall at Monghyr 2·87, Begusarai 4·09, Jamui 3·71. Weather cloudy and rainy. Transplantation of winter paddy going on. *Bhadoi* crops look excellent. *Makai* in low lands is being damaged in places by floods. No cattle-disease. Common rice sells as follows:—

Monghyr	...	..	...	12 to 14 seers	per rupee.
Begusarai	...	...	...	11 to 13	„ „
Jamui	...	...	...	14	„ „

Bhagalpur.—Rainfall at Sadar 9·02, Banka 7·24, Madhipura 1·98, Supaul 2·25. Weather rainy. Transplantation of winter paddy is progressing well in South Bhagalpur. More rain needed in parts of North Bhagalpur. Prospects of *bhadoi* crops continue very good. Price of common rice at Sadar steady.

Purnea.—Rainfall at Sadar 6·4, Kishanganj 1·04, Araria 2·50. Weather hot and cloudy with occasional showers. Harvesting of jute and *bhadoi* rice going on. Transplantation of *aghani* rice continues. More rain wanted. Cattle-disease still reported from Matiari, and Sikti. No fresh cases of *kala dukh* reported. Fodder and water sufficient. Common rice sells as follows:—

Sadar	...	...	...	15	seers per rupee.
Kishanganj	...	...	...	14	„
Araria	...	...	...	15	„

Malda.—Rainfall at Sadar 1·37, Chanchal 2·17, Shibganj 1·62, Gajole 4·98. Weather cloudy and rainy. Transplantation of winter rice still continues. Standing crops in good condition. Harvesting of *bhadoi* paddy going on. Common rice selling at 12½ seers per rupee. Fodder and water ample.

Sonthal Parganas.—Average rainfall 4·39. More rain wanted in Godda. Transplantation going on vigorously. *Bhadoi* prospects good. Price of rice 13 to 15 seers, and of maize 18½ to 22 seers per rupee.

Cuttack.—Rainfall at Sadar 7·51, Jajpur 9·55, Kendrapara 11·02, Banki 4·98, False Point 12·82. Weather rainy. *Beali* in ear. *Sarad* being transplanted. and reploughed. Harvesting of cotton nearly over. Sugarcane growing. Condition of cattle generally good, but disease still prevails in places. Fodder sufficient. Common rice sells as follows:—

					S.	ch.	
Cuttack	...	...	...	...	12	8	per rupee.
Jajpur	...	...	...	...	15	12	
Kendrapara	...	...	...	...	17	1	
Banki	...	...	...	...	15	12	

Balasore.—Rainfall at Sadar 3·71. Weeding of *beali* and transplantation and puddling of *sarad* continue. Jute flowering. Sugarcane and other standing crops growing well. Price of rice varies from 13½ to 17 seers per rupee in the interior. Rice sells at 13 and 16 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rainfall at Angul 3·24. The rainfall on 8th and 9th instant has much improved the condition of the winter rice crop. Transplantation and weeding will be completed by the late rains where rainfall was insufficient. *Bhaloi* crops not yet ripe in Angul. Prices of food-grains the same as last week.

Puri.—Rainfall at Puri 4·86, Khurda 5·36. Weeding and transplanting of *sarad* paddy continue. *Beali* and *mandia* are growing well. Puddling of *sarad* commenced. Prospect of sugarcane good. Fodder and water sufficient. Cattle-disease reported from certain parts of Khurda. Common rice sells as follows:—

	Srs.	ch.	
Puri	... 13	2	
Khurda	... 13	2	
Interior of districts	... 13 to 15	2 to 12	per rupee.

Hazaribagh.—High westerly wind. Constant rain—Sadar 4·57, Giridi 4·10. Transplantation nearly finished. Prospects of all crops except Indian-corn are good. Rice 10 to 12 seers per rupee.

Lohardaga.—Rainfall at head-quarters 2·02. Transplantation continues. State of standing crops good. Rice sells at Ranchi 11 seers and in the interior from 11 to 16 seers per rupee. Cattle-disease continues in the interior. Fodder and water sufficient. Food-grain stocks sufficient.

Palamau.—Rainfall at Sadar 1·68. Weather seasonable. *Bhadoi* in good condition. Transplantation of paddy in progress. Rice sells at 12 to 15 seers per rupee.

Manbhum.—Rainfall at Sadar 8·53, Gobindpur 7·01. Weather seasonable. Prospects of crops good. Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar 12 seers and at Gobindpur 11 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 4·51. Rice plentiful, 12 to 14 seers per rupee.

General Summary.—There was good and general rain during the week, which has improved the prospects of the winter rice, and transplantation is now going on everywhere. More rain is, however, still required in some districts. Reports of the early rice, jute, and other *bhadoi* crops, and of sugarcane and indigo continue favourable. The harvesting of early rice and jute is progressing, and the manufacturing of indigo has begun. Prices generally were stationary. There were cases of cattle-disease in several districts, but no want of fodder anywhere.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 16th August 1898.

M. FINUCANE,
Secretary to the Govt. of Bengal.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ⚡, lightning; lr, lightning reflection.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Calcutta, the 15th August 1898.

J. H. GILLILAND,
For Meteorological Reporter to the Govt. of India.

Meteorological Report of the Province of

Meteorological Division.	Division.	District.	Representative stations.	Station Observations.												
				Air Pressure.					Wind.		Temperature.					
				Highest, 8 A.M., bar meter reading.	Lowest 8 A.M., barometer reading.	Mean, 8 A.M., reduced to 32°.	Mean reduced to sea-level and constant gravity, Lat. 45°.	Variation from normal mean.	Mean direction at 8 A.M.	Mean velocity in miles daily.	Highest of month.	Lowest of month.	Mean daily maximum temperature.	Mean daily minimum temperature.	Mean daily temperature.	Variation from normal mean.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JULY 1898.

At the end of June weather conditions were practically normal both as regards pressure and temperature. In the 1st of July, however, pressure began to fall, and there were signs of the beginning of a small disturbance in the north of the Bay. On the 2nd a further fall took place in pressure, and a well marked though shallow depression appeared over the Sandheads. Though pressure continued to fall on the succeeding day, the depression became diffused, winds veering round to their normal direction in the north-west angle of the Bay. On the 4th a recovery took place which continued still more markedly on the 5th, but fair and general rain had accompanied the development of the small depression.

Temperature which had been nearly normal at the commencement oscillated slightly during the first six days of the month, never differing greatly from the normal.

Up to this date a fairly strong monsoon had been blowing in the Bay, and the general distribution had remained nearly constant. From the 6th, however, a marked diminution took place in the strength of the monsoon, while pressure, which had for some days been deficient, rose and remained fairly normal over the province for a considerable period. Signs of a local disturbance were not wanting at the head of the Bay, but the weakness of the monsoon afforded but little opportunity for its development. With the comparatively fine weather which characterised this period, temperature naturally rose and remained above the normal till the 15th of the month. Till the same date the monsoon current continued weak, but after that a gradual revival of strength took place, and weather again became of the ordinary monsoon character. Up to the 16th pressure underwent small oscillations, but never deviated much from the normal. The general features of the distribution were likewise remarkably constant, the area of low pressure remaining steadily over the west or north-west of the province, and giving rise to the usual winds of the season. Fair and general rainfall took place during this time, and the temperature fell from the high point which it had reached and remained practically steady and near the normal.

On the 16th there was a sharp fall of pressure over the province, which was followed by a slight recovery in Bengal on the succeeding day, but which continued, though in a considerably lesser degree, in Bihar, Chota Nagpur and Orissa. On the 18th the barometer began to rise very rapidly in Bihar as well, and in consequence a shallow depression was formed over the south-west of Bengal and the adjacent sea. Heavy rain and a considerable fall of temperature accompanied the violent oscillation of pressure.

The depression which was due merely to the rapid advance of the wave of fall and recovery over the province quickly disappeared, and the barometer on the 19th stood comparatively high.

On the 20th weather again began to be unsettled off the Orissa and Coromandel Coasts, a small shallow though well marked depression appearing to the south-east of Gopalpur. On the 20th the barometer which stood comparatively high fell slightly, but the area of low pressure became much more diffused and spread over a considerable part of the adjacent land area. The centre appeared to be in the neighbourhood of Puri, and winds along the coast were very light and variable, changing from north-west in the morning to south on the night of the 21st. In the early hours of the 22nd, however, the disturbed conditions prevailing in that quarter led to the formation of a fresh depression of considerably greater intensity, the centre apparently lying to the east of Puri. In the course of the day the storm following a most unusual course for this period of the year moved slowly along the coast, and on the 23rd its centre was about 40 miles to the south-east of Gopalpur. During the 23rd the storm continued to move in the same general direction, having in the meantime gained considerably in depth, and on the morning of the 24th its centre was immediately over Vizagapatam. Here if we except a slight further motion of its centre some twenty miles to the south, it practically maintained its position unchanged, and its intensity undiminished during the 24th and 25th July, and it was only in the early hours of the 26th that it finally crossed the coast in the neighbourhood of Vizagapatam. Its subsequent course was as unusual as its initial path, as is proceeded in a north-westerly direction, and finally broke up in the Central Provinces.

A further unusual feature of this storm, which should be noticed, was the prevalence of strong winds in the north-east quadrant and the comparative lightness of the winds to the south-west.

The effect of this disturbance on the weather in Bengal was distinctly unfavourable as far as rain was concerned owing to the strong indraught of winds from the north. Till the 26th, when conditions began to be more normal, practically no rain fell over the province, and a consequent rise in temperature took place everywhere. On the 27th, the area of low pressure again shifted to the north-west, and general and abundant rainfall took place.

Pressure, which had risen considerably above the normal during the progress of the storm, now fell steadily till the 30th. On the 31st there was a slight recovery, but insufficient to raise the pressure above the normal, so that, except in Burma, readings on the last day of the month were everywhere in defect.

Rainfall continued to be general till the end of the month.

Temperature, which had fallen below normal on the 27th, oscillated slightly in the last days of the month, but the general tendency was downwards, so that on the 31st readings were low at all stations.

Summary.—Weather was, on the whole, of ordinary monsoon character. Two small breaks in the rainy weather were noticeable: the first, which occurred from the 6th to about the 13th, being due to a weakening of the monsoon current, while the second, from the 19th to the 26th was, owing to the storm, off the Coromandel Coast, which, by diverting the current and causing heavy rainfall in that quarter, deprived the province of its usual rain.

Pressure fell in the beginning of the month: after the 6th it recovered, and rising slowly till it reached the normal, oscillated very slightly about that position till the 16th. From the 16th to 18th a rapid fall, followed by an equally rapid rise, took place, which left the pressure in slight excess. During the storm in the latter part of the month, it rose with slight oscillations still further; but owing to the fall which took place in the last few days, the month ended with a slight defect in pressure throughout the province.

The resultant effect of these changes was that the average pressure for the month has been everywhere below the normal, the defect being generally slight, but greatest in Bihar and Orissa.

Temperature was also subject to considerable variations, the rise and fall being generally coincident with the periods of smaller or larger rainfall. It will be found accordingly that from the 6th to the 13th temperature, which up to the former date had been nearly normal, rose slowly and was for some days in excess. From the 13th it fell to a point below normal, and during the second break again rose. During the last days of the month, however, a fresh fall took place, which resulted in readings being low at all stations on the 31st of July. Taking the average for the month, it is found to be slightly above the normal over the greater part of the province, the only divisions where there was a small defect having been South-West Bengal and Orissa.

Rainfall.—Rainfall was fairly general during the month, except during the two periods mentioned above, when adverse conditions prevailed. These two periods of deficient rainfall were, however, of sufficient length to affect the totals prejudicially, and the latter are consequently below the normal in all divisions. The defect is, however, in no case very large, being greatest in North Bengal, where it amounts to 20 per cent., and least in Chota Nagpur, where it is only 2 per cent.

Reckoning the rainfall from the 16th May, the amount is practically normal for Bengal and Chota Nagpur, and in slight defect for the other two divisions.

The following table gives a comparison of the falls in the various divisions during the month of July with the normal fall, the actual being given as a percentage of the normal fall. The table also shows the actual falls for each of the previous months of the year expressed in the same way, and the last column of the table shows the total of the falls of the past seven months of the year in each division expressed as a percentage of the normal fall:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	Actual rainfall of first seven months of 1898 expressed as a percentage of the normal fall for the period.
South-West Bengal ...	120	16	2	64	88	124	82	90
North Bengal ...	119	162	6	82	88	114	80	93
East ,, ...	177	31	8	84	80	122	88	88
Bihar ...	38	200	23	109	100	80	91	89
Orissa ...	0	16	0	138	59	75	84	73
Chota Nagpur ...	2	116	3	80	47	150	98	103

The following table gives full data for the comparison of the actual and normal rainfall of the month of July in all districts of the Province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past 25 years. The second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district. The third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage; and the fourth column gives the same information in

a slightly different form, expressing as a percentage how much the district rainfall varied in excess or in defect from the normal rainfall:—

Percentage Table for July 1898.

Division.	District.	Normal district rainfall for July.	Actual district rainfall for July 1898.	Percentage of actual to normal rainfall.	Percentage excess (+), defect (−).

The Hon'ble SALIGRAM SINGH.
The Hon'ble KALI CHARAN BANERJEE.
The Hon'ble SURENDRANATH BANERJEE.
The Hon'ble JATRA MOHAN SEN.
The Hon'ble T. W. SPINK.
The Hon'ble RAJA SHASHI SHAKHARESWAR ROY BAHADUR, of Tahirpur.

PREVENTION OF ACCIDENTS FROM RIFLE PRACTICE AT DUM-DUM.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Has the attention of the Government been drawn to a paragraph in the *Hitvadi* of the 8th instant to the effect that the people of Kadihati, a village in the vicinity of the Dum-Dum Cantonment, have been put to serious loss and inconvenience by reason of the rifle practice of the local soldiers, and that one Bhutnath Bagdi was shot through the leg and the children of Babu Boikanta Nath Chackravati, a local medical practitioner, narrowly escaped being shot? If the above statements are substantially correct, will the Government be pleased to take the necessary steps with a view to the prevention of such accidents?

The Hon'ble MR. BOLTON replied:—

"It has been ascertained that the statements referred to by the Hon'ble Member are substantially correct. A proposal for the re-alignment of the range so as to guard against all possibility of danger to the villagers is already under the consideration of the Military Department, and the necessity for completing the work by an early date will be brought to the notice of that Department."

RELIEF OF LOCAL BODIES FROM EXPENSES OF PLAGUE CAMPS.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Is it the case that a letter has been addressed by the Government to the Accountant-General by which it is proposed to recover from the local bodies the sum of Rs. 48,392 incurred in increasing the Police force at the Mairwa and Chausa Plague Camps? If so, having regard to the financial condition of most local bodies and the difficulty which they experience in meeting their own legitimate charges and the fact that the expenditure is to be incurred in connection with the plague, which is an imperial rather than a local question, will the Government be pleased to consider the propriety of relieving the local funds of this charge?

The Hon'ble MR. RISLEY replied:—

"The order referred to has been issued under section 2, sub-section (*1*) of the Epidemic Diseases Act, which empowers the Government to determine in what manner and by whom any expenses incurred in preventing the spread of plague shall be defrayed. Such expenses are not merely a legitimate but a just charge upon the funds of local bodies, so long as they are able to bear them."

DURATION AND COST OF SETTLEMENT OPERATIONS IN ORISSA.

The Hon'ble BABU NORENDRA NATH SEN asked—

Will the Government be pleased to state how long the survey and settlement operations in Orissa have been going on, and when they are likely to come to an end, and also what they have already cost, and are likely to cost hereafter?

The Hon'ble MR. FINUCANE replied:—

"The Survey and Settlement proceedings were commenced in Orissa in the month of November, 1889, and will probably be completed within the calendar year 1899. The cost up to the end of July, 1898, has been approximately Rs. 30,50,000, and the further cost to be incurred before the proceedings are completed will probably amount to Rs. 4,50,000."

APPREHENDED SCARCITY OWING TO DEFICIENT RAINFALL.

The Hon'ble BABU NORENDRA NATH SEN said—

In view of the apprehended scarcity in several districts in these Provinces on account of deficient rainfall and disease among cattle, will the Government be pleased to give a definite idea of the agricultural outlook generally, and of the rice crop in particular?

The Hon'ble MR. FINUCANE replied:—

"The telegraphic weekly weather and crop reports received from all districts which are published in the Calcutta Gazette, give the information asked for. In the reports for the week ending August, 8th, published in the Calcutta Gazette of the 10th, it was stated that more rain was then required for the transplanting of the winter rice in some districts, and especially in parts of Bankura, Midnapore, Hooghly and Howrah, but that the prospects of the early rice and the *bhadoi* crops generally were favourable. There is at present no reason to apprehend scarcity on account of deficient rainfall or disease among cattle. A certain amount of sporadic cattle-disease is reported from some districts, but there is no indication that cattle-disease is more than usually prevalent."

RE-EXCAVATION OF KHALS.

The Hon'ble BABU NORENDRA NATH SEN asked—

Will the Government be pleased to state whether, having regard to the importance of re-excavating the *khals*, which have dried up, in the Lower Provinces, both for the purposes of sanitation and irrigation, something ought not to be done in this direction without delay, and the initiative taken by the Government in the matter, having in view specially the manifest blessing the Eden Canal has proved to those parts, through which it runs?

The Hon'ble MR. BUCKLEY replied:—

"It is a fact that certain khals in Lower Bengal have silted up from natural causes, but often where this has occurred others have opened out to take their places, and it is doubtful whether a system for a general clearance of old channels would give any beneficial result.

"Special cases have been dealt with from time to time, as their urgency has been brought to notice, such as the Buxi-Gaighatta and Protapkally khals, while the numerous channels which drain the areas of country protected by flood embankments in the Midnapore and Hooghly districts are periodically cleared.

"At this time of year the silt clearance of khals is not easily possible, but consideration will be given to any particular cases which may be brought forward.

"Schemes directed to sanitary improvements come within the provisions of the Bengal Sanitary Drainage Act, 1895, under section 3 of which the initiative must be taken by the District Board."

APPLICATION OF PUBLIC WORKS CESS TO OPENING AND MAINTENANCE OF ROADS.

The Hon'ble BABU NORENDRA NATH SEN asked—

Will the Government be pleased to state whether, having regard to the fact that the revenue, derived from the Road Cess, being wholly insufficient to meet the purpose for which the cess is levied, a portion of the income, obtained from

the Public Works Cess, ought not to be diverted towards the opening and maintenance of roads in these Provinces, as complaints in regard to roads in the interior are general?

The Hon'ble MR. RISLEY replied:—

"Out of the estimated proceeds of the Public Works Cess during the current year, a sum of Rs. 10,86,000 has already been allotted for the construction and maintenance of roads."

POLLUTION OF THE RIVER HOOGHLY.

The Hon'ble MR. RISLEY said:—"With Your Honour's permission I will take this opportunity of replying to certain questions previously asked in the years 1895, 1896 and 1897, on the subject of the alleged pollution of the Hooghly by effluxions from the mills and factories situated on the banks of the river:—

Reports by the Sanitary Commissioner and Deputy Sanitary Commissioner on the alleged pollution of the Hooghly and of the Bally Khal by the effluent of certain mills are now being printed, and will be laid on the table. The Sanitary Commissioner is of opinion, after personal investigation, that no unwholesome waste from the Titagarh Jute Mill now passes into the Hooghly. In the case of the Bally Khal, the Deputy Sanitary Commissioner shows that the water, both above and below the paper mill, is impure and unfit for drinking purposes by reason of the presence of organic matter the bulk of which comes from the drains and latrines of the Bally and Uttarpara Municipalities. A small part only consists of mill refuse, and this is of vegetable origin and is comparatively harmless."

AMENDMENT OF THE CALCUTTA PORT ACT, 1890.

The Honb'le MR. RISLEY presented the Report of the Select Committee on the Bill to amend the Calcutta Port Act, 1890, and moved that the Report be taken into consideration. He said:—

"As originally drafted, the Bill has been received with general approval by all the authorities consulted and no suggestions for its further amendment have been made. A slight change in its form has been introduced by the Select Committee which is explained in the report. They say:—

'One of the objects which it was intended to secure was an extension of the period of the Port Commissioners' liability for goods committed to their charge from two to three clear working days. We are advised that the Bill as drawn will not meet this object, and we have accordingly added a section specifically amending section 113 of the Act by substituting 'three' for 'two.'"

"It was the intention of the Port Commissioners in 1894 to grant this concession, and in practice they have been, I understand, giving that number of free days; that is to say, they have been giving a third day in addition to the two days allowed by the Act. It was ascertained that, under the law as it stands, they have no legal power to do this, and that when they did so, they could not assume the liability which it is essential they should have, and therefore the additional day which they gave would be of no use to the parties to whom they gave it. In its present form the Bill will effect all the objects which the Port Commissioners and the mercantile community desire it should effect, and I submit that it may now be passed by the Council."

The Motion was put and agreed to.

The Hon'ble MR. RISLEY also moved that the Bill, as amended by the Select Committee, be passed.

The Motion was put and agreed to.

BENGAL GENERAL CLAUSES BILL.

The Hon'ble SIR CHARLES PAUL moved that the Bill for further shortening the language used in Bengal Acts, and for other purposes, be referred to a Select Committee consisting of the Hon'ble Nawab Bahadur Syud Ameer Hossein, the Hon'ble Mr. Bolton, the Hon'ble Babu Saligram Singh and the Mover.

The Motion was put and agreed to.

The Council adjourned *sine die*.

CALCUTTA;
The 23rd August, 1898.

F. G. WIGLEY,
Offg. Asst. Secy. to the Govt. of Bengal,
Legislative Department.

LIBERALITY OF RAI SITAB CHAND NAHAR BAHADUR, OF SITABGANJ.

No. 5036Medl., dated, Calcutta, the 17th August 1898.

From—E. N. BAKER, Esq., Offg. Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Bhagalpur Division.

WITH reference to the correspondence ending with your memorandum No. 931J., dated the 25th July 1898, in which it is reported that Rai Sitab Chand Nahar Bahadur, of Sitabganj, has offered a donation of Rs. 1,384 for the construction of a ward for females in connection with the Charitable Dispensary at Dumka, in commemoration of Sir Alexander Mackenzie's visit to that town, I am directed to request that you will be so good as to convey to the donor an expression of His Honour's thanks for this act of liberality and public spirit on his part.

2. I am also to convey the sanction of Government to the construction of the ward in question, and to say that, as desired by the donor, the ward may be styled "The Mackenzie Ward."

3. This letter will be published in the *Calcutta Gazette*. The plans and estimates submitted by you are herewith returned.

RESOLUTION ON THE ANNUAL REPORT ON THE GOVERNMENT CINCHONA PLANTATION AND FACTORY IN BENGAL FOR THE YEAR 1897-98.

FINANCIAL DEPARTMENT—MISCELLANEOUS.

Calcutta, the 12th August 1898.

RESOLUTION—No. 4453Mis.

READ—

The Report on the Government Cinchona Plantation and Factory in Bengal for the year 1897-98.

Read also—

The Report for 1896-97 and the Resolution of Government recorded thereon.

UNLIKE the two previous years, there was nothing abnormal in the climatic conditions of the year under review; and though the rainfall was slightly below the average, it was well distributed throughout the rainy season. The number of trees up-rooted at the plantation for their bark was 245,109 against 1,064,200 in the previous year, while 40,207 young trees of the quinine-producing kinds were planted out. The result of the year's operations was that the total number of living cinchona plants at the Government plantations (excluding the nursery stock, which amounted to 212,787) at the close of the year was 2,478,549.

2. The crop of the year amounted to 318,715 lbs. of dry bark, of which 212,175 lbs. were obtained from the trees up-rooted in the Government plantations in Sikkim, and 106,540 lbs. from the trees in the plantation at Nimbong purchased a few years ago. In addition to this quantity, 418,602 lbs. of bark were purchased from private plantations in Sikkim and Southern India. The quantity of bark made over to the cinchona factory for manufacture into quinine and febrifuge was 511,933 lbs.

3. The outturn of the factory was 10,149 lbs. of sulphate of quinine and 4,075 lbs. of cinchona febrifuge against 10,673 and 3,452 lbs. respectively in 1896-97. The following statement compares the issues of the year with those of the preceding year:—

	1896-97.		1897-98.	
	Sulphate of quinine.	Cinchona febrifuge.	Sulphate of quinine.	Cinchona febrifuge.
1	2	3	4	5
	lbs. oz.	lbs. oz.	lbs. oz.	lbs. oz.
To Medical Depôt, Calcutta ..	1,570 0½	200 0	1,739 0	500 0

To Inspector-General of Jails, Bengal (for jails and lock-ups in Bengal).	.....	.....	2 0	.....
To Inspector-General of Jails, Bengal (for making into pice-packets at Alipore Jail).	3,300 0	.....	2,200 0	.....
To Inspector-General of Jails, Bengal (for compensation for loss of weight in conversion into pice-packets).	33 0	.....	22 0	.....
To Commissariat Department for Port Blair.	40 0	.....	.....	.....
To Inspector-General of Civil Hospitals, North-Western Provinces and Oudh (for making into pice-packets at Aligarh Jail).	.....	.....	800 0	.....
To Inspector-General of Civil Hospitals, North-Western Provinces and Oudh (for compensation for loss of weight in conversion into pice-packets).	.....	.....	8 0	.....
Sold to Government officers, dispensaries and medical missions, &c.	2,2?7 6½	.....	3,314 2$\frac{3}{16}$	.....
Sold to Government officers and to the general public.	.....	2,153 12	.....	2,297 4
Given as samples	2 1½	1 2	2 7$\frac{13}{16}$	1 0
Total ...	8,482 0⅛	2,994 10	10,939 2⅝	3,398 4

Owing probably to the prevalence of scarcity the demand from Bengal for sulphate of quinine to be sold at post offices decreased by 1,100 lbs.; but on the other hand the Superintendent of the Aligarh Jail was supplied with 800 lbs. for the introduction of the system into the North-Western Provinces. The stock of sulphate of quinine in hand at the close of the year was less by 791 lbs. than it was at the close of 1896-97, but the Superintendent recognises the advisability of having always in stock, at the commencement of a year, a quantity equal to the year's probable consumption.

4. The following statement compares the receipts from the sale of sulphate of quinine, cinchona febrifuge, cinchona bark, and other products of the plantation during the last two years:—

	1896-97.	1897-98.
	Rs.	Rs.
By sale for cash	62,901	73,220
By credit from the Medical Depôts and Port Blair.	60,728	60,548
By credit from the Inspector-General of Civil Hospitals, Bengal.	300	1,000
By credit from the Inspector-General of Jails, Bengal.	...	...
For jails	...	30
For pice-packets	47,850	30,800
By credit from the Inspector-General of Civil Hospitals, North-Western Provinces and Oudh.	...	11,200
Total ...	1,71,779	1,76,798

5. The expenditure on the plantation amounted to Rs. 66,509 against Rs. 82,143 in the previous year, the decrease being chiefly in the salary and exchange compensation allowance of the Deputy Superintendent, owing to the retirement of Mr. Gammie, the late Deputy Superintendent, and under "Contingencies" due to the cessation of the transport of bark from Nimbong. Dr. Prain suggests that, in the event of similar savings again occurring, they might be devoted to making the present temporary bridge across the Rungjo stream on the road that connects the plantation and factory with the Tista Valley road into a permanent one. The amount spent on account of the factory rose from Rs. 79,867 to Rs. 89,278. This sum includes the price paid for the bark purchased from private plantations.

6. The cash receipts show a surplus over cash expenditure of Rs. 21,010; but owing to the fall in the price of bark there has been a large decrease in the value of the stock in hand; and Dr. Prain estimates the net profits at Rs. 11,632 as against Rs. 9,767 last year. Under the circumstances this must be held to be very satisfactory.

7. Sir George King, Superintendent of Cinchona Cultivation, and Government Quinologist, who retired in February last, had with conspicuous success directed the preparation by Government of the medicinal products of cinchona from their very commencement, and his brilliant services have already been acknowledged in a separate Resolution. The Government also lost during the year the services of Mr. J. A. Gammie, Deputy Superintendent, who had been associated with cinchona cultivation since its commencement. The Lieutenant-Governor now desires to thank Surgeon-Major Prain, who has succeeded Sir George King, for his efficient management and for the interesting report submitted by him.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT ON THE POLICE ADMINISTRATION OF THE TOWN OF CALCUTTA AND ITS SUBURBS FOR THE YEAR 1897.

RESOLUTION No. 4022J.

POLICE.

Dated Calcutta, the 19th August 1898.

READ—

The Annual Report on the Police Administration of the Town of Calcutta and its Suburbs for the year 1897.

The Annual Report of the Chief Presidency Magistrate.

The Annual Report of the Presidency Magistrate of the Northern Division.

READ also—

The Reports for the two previous years and the orders of Government recorded thereon.

SIR JOHN LAMBERT, K.C.I.E., held the office of Commissioner of Police from the beginning of the year until his retirement on the 26th May, when he was succeeded by Mr. James, who was in charge up to the end of the year. The report was due to Government on the 1st May, but was not received until the 30th July. The increase of work thrown on the Commissioner of Police in connection with the plague, and the necessity of preparing the statements in the new forms prescribed in Home Department Resolution No. $\frac{\text{S Police}}{521\text{-}35}$, dated 25th September 1896, retarded the completion of the report, but do not fully account for the very great delay in its submission. It should certainly have reached the Government earlier, and the Lieutenant-Governor trusts that similar delay will not recur in the future.

2. The following table shows the total number of cognizable and non-cognizable offences reported in the town and suburbs of Calcutta during each of the last five years:—

1	2	3	4	5	6
	1893.	1894.	1895.	1896.	1897.
Town	36,552	41,512	45,291	51,855	50,867
Suburbs	11,242	13,014	13,589	15,064	13,576
Total ...	47,794	54,526	58,880	66,919	64,443

The total in the past year was greater than in any preceding year, except 1896, which was an abnormal year owing to high prices throughout Bengal.

The table below contrasts the crime of the past three years, showing separately cognizable and non-cognizable crime, and offences under the Indian Penal Code and under the municipal and other laws:—

1		2	3	4
		1895.	1896.	1897.
Cognizable ...	Penal Code ...	6,836	8,116	7,612
	Miscellaneous ...	24,392	26,714	27,332
Non-cognizable ...	Penal Code ...	6,760	6,608	6,259
	Miscellaneous ...	20,892	25,481	23,240
Total ...		58,880	66,919	64,443

It will be observed that, as compared with the figures for 1896, offences under the Indian Penal Code decreased by 853 in the past year, and offences against the municipal and other laws, which are, with few exceptions, of a petty character, by 1,623. The Police, however, displayed greater activity in prosecuting for breaches of these laws, the number of miscellaneous cognizable offences reported showing an increase.

3. The following statement shows separately the number of cognizable and non-cognizable cases during the last two years, and their results, and also the division of work between the Courts of the Presidency and Suburban Magistrates during the past year :—

Court.	Cases instituted.			Cases tried.				Number of cases ending in conviction.			
	Cognizable cases sent up by the Police.	Cognizable cases taken up by the Magistrate direct.	Non-cognizable cases.	Cognizable cases sent up by the Police.	Cognizable cases taken up by the Magistrate direct.	Non-cognizable cases.	Total.	Cognizable cases sent up by the Police.	Cognizable cases taken up by the Magistrate direct.	Non-cognizable cases.	Total.
1	2	3	4	5	6	7	8	9	10	11	12
Northern Division Court	13,926	571	2,869	13,272	383	788	13,393	12,151	204	674	13,009
Southern Division Court	9,403	323	2,200	8,867	244	676	9,907	7,896	189	581	8,606
Bench Court	3,544	318	13,044	3,544	255	5,927	9,726	3,054	27	4,763	7,873
								28,023 by Magistrate 28 by High Court	420 by Magistrate ... by High Court	6,006 by Magistrate 11 by High Court	29,449 by Magistrate 39 by High Court
Total ...	26,873	1,212	24,013	24,203	882	7,391	33,416	23,051	420	6,017	29,488
Figures for preceding year.	24,483	1,638	24,474	22,357	897	14,032	37,286	21,605	478	7,505	29,648
Northern Division Suburban Court.	4,530	287	5,746	3,617	197	3,383	7,197	3,780	118	2,520	6,368
Southern Division Suburban Court.	2,900	383	1,031	2,328	202	201	3,231	2,737	159	109	3,005
								6,448 by Magistrate 19 by Sessions	276 by Magistrate 1 by Sessions	2,628 by Magistrate 1 by Sessions	9,353 by Magistrate. 21 by Sessions.
Total ...	7,520	670	6,777	6,645	399	3,584	10,628	6,467	277	2,629	9,373
Figures for preceding year.	6,727	183	7,018	9,716	152	4,702	11,570	6,417	26	2,786	9,229

The total number of cases tried in the town and suburbs during the year was 43,044, of which 38,861 or 90·30 per cent. ended in convictions. The police sent up 34,053 cognizable cases and obtained convictions in 29,518 or 86·68 per cent. The percentage of conviction was higher than in the preceding year in the total number of cases tried, but lower in the police cases. Of 1,882 cognizable cases taken up by the Magistrates direct, 697 or 37·03 per cent. resulted in conviction. This low percentage, though an improvement over the figure for the previous year, indicates a strong necessity for fuller examination of the complainants before ordering the issue of process. It is observed that of the 24,013 non-cognizable cases instituted in the town only 7,391, or 31 per cent. are shown as having been tried, while in the previous year 14,032 out of 24,474, or 57 per cent., were tried. The very small percentage of cases actually heard in the past year should be explained, and the Lieutenant-Governor desires that an explanation may be submitted.

The total number of persons arrested in the town and suburbs on cognizable charges fell from 41,234 to 40,498. Of these, 37,507 or 92·6 per cent. were convicted.

4. *False cases.*—The number of false cases in the town and suburbs was 70 and 42 respectively, as compared with 61 and 40 in the previous year. The complainants were prosecuted in 20 of the cases in the town, and fined in 17: one case was struck off in default of appearance, in one case the accused was discharged by the Magistrate and one case was compromised. In the suburbs 17 prosecutions were instituted: in 2 cases the accused were discharged by the Magistrate, 1 case was struck off in default of appearance and 5 cases were compromised. In 7 cases fines were inflicted amounting in the aggregate to Rs. 170, which sum was awarded as compensation to the aggrieved parties. In 2 cases the accused were sentenced to terms of imprisonment. These figures do not appear to the Lieutenant-Governor satisfactory. The offence of

bringing false criminal charges is a serious one, involving much harassment to innocent persons, but the number of prosecutions last year was small and their results were not such as to produce much deterrent effect.

5. *Property stolen and recovered.*—The total value of property stolen was Rs. 1,69,608 against Rs. 2,97,675 in the previous year. Property to the value of Rs. 91,109, or 53·71 per cent., was recovered against Rs. 1,92,398, or 64·63 per cent., in the previous year. A reduction in the percentage of recovery does not necessarily indicate inferior work on the part of the Police, the degree of success being largely dependent on the circumstances of the cases.

6. *Cognizable offences in the Town.*—The number of cognizable cases in the town was 26,592 against 27,363 in 1896. There was a decrease under all heads of crime under the Penal Code, while an increase occurred in offences against other laws. Of the serious offences under the Code the following may be noticed. There were 7 cases relating to coins against 11 in 1896. The number of murders was 9, against 2 in the previous year and 9 in 1895. In 3 of these cases the accused were convicted and sentenced to death, in 3 others they were found insane, and in the remaining cases they were acquitted. Of culpable homicide there were 5 cases as compared with 3 in the previous year. Forty-seven cases of grievous hurt were reported against 40 in the previous year, and 6 cases of kidnapping against 38. The number of robberies was 3, the same as in the previous year. One hundred and fifty-two cases of burglary were reported true. The cases show a decrease of 33 as compared with the number in 1896; seventy-three were detected and 84 persons were convicted; results on the whole creditable to the police. The value of the property stolen was Rs. 50,332 and of that recovered Rs. 35,416. There were 1,700 cases of theft reported true, this being 27 less than the number in 1896; in 1,188 investigation was successful, and 1,320 persons were convicted; results again creditable. Property was stolen to the value of Rs. 1,50,605 and recovered to the value of Rs. 85,005. Cases of criminal breach of trust were 187 in number against 476 in 1896, including 28 cases against cart-drivers and 5 against boatmen, who committed the offence in respect of property entrusted to them as carriers. The decrease in complaints under this head is very marked. It was stated in the report for 1896 that these cases are generally settled out of Court, and evidently many of them have been disputes of a civil nature. If, as the figures for the past year would suggest, the people are refraining from bringing such disputes before the Criminal Courts, the change is satisfactory. Under the Gambling Act there were 132 cases against 149 in the preceding year. Offences under the Police Act, and municipal and other miscellaneous offences were 10,717 in number against 12,888 in the previous year. Under the Shipping Act there were 70 cases against 292 in 1896, and under the Port Act 798 cases against 1,041 in 1896. The great decrease under these heads should have been explained, and the Lieutenant-Governor would be glad to have that explanation now. Under the Cruelty to Animals Act there were 7,323 cases against 6,890 cases in 1896.

7. *Non-cognizable crime in the town.*—The total number of non-cognizable cases was 6,259 under the Penal Code and 23,240 under the municipal and other laws, against corresponding totals of 6,608 and 25,481 in 1896. The most important case was one of forgery of Government currency notes. Seven persons were convicted and sentenced each to terms aggregating ten years. The notes were forged in a village of the Nadia district, where the men had provided themselves with a printing press and other apparatus. Some of the gang were convicted in that district; and others were arrested while endeavouring to pass a large number of the forged notes in Calcutta, and were convicted by the High Court. The detection of the gang was an important success of the Police during the year. Under the Municipal law there were 17,617 cases during the year against 17,454 in 1896. The number of bogus firms carrying on fraudulent business by means of advertisements in the mufassal papers and circulars to residents in up-country stations, which was reported to be 120 in 1895 and 74 in 1896, has now fallen to 57. The Lieutenant-Governor trusts that the attention given to these firms will be continued and have the effect of further reducing their number.

8. *Cognizable offences in the suburbs.*—In the number of cognizable cases in the suburbs there was a slight decrease, from 7,449 in 1896 to 7,301 in the year under review. There were six cases relating to coin against 4 in 1896; 4

murders against one in 1896; and one case of culpable homicide against 3 in 1896. Thirty-four cases of grievous hurt, being 16 more than in the previous year, and 38 cases of hurt by a dangerous weapon against 23 in the previous year, were reported. Burglaries and thefts also slightly increased.

9. *Non-cognizable crime.*—The total number of non-cognizable cases was 6,777 against 7,615 in the previous year. Cases under Municipal law increased by 1,084, the total for the year being 5,270.

10. *Suicides and accidental deaths.*—Suicides show an increase, numbering 101 against 73 in the previous year. The number of accidental deaths also rose considerably, from 186 in 1896 to 331 in the year under review. Ten persons lost their lives through a lamentable accident due to the fall of a portico under construction at the Martinière College. Twenty-two persons were killed by being run over. One hundred prosecutions for rash and furious driving were instituted and resulted in 91 convictions. In the Port of Calcutta 92 persons were accidentally killed. Of these, 63 were drowned.

11. *Working of the Arms Act.*—At the beginning of the year 3,008 fire-arms were held in stock by dealers. The number imported during the year was 3,959, and the number bought in India 1,850. Of these, 5,568 were sold. The closing balance showed 3,249 pieces in stock. Five prosecutions were instituted under the Arms Act and in four convictions were obtained.

12. *European Vagrancy Act.*—Ten European vagrants were in the work-house at the beginning of the year and 58 were received during the year—48 from Calcutta and 10 from the mufassal. Of these, 34 were discharged on obtaining work. Ten vagrants were also deported under agreements. The Alms House provided refuge for 24 seamen, for all of whom passages were arranged by the Superintendent.

13. *Fire-Brigade Act.*—The Fire-Brigade gave assistance at 32 fires during the year—14 in the town and on the river, 11 in the suburbs and 7 in Howrah. At ten other large fires the manual engines kept at out-stations were employed. One hundred other fires were reported, in which the value of property destroyed was trifling, not averaging more than Rs. 5 in each case. The total value of property lost by fire was Rs. 2,43,760, being slightly in excess of the loss in the previous year.

14. The sanctioned strength of the Calcutta Police Force was 2,997 against 2,891 in the previous year. The increase is due to additional men being sanctioned for the Kidderpore Docks and to the inclusion within the Calcutta force of the Hooghly Bridge Police. The percentage of casualties from retirements, dismissals, desertions, resignations and deaths, was 8·17. The number of punishments, judicial and departmental, remained much the same as in previous years. A sum of Rs. 3,634-4 was disbursed in rewards against Rs. 5,922-6 in 1896.

15. *Old offenders and anthropometry.*—The police kept surveillance over 714 released offenders during the year. Of these, 359 were Bengalis and 355 up-country men. Out of 961 accused whose antecedents were at first unknown 97 were eventually found, by means of anthropometry, to have been previously convicted.

16. The most important occurrence of the year in connection with the police administration of Calcutta was the rioting which took place at Tallah and the northern parts of the town on the 30th June and 1st July. A report was submitted to the Government of India in this Government letter No. 4113J., dated 28th July 1897, and it is unnecessary to enter into details here. Out of 87 persons sent up for trial in connection with these riots, convictions were obtained against 81. This result was satisfactory. The Government of India expressed their agreement with the opinion of Mr. Stevens, the Officiating Lieutenant-Governor, that the conduct of the Police throughout the riots was deserving of all praise. The necessity which arose, however, of summoning the military to the aid of the civil power drew attention to the fact that the strength and equipment of the Calcutta Police were defective, and recent events in connection with the out-break of plague in the city have confirmed the conclusion that the force should be strengthened and improved. Proposals have accordingly been submitted to the Government of India, and in the meantime the recruitment of additional men has been proceeding. Subject to the final approval of the Secretary of State, the Government of India have already sanctioned the creation of a company of Military Police for employment in the

vicinity of Calcutta. This force will be located near Barrackpore, on the opposite side of the river, and will serve to keep in check or suppress any riotous out-breaks among the mill-hands. In view of last year's riots it was also thought advisable to pass an Act extending to Calcutta the provisions of the Police Act V of 1861 relating to the quartering of additional police in disturbed areas at the cost of the inhabitants and the levying of compensation for injury to person and property done in such areas in the course of disturbances.

17. *Judicial work.*—Mr. Pearson held the office of Chief Presidency Magistrate from the beginning of the year, until the 29th September, when he went on leave, his place being filled by Mr. Bonnaud. The Hon'ble Nawab Bahadur Syud Ameer Hossein, C.I.E., was Magistrate of the Northern Division during the year, except from the 17th June to 31st July, when Mr. Bonnaud acted for him while absent on leave.

18. *Court of the Chief Presidency Magistrate.*—The total number of cases instituted during the year was 11,986 against 13,289 in the previous year. Of 11,807 persons prosecuted, 10,633 were convicted, and 1,138 acquitted or discharged. Appeals were preferred against the order of the Court in 22 cases; but the order was reversed in no case. Out of 15 motions to the High Court 3 were successful.

19. *Northern Division Court.*—The total number of cases instituted was 16,966 against 17,077 in the preceding year. Of 18,650 persons brought before the Court 17,687 were convicted, 36 committed to the Court of Sessions, and 871 acquitted or discharged. The number of appeals was 34, and all were rejected. In 8 out of 15 motions to the High Court, the original order was set aside.

20. The following statement compares the number of persons against whom process issued in non-cognizable cases with the number actually appearing during the past two years:—

Name of Court.	Number of persons against whom process issued.		Number of persons actually appearing.		Percentage of persons appearing to persons against whom process issued.		Remarks.
	1896.	1897.	1896.	1897.	1896.	1897.	
1	2	3	4	5	6	7	8
Chief Presidency Magistrate ...	2,688	2,837	1,418	857	52·7	30·2	
Presidency Magistrate, Northern Division	4,855	4,904	1,707	1,351	35·2	27·5	
Honorary Presidency Magistrates ...	19,322	19,880	12,429	9,775*	64·3	49·1	
Total ...	26,865	27,621	15,554	11,983	57·9	43·4	* (Including three persons whose trial was pending at the beginning of the year.)

The percentage for the past year for all the Courts was even lower than that of the previous year. The Chief Presidency Magistrate observes that the number of persons who do not appear must always be large as long as the law allows cases to be withdrawn, abandoned or compounded. This does not, however, explain the great divergence in the percentages in the past two years. In the Court of the Chief Presidency Magistrate 547 cases were dismissed under section 203, Criminal Procedure Code, against 442 in 1896, and in the Northern Division Court 1,258 cases against 979. It appears that out of 372 persons against whom process issued from the Chief Presidency Magistrate's Court on charges under sections 504, 506—510, Indian Penal Code (intimidation, insult and annoyance), only one person or ·27 per cent. was convicted. This presumably affords further evidence of the necessity for more fully examining the complainant before the issue of process.

21. *Work of Honorary Magistrates.*—The number of cases referred for trial to the Honorary Magistrates during the year was 5,299, and they also had on their files 17,484 municipal cases. Of the total of all classes of cases (22,783) it

appears from the statement in paragraph 3 above that only 9,728 were actually tried, the remainder having been struck off for non-appearance or compromised or withdrawn. Nine appeals were preferred against the orders of Honorary Magistrates. Of these, one was successful and another partially so. Motions were preferred in 6 cases, with the result that in one case the order was set aside, and in another the sentence was modified. In the municipal cases fines were inflicted to the amount of Rs. 23,280-14, out of which Rs. 17,625-4-3 were realised. The unrealised balance appears large. The Lieutenant-Governor again takes the opportunity of thanking the Honorary Presidency Magistrates for the large amount of work done by them during the year. He notices that the number of cases in which Honorary Magistrates failed to attend without giving notice was fewer than in the previous year. The thanks of Government are in particular due to those Magistrates whom Mr. Pearson mentions as having frequently attended when requested to do so at the shortest notice.

22. Under the new Code of Criminal Procedure the Lieutenant-Governor has declared the Honorary Presidency Magistrates to be subordinate to the Chief Presidency Magistrate to the same extent as the Magistrates in the interior are subordinate to the District Magistrates. This is an improvement in the law, which was needed. Under section 557 of the Code legal practitioners who appear in the Presidency Courts have been disqualified for appointment as Honorary Presidency Magistrates.

23. Sir John Lambert severed during the year his long connection with the Police of Calcutta. The Lieutenant-Governor in reviewing the last report recorded his appreciation of the value of his services. Mr. James had within a very short time of succeeding him to deal with much excitement in connection with the Tallah riots, and there has been a recurrence of excitement since. His tenure of office has so far been attended with much anxiety, and he has earned the thanks of the Government by the manner in which he has discharged his responsible duties. The favourable mention made of Mr. Paget, the Deputy Commissioner, and of the other officers mentioned in paragraph 38 of the report has been noted by Government.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Commissioner of Police, Calcutta, for information and for communication to the Presidency Magistrates.

Ordered that a copy of the Resolution be forwarded to the Commissioner of the Presidency Division, the Chairman of the Corporation of Calcutta, and the Municipal Department of this Government, for information.

Ordered also that a copy of the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

Chief Secretary to the Government of Bengal.

REPORT ON THE STATE OF THE SALT MARKET FOR THE FIRST QUARTER OF 1898-99.

No. 639B., dated Calcutta, the 16th August 1898.

From—E. V. LEVINGE, Esq., Offg. Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

SALT.

THE HON'BLE MR. W. H GRIMLEY.

I AM directed to submit the following report on the state of the salt market for the first quarter of 1898-99, comprising the months of April, May and June 1898.

2. The quantity of salt of every description cleared during the quarter under review amounted to 28,36,853 maunds, as compared with 26,59,942 maunds in the previous quarter, and 26,17,863 maunds in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 67,29,251, as against Rs. 62,57,638 in the previous quarter, and Rs. 61,10,816 in the corresponding quarter of the previous year.

3. The quantity of locally-made salt removed from the *Golas* in Orissa during the quarter under review, and the quantity which remained in store at the close of the quarter, are shown in table I below:—

TABLE I.

1	2
	Puri.
	Mds.
Balance at the close of the previous quarter ...	5,58,893
Manufactured or added during the quarter ...	.....
Total ...	5,58,893
Sold during the quarter	7,186
Wastage	.....
Total ...	7,186
Balance at the close of the quarter	5,51,707

The total sales of locally-made salt during the quarter under review amounted to 7,186 maunds, as compared with 3,778 maunds in the previous quarter, and 3,914 maunds in the corresponding quarter of the previous year. Duty was paid on the full quantity sold.

4. The subjoined table (II) shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter

under review, as compared with the figures of the corresponding quarters of the last two years:—

7. The quantity of salt despatched by the East Indian Railway to stations beyond Buxar during the quarter under review amounted to 2,250 maunds and 20 seers, as noted in the margin, against 1,873 maunds and 30 seers in the previous quarter, and 2,623 maunds and 10 seers in the corresponding quarter of the previous year.

	Mds.	s.
April	2	0
May	749	20
June	1,499	0
Total ...	2,250	20

8. The quantity of saltpetre removed from the refineries during the quarter on payment of duty, amounted to 6,074 maunds, as compared with 11,136 maunds in the previous quarter, and 11,754 maunds in the corresponding quarter of the previous year.

9. The shipments of Liverpool salt for the port of Calcutta, according to the published market reports, were as follows :—

		Tons.
April 1898		26,040
May „		39,240
June „		18,670
	Total ...	83,950

It is reported that two vessels were *en route* for Calcutta at the close of the quarter with 6,670 tons of salt from Hamburg.

10. Table V shows the average wholesale price per 100 maunds of Liverpool and other descriptions of salt during each fortnight of the quarter :—

No transactions in sea-imported salt have been reported for the quarter from Cuttack and Puri.

WEATHER AND CROP REPORT.

For the week ending the 22nd August 1898.

Burdwan.—Rainfall at Sadar 3·16, Kalna 4·62, Katwa 1·92, Raniganj 1·27. Weather favourable. Transplantation of *aman* almost over. Harvesting of *aus* began. Common rice selling as follows:—

	Srs.	
Sadar	11 to 13	per rupee.
Kalna	11 to 12	
Katwa	13	
Raniganj	12½	

Birbhum.—Rainfall at Sadar 5·12, Rampur Hât 4 89. Weather hot, cloudy and rainy. Break in rains needed. Lowland paddy and sugarcane not doing well. Highland paddy promising. Prices stationary. Fodder sufficient.

Bankura.—Rainfall at Bankura ·33, Vishnupur 1·01. Weather seasonable. Transplantation of paddy almost over. Prospects of crops good. Manufacture of indigo going on. No cattle-disease reported. Price of common rice at Sadar 14½ seers and at Vishnupur 12½ seers per rupee.

Midnapore.—Rainfall at Sadar 3·84, Contai 2·25, Tamluk 1·64, Ghatal 1·68. Prospects of standing crops favourable. Transplantation going on. More rain wanted at Tamluk and Contai. Some of the lands resown after floods in thanas Ghatal and Daspur are again under water. Damage by grasshoppers reported from Dantoon, Dibra, Sabang, and Chandrakona police-stations. Prices of common rice—

	Srs.	
Sadar	12	per rupee.
Contai	11 to 13	
Tamluk	11⅘	
Ghatal	12 to 13	

Hooghly.—Rainfall at Sadar 3·50, Serampore 5·15, Jahanabad 6·02. Transplantation of *aman* is going on briskly. *Aus*, sugarcane, and jute doing well. Cattle-disease prevails in places. Common rice sells from 10 to 12 seers per rupee.

Howrah.—Rainfall at Sadar 2·51, Ulubaria 1·80. Weather cloudy with occasional showers. Transplantation of *aman* still going on. More rain is wanted at Ulubaria, where there has been short rainfall throughout this year. Condition of standing crops good. Fodder and water sufficient. Common rice sells at 10 to 12 seers per rupee.

24-Parganas.—Rainfall at Sadar 2·60, Barasat 3·53, Basirhat 3·60, Diamond Harbour 2·72. Weather seasonable. More rain is still required in the Diamond Harbour subdivision. *Aus* and jute doing well. Transplantation of *aman* going on. Harvesting of *aus* and cutting of jute commenced. Fodder and water sufficient. Cattle-disease reported from some parts of the Sadar, Basirhat, and Diamond Harbour subdivisions. Common rice sells as follows:—

	Srs.	
Sadar	10 to 12⅘	per rupee.
Barasat	11	
Basirhat	13¾	
Diamond Harbour	11	

Nadia.—Rainfall at Sadar 1·83, Kushtia ·79, Meherpur 1·09, Chuadanga 1·70, Ranaghat 4·26. Harvesting of *aus* has commenced in places. Transplantation of winter rice is going on. Common rice selling at 10 to 12½ seers per rupee. Fodder and water sufficient. Cattle-disease in thanas Chuadanga and Tehatta.

Murshidabad.—Rainfall at Sadar 7·18, Kandi 4·12, Jangipur 2·77. Weather seasonable. Transplantation of *aman* nearly finished. Harvesting of *bhadoi* going on. State of indigo and mulberry hopeful. Jute plants are doing well. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	
Sadar	12	per rupee.
Kandi	14	
Jangipur	13½	

Jessore.—Rainfall at Sadar 1·09, Jhenida 1·50, Magura ·81, Narail 2·64, Bangaon ·55. Weather variable—sometimes bright and clear, and at other times dark, cloudy, and damp. State and prospects of crops good. *Aus* paddy being reaped. No cattle-disease reported. Condition of fodder and water good. Common rice sells as follows:—

	Srs.	
Sadar	11 to 14	per rupee.
Jhenida	12	
Magura	14 to 17	
Narail	13-5½ chs.	
Bangaon	11½ to 12½	

Khulna.—Rainfall at Sadar 3·06, Satkhira 3·21, Bagerhat 1·99. Weather seasonable. Transplantation of *aman* and harvesting of *aus* going on. Fodder and water sufficient. Common rice sells as follows :—

		Srs.	
Sadar	13 to 13½	}	
Satkhira	13	}	per rupee.

Pabna.—Rainfall at Sadar ·47, Sirajganj 2·37. Weather cloudy and rainy. Rivers rising and the prospect is good. Common rice sells from 10 to 14 seers per rupee.

Dacca.—Rainfall at Sadar 1·51, Manikganj 1·61, Munshiganj 2·74, Narainganj 1·78. Weather seasonable. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice 11 to 14 seers per rupee.

Mymensingh.—Rainfall at Sadar 3·57, Tangail 1·69, Jamalpur 2·68, Kishorganj 10·50, Netrokona 4·80. Weather seasonable. Harvesting of *aus* and jute going on. Prospects of standing crops very fair. More rain wanted for the *aman* crop. Common rice sells from 11 to 15⅞ seers per rupee. Condition of cattle good. Fodder and water available.

Faridpur.—Rainfall at Sadar 1·60, Goalundo ·91, Madaripur 4·6. Weather seasonable. Prospects of crops good. Rice 12 to 13 seers per rupee.

Backergunge.—Rainfall at Sadar 4·53. Weather first [illegible] of showery. Common rice (*aman*) sells from 10½ to 13½ seers and (*aus*) from 15 to 16 seers per rupee.

Tippera.—Rainfall at Sadar ·46, Brahmanbaria 1·14, Chandpur 2·70. Weather somewhat warm. Harvesting of jute and *aus* paddy continues. More rain wanted for transplantation of *aman* crop. Fodder plentiful. Rice selling at 10 to 16 seers per rupee.

Noakhali.—Rainfall at Sadar 5·28, Feni 6·85. Excessive rainfall, but prospects of crops still good. No cattle-disease. Fodder sufficient. Price of rice (*aman*) 10 to 11 seers and (*aus*) 13 to 16 seers per rupee.

Chittagong.—Rainfall 5·60. Weather seasonable. *Aus* crop doing well. Transplantation of *aman* progressing. Prospects good. Rice selling at 11 seers per rupee.

Patna.—Rainfall at Sadar 3·42, Barh 4·57, Bihar 1·19, Dinapur 2·11, Hilsa 2·65, Bikram 3·58. Transplantation of paddy going on Prospects of *bhadoi* crops good. More rain wanted in the Bihar sub division. Prices stationary. In Patna common rice sells at 15 seers a rupee. Fodder and water for cattle sufficient.

Gaya.—Rainfall at Sadar 1·63, Jahanabad ·12, Aurangabad 3·99, Nawada ·94. Transplantation of paddy approaching completion. Harvesting of *marua* commenced in places. Common rice selling at 13 seers per rupee.

Shahabad.—Rainfall at Sadar 1·73, Buxar 4·09, Sasaram 4·38, Bhabua 2·38, Dehri 3·56. Standing crops good. Transplantation of paddy continuing. *Sawan* and *tangoon* being harvested. Rice sells at Arrah 14 seers per rupee.

Saran.—Rainfall at Sadar 2·71, Siwan 3·53, Gopalganj 3·47. Weather seasonable. Indigo generally good *Makai* and other *bhadoi* crops very good. Transplantation of paddy going on well. Average price of common rice 12 seers 9 chittacks and of *makai* 21 seers 10 chittacks per rupee.

Champaran.—Rainfall at Motihari 5·12, Bettiah 2·62, Burharwa 3·75, Bagaha ·73, Ramnagar ·56. Weather hot. Rain has done much good to cultivation. Transplantation is going on, but more rain is urgently wanted, especially in the north of the district. Early rice is being harvested. *Bhadoi* crops doing well. Fodder and water sufficient. Cattle-disease in Mainatand. Price of common rice unchanged.

Muzaffarpur.—Rainfall at Sadar 5·67, Hajipur 5·37, Sitamarhi 2·13. Transplantation of the rice crop is nearly completed. Prospects good. No cattle-disease Prices are—common rice 11 to 14 seers, wheat 15½ to 16 seers, barley 25 seers, *makai* 23 seers, gram 18 to 20 seers, *rahar* 23½ and 24 seers, and *marua* 25 seers per rupee.

Darbhanga.—Rainfall at Sadar 2·95, Samastipur 2·67, Madhubani 2·32. Transplantation of paddy continues. More rain urgently wanted. *Marua* doing well. *Makai* attaining maturity. Price of common rice at Sadar 12 seers per rupee.

Monghyr.—Rainfall at Sadar 6·90, Begusarai 2·69, Jamui 4·15. Weather cloudy and rainy. Transplantation of winter paddy continuing. Prospects of *bhadoi* crops hopeful. Standing crops doing well. *China* and maize being harvested in places. No cattle-disease. Common rice sells as follows:—

Monghyr	...	...	...	12 to 14 seers	per rupee.
Begusarai	...	...	...	11 to 13	„ „
Jamui	...	...	...	14	„ „

Bhagalpur.—Rainfall at Sadar ·62, Banka 3·41, Madhipura ·54, Supaul ·93. Weather windy and cloudy. Transplantation of *aghani* paddy in full progress. Prospects of standing crops satisfactory. Prices steady.

Purnea.—Rainfall at Sadar ·30, Kishanganj 2·63, Araria 1·08. Weather hot and cloudy. Harvesting of jute and *bhadoi* rice continues. Standing crops doing well. Heavy showers required for transplantation of *aghani* paddy. Cattle-disease still reported from Matiari and Sikti. No fresh cases of *kala dukh* reported. Fodder and water sufficient. Common rice sells as follows:—

Sadar	...	...	...	15	seers per rupee.
Kishanganj	...	...	...	14	„
Araria	...	...	...	16	„

Malda.—Rainfall at Sadar 1·07, Chanchal 2·65, Shibganj 1·57, Gajole 2·28. Weather cloudy and hot. Harvesting of *bhadoi* continues. Jute is being harvested in some places. More rain wanted for transplantation of winter rice, which is still going on. Prospects of standing crops good. Common rice selling at 13 seers per rupee. Fodder and water sufficient.

Sonthal Parganas.—Average rainfall 3·75. Transplantation of winter rice nearly done. All crops doing well Some cattle-disease reported. Fodder and water sufficient. Price of rice 13 to 15 seers, and of maize 20 to 21 seers per rupee.

Cuttack.—Rainfall at Sadar 1·88, Jajpur 4·08, Kendrapara 5·36, Banki 1·26. Weather cloudy and showery. *Beali* in ear and in some places being reaped. *Sarad* being transplanted and weeded. Sugarcane, jute, and *arhar* in progress. Condition of cattle generally good, but disease still prevails in places. Fodder and water sufficient. Common rice sells as follows:—

				S.	ch.	
Cuttack	...	...	...	13	2	per rupee.
Jajpur	...	...	...	15	12	
Kendrapara	...	...	...	17	1	
Banki	...	...	...	14	13	

Balasore.—Rainfall at Sadar 4·69. *Beali* in ear. Transplantation and puddling of *sarad* continue. Jute flowering. Sugarcane and other standing crops growing well. Price of rice varies from 13 to 17 seers per rupee in the interior. Rice sells at 13 and 14 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rainfall at Angul ·26. Khondmals. 7·50. More rain needed in Angul. Harvesting of *bhadoi* crops commenced. Prices stationary. Condition of people good.

Puri.—Rainfall at Puri 4·01, Khurda 2·90. Weeding, transplanting and puddling of *sarad* paddy continue. *Beali* and *mandia* in ear. Prospects of sugarcane good. Fodder and water sufficient. Cattle-disease reported from certain parts of the district. Common rice sells as follows:—

	Srs. ch.	
Puri	... 13 2	per rupee.
Khurda	... 13 2	
Interior of district	... 13 2 to 15 12	

Hazaribagh.—Rainfall at Sadar ·57, Giridi 1·05. Sunshine and cloudy. Prospects of *bhadoi* crops good. More rain wanted to complete paddy transplanting. Rice sells at 10 to 12 seers per rupee.

Lohardaga.—Rainfall at Sadar 1·13. Transplantation finished. Sowing of *sargooja* commenced. State of standing crops good. Rice sells at Ranchi 11 seers per rupee and in the interior from 11 to 16 seers per rupee. Cattle-disease continues. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—Rainfall at Sadar 4·79. Weather favourable. *Bhadoi* and rice crop doing well. Paddy transplantation still going on. Rice sells from 11 to 16 seers per rupee.

Manbhum.—Rainfall at Sadar 2·68, Gobindpur 1·35. Weather seasonable. Prospects of crops good. Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar 12 seers and at Gobindpur 11 seers per rupee. Supply sufficient.

Singhbhum.—Prospects of crops good. Prices stationary. Cattle-disease reported from Chakradharpur and Kolhan.

General Summary.—There was rain all over the Province during the week, and the general agricultural prospects are favourable. More rain is still required in parts to complete transplantation of the winter rice. In Midnapore some of the lands re-sown after the late floods are said to be again under water, and grass-hoppers are doing damage to the paddy plants in places. Early rice and jute are being harvested. Other *bhadoi* crops and sugarcane are doing well. There was a fall in the price of common rice in some districts owing to the appearance of the new *aus* crop in the market. Fodder-supply is everywhere sufficient. Cattle are generally in good condition, but disease is reported from some districts.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 23rd August 1898.

M. FINUCANE,
Secretary to the Govt. of Bengal.

The mean pressure of the seven days	Inches. 29·601
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29·589
The total number of hours of bright sunshine	Hours. 34·5
The maximum possible number of hours of sunshine	89·9
The mean temperature of the seven days	° 81·9
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	83·1
The extreme variation of temperature	12·3
The maximum temperature	88·7
The highest velocity of the wind in one hour	Miles. 10
The mean relative humidity	% 89
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	87
The total fall of rain from 14th to 20th August 1898	Inches. 2·83
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3·75
The total fall from 1st January to 20th August 1898	37·75
The average fall of the corresponding period for 24 years, Surveyor-General's Office	44·02

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder.

WEATHER AND CROP REPORT.

For the week ending the 29th August 1898.

Burdwan.—Rainfall at Sadar ·95, Kalna 1·65, Katwa 2·63, Raniganj ·88. Weather rainy. *Aus* being harvested. Transplantation of *aman* nearly over. Prospects favourable. Some cases of cattle-disease. Common rice selling as follows:—

	Srs.	
Sadar	11 to 16	per rupee.
Kalna	11 to 12	
Katwa	12¼	
Raniganj	12½	

Birbhum.—Rainfall at Sadar 1·87, Rampur Hât 3·76. Weather cloudy and rainy. Lowland paddy and sugarcane not improving. Highland paddy promising. Prices stationary. Fodder sufficient.

Bankura.—Rainfall at Bankura 2·00, Vishnupur ·97. Weather hot; latter part of the week rainy. Transplantation almost finished. Prospects cheerful. No cattle-disease reported. Fodder and water sufficient. Price of common rice at Sadar 15 seers and at Vishnupur 12½ seers per rupee.

Midnapore.—Rainfall at Sadar ·62, Contai 2·44, Tamluk ·72, Ghatal ·84. Transplantation going on. Good rain in Contai has done much good. Prospects of standing crops favourable. Damage by grasshoppers reported from several thanas. Prices of common rice are as follows:—

	Srs.	
Sadar	12	per rupee.
Contai	11 to 14	
Tamluk	11½	
Ghatal	12 to 13	

Hooghly.—Rainfall at Sadar 1·14, Serampore 1·85, Jahanabad ·66. Transplantation of *aman* is going on briskly. *Aus*, sugarcane, and jute doing well. Cattle-disease prevails in places. Common rice sells from 10 to 12 seers per rupee.

Howrah.—Rainfall at Sadar 1·57, Ulubaria ·65. Weather cloudy with rain almost every day. Transplantation of *aman* still going on. More rain is wanted at Ulubaria. Condition of standing crops good. Fodder and water available. Common rice sells at 10 to 12 seers per rupee.

24-Parganas.—Rainfall at Sadar 4·53, Barasat ·97, Basirhat 1·49, Diamond Harbour 1·44. Weather seasonable. Transplantation of *aman* going on. More rain still required for high lands in Diamond Harbour subdivision. Harvesting of *aus* and jute commenced. Fodder and water sufficient. Cattle-disease reported from Diamond Harbour subdivision. Common rice sells as follows:—

	Srs.	
Sadar	10 to 12	per rupee
Barasat	12½	
Basirhat	13¾	
Diamond Harbour	11	

Nadia.—Rainfall at Sadar 3·99, Kushtia 3·35, Meherpur 1·55, Chuadanga 2·51, Ranaghat 2·17. Harvesting of *aus* in progress. Standing crops doing well generally. Common rice selling at 10½ to 12½ seers per rupee. Fodder and water sufficient. No cattle-disease reported beyond that mentioned last week.

Murshidabad.—Rainfall at Sadar 4·35, Kandi 3·87, Jangipur 4·32. Weather seasonable. Harvesting of *bhadoi* still continues. Transplantation of *aman* nearly finished. State of mulberry, indigo, sugarcane and jute hopeful. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	12	per rupee.
Kandi	14	
Jangipur	13½	

Jessore.—Weather cloudy, rainy and damp. Rainfall at Jessore 7·97, Jhenida 5·17, Narail 2·54, Bangaon 3·59. Harvesting of *aus* and jute going on. Manufacture of indigo almost over. Fodder and water sufficient. Cattle disease reported from Bangaon. Common rice sells as follows:—

	Srs.	
Jessore	12 to 16	per rupee.
Jhenida	13	
Narail	16	
Bangaon	12 to 13	

Khulna.—Rainfall at Sadar 2·30, Satkhira 2·70, Bagerhat 4·67. Weather close and cloudy. Transplantation of *aman* and harvesting of *aus* still going on. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	12 to 15	per rupee.
Satkhira	13	
Bagerhat	13½	

Rajshahi.—Rainfall at Sadar 6·84, Nator 7·26. Prospects of crops good. Harvesting of *aus* paddy continues. No cattle-disease. Fodder and water ample. Rice sells from 10 to 15 seers per rupee.

Dinajpur.—Average rainfall 2·53. Weather cloudy and rainy. Harvesting of *bhadoi* paddy and jute going on. Transplantation of *aman* paddy nearly finished. No cattle-disease. Fodder and water ample. Rice selling at 14 seers a rupee.

Jalpaiguri.—Rainfall at Sadar 2·92, Alipur Duars 2·70. Weather hot. Harvesting of *bhadoi* paddy going on. More rain wanted for the transplantation of *haimanti* paddy and for jute. Fodder and drinking-water sufficient. Common rice sells from 8 to 14 seers a rupee.

Darjeeling.—Rainfall at Darjeeling 3·85, Kurseong 4·75, Siliguri 6·39. Weather seasonable. *Hills*—Harvesting of *chhota marua* and *bhutta* going on; *haimanti* paddy and *bara marua* progressing. *Terai*—Transplanting of *haimanti* paddy nearly finished; *jamira*, *bhadoi*, and jute being cut. Coarse rice sells:—

	Srs.	
Hills	8 to 10	per rupee.
Terai	13 to 15	

Bhutta sells from 16 to 32 seers per rupee.

Rangpur.—Rainfall at Sadar 9·68, Gaibanda 16·27, Kurigram 8·97, Nilphamari 4·85. Weather seasonable. Transplantation of *aman* and harvesting of *aus* still in progress. Cutting, steeping and washing of jute going on. Prospects fair. Common rice selling at 11 to 14 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 7·61. Transplanting of *aman* continues. Harvesting of *aus* and cutting of jute in progress. Fodder and water sufficient. Common rice selling from 10½ to 16½ seers per rupee.

Pabna.—Rainfall at Sadar 6·03, Sirajganj 7·88. Weather rainy. Prospects of crops good. Common rice selling at 10 to 15 seers per rupee.

Dacca.—Rainfall at Sadar 9·10, Manikganj 5·99, Munshiganj 2·72, Narainganj 7·65. Weather cloudy and rainy. Prospects of standing crops good. Harvesting of jute going on. River gradually rising. Fodder available. No cattle-disease. Common rice 11 to 15 seers per rupee.

Mymensingh.—Rainfall at Sadar 12·43, Tangail ·92, Netrokona 3·34, Jamalpur ·80, Kishorganj ·52. Very heavy rain during the week. Prospects of all crops good. Fodder and water ample. Condition of cattle good. Common rice sells at 10 to 12 seers per rupee everywhere, except Netrokona, where 18 seers 14 chitaks is reported.

Faridpur.—Rainfall at Sadar 4·14, Goalundo 2·71, Madaripur ·84. Weather rainy and seasonable. Prospects of paddy excellent. Rice sells from 13 to 14 seers per rupee.

Backergunge.—Rainfall at Sadar 7·47. Weather wet. Prospects of crops fair. Common rice sells from 10½ to 14 seers per rupee.

Tippera.—Rainfall at Sadar 13·18, Chandpur 7·89. Weather rainy. Harvesting of jute and *aus* paddy still continues, but crops damaged by heavy rain. Prospects of *aman* hopeful. Fodder plentiful. Rice selling at 10 to 16 seers per rupee.

Noakhali.—Rainfall at Sadar 17·99, Feni 7·26. *Aus* paddy and *aman* seedlings being damaged by excessive rain in low-lying tracts. No cattle-disease. Fodder available. Price of rice (*aman*) 9 to 14 seers and (*aus*) 13 to 15 seers per rupee.

Chittagong.—Rainfall 15·61. Weather seasonable. *Aus* being reaped. Cultivation of *aman* continues. Crops suffered from heavy rainfall. Prices stationary.

Patna.—Rainfall at Sadar 4·26, Barh 3·09, Bihar 3·75, Dinapur 3·45, Hilsa 5·70, Bikram 4·61. *Bhadoi* somewhat damaged by the recent flood in Barh. Transplantation of paddy in progress. Fields being prepared for *rabi* sowings. Prices improving. Common rice sells in Patna at 16 seers a rupee. Fodder and water for cattle sufficient.

Gaya.—Rainfall at Sadar 4·01, Jahanabad 12·74, Aurangabad 3·76, Nawada 1·60. *Bhadoi* being harvested. Transplantation of paddy still going on in places. Common rice selling at 14 seers per rupee.

Shahabad.—Rainfall at Sadar 2·80, Sasaram 1·68, Buxar 3·98, Bhabua 3·94, Dehri 2·36. *Bhadoi* crops being harvested and slightly damaged in Buxar. Transplantation of paddy still continuing. Prices stationary.

Saran.—Rainfall at Sadar 4·18, Siwan 9·10, Gopalganj 1·98. Heavy rain has just fallen and rivers are full. *Bhadoi* crops generally very good. Transplantation of *aghani* paddy going on with good prospects. Cattle-disease continues. Average prices—Common rice 12·13 and *makai* 21·6 seers per rupee.

Champaran.—Rainfall at Motihari 3·73, Bettiah ·44, Burharwa 2·71, Bagaha ·04, Ramnagar 2·33. Weather cloudy and showery. *Bhadoi* crops much benefited by rain. Rice transplantation going on, but retarded in Bettiah subdivision for want of good rain. *Sawan* millet and early rice being harvested. *Makai* ripening. *Marua* doing well. Fodder and water ample. Cattle-disease in Mainatand. Price of common rice unchanged.

Muzaffarpur.—Rainfall at Sadar 3·73, Hajipur 4·81, Sitamarhi ·24. Weather seasonable. Standing crops doing well. Prospects good. More rain wanted in Sitamarhi subdivision both for rice and *bhadoi* crops. No cattle-disease. Prices are—Common rice 11 to 14 seers, wheat 15 to 18 seers, barley 25 seers, *makai* 20 to 25 seers, gram 18 to 21 seers, *rahar* 23 to 24 seers, and *marua* 25 seers per rupee.

Darbhanga.—Rainfall at Sadar 3·55, Samastipur 4·43, Madhubani 1·88. Weather cloudy with east wind. Transplantation of paddy nearly completed, but more rain is wanted in Madhubani. *Makai* ripening in places. *Marua* flourishing. Common rice selling at Sadar 11½ seers per rupee.

Monghyr.—Rainfall at Sadar 3·33, Begusarai ·18, Jamui 1·45. Weather cloudy and rainy. Transplantation of winter paddy nearly completed. Prospects of standing crops good except where flooded. Maize and *kharf* being harvested. No cattle-disease. Common rice sells as follows:—

Monghyr	...	...	...	12 to 15 seers	per rupee.
Begusarai	...	...	...	11 to 13	„ „
Jamui	...	...	...	14	„ „

Bhagalpur.—Ordinary monsoon weather. Rainfall at Sadar 9·51, Banka 2·74, Madhipura ·53, Supaul 1·65. Transplantation of paddy going on. Prospects of all crops good. Prices steady.

Purnea.—Rainfall at Sadar ·41, Kishanganj 1·54, Araria ·86. Weather hot and cloudy. Harvesting of *bhadoi* and jute in full swing. Rain urgently needed for transplantation of *aghani* paddy. Cattle-disease reported from Matiari and Sikti in Araria subdivision. One fresh case of *kala dukh* reported. Fodder and water sufficient. Common rice sells as follows:—

Sadar	...	...	...	15	seers per rupee.
Kishanganj	...	...	...	14	„
Araria	...	...	...	16	„

Malda.—Rainfall at Sadar 6·51, Chanchal ·32, Shibganj 2·88, Gajole 6·34. Weather cloudy with occasional heavy showers. Transplantation of winter paddy nearly done. Harvesting of *bhadoi* rice progressing; an average outturn expected. Steeping of jute continues. Coarse rice selling at 13¼ seers per rupee. Fodder ample.

Sonthal Parganas.—Average rainfall 5 inches. Harvesting of *bhadoi* crops continues. They have been damaged by floods in Pakour; otherwise they are doing well Transplantation of winter rice nearly done. Price of rice 12½ to 15 seers, and of maize 18 to 22 seers per rupee. Health of cattle good.

Cuttack.—Rainfall at Sadar 4·45, Jajpur 5·38, Kondrapara 4·03, Banki 2·50. Weather showery. *Beali* in ear and in some places being reaped. *Sarad* being transplanted and weeded. Sugarcane, jute, and *arhar* growing. Condition of cattle generally good, but disease still continues in places. Fodder and water sufficient. Common rice sells as follows:—

				S.	ch.	
Cuttack	...	...	...	13	2	per rupee.
Jajpur	...	...	...	15	12	
Kendrapara	...	...	...	17	1	
Banki	...	...	...	15	12	

Balasore.—Rainfall at Sadar ·18. *Beali* ripening. Weeding, puddling and transplanting of *sarad* continue. Jute flowering. Sugarcane and other standing crops growing well. Price of rice varies from 13 to 17 seers per rupee in the interior. Rice sells at 13½ and 15 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rainfall at Angul 2·76. Prospects of winter rice crop promising. *Bhadoi* crops being harvested. Prices stationary. Condition of people good.

Puri.—Rainfall at Puri 1·86, Khurda 1·56. Weeding, transplanting and puddling of *sarad* paddy continue. *Beali* and *mandia* nearly ripe. Prospects of sugarcane good. Fodder and water sufficient. Cattle-disease reported from certain parts of the district. Common rice sells as follows:—

				Srs.	ch.	
Puri	...	...	...	13	2	per rupee.
Khurda	...	...	...	13	2	
Interior of district	...	...	...	13 to 15	2 to 2	

Hazaribagh.—Weather rainy. Rainfall at Sadar 2·68, Giridi 2·79. Transplantation nearly over. Prospects very favourable. Rice 10 to 13 seers per rupee.

Lohardaga.—Rainfall 2·86. *Sarguja* sowing continues. State of standing crops good. Rice sells at Ranchi 11 seers and in the interior from 11 to 16 seers per rupee. Cattle-disease continues in the interior. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—Rainfall at Sadar 2·12. Weather seasonable. Paddy transplantation nearly finished. Prospects of crops good. *Sawan* and *gonda* being harvested in places. Rice sells from 12 to 16 seers per rupee.

Manbhum.—Rainfall at Sadar ·22, Gobindpur 1·18. Weather seasonable. Prospects of crops good. Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar 12 seers and at Gobindpur 11 seers per rupee. Supply sufficient.

Singhbhum.—Satisfactory rain, 1·51. Prices stationary. Rice plentiful.

General Summary.—There was rain in all parts of the Province during the week, and in Eastern Bengal the fall was very heavy, and some damage to the crops is reported from Tippera, Noakhali and Chittagong. The transplantation of winter rice is being rapidly completed, but in the north of Champaran, Muzaffarpur and Darbhanga, and in Purnea, more rain is required. The *bhadoi* crops are promising except where they have been damaged by floods in Patna, Monghyr and the Sonthal Parganas. Grasshoppers are still doing damage to the paddy plants in several thanas in Midnapore. The harvesting of early rice and the cutting and washing of jute are in progress. There was a slight fall in the price of rice in some districts. Cattle-disease is still reported from places, but the fodder-supply is everywhere sufficient.

The total fall from 1st January to 27th August 1898	40·29
The average fall of the corresponding period for 24 years, Surveyor-General's Office	47·13

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder.

RESOLUTION ON THE WORKING OF THE CALCUTTA SHIPPING OFFICE AND OF THE SHIPPING OFFICES AT OUTPORTS FOR 1897-98.

No. 1673Marine.

GOVERNMENT OF BENGAL, MARINE DEPARTMENT.

Dated Calcutta, the 19th August 1898.

RESOLUTION.

READ—

Letter No. 578B., dated 27th July 1898, from the Secretary to the Board of Revenue, Lower Provinces, submitting the Report on the working of the Calcutta Shipping Office and of the Shipping Offices at outports for 1897-98.

The chief duties of a Shipping Master are to afford facilities for the engagement and discharge of seamen and also for the registration of vessels, and this brings him into constant correspondence with the Registrar-General of Shipping and Seamen, London, and also with the Board of Trade. He furnishes the former with monthly transactions under the Merchant Shipping Act, 1894, and the latter with accounts relating to the estates of deceased seamen and the relief of distressed British seamen.

2. The number of seamen of all nationalities shipped and discharged through the Calcutta Shipping Office was 26,087 and 23,564, respectively, against corresponding figures of 23,565 and 21,736 during the previous year:—

	1897-98.		1896-97.	
	Shipped.	Discharged.	Shipped.	Discharged.
British	1,454	1,301	1,500	1,242
Europeans—Continental ...	460	419	426	380
Americans, West Indians and Africans	191	121	172	104
Australians	11	12	7	9
Asiatics other than Indians ...	270	227	194	368
Indians proper	23,282	21,074	20,751	19,157
Eurasians and Goanese ...	418	410	511	486
South Sea Islanders ...	...	...	4	...
Total ...	26,087	23,564	23,565	21,736

3. The increase is due to the more general employment of Indian seamen, and the difference between the total number shipped and discharged to an increase in the number of native crews engaged at Calcutta for service in vessels trading from the United Kingdom and Germany. The men engaged for service in Germany were chiefly engine-room crews forwarded to Hamburg and shipped through the office in accordance with the Merchant Shipping Act, the usual bond of indemnity for lascars sailing under a foreign flag being filed in the office.

4. The number of British seamen shipped again shows a decrease as compared with the previous year, while the number discharged shows an increase. On this point the Shipping Master explains that Englishmen, as a rule, endeavour to better their position, and many seamen, on their arrival in India, obtain their discharge, and find employment on the railways and in the hotels established all over the country.

5. The number of seamen of all nationalities shipped in and discharged from foreign vessels through their Consulates and not included in the figures given above are:—

Shipped	...	...	... 85
Discharged	...	...	... 73

6. There were 86 deserters against 61 in the previous year. It is difficult to assign any cause for this increase, but it is stated that a number of seamen who had drawn their wages and supplies from the Masters of the ships they belonged to deserted in order to join American and German vessels. It is also stated that many of the deserters were British, who were dissatisfied with their ships and wanted their discharge, but, failing to obtain it, left their vessels without permission, and, as they have not since been heard of, it is supposed that they proceeded inland for employment.

7. The receipts of the Calcutta Shipping Office amounted to Rs. 47,313 as compared with Rs. 41,967 during the previous year. The largest increase is under shipping and discharging fees, which is due to increased operations in shipping and discharging seamen, both Europeans and Natives, especially the latter. The expenditure amounted to Rs. 24,014, or an increase of Rs. 245 on the figures for 1896-97, due entirely to cost of forms required for the increased operations of the office.

8. The following table shows the receipts of the funds held in trust by the Calcutta Shipping Office on account of both European and Native seamen for the past two years:—

	1897-98.	1896-97.
	Rs.	Rs.
Ticket-money	510	420
Deposit-money of British seamen ...	29,415	22,717
Ditto of Native seamen	4,057	2,256
Estates of deceased Native seamen ...	6,965	2,630

The increase of Rs. 6,698 under "Deposit-money of British Seamen" is due to larger amounts having been received from seamen who had been left behind from their ships in hospital and jail, and who had, in accordance with

the usual practice, deposited a portion of their wages in the office as a provision against their falling into distress. The total sum represents the voluntary deposits of 197 seamen and Rs. 1,542 deposited by Masters of ships as the wages of 11 seamen who were too ill to understand their accounts.

9. The increase under "Deposits of Native Seamen" is due to an increase in the number of native seamen left behind in hospital and jail, and of others who, when the crews of the vessel they belonged to were paid off, failed to appear to receive their money.

10. The increase under "Estates of deceased Native Seamen" represents the wages of the crews of the vessels *City of Agra* and *Falls of Bracklin* lost at sea, which were forwarded to the Shipping Master of Calcutta for payment to the relatives. The work of finding out the legal representatives is still going on, and the greater part of the money will doubtless be paid away in the course of the year.

11. The value of seamen's money-orders increased from Rs. 11,260 in 1896-97 to Rs. 11,934 during the year under review. The increase is due to the favourable rates of exchange and to one or two large orders issued during the year.

12. The number of distressed seamen sent home during the year was 47, or one less than in the previous year. The causes of distress were sickness 25, injuries 4, shipwreck 7 and paucity of employment 11.

13. In respect of the condition of European seamen, the Shipping Master reports that, on the whole, a better class of men seems to be manning the merchant ships. The foreign element in the crews of British ships is about the same as last year. The Society of the Ship Masters' Federation appears to be inducing good men to join the mercantile navy, and it has been noticed that sick seamen left behind, especially foreigners, are particularly solicitous of the safety of their Federation tickets. It is said that a British seaman who cannot read and write is now rarely to be found. The condition of native seamen appears to have been unchanged, but the demand for them continues to increase.

14. Statements taken on oath of five of the crew of the ship *Severnbank* complaining of the quantity, quality and cooking of the meat issued to them while in port were sent by the Chief Presidency Magistrate to the Shipping Office for enquiry. As the Master of the vessel was sick in hospital at the time, he was not called upon to answer the charge; but the Health Officer of the vessel made an inspection of the ship's stores, and reported that the provisions on board were all of good quality and sufficient in quantity. No complaints were made to him, as the complainants withdrew their charge on the ground that immediately on their complaining, good and well-cooked food was served out to them.

15. Two cases of ill treatment of seamen were reported, but in both cases the complaints were found to be groundless. In one case the steersmen of the S.S. *Gorseda* complained against the Master for assault and destruction of their effects, and on enquiry the complaint proved to be a vexatious one in consequence of the Master having declined to give the men a character for ability. In the second case the native cook of the S.S. *Barrister* complained that on the voyage he had been confined in irons for a day and-a-half, and that an unauthorized deduction had been made from his wages when paying him off. On enquiry it was ascertained that the man had become riotous at sea, and had assaulted and otherwise maltreated several of his fellow-servants, and had to be put in irons for violent conduct, but he had been released as soon as it was considered safe to do so. The so-called unauthorized deduction from his wages was found to be a lawful fine, which was deposited in the Shipping Office.

16. At the Port of Chittagong, the number of seamen shipped and discharged was 33 and 95, against 26 and 32 in the previous year. The increase of 63 in the number discharged is attributed chiefly to permission given to Masters of vessels, who had dissatisfied men on board anxious to change their vessels, to discharge the men, provided they had sufficient wages due to them to enable them to deposit at least two months' board wages with the Shipping Master, Calcutta, and on the understanding that the Masters would fill the vacancies thus caused by obtaining men from Calcutta.

17. There were 3 deserters against 4 during the previous year. No clue to their whereabouts was found, though a search was made for them by the police.

18. The receipts of the office amounted to Rs. 117, against Rs. 47 in 1896-97. The increase is almost entirely under discharging fees, which is due to two vessels having paid off the whole of their native crew on termination of agreement. There were no disbursements.

19. The receipts on account of Trust Funds amounted to Rs. 12,797, the whole of which was disbursed. These receipts consisted of deposits received on account of the balance of wages of 21 British and 63 native seamen discharged by mutual consent, and of 6 British seamen discharged under Medical Certificate, of 2 left in jail and of 3 Native seamen deceased.

20. The Shipping Master visited 75 vessels in port for enquiry and inspection, and no complaints regarding bad or insufficient food were made by the crews.

21. At the port of False Point no seamen were shipped or discharged during the year.

22. The Shipping Master paid seven visits to vessels in port, and found that the provisions, water and medicines, as well as the forecastle accommodation, were good and ample. No complaints were made by the crews of any of the vessels visited.

23. At the ports of Balasore and Puri there were no transactions under the Merchant Shipping Act. Enquiries as to the health of the crew and the provisions and water supplied to them were made with satisfactory results by the Collector of Balasore exercising the powers of a Shipping Master.

By order,

A. D. McARTHUR, *Colonel*, R.E.,

Secy. to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT OF THE PORT OFFICER, CALCUTTA, FOR 1897-98.

No. 1769Marine.

GOVERNMENT OF BENGAL, MARINE DEPARTMENT.

Dated Calcutta, the 5th September 1898.

RESOLUTION.

READ—

Letter No. 4017, dated 23rd July 1898, from the Port Officer, Calcutta, submitting the Annual Report for 1897-98.

The Department was presided over by Commander B. P. Creagh, R.I.M., throughout the year. The tenure of the appointment is limited to five years. Commander Creagh was appointed on 1st April 1893, and on the 1st April 1898, on the termination of his appointment, he handed over charge of the Department to his successor, Commander P. J. Falle, R.I.M.

2. The strength of the Pilot Service at the close of the year stood at 52, showing an increase of one. The number of Leadsmen Apprentices has, however, fallen from 13 to 9, owing to one having resigned and the recruitment from local candidates having failed for 2 years. Owing to this large reduction among the staff of Apprentices, steps were taken immediately, after the close of the year, to obtain from England the services of 5 additional Leadsmen Apprentices, and they are expected in India by the beginning of next cold season.

3. The more frequent employment of Pilots, resulting from the reduction of the service, has continued this year, as will be seen from the following figures:—

	Average number at work throughout the year.		Average number of vessels pilotted each month.	
	1897-98.	1896-97.	1897-98.	1896-97.
Branch Pilots	11·11	12·22	7·41	5·9
Senior Master Pilots ...	9·63	10·14	6·06	4·93
Junior ditto	8·16	7·91	4·44	3·89
Mate Pilots	7·49	5·37	3·69	4·17

It is only in the last grade of officers that the figures show a falling off, and this is entirely due to an increase in the number of Mate Pilots on the running list. The total number of vessels piloted by them shows a small increase.

4. It is satisfactory to find that the three pilot vessels are still in command of Licensed Pilots, the Commanders being Messrs. Cooper, Huntly and Smyth.

5. The following table shows the number of arrivals and departures of vessels during the past three years:—

	Year.	Arrivals.	Departures.	Average tonnage.
1	2	3	4	5
Steamers	1895-96 ...	909	904	2,958
	1896-97 ...	939	924	3,002
	1897-98 ...	1,102	1,097	2,995
Sailing ships	1895-96 ...	118	129	1,691
	1896-97 ...	118	114	1,580
	1897-98 ...	133	126	1,866

Although there has been a slight increase in the number of sailing vessels visiting the port, it is apparent from the figures shown above that steamers are steadily taking up the increase in the traffic.

6. The following statement shows the number of vessels drawing 21 feet and upwards, pilotted inwards and outwards, during the last two years:—

		21-22.		22-23.		23-24.		24-25.		25-26.		26-27.		Total.	
		Inwards.	Outwards.	Inwards.	Outwards.	Inwards.	Outwards.	Inwards.	Outwards.	Inwards.	Outwards.	Inwards.	Outwards.	Inwards.	Outwards.
1		2	3	4	5	6	7	8	9	10	11	12	13	14	15
Steamers ...	1896-97	51	96	52	100	51	131	51	110	6	24	1	10	215	477
	1897-98	59	98	65	118	79	187	48	149	7	59	1	3	249	612
Sailing vessels ...	1896-97	20	21	13	21	6	4	1	...	...	...	...	...	40	48
	1897-98	23	34	23	23	8	5	...	1	...	...	...	...	54	63

Compared with the previous year, there has been an increase in the number of steamers and sailing ships of the draughts recorded above, both inwards and outwards.

7. Three inward and three outward bound vessels were neaped during the year from two to six days each, but it is satisfactory to observe that this was far less than 45, the number detained during the previous year. This is due to the considerable improvement which has taken place in the several channels of the river Hooghly.

8. There were 33 groundings and 8 collisions during the year, showing an increase of 1 grounding as compared with the previous year. Of the former, 15 were either accidental or slight and 3 due to an alteration of the channel. Of the remaining 15, in 6 cases the Pilots were not to blame, but only in 1 case was damage caused to the vessel. In the case of the collisions, 1 vessel was totally lost and in 5 cases damage was caused. The percentage of casualties to vessels was 1·66 against 1·90 and 1·55 in the two previous years.

9. Fifty preliminary enquiries were held by the Port Officer during the year. Three of these were referred to Departmental Courts of Enquiry, two of which were further referred to a Marine Court under Act V of 1883. In one case the tug-master was found to blame, and his license as a Steam-tug Pilot was suspended for one year, and the Pilot warned that greater care should be taken to attract the attention of the tug and to observe the rules of the road. In the second case, which was one of collision between two vessels, the accident was found to be due to an error of judgment on the part of both Pilots, who were warned to be more careful. Three other Marine Courts were held, one of which was to ascertain the cause of the loss of the barque *Amanath Rohoman*, which sank off the Malabar Coast after colliding with the S.S. *Nawab*. As the casualty occurred in Madras waters, the proceedings and report of the Court were forwarded to the Government of Madras for necessary action.

10. A special Court of Enquiry under the Inland Steam Vessels Act was held at Chandpur to enquire into the loss of the Rivers Steam Navigation Company's steamer *Lohit* in the Megna river while carrying mails and passengers from Chandpur to Goalundo. One life was lost. The Court were of opinion that the vessel sank in consequence of a fierce sudden gust of wind, and that the serang was not to blame for the accident.

11. In paragraph 13 of the Resolution on the report of the previous year, it was stated that proposals had been submitted to the Imperial Government to enforce compulsory signalling by whistles on inland steamers. It was found that Government were powerless in the matter, as the Act did not authorise the framing of rules on the subject. Steps are now being taken to amend the Act, giving Government the power to frame rules for signalling.

12. The S.S. *Guide* made 20 trips during the year. These trips are made chiefly in towing pilot brigs to and from their stations, and in supplying them with stores, water and provisions. On five occasions during the year she went to Chittagong.

13. The receipts and expenditure on account of pilotage for the last three years are shown below:—

Year.	Receipts. Rs.	Expenditure. Rs.
1895-96	8,85,994	7,50,353
1896-97	8,55,724	7,44,392
1897-98	10,45,081	8,51,887

14. The number of certificates of each class granted to masters, mates, engineers and engine-drivers after examination in Calcutta is shown in the table below:—

Nature of certificate.	Candidates.	Total number examined.	Result. Passed.	Failed.	Not eligible.	Provisional certificate granted.	Renewal of certificate.	Remarks.
1	2	3	4	5	6	7	8	9
Colonial	Master	23	17	6	.....	.....	.....	
	Do., Provisional	.....	.....	.....	.....	.....	.....	
	First Mate	53	35	18	.....	.....	.....	
	Only Mate	.....	.....	.....	.....	.....	.....	
	Second Mate	27	17	10	.....	.....	.....	
	First Class Engineer	7	5	2	.....	.....	.....	
	Second Class Engineer ...	24	15	9	.....	.....	.....	
Home Trade	Master	.....	.....	.....	.....	.....	.....	
	Mate	.....	.....	.....	.....	.....	.....	
	Engine-driver under Act VII of 1864	2	1	1	.....	.....	.....	
Local	First class Master	4	3	1	.....	.....	.....	
	Second class Master	46	22	24	.....	.....	.....	
	Serang	50	20	30	.....	.....	.....	
	Engineer	.....	.....	.....	.....	.....	.....	
	First class Engine-driver ...	71	39	32	.....	.....	.....	
	Second class Engine-driver ...	44	28	14	2	.....	.....	
		351	203	147	2	.....	.....	

15. The duties of the First Engineer and Shipwright Surveyor were conducted by Mr. G. Robertson throughout the year, with the exception of three months when he was on privilege leave. During this period Mr. E. G. Venn, the 2nd Surveyor, acted for him and was assisted by Mr. T. W. Fish, Lloyds Surveyor.

16. The total receipts from fees collected for surveys amounted to Rs. 33,736 and the expenditure, including the travelling allowances of Surveyors to out-stations, to Rs. 30,377. In all, 449 vessels were surveyed.

17. The Department was efficiently managed during the year by Commander Creagh. As already mentioned, this officer vacated his appointment on the 1st April 1898, after a tenure of five years. The Lieutenant-Governor is glad to express his cordial appreciation of the work done by Commander Creagh throughout this period.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, *Col.*, R.E.,
Secretary to the Govt. of Bengal.

WORKING OF THE INDIAN FACTORIES ACT IN BENGAL DURING THE YEAR 1897.

No. 2833.—The 5th September 1898.—The following paper is published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

No. 2574Mis., dated Calcutta, the 13th August 1898.

From—M. FINUCANE, Esq., C.S.I., Secy. to the Govt. of Bengal, General Dept.,
To—The Secretary to the Government of India, Home Department.

I AM directed to submit the Report on the working of the Indian Factories Act, XV of 1881, as amended by Act XI of 1891, in Bengal during the year 1897. The prescribed statements, Forms I and II, are appended.

2. *Number of factories and system of work.*—There were 167 factories shown as open at the close of the previous year. Ten factories were brought under the Act during the year under report, viz., five in the district of the 24-Parganas, three in Howrah, one in Dacca, and one in Pabna. On the other hand, eight factories were removed from the list during the year, viz., three in the 24-Parganas, three in Dacca, one in Howrah, and one in Pabna, while two factories, viz., one in the 24-Parganas and one in Jessore, remained closed during the year. Thus at the end of the year 167 factories were actually working. In 80 factories work was carried on by shifts or sets; in 65 by midday stoppages; in 3 by a combination of shifts and midday stoppages, and in 19 by other means. The number of factories exempted from the rule requiring a Sunday or weekly holiday was 28, against 34 in the previous year.

Almost all the jute mills are now lighted with electric-light, and the Special Inspector reports that with two or three exceptions, mills that had previously opposed its introduction have since been compelled to give way by the necessity of competing with their neighbours, and retaining their hands who otherwise would be attracted by the slightly higher wages they could earn by longer work elsewhere. In the Report for the year 1896 the opinion of Mr. Walsh was quoted to the effect that working for the longer hours made possible by the use of artificial light, was in reality a doubtful advantage, in view of the discontent caused among the operatives, the deterioration in the work done, and the higher wages to be paid for overtime. The facts now reported would appear to conflict with the view then expressed.

On the subject of the granting of a half-holiday in jute mills on Saturday, Mr. Walsh has made the following remarks:—

"The majority of mills still continue to work till late on Saturday night, although 90 per cent. would be glad if the early closing on Saturday were made compulsory. Some endeavour is being made by the Jute Association to induce all mills to close; but these combinations invariably break down in a few weeks on the slightest pretence, and only legislation will ensure this half-holiday. The opinions of managers on the question are at present, however, somewhat conflicting, and it is doubtful whether Government would feel justified in resorting to legislation, unless it was the unanimous opinion of the Chamber of Commerce, both in Calcutta and Bombay, that the half day holiday on Saturday was absolutely necessary for the benefit of the operatives. Some managers are in favour of closing at 2 P.M.; others consider that 12 A.M. should be the time fixed, as this would allow ample time in the afternoon for repair, cleaning, &c., and would be economical as regards wages. Others again advocate closing entirely on Saturday; a few believe that the mills should be allowed to work as they choose on Saturday, as the operatives take whatever leave they require. Amongst these may be included the opinion of those not using the electric-light. They naturally work less hours a week than other mills, and resent any further reduction of working hours by introducing a half-holiday on Saturday. The Hastings Mills which have a night shift are willing to close at 2 P.M., conditionally that they commence again at 6 P.M., working till midnight. Under these circumstances it does not appear likely that the Chamber will come to a unanimous opinion on the subject. Personally, I am entirely in favour of closing early on Saturday, and believe it would be to the interest of trade, and beneficial to the managers, European assistants, and operatives."

The European Assistants of jute mills in Calcutta and the suburbs have repeatedly memorialised Government praying that early closing of these mills on Saturdays be made compulsory, so that the machinery may be cleaned

on that day, and they may themselves be enabled to enjoy complete rest on Sunday, instead of being obliged to supervise the cleaning of the machinery on that day. As intimated in last year's Report, the matter was brought to the notice of the Chamber of Commerce and the Jute Association. The latter body reported that while approving of the principle of closing on Saturday afternoons, they were unable, after protracted discussion, to arrive at any practicable arrangement for carrying out the principle by voluntary agreement. The Chamber of Commerce has also recorded a resolution in favour of the closing of mills at 2 P.M. on Saturdays, but the Jute Association is obviously the body which is most directly interested.

The Lieutenant-Governor regrets that a matter which it was hoped would have been arranged by amicable agreement among the parties interested is no nearer adjustment in that fashion. The desirability of having recourse to legislation in this matter is still under consideration; but although his sympathies must be warmly in favour of a measure so reasonable and salutary, the Lieutenant-Governor cannot conceal that legislation is beset with difficulties, for any alteration in the law that may be undertaken with a view to enforce early closing on Saturdays could not be confined to the jute mills of Calcutta, but would extend to cotton and other mills and to all parts of India, and re-open questions which were carefully considered and settled when the Acts of 1881 and 1891 were passed.

3. *Inspections.*—Seven factories were inspected once, 29 factories twice, 29 factories thrice, and 105 factories more than three times during the year. There were no factories which were not inspected at all, as compared with five such in the previous year. Of the seven factories inspected only once, three in Howrah and two in the Presidency Division were brought under the operation of the Act towards the close of the year only. As regards the remaining two,—the Small Arms Factory at Dum-Dum and Messrs. David and Co.'s Jute Hand Press at Pabna,—no explanation has been furnished.

It is reported that the requirements of the Act and the rules framed thereunder were generally complied with, and that suggestions made by the inspecting officers for the improvement of sanitary arrangements, machinery and other matters were, for the most part, promptly attended to by the managers without objection. The Special Inspector mentions one mill in which it was suspected that Sunday work was illegally allowed, although his inspections failed to detect it; the manager, however, admitted that on one or two occasions he had worked one department for a few hours only, but apparently no action beyond a warning was considered necessary.

4. *Sanitary arrangements and ventilation.*—As in the previous year, the sanitary condition and ventilation of the factories are reported to be generally satisfactory. Mr. Walsh reports that gradual improvement is steadily noticeable year by year as new and improved latrines are erected, pucca drains constructed, and better arrangements made for water-supply. The necessity for plague precautions gave an impetus to white-washing, disinfecting, and sanitation generally. The Special Inspector notices the need for a road connecting Garden Reach and the Lower Hooghly Jute Mill, towards which the Mill concerned and the India General Steam Navigation Company are reported to be willing to subscribe handsomely. The attention of the Municipality will be invited to the matter.

5. *Quarters for operatives.*—The Commissioner of the Presidency Division has made the following remarks on the subject of the accommodation of the operatives:—

"Out of the factories under the Civil Surgeon of the 24-Parganas, six have quarters for their operatives, of which three are *kutcha* and three *pucka* cooly-lines; of the factories in thana Naihati, four are provided with *kutcha* huts and one *pucka*. The mills under Dr. Comley in Garden Reach have also cooly-lines, except the Garden Reach Cotton Mills. The operatives live in *bustees* outside the mills. None of the factories under Dr. Gibbons provide cooly-lines for the operatives on account of the difficulty in getting lands for the purpose. The Chairman of the Cossipore-Chitpur Municipality has been trying his best to improve the sanitation of the *bustees* in which factory hands live."

The Commissioner of the Burdwan Division writes as follows:—

"Many of the operatives working in the three factories situate within the Raniganj subdivision, live in quarters attached to them, and these are reported to be better than average

cooly sheds. Each of these factories have got a supply of medicines, and a medical practitioner attends when necessary, but in cases of cholera and other serious diseases, as well as in cases of accidents occurring at the Raniganj Pottery Works and the Paper Mills, the patients are sent to the Raniganj dispensary for treatment. The operatives of the Gurulia Silk Factory being all residents of the neighbouring villages attend it daily from their homes, and consequently no quarters for them are necessary. The Civil Medical Officer of Serampore remarks:—

'Cholera and small-pox being diseases chiefly introduced and rendered endemic by up-country mill operatives, the question of each mill being bound to supply its operatives with sanitary quarters may well form a subject for legislation. In the absence of legislation on the subject, the operatives run up quarters as and where they please, and are not only their own enemies, but a curse to the neighbourhood.'

"Of all the *bustees* attached to the mills within the Serampore sub-division, the one within the Wellington Jute Mill enclosure is specially bad, and action is being taken by the Magistrate of Hooghly under the authority conferred by the plague notification to improve this *bustee*. The Serampore Municipality also contemplates taking action under section 246 of the Bengal Municipal Act."

The Special Inspector mentions new and improved quarters erected at several mills, notably in the Gurulia Municipality.

6. *Vaccination of operatives.*—Almost all managers have now agreed to the suggestion made by Government that no child should be employed unless he can show good protective marks of vaccination, or agrees to submit to vaccination. In the 24-Parganas, out of 1,262 children examined, about 13 per cent. were found to be unprotected.

7. *Water-supply.*—The water-supply in most factories, though drawn from various sources, is generally satisfactory. Of the 59 factories working in the 24-Parganas, 33 use filtered water drawn from the Calcutta water-works; 19, filtered river water; 4, unfiltered river water; 1, unfiltered tank water; and 2, unfiltered tank or well water. In the Burdwan Division arrangements have been made in almost all the factories for the supply of good drinking-water to the operatives. Most of the factories situate within the Howrah Municipality get their supply from the Howrah water-works, but the Special Inspector observes that the municipal supply appears scarcely equal to the demand, and the cost considerable. He instances one mill which was unable to obtain a stand-pipe, although willing to pay 12 annas per 1,000 gallons. In Cawnpore the mills are supplied with water at the rate of 2 annas per 1,000 gallons.

8. *Number of operatives.*—The total number of operatives employed in the various factories was 166,828, against 148,551 in 1896. The number of male adults was 131,761, against 116,867, female adults 21,172, against 19,018, boys 12,434, against 11,379, and girls 1,461, against 1,287 in the previous year. The percentages of male and female adults and boys and girls were therefore 79, 13, 7, and ·87, respectively, or practically the same proportions as in the previous year.

9. *General health of the operatives.*—The general health of the operatives employed in the various factories during the year was good. Some cases of cholera occurred in the Raniganj Pottery Works, but were not due to any want of precautions on the part of mill-owners, the situation of the factory in the heart of the bazar rendering it particularly liable to infection.

The Civil Surgeon of the 24-Parganas has made the following observations:—

"During the year under report the general health of the operatives has been fairly good, and, on the whole, much better than it was in the previous year. A bad form of malarial fever broke out among the people working in the mills and factories along the banks of the Hooghly in August and September. The outbreak was especially severe in Garden Reach, and I visited that locality and made enquiries regarding the disease. The fever, I found, was a bad type of malarial fever, and in no way resembled plague or enteric. There were a great many deaths from it, and the health of the European employés also suffered."

In the factories under Dr. Leahy in the 24-Parganas there were 59 cases of cholera and 20 deaths, though all the cases were sporadic; there was a severe outbreak of small-pox in an epidemic form in the Shamnaggar Jute Mills.

10. *Wages and general condition of the operatives.*—There was no material change during the year under review in the rates of wages paid to different

classes of operatives, which are generally higher than those prevailing for agricultural labour in the neighbourhood, but the competition of the factories for labour tends to raise the wages of ordinary agricultural and domestic labour in the surrounding areas.

The Commissioner of Rajshahi notices that the general condition of the operatives in the Kajla Silk Filature is reported to be poor, though the rates of wages paid, seem fair. The matter is being enquired into.

11. *Employment of women and children.*—In only a few instances did any disregard of the rules relating to the employment of children come to light during the year. In the Victoria Jute Mill in the Serampore sub-division, a boy was found under age, and was promptly turned out. The circumstances of the Sibpur Jute Mill appear to call for special attention. On two occasions in April and October, Dr. Murray detected instances of uncertified children under age at work, and noticed that his appearance in the spinning room of the mill was the signal for a general disappearance of children, while several who seemed to be under age vanished among the machinery and could not be found. The attention of the Manager was drawn to the matter, and he was warned. Mr. Duke, the Magistrate of Howrah, observes that it is difficult to obtain convictions, since the plea of ignorance of the true age is frequently urged with success. The Lieutenant-Governor, however, is unable altogether to accept this explanation, and the case in point seems to have been a flagrant one. The Special Inspector of Factories, while inspecting the Howrah Foundry in September last, found a number of boys under age at work. On enquiry it was found that the register of children was not kept up. The Manager has since reported that strict orders have been issued to his subordinates not to employ boys under 14 years of age, but the Magistrate does not regard the reply as satisfactory, and action will be taken to ensure the non-recurrence of the irregularities detected.

12. *Fencing of machinery.*—All that is necessary appears to have been done in the matter of the fencing of machinery.

13. *Accidents.*—The number of accidents that occurred during the year was 651, against 493 and 526 during the two preceding years. Of these, 18 were fatal, as compared with 19 in the previous year. Three hundred and twenty were of a serious nature and 313 were slight, all usually attributed to the carelessness and disobedience of orders on the part of the employés. Many accidents occurred while adjusting the belts of machinery in motion, as to which Mr. Walsh observes that these accidents are as common, if not more so, in England, and there is no satisfactory remedy. Orders to slow down or stop the engines before touching the belts are usually neglected. The following are some of the fatal accidents that occurred during the year under report:—

(1) One man was killed at the Sirajganj Jute Mill while working at a sewing machine. The machine belt became mixed up with a handkerchief and a piece of twine round his neck, severing the head from the body.

(2) One man was killed at the Empress of India Cotton Mill, by the breaking of the fly-wheel. It was found difficult to arrive at a satisfactory solution regarding the cause of this accident. Either the engine got out of control, and the fly-wheel broke from centrifugal force, bringing down the roof, or, it was conjectured, a beam fell from the roof on the fly-wheel, breaking it. On receipt of the report of this accident, the Inspector of Factories visited the mill, and the roof timber appeared perfectly sound.

(3) & (4) Two men were killed at the Ganges Jute Mill, and several were injured from the bursting of the fly-wheel. The following report was submitted by the Special Inspector of Factories:—

"The engine was running about 12 o'clock rather fast on the date of accident, and in consequence the yarn was breaking in the spinning department. The assistant left this room to acquaint the Engineer, and during his absence a number of machines, it appears, were thrown out of gear to avoid breakages, thus relieving the engine of its work so suddenly that the speed was greatly accelerated, and although the Engineer shut down steam at the throttle valve, the vacuum was sufficient to keep up the momentum, and the large driving wheel, some 30 feet in diameter, was unable to stand the centrifugal force and flew to pieces."

Since then experiments were made to test the arms of the fly-wheel, as it was observed that in casting them the core had shifted, leaving the metal unequally distributed; to this cause the manager partly attributed the breaking of this wheel. The accident was a most serious one both in the loss of life caused and the damage done, the repairs of which cost some Rs. 50,000.

(5) A man was killed by the bursting of a piston at the India General Steam Navigation Company's Dockyard, 6, Garden Reach. It appears that the piston was hollow, and water must have condensed inside it, so that when fire was applied to endeavour to remove the nut which fixed it on the piston rod, steam was generated inside the piston, which thereupon burst.

(6) One man was killed by a bale of gunnies falling on him at the Baranagore Mill.

(7) One man was killed by falling on the "softener" when asleep. Instead of standing at his work he sat on the gearing-box, and fell on the travelling cloth, receiving injuries from which he died.

(8) One man was killed by a bale of jute falling on him at the Baranagore North Mill.

(9) One man was killed at the Kamarhatty Jute Mill by being carried up to the shaft by a belt.

(10) One man was found dead at the bottom of a fly-wheel pit. It was not known how he managed to fall below, as the wheel is well fenced.

(11) One man was killed by the fall of a jute bale on him at the Wellington Jute Mill.

(12) One man was killed by the fall of a jute bale on him at Messrs. Ralli Brothers' Jute Press.

(13) One man was killed by his cloth lapping the shaft, resulting in a compound fracture of the arms, and his ultimate death from hæmorrhage.

Mr. Walsh draws attention to an apparent necessity for a change in the rules. At present if the injured man is alive when leaving the mill, the accident is often returned merely as "serious" and recorded as such, although as a fact the man may die soon after reaching hospital. The Special Inspector will be asked to submit a separate report on the amendment of the rules which he would propose.

The question of ensuring that information of fatal accidents is conveyed promptly to the Special Inspector by managers of mills, and also information of the result of inquests held and of their dates when practicable, has recently been under the consideration of Government, and orders are under issue by which this object will be attained.

14. *Prosecutions.*—There were two prosecutions instituted during the year as compared with three during 1896. The Manager of the Victoria Jute Mill in the sub-division of Serampore, district Hooghly, was prosecuted on account of the nuisance caused by the filthy state of the latrine, and fined Rs. 200. The other prosecution was instituted against the Manager of the Hastings Jute Mill at Rishra in the same sub-division, under clause (*g*) of section 15 of Act XV of 1881, as amended by Act XI of 1891; but under the provisions of section 17 of the Act and Part IX of the Bengal Municipal Act, the Chairman of the Serampore Municipality was declared the responsible party, and the manager acquitted.

15. The examination of the working of the mills is in the opinion of the Lieutenant-Governor on the whole most creditable to the management, who are not merely careful to comply with the requirements of the law, but spontaneously anxious to promote the health and comfort of the factory hands.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE CUSTOMS DEPARTMENT FOR THE YEAR 1897-98.

FINANCIAL DEPARTMENT.—SEPARATE REVENUE.

RESOLUTION—No. 4867S.R.

Calcutta, the 29th August 1898.

READ—

The Report on the Administration of the Customs Department for the year 1897-98.

Read also—

The Report of the previous year and Government Resolution thereon.

WITH the exception that the *ad valorem* duty on sleepers of iron and steel was reduced from 5 per cent. to 1 per cent., and that machinery for the manufacture of matches, articles of leather, and tobacco was exempted from duty, there were no changes of importance in the tariff during the year under review.

2. The following statement compares the gross and net customs duty collected during the last five years and in the years before and after the remission of the import duties in March 1882 :—

	1880-81.	1881-82.	1882-83.	1893-94.	1894-95.	1895-96.	1896-97.	1897-98.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

Refunds and drawbacks—								
Import	3,97,096	3,04,426	3,20,638	2,98,551	3,12,540	3 58,764	3,36,510	3,27,761
Export	71,979	1,05,519	1,16,840	57,133	53,842	65,321	69,450	39,300
Total ...	4,09,075	4,09,975	4,37,476	3,55,684	3,66,382	4,24,085	4,05,960	3,67,151
Total net duty ...	3,14,07,095	3,15,25,943	2,06,50,647	2,86,57,758	2,48,56,819	4,12,51,355	3,89,37,261	3,85,05,944

The total net duty collected during the year fell from Rs. 3,89,37,261 in 1896-97 to Rs. 3,85,05,944, showing a decrease of Rs. 4,31,317, or 1·1 per cent. The falling-off occurred under the heads of import duty on general merchandise (Rs. 1,36,291) and on salt (Rs. 3,42,525), while the increase of Rs. 47,499 under export duty is said to be due to the partial recovery of the rice trade after the famine of 1896-97. The decrease in the import duty on general merchandise is ascribed to smaller imports of cotton and woollen goods and machinery. In the case of salt, the lower receipts of duty were due to larger quantities going into bond, as the actual imports were largely in advance of those of the previous year. The charges of the year, inclusive of refunds and drawbacks, amounted to Rs. 12,00,094 against Rs. 12,15,472 in the previous year. The total net receipts, including receipts other than duty, fell from Rs. 3,84,29,248 in 1896-97 to Rs. 3,79,73,556 in the year under review, thus showing a decrease of Rs. 4,55,692, or 1·1 per cent.

3. The subjoined table compares the collections of import and export duty at the different ports in the past two years.

	Total	...	13,30,201	13,47,631

In import duty the decrease occurred chiefly under cotton goods (Rs. 9,34,741) and woollen goods and apparel (Rs. 1,83,097), while there was a substantial increase under sugar (Rs. 3,27,240), oil (Rs. 2,85,669), and silver bullion (Rs. 3,29,438). It is worthy of note in connection with the import duties, that more than 94½ lakhs out of a total of under 132 lakhs, (excluding salt) are realized on four items, viz., cotton goods, oil, liquors, and silver bullion.

4. *The value of trade.*—The following table shows the value of the import and export trade of the province, both foreign and coasting, in the past two years under the three main heads of Merchandise, Treasure, and Government transactions :—

	Merchandise.		Treasure.		Government transactions.		Total.		Increase.	Decrease.
	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.

Coasting	6,96,03,076	8,04,07,906	1,13,53,964	1,27,00,029	20,34,536	33,59,198	8,29,71,566	9,64,70,738	1,35,05,247	.....
Total ...	52,52,06,523	53,16,97,252	1,46,12,091	2,45,30,100	23,00,585	39,06,112	54,21,19,159	56,01,43,064	1,80,24,805	.....
Grand Total Trade of the Province.	89,92,65,204	89,33,46,685	3,45,72,572	6,25,24,777	1,96,19,575	2,67,70,223	95,34,57,341	98,21,51,784	2,86,94,343	.....

The total net value of the foreign import trade in merchandise showed a decrease of Rs. 2,23,95,600, or 7·4 per cent. The decrease, which occurred both in free and dutiable goods, is attributable to the deficient harvest in 1896,

and it is very remarkable that the apparent effects of that calamity on trade should be so slight, the value of the imports of merchandise being actually greater than in 1894-95 or 1895-96. Owing to heavier receipts of gold from China and Australia and of silver from the United Kingdom, there was an increase of Rs. 1,48,34,823, or 83 per cent. in the imports of treasure. The value of the stores imported on behalf of Government stood at Rs. 2,13,25,189 against Rs. 1,65,20,247 in the previous year. This increase is ascribed to larger receipts of railway materials, arms and ammunition, apparel, telegraph materials, stationery, flax goods, and hardware. The total value of the foreign export trade in Indian produce again fell off by Rs. 41,68,420. The smaller shipments of opium to Hongkong and the Straits Settlements, and of indigo to the United Kingdom account for this decline. The value of exports of Government stores increased by 105 per cent. owing to the unusually large despatches of copper coins to the Straits Settlements. As in previous years, there were no exports of treasure on account of Government. In the coasting trade there was an increase of 14 per cent. and of 5 per cent., respectively, in the value of imports and exports of merchandise. The increase in the former is attributable to the unusually large shipments of rice and paddy from Burma to meet the demand caused by scarcity in India, while larger despatches of coal to Bombay, Madras, and Burma, of rice and wheat to Madras, of rapeseed and jute manufactures to Bombay, and of provisions to Burma account for the increase in the exports. Including Government transactions, the total value of the trade of the Province stood at Rs. 98,21,51,684 against Rs. 95,34,57,341 in the previous year, showing an increase of Rs. 2,86,94,343, or 3 per cent.

5. *Trade of Calcutta with Foreign Countries.*—The following table shows the total value of the foreign trade of Calcutta with the several countries with which commercial transactions were maintained, and the proportion in which it was divided between them during the past five years:—

1	2	3	4	5	6	7	8	9	10	11

It will be seen that, as usual, the bulk of the trade was carried on with the United Kingdom, but the proportion which this branch bears to the entire foreign trade of the port declined during the year from 58·57 per cent. in 1896-97 to 53·87. The falling-off in value was equivalent to 8 per cent., and the total trade recorded is the smallest since 1892-93. The decrease occurred in both imports and exports. The falling-off under imports is due to smaller shipments of cotton and woollen goods, machinery, apparel, liquors, and umbrellas, while short despatches of tea, raw jute, and raw cotton, dyeing materials, lac, grain, and pulse, oils, and sugar account for the decrease under exports. The United States have again gone ahead of Germany and stand second in the list with a percentage of 7·65 against 5·96 in the preceding year. The increase was wholly under exports, owing to a larger trade in jute, both raw and manufactured, hides and skins, and tea. A noticeable incident in the trade with the United States was the import of a consignment of grain despatched by charitable people for the relief of the famine. The cargo was brought in "a whaleback" steamer—the first of its kind to visit Calcutta. Germany occupies the third place, with a percentage of 7·40 against 6·70

in 1896-97. The increase was both under imports and exports. There was a remarkable advance of 324,566 cwts. in the imports of sugar, while raw jute and hides and skins contributed materially to the increase in exports of Indian produce. China comes next, and her share in the trade stood at 5·89 against 5·50 in the previous year. The trade with Hongkong and the Treaty Ports of China increased by 6 per cent. and 12 per cent., respectively. The quantity of opium exported to Hongkong rose in quantity from 21,798 to 22,771 chests, but its value fell from Rs. 2,75,02,495 to Rs. 2,35,06,832 owing to a steady and continuous fall in price. The Straits Settlements maintained their position, but with a lower percentage of 3·67. The decrease which has been going on since 1894-95 occurred wholly under exports, and is due mainly to smaller shipments of opium. The marked improvement of 85 per cent. in the trade with Ceylon during the last year, though mainly due to the large transactions in gold and silver, is also attributable to larger imports of cocoanut oil, copper, and sugar, and to heavier exports of grain and pulse, coal, teaseed, and jute manufactures. It is satisfactory to note that with the cessation of famine, exports of grain to Ceylon are returning to their normal condition. The increase of 22 per cent. in the trade with Australia is ascribed to heavy receipts of treasure and to enlarged shipments of jute manufactures and of castor and linseed oils. There was, however, a very large falling-off in the importation of horses. The trade with France fell by 13 per cent. in imports and 5 per cent. in exports. The decline in the former was due to smaller receipts of silk goods, the most important of our importations from France, while short shipments of indigo and raw silk brought about the fall in exports. The increase of 11 per cent. in the total value of the trade with Austria-Hungary, in spite of the large decrease in the receipts of cotton and woollen goods, is accounted for by larger exports of raw jute and hides and skins. The reduced purchasing powers of the people occasioned by famine and other troubles, are clearly responsible for the restricted demand for cotton goods. The trade of Italy with Calcutta increased in the past year by 13 per cent., a larger quantity of aniline dyes being imported, and of hides and skins, raw jute, and seeds exported. In the trade with Belgium there was an improvement of 4 per cent., due to larger imports of metals, aniline dyes, cement, and matches, and to a marked advance in exports of oilseeds. The improvement of 33 per cent. in the Mauritius trade is attributed to the increased imports and exports of merchandise and exports of treasure. Imports from Mauritius consist mainly of sugar, both refined and unrefined, and the total quantity received during the year rose from 338,146 cwts. to 565,891 cwts.

6. *Shipping in Calcutta.*—The proportion which the trade of Calcutta carried through the Suez Canal during the year under review bore to its total foreign trade was 73·9 per cent. as against 76·9 in the previous year. The table below compares the total shipping entering inwards and clearing outwards without touching at any other port, and the aggregate tonnage, in the past two years :—

	1896-97.		1897-98.	
	Number.	Tonnage.	Number.	Tonnage.
1	2	3	4	5
Steam vessels	635	1,414,393	764	1,660,694
Sailing vessels	217	328,141	248	447,218
Native craft	11	1,850	13	2,131
Total ...	863	1,744,384	1,025	2,119,043

There was thus an increase of 129 steam vessels, 31 sailing vessels, and 2 native craft, representing an advance of 374,659 in tonnage.

7. *Imports into Calcutta.*—The total value of the imports, including treasure, but excluding Government transactions, into Calcutta from foreign countries fell from Rs. 31,90,39,573 in 1896-97 to Rs. 31,11,60,201, showing a decrease of Rs. 78,79,372, or 2·4 per cent. The decrease occurred under Merchandise (Rs. 2,27,14,195, or 7·5 per cent.) against an increase of Rs. 1,48,34,823, or 83·4 per cent., under Treasure. The total values of the principal articles of merchandise imported into the port during the last two years are shown below:—

	1896-97.	1897-98.
	Rs.	Rs.
Cotton goods	14,45,92,629	11,73,52,665
Twist and yarn	91,17,985	91,05,988
Metals	2,69,10,070	2,79,42,502
Mineral oil	1,58,02,535	1,67,25,583
Machinery (excluding railway plant)	1,82,49,422	1,37,87,504
Sugar	57,72,666	1,19,99,614
Liquor	52,68,188	46,31,700
Salt	53,77,553	67,19,749
Hardware and cutlery	49,65,588	51,00,523
Woollen goods	70,75,577	41,75,327

The total imports of cotton goods, including twist and yarn, decreased by 17 per cent. in comparison with 1896-97. The Collector of Customs writes:—

"The *Cotton* trade which was shown in last year's report to be in a most unsatisfactory state has still further deteriorated in the past year. It would be difficult to point to a time when the unfavourable factors then mentioned were so prolonged. Indeed, it was only during the period of the American war that the difficulties of producers were greater. In India the heavy imports of 1896, which could find no outlet owing to the prevailing distress, became a drag on the market, necessitating the carrying forward of large stocks which seriously interfered with the free flow of orders to Lancashire, and resulted in lower prices, stoppage of machinery, and disputes regarding wages. The good monsoon and bountiful harvests have, however, helped to relieve this unsatisfactory position, and prospects all round are considerably brighter with the close of 1897-98. It is unfortunate that the stringency of money caused still further complications in the local trade, for it compelled importers to burden themselves with the stocks of goods, for the native dealers found it impossible under the adverse conditions which existed to pay for and take delivery of their orders. Numerous failures occurred in the bazar, which caused a very uneasy feeling and restricted credit, importers having to exercise greater caution. Confidence, however, is being gradually restored, and it is not improbable that the long-looked-for healthy revival will become an accomplished fact during 1898-99 if no other adverse circumstances intervene."

The improvement of 3·8 per cent. in metals is due mainly to larger imports of brass (wrought), copper (wrought and unwrought), steel, quicksilver, and zinc. The importation of mineral oil increased by 7 per cent. owing to larger receipts of the article from the United States and Sumatra. Mineral oil was imported from Sumatra to this country for the first time in 1896-97, and in the past year the quantity imported rose from 558,271 gallons in 1896-97 to 5,332,703 gallons, nearly a tenfold increase. On the other hand, Russian oil shows a decline on last year's record of 6,081,144 gallons. Machinery and mill-work fell off by 24·4 per cent. owing, it is stated, to the heavy receipts during 1896-97, chiefly of jute and cotton mill machinery. The Collector of Customs observes that most of the mills are now completely equipped, and unless new ones are erected or extensions made to existing ones, the importations during the coming year will consist only of "spares" and "renewals." Sugar shows a marked increase of 117·7 per cent., to which all the exporting countries, except the United Kingdom, contributed. This increase is attributed to the continued operation of the Continental bounty system, regarding which the Collector makes the following remarks:—

"Under the encouragement of bounties this trade has been steadily expanding for some years. The past years's trade was further favourably assisted by a plenteous beet crop and an advancing exchange. At the same time, it is not believed that the trade has been a lucrative one: supply was invariably in excess of demand, causing a continual decline in prices. It is stated that a general opinion is gaining ground as to the desirability of abolishing these bounties. Not only is the bounty system very costly to the countries concerned (for the current year 1898, the cost of France alone is estimated at £4,500,000), but the heavy protection duty also makes it very costly to the consumer. It is stated that the average consumption of *Sugar* on the Continent is less than one-third that of England.

The consumer objects to the high price he has to pay, and the producer complains of the smallness of consumption. These two grievances combined form the basis for considerable agitation against the bounty system on the Continent. Germany, Austria, and Belgium are in favour of abolition, and the general objection to bounties on *Sugar* has resulted in the invitation lately issued to the Powers to meet in conference at Brussels."

The Brussels Conference has unfortunately not led to any practical result. In the meantime, the imposition by the United States, America, of countervailing differential duties against bounty-fed sugar, while beneficial to the West Indian colonies, is likely to divert Continental bounty-fed sugar to this country, still further depressing the local industry.

The decrease of 20·2 per cent. in the importation of ale, beer, and porter is ascribed to the fact that the despatch to the front of a large number of British regiments, whose messes used to be supplied with English beer from Calcutta, diverted the trade to Karachi. "Pilsener" beer has recovered the place which it lost two years ago as the variety most largely imported. Next comes "Younger and Sons," followed by "Ind Coope" "Bass" and "Tennants." "Mc Ewan's" ale, which last year stood first, is now seventh in order of importance. The falling-off of 1·3 per cent. in the trade in spirits and liquors occurred under the staple spirits, brandy, whisky, gin, and liqueurs, but was mitigated by an increase of 11,494 gallons under "other sorts of spirits." These consist chiefly of methylated spirits, and of "white spirit" from Germany, which is used in the production of spurious brandies and whiskies. The total importation of wines also decreased from 120,801 gallons in 1896-97 to 115,706 gallons, showing a decrease of 4·2 per cent. The decrease was in champagne (2,172 gallons), sherry (1,250 gallons), and other wines (6,354 gallons), while claret and port increased by 1,572 and 3,109 gallons, respectively. The advance of 40 8 per cent. in the salt trade is due to larger shipments by all the salt-producing countries, (except Egypt), the largest contributor being the United Kingdom. The increased consumption of Liverpool salt is said to be due to the efforts of the Salt Union to compete with crushed salt from Aden and the Red Sea ports. Hardware and cutlery increased by 2·8 per cent., owing to larger receipts from the United Kingdom. It is observed by the Collector of Customs that large importations were made of agricultural and other implements to meet Government requirements for the construction of remunerative works in the regions affected by famine. The bulk of the wares imported were from the United Kingdom—a tribute to their superiority of manufacture. The decline of 41 per cent. in the total imports of woollen goods is attributed to the fact that both dealers and merchants had heavy stocks of goods, imported in the famine year 1896-97, still left on their hands. Amongst other imports, agricultural implements improved by 11·2 per cent., matches by 86·1, and drugs and medicines by 11 per cent., while umbrellas and apparel declined by 25·8 and 9·2 per cent., respectively. The trade in English matches is practically extinct, and this trade is said to be almost entirely in the hands of Belgium, Germany, Sweden and Norway, and Japan.

8. *Exports from Calcutta.*—The total value of exports from Calcutta to foreign countries, including treasure, but excluding Government transactions, rose from Rs. 44,96,22,007 to Rs. 45,32,27,558, an increase of Rs. 36,05,551. The value of the trade in the principal exports in 1896-97 and 1897-98 is compared in the table below :—

	1896-97. Rs.	1897-98. Rs.
Jute, raw	9,96,51,492	9,52,93,179
Jute gunny-bags	3,46,09,643	3,67,97,541
Opium	4,96,87,235	3,89,39,565
Tea	7,72,69,736	7,64,72,151
Oilseeds	2,19,92,491	2,83,52,999
Rice	2,45,78,681	2,62,12,760
Indigo	3,11,42,055	1,75,51,045
Hides and skins	2,85,60,259	4,17,17,531
Wheat	3,13,834	3,71,510
Raw cotton	82,20,501	65,81,118
Lac	1,38,55,530	1,06,15,262
Silk, raw	49,50,709	49,77,274

The total exports of raw jute increased in quantity by 32 per cent., but in consequence of the low price prevailing during the year, the aggregate value decreased by 4·3 per cent. Larger exports were made to the United Kingdom, Austria-Hungary, France, Germany, Italy, Spain, the United States, and Australia, while China, Japan, and "Other countries" took smaller supplies. In jute gunny-bags there was an increase of 19·9 per cent., due to the larger amount of machinery now at work in India. In the total exports of opium there was a falling-off to the extent of 1,681 chests, but the trade with China, the principal consumer of the drug, shows an increase of 5·8 per cent. The exports of tea increased by nearly two million pounds or 1·3 per cent. owing to larger shipments to all the importing countries. The excess of production over demand, the rise in exchange, and the fact that the teas were generally deficient in good liquoring quality, lowered the average price of the article, which stood at 8 annas and 5 pies per lb. in the year against 8 annas and 8 pies in 1896-97. Ceylon tea continues to gain favour, and the quantity exported during the year increased by 3·9 per cent. The Collector of Customs observes:—

"In view of the active competition of Ceylon teas, the Indian planters have taken advantage of the warning note sounded, and are now endeavouring to manufacture a better liquoring quality of tea, and are not trusting entirely to quantity for their profit, experience having shown that most of the lower grades do not repay the cost of production and manufacture."

Among oilseeds, linseed, the principal article of export, increased by 13·7 per cent., owing to larger shipments to the United Kingdom, France, and the United States. Poppy, rape, and til, the other seeds exported, also advanced, the two latter by 492·9 and 15·2 per cent., respectively. Germany, Arabia, Persia, Ceylon, China, and the Maldives took larger supplies of rice, while smaller shipments were made to the United Kingdom, Cape Colony, Mauritius, Natal, Réunion, and West Indies. Ceylon, which is the principal market for Bengal rice, took 41·4 per cent. more than in 1896-97, while the exports to the United Kingdom and to Mauritius, the next largest consumers of rice, decreased by 13·6 and 7·9 per cent., respectively. Indigo fell off by 34·5 per cent. owing to smaller shipments to the United Kingdom, Austria-Hungary, Belgium, France, Germany, Holland, the United States, Russia, and Italy. The Collector of Customs observes:—

"To over-production, to the tightness of the money market, to the substitution of chemical dyes, to the Badische scare, and to the heavy stocks in the home market may be attributed the unfortunate condition to which this once thriving industry is now reduced."

The exports of raw hides, which are the largest item under the head of hides and skins, increased by 47·1 per cent., in consequence of larger despatches to the United States, Germany, Austria-Hungary, Italy, France, and "Other countries." On the other hand, there was a decline of 18·3 per cent. in dressed hides. Though the trade in wheat during the past year shows a nominal increase of 2·1 per cent., it has shrunk greatly from its previous vast proportions. The trade in raw cotton with the United Kingdom fell away by 23·2 per cent.; with Austria-Hungary by 60·1 per cent.; with Belgium by 55·3 per cent.; with France by 12·3 per cent.; with Germany by 35·4 per cent.; with Italy by 27·3 per cent.; with Japan by 58·5 per cent.; and with "Other countries" by 19·6 per cent., while China took 116·6 per cent. more than in 1896-97. The Collector of Customs observes:—

"The decline in the total exports is attributable to the cotton crop of the past season being below the average, owing, in the first instance, to the late advent of the rains, which prevented sowing and interfered materially with healthy germination, while on irrigated lands over-irrigation proved injurious to the seedlings; and, secondly, owing to small acreage only being sown, while the greater portion of the soil was utilised for food-grain and fodder."

The exports of shell-lac increased in quantity, but decreased in value owing to the fact of there being no demand for established and more expensive marks, as the rise in exchange restricted the trade, and purchasers were satisfied with a fair quality of goods at a lower valuation. There was an improvement of 10·5 per cent. in the exports of raw silk as compared with 1896-97. The trade with the United Kingdom and "Other countries" shows an increase of 80·7 and 93·8, respectively, while France and Italy took 27·7 and 32·6 per cent. less than in 1896-97.

9. *Treasure.*—The importation of gold increased by 106·9 per cent. and of silver by 65·4 per cent. The exports of gold were very small, but there was an increase of 260·7 per cent. in the exports of silver, owing to larger shipments to Mauritius, Ceylon, Siam, and the Straits Settlements.

10. *Subordinate Ports.*—The total value of the foreign trade of the port of Chittagong rose from Rs. 75,39,602 to Rs. 81,50,349, showing an increase of Rs. 6,10,747, or 8·1 per cent. This took place both in imports (21·7 per cent.) and exports (4·6 per cent.), and is attributable mainly to larger receipts of salt from the United Kingdom and kerosine oil from America, and to heavier shipments of raw jute to the United Kingdom, Dunkirk, and Hamburg, of tea to the United Kingdom, and of rice to Ceylon. The imports of liquors from foreign and Indian ports declined by 17 and 43 per cent., respectively. As in previous years, there were no imports or exports of treasure in the foreign trade. In the coasting trade imports increased in value, owing to larger receipts of rice from Akyab and Rangoon and of jute from Narayanganj, while the heavy shipments of raw cotton to Calcutta and of treasure to Calcutta, Akyab, and Rangoon for the purchase of rice, raised the value of the exports.

The total value of the trade, both foreign and coasting, at the Orissa ports, as compared with 1896-97, rose at Balasore from Rs. 1,26,61,352 to Rs. 1,46,76,513; at Cuttack, from Rs. 26,09,173 to Rs. 27,63,354; and at Puri, from Rs. 4,59,818 to Rs. 4,61,170. The net amount of customs duty, inclusive of the duty on imported salt collected at the Orissa ports, rose from Rs. 4,00,625 to Rs. 5,91,736, showing an increase of Rs. 1,91,111, or 47 per cent. The improvement, it is said, is due mainly to the increase in the import duty on salt realised in the port of Balasore, and partly to a considerable decrease in refunds on exports in all the three districts of this Division.

The trade at Narayanganj, which is carried on with coast ports only, rose from Rs. 55,88,341 to Rs. 60,40,026: an increase of 8 per cent. Salt was the only dutiable article imported into this port, and the duty on it rose from Rs. 4,37,950 to Rs. 7,15,777, or by 63 per cent. No kerosene oil was imported by sea into Narayanganj, as the supplies are said to have been obtained by other routes from Calcutta. The exports were of rice only, and 5,587 cwts. were exported during the year against 966 cwts. in 1896-97, the increase being due to heavy shipments made to Chittagong, where the prices ruled high.

11. The Lieutenant-Governor's thanks are again due to the Collector of Customs and to the Board of Revenue for their supervision of the Department during the year. The report of its operations is as usual full of interest. The names of the officers who have been favourably mentioned by the Board will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Offg. Secretary to the Government of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE POLICE DEPARTMENT FOR THE YEAR 1897.

RESOLUTION—No. 5249J.

POLICE.

Calcutta, the 31st August 1898.

READ—

The Report on the administration of the Police Department for the year 1897.

Read also—

The Report for the year 1896, and the Resolution of Government recorded thereon.

MR. HENRY was Inspector-General of Police throughout the year. The present report was received by Government on the 6th July. The preparation of the statistical returns in the revised forms prescribed by the Government of India caused some delay in the submission of divisional reports to the Inspector-General of Police. Only three reports were, however, overdue at the end of March.

2. *Constitution of the force.*—The sanctioned strength of the force showed an increase of 139. While the number of head-constables was reduced by 49, there was an increase of 1 inspector, 75 sub-inspectors, 51 constables, and 51 town chaukidars. The force actually employed on the last day of the year was, however, short of sanctioned strength by 37 sub-inspectors, 37 head-constables, 177 constables, 16 town chaukidars, and 1 European constable. The omission to fill the vacancies among the sub-inspectors and head-constables was intentional—in the case of the former, with a view to leaving room for sub-inspectors appointed by competitive examination, and in the case of the latter, in order to allow the substitution of sub-inspectors, on the principle laid down by the Police Redistribution Committee. The deficiency in the number of constables was due to difficulty in recruitment.

3. *Expenditure.*—The following table compares the expenditure under the main heads during the financial years 1896-97 and 1897-98:—

Sub-heads.	HEADS OF CHARGES.	Actual expenditure for 1896-97.	Actual expenditure for 1897-98.	Increase.	Decrease.
1	2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.
1	Inspecting agency	1,65,903	1,59,077	...	6,826
2	Pay of District and Assistant Superintendents ...	4,96,168	4,80,813	...	15,355
3	Pay of Executive Police and establishments, with good conduct pay and *batta* allowance, &c. ...	33,62,935	36,25,718	2,62,783	...
4	Travelling allowance	1,21,285	1,27,480	6,195	...
5	Fixed boat establishment	59,317	65,438	6,121	...
6	Special, regular and contract contingencies ...	6,01,339	6,01,575	236	...
7	Government contribution to the Municipal and Railway Police	1,61,733	1,70,324	8,591	...
8	Bengal Military Police	70,514	52,851	...	17,663
	Total ...	50,39,194	52,83,276	2,63,926	39,844
	Net increase ...	...	...	2,44,082	...

The expenditure shows an increase of Rs. 3,99,276 over the budget grant for the year. Of this Rs. 2,73,142 was expended in compensation for dearness of provisions, which had to be paid throughout the year, and has now been discontinued. The remainder of the excess was mainly due to the entertainment of extra men in connection with the plague, the famine, and railway extensions, and to repairs and rebuilding necessitated by the earthquake, and the cyclone in the Chittagong district. The cyclone alone entailed an expenditure of Rs. 20,000. The cost of the police in each of the last ten years is shown in the margin. The increase which has occurred was in the main inevitable. It is largely attributable to additional charges sanctioned on the recommendation of the Police Redistribution Committee as essential to the maintenance of an honest and efficient body of men, to the necessity which constantly arises for strengthening the force with the development of railways and trade, to special measures for suppressing

	Rs.
1888-89	40,82,462
1889-90	40,81,342
1890-91	40,19,887
1891-92	42,26,193
1892-93	43,00,062
1893-94	43,99,736
1894-95	46,83,430
1895-96	49,77,375
1896-97	50,39,194
1897-98	52,83,276

outbreaks of crime, and, in the last two years, to the famine and the measures connected with the plague. Notwithstanding this increase the cost of police protection per head of population is still only 1 anna 1 pie as against 1 anna 10 pies in the North-Western Provinces, 2 annas 3 pies in the Central Provinces, 2 annas 8 pies in the Punjab, and 3 annas 2 pies in Bombay. Nevertheless, it is necessary that the growth of the police expenditure should be closely watched. The department will now be relieved of the exceptional charges of the last year, and there are details in which the Inspector-General can exercise considerable economy. These the Lieutenant-Governor does not doubt will receive his steady attention. Estimates should be carefully framed and sustained effort made to keep the expenditure within them.

4. *Recruitment of investigating officers.*—The number of officers selected at the two competitive examinations was 83. Besides these, 31 head-constables and writer-constables with a meritorious record of services were promoted to the rank of Sub-Inspector, of whom 10 had attended the training school for a term. The Lieutenant-Governor is glad to find that effect is thus being given to the desire of the Government that promotion should not be withheld from deserving and competent officers who have not been admitted into the force through the new system of competitive examination. The sub-inspectors appointed under that system now, however, number 580, this being nearly half of the total of officers in that grade. They are men of better social status and better education than their predecessors, and the Government looks now for a distinct improvement in both the character and the work of the police.

5. *The Police Training School.*—Mr. Henry considers that the course of instruction at the school is too short and should be extended. The expenditure involved would, however, be considerable, and any change must, therefore, be deferred. There were 165 students in the past year, of whom 69 were admitted after selection by open competition, and 13 under special orders, the remaining 63 being officers already in the service, who were permitted specially to attend for the purpose of improving themselves. Of the total number, 3 qualified as Inspectors and 148 as Sub-Inspectors, and 14 failed to obtain certificates. Apart from the knowledge imparted in the classes, much good may be expected to result from the maintenance of a healthy discipline and the encouragement of athletics and outdoor games at the school. The increase in the number of district schools started for the education of the rank and file of the police is satisfactory. The Lieutenant-Governor trusts that additions have been made this year to the 17 schools which existed at the end of the past year. This is the most effective means of reducing the percentage of illiterate men in the force, which is now so high as 74.

6. *Town Police.*—As noted in last year's Resolution, the pay of town chaukidars has been raised in fifteen districts from Rs. 5 to Rs. 6 per month, and in two other districts from Rs. 4 to Rs. 5 per month. In Serampore and the neighbouring urban areas, where there exists a large population of operatives drawing high wages, it was found necessary to withdraw the system of employing chaukidars and revert to regular constabulary. The night patrol system, which was first adopted in Patna City in lieu of the old system of watch and ward, under which each constable or chaukidar was fixed on one beat, has now been introduced in some towns in all Divisions. It has been followed by excellent results in the detection and arrest of criminals, especially in the Patna Division. The system is not, however, suited to small municipalities where the houses are scattered. The Lieutenant-Governor regrets to learn that in some places its adoption has been prevented by a refusal on the part of the municipality either to light the streets or to provide oil for the police lanterns. Such refusal is singular in the case of large municipalities like Hooghly and Dacca. The success of the plan in other municipalities should again be brought before the Committees, and, should assistance be still declined, the Lieutenant-Governor would be glad to have a report of the reasons for the refusal. The report states that the town police system must be considered unsatisfactory in the numerous municipalities of the 24-Parganas, because the strength of the police is altogether incommensurate with the duties they have to perform. An increase of the police is obviously a question of money, but the remarks of the Inspector-General will be brought to the notice of the Commissioner of the Division.

An addition of 4 officers and 61 men to the total strength of the town police of the province was made during the year.

7. *Rural Police.*—A further increase has been made in the number of chaukidars appointed under Act VI of 1870, which was 117,999 at the close of the year against 115,762 in the previous year. The services of chaukidars under Regulation XX of 1817 were in consequence dispensed with, their number being reduced from 32,000 to 28,815. Nearly half the chaukidars of this class are found in the Burdwan Division, where proceedings for the introduction of the system of panchayats and cash payment of the chaukidars have been going on for some years. Much has been already done, but the progress made in some districts has been far from satisfactory, and the matter calls for the special attention of the local officers. Mr. Henry dwells with reason on the improvement which has been effected in the last few years in the general condition of the chaukidars. The men receive in every respect greater consideration, and are, in consequence, acquiring more and more the confidence and self-respect which are requisite for efficient and honest work. A large sum is paid to them annually in rewards, they are generally provided with suitable uniforms, and sheds have been built for their shelter at the stations, where they are required to report themselves weekly. They are numbered by thousands in some districts, the total for the Province being 160,000, and the necessity for placing them under petty officers of their own class has long been felt. This has now been met in many districts by the appointment of dafadars, who act as intermediaries between them and the police. The measure has proved a success and should be adopted as soon as practicable in the other districts, where there is no local impediment.

The dafadars of Bogra are said to have done excellent service in giving important clues to the police in serious cases. In Backergunge there have been many instances of similar assistance given by chaukidars. In Noakhali it is reported that 15 chaukidars have passed the Primary or Middle Vernacular Examination, that 84 can read and write fairly well, and that 303 can read print.

The Orissa chaukidari system is in course of reorganization. Panchayats and cash payment of the chaukidars will be introduced, the Government paying for the large body of dafadars required out of the proceeds of the resumed service lands.

8. *Rewards to chaukidars.*—The total number of chaukidars departmentally rewarded rose from 4,354 in 1896-97 to 7,454, and the total sum paid shows a considerable and satisfactory increase, being Rs. 32,946-4 against Rs. 21,033-5-3 in the previous year. In several districts, however, the balance to the credit of the Reward Fund was allowed to increase unduly during the year, notably in Nadia, Jessore, Dacca, Saran, and Muzaffarpur. Saran and Backergunge had each more than Rs. 6,000 to their credit at the end of the year. These balances would show that still greater liberality may be exercised in rewarding the chaukidars for good work. In Backergunge Mr. Beatson-Bell has instituted the practice of giving medals, which is much appreciated by the men, and some mark of distinction for good service, to be seen and noted of all men, is a system which deserves encouragement throughout the province. The amount credited to the Fund throughout the province was less than in the previous year. This is no cause for regret, as it was apparently partly due to a diminution in the number of chaukidars fined departmentally. On the other hand, from the fact that the number of chaukidars brought to judicial trial or departmentally punished with dismissal was larger than in the previous year, it may be inferred that due notice was taken of cases of serious misconduct, in order to secure improvement in the efficiency of the rural police.

9. *Station-beat system.*—The Inspector-General mentions the general introduction of the station-beat system. The Lieutenant-Governor recognises the value of this plan within limits, but it may be made the occasion of much harassment, and he trusts that the Inspector-General will very carefully watch its development and restrict the patrol to villages which are known to be the residence or resort of bad characters.

10. *Railway Police.*—There was an increase of 1 Sub-Inspector and 115 constables in the permanent force of the Railway Police during the year. These were sanctioned for employment on the East Coast Railway at Puri.

A total temporary force of 1 Sub-Inspector, 27 head-constables and 114 constables was also entertained for railway guard duty and to deal with crime in the vicinity of railway construction works.

11. *Special constables and additional and private police.*—Altogether 826 men were appointed special constables during the year to keep the peace in connection with disturbances, actual or apprehended. Of these 711 were appointed for short periods in the Darbhanga district alone, the next largest number in one district being 60 in Champaran. Those in Darbhanga were required during the festivals of the Bakri Id and Muharram as a precaution against the renewal of disturbances which had occurred on previous occasions. In 13 cases forces of additional police were sanctioned by Government. Five Sub-Inspectors, 33 head-constables and 431 constables were supplied to various persons at their own expense under secton 13 of Act V of 1861.

12. *Military Police.*—Three companies of military police, each one hundred strong, were maintained at Daca, Dumka, and Bhagalpur, respectively. The barracks in which the Dacca company was quartered were so severely damaged by the earthquake as to be rodered unsafe. Steps are being taken for the construction of a new building. Detachments from these companies were utilised on several occasions during the year for the preservation of the peace outside their own districts: at Hoghly and in the 24-Parganas during the Muharram and after the Tallah pts in Calcutta, and at Bankipore during the Bakri Id. The Dumka company was marched through the Damin-i-koh. Mr. Henry speaks highly of the physique and smart appearance of the men. The service is popular, and most of thanen whose first term of three years has expired have re-engaged for a furtheterm. Schools have been started in all the three companies, and sports and gymnastics are encouraged. Since the end of the year orders have issued for te formation of a new company to be quartered in the neighbourhood of Cautta for employment on the occurrence of disturbances among the numerous country operatives employed in the mills on the banks of the river Hooghly. Stationed across the river near Barrackpore the company will be in a ceral position, whence the men could be promptly moved by road or river to the scene of any threatened disturbance.

13. *District Police Reserves and Ordinary Reserves.*—The District Police Reserves were maintained at the headquarters of every district, and number 50, 25 or 20 constables, with officers, according to the need of the district. In each district this force is alway kept at full strength and is not drawn upon for ordinary work. The men are thoroughly drilled, and, as they have shown themselves whenever employed, are competent to deal with any disturbance of an ordinary kind occurring within their district. The Ordinary Reserves are maintained for the purpose of filling vacancies due to leave and sickness among the ordinary police of the district. They number about 15 per cent. of the strength of the district force, but in the more unhealthy districts, especially in the Rajshahi Division, this percentage is frequently found insufficient.

14. *Casualties.*—The following table shows the casualties during the year:—

		1895.	1896.	1897.
1.	Retirement on pension or gratuity	383, or 1·56 per cent.	273, or 1·12 per cent.	258, or 1·05 per cent.
2.	Resignation	814, „ 3·31 „	774, „ 3·17 „	491, „ 2·003 „
3.	Dismissal	591, „ 2·4 „	534, „ 2·19 „	484, „ 1·97 „
4.	Discharge	184, „ ·74 „	144, „ ·59 „	203, „ ·82 „
5.	Desertion	90, „ ·36 „	66, „ ·27 „	68, „ ·27 „
6.	Death	521, „ 2·11 „	526, „ 2·13 „	552, „ 2·25 „
	Total ...	2,583, „ 10·5 „	2,311, „ 9·4 „	2,056, „ 8·3 „

While the percentage of deaths and of discharges was last year somewhat greater than in the two previous years, a decrease occured under all other heads, and the percentage of casualties to the total strength of the force fell from 10·5 in 1895 and 9·4 in 1896 to 8·2 in 1897. The number of admissions to hospital was 9,091 against 9,653 in 1896 and 1,277 in 1895. The average daily percentage of sick in hospital on the actual strength of the force was 1·8. The percentage was highest (3·4) in Rajshahi and lowest (·9) in Chittagong.

15. *Punishments.*—The number of officers and men judicially punished under the Penal Code during the year was 176 against 258, and under Act VI 158 against 167 in the previous year. The number dismissed was 484 against 539, and the number fined or degraded 2,794 against 2,694 in 1896. The decrease in the number of prosecutions and of dismissals indicates improvement in the conduct and discipline of the force. The number of fines and degradations was large, but under orders issued by the Inspector-General, with the approval of the Government, fines are now imposed with due regard to the pay of the men, and the pecuniary affect of degradations is duly considered. Mr. Henry remarks that, as the result of the more considerate treatment accorded to the men, the Bengal police are at present a contented force, though the smallness of the pay given to the lowest grades is responsible for many resignations.

16. *Conduct of the police.*—There was an increase of 328 in the number of constables wearing good-conduct stripes. The number of educated officers was 3,024, or 84·5 per cent., and that of educated men 5,038, or 24·6 of the total force. One Inspector and 16 Sub-Inspectors are graduates, and 37 Inspectors, 467 Sub-Inspectors, and 21 head-constables have passed the Entrance and F.A. examinations, while 133 Inspectors, 719 Sub-Inspectors, and 1,269 head-constables, although they have passed no examination, know sufficient English to be able to transact ordinary business in that language. In seven cases embezzlements were detected on the part of police officers and criminal prosecutions were instituted. Four officers were convicted, one was punished departmentally by dismissal, and two were under trial at the end of the year.

The general conduct of the police was discussed at considerable length in the report for 1896 and the Government Resolution on it. The system of competitive examination, followed by training at the Police School, has introduced into the force officers unquestionably superior in social position and education to the great majority of the old officers. The new men necessarily have still much experience to acquire, and further time must be allowed to elapse before a definite judgment is formed as to their efficiency in dealing with crime. For the purpose of estimating the effectiveness of the present force as an agency for the detection and prevention of crime, Mr. Henry has reproduced, with the addition of the figures for the past year, the statistics of serious crime in quinquennial periods since 1882, which were introduced in the report for 1896. The percentages of cases convicted show an improvement under a few heads of crime; but in rioting, murder and dacoity a marked increase of cases occurred in the past two years, while detection has also fallen off. This is a feature certainly unfavourable to the police. On the other hand, they have shown greater activity in prosecuting for bad livelihood and are far more successful in proving previous convictions. As an agency for dealing with organized disturbances, the Lieutenant-Governor agrees with Mr. Henry in commending the police for their uniform good conduct.

17. *Charges of torture and extortion against the Police.*—Altogether 23 charges of torture were brought against the police. Of these 20 were found to be false after judicial or departmental enquiry. In nine cases the complainants were prosecuted, and five were convicted, and three acquitted, one being under trial at the close of the year. Of the remaining three cases against the police, one was declared true and in the others the accused were acquitted.

Charges of extortion were brought in 149 cases against 99 in 1896. Of these, 82 were dismissed or declared false, while 21 cases were found to have been much exaggerated and were entered as true under minor sections of the Code. Ten cases resulted in convictions; in 12 the accused were discharged; 9 were compromised; in 3 there was no evidence; and 12 were pending at the end of the year. It is noticeable that out of the total of 149 cases no fewer than 92 were in the district of Mymensingh alone; this number being far in excess of the institutions in any previous year. The large increase shown for the whole Province in these charges against the police during the past year is, in fact, entirely due to the complaints made in that district, where the police have had for several years past to contend against this form of harassment. The small number of convictions must be accepted as evidence of the generally unfounded or exaggerated character of the complaints.

18. *Inspections.*—The Inspector-General spent 111 days on tour, and the Deputy Inspectors-General 174 and 167 days respectively. All the districts except Mymensingh, Manbhum, and Purnea were inspected by one of these officers. These three districts have been inspected since the beginning of the year. The Inspector-General has, as requested, shown in tabular form for each class of crime the number of cases investigated locally by the District Superintendent of Police. Burdwan, Midnapore, Dinajpur, Pabna, Patna, Champaran, and Manbhum show the largest number of such cases, while Murshidabad and Cuttack show no cases locally investigated. The Inspector-General should obtain an explanation in regard to these two districts.

19. *Suicides and accidental deaths.*—The number of suicides throughout the Province was 3,154, showing an increase of 212 over the total of the previous year. There was also a large increase in the number of accidental deaths, which showed a total of 46,061 against 29,351 in 1896. Deaths from drowning show an excess of over 13,000. No cause has been assigned for this extraordinary increase. In 25 cases enquiry showed that cases of murders had been reported as accidental deaths.

20. *Crime.*—The following table shows the incidence of cognizable crime according to Divisions, excluding nuisance cases and cases not investigated:—

Division.	Police.	Population.	Cognizable crimes (*minus* public and local nuisances, serial No. 57) actually investigated.		Proportion of police to population.		Proportion of police to cases of cognizable crime investigated.				Proportion of cases of cognizable crime investigated to population.			
	1897.	1891.	1896.	1897.	1897.		1896.		1897.		1896.		1897.	
1	2	3	4	5	6		7		8		9		10	
					Policeman.	Persons.	Policeman.	Cases.	Policeman.	Cases.	Case.	Persons.	Case.	Persons.
Burdwan ...	3,610	7,088,818	9,671	11,781	1 to	2,126	1 to	2·6	1 to	3·2	1 to	795	1 to	652
Presidency ...	3,720	7,853,566	10,813	13,185	1 ,,	2,111	1 ,,	2·9	1 ,,	3·5	1 ,,	726	1 ,,	595
Rajshahi ...	2,703	8,019,187	9,582	10,490	1 ,,	2,967	1 ,,	3·5	1 ,,	3·8	1 ,,	839	1 ,,	764
Dacca ...	2,482	9,844,127	12,944	12,343	1 ,,	4,014	1 ,,	5·2	1 ,,	4·9	1 ,,	760	1 ,,	804
Chittagong ...	1,152	4,082,705	3,494	3,210	1 ,,	3,544	1 ,,	3·0	1 ,,	2·7	1 ,,	1,171	1 ,,	1,271
Patna ...	4,626	15,811,014	18,087	26,016	1 ,,	3,417	1 ,,	3·8	1 ,,	5·8	1 ,,	877	1 ,,	607
Bhagalpur ...	2,169	6,582,490	10,635	14,928	1 ,,	3,030	1 ,,	4·9	1 ,,	6·8	1 ,,	807	1 ,,	574
Orissa ...	1,346	4,047,353	3,389	4,880	1 ,,	3,006	1 ,,	2·4	1 ,,	3·6	1 ,,	1,238	1 ,,	829
Chota Nagpur ...	1,700	4,622,702	5,911	9,823	1 ,,	2,724	1 ,,	2·9	1 ,,	5·7	1 ,,	923	1 ,,	470

The total number of cases of cognizable crime was 106,561 as compared with 83,515 in 1896. The proportion of police to cognizable cases was highest in the Presidency and Burdwan Divisions, where there was one policeman to every 2,111 and 2,126 of the population respectively. It was lowest in the Dacca Division, where one policeman was employed to every 4,014 of the population. The statement in paragraph 46 of the Report comparing the proportion of police to population and to cognizable crime reported and investigated in the various Provinces of India shows that more work is required of the police in Bengal. The strain on the force must have been very severe in a period of exceptionally heavy crime such as the past year has been.

21. *Police tests.*—The following figures show the working results during the past three years according to the prescribed tests:—

		Percentage of cases investigated to cases reported.	Percentage of cases ending in conviction to cases decided.	Percentage of persons convicted to persons sent up for trial.
Classes I to V taken together	1895 ...	67	74	62
	1896 ...	72	77	68
	1897 ...	70	76	61
Classes I to VI taken together	1895 ...	75	85	74
	1896 ...	78	87	74
	1897 ...	76	86	75

These figures show no very marked difference in the work of the three years.

22. *Reported crime of the Province.*—The statement below shows the total cognizable and non-cognizable crime reported in the Province during the last ten years with the average price of common rice:—

Year.	Cognizable crime.	Non-cognizable crime.	Total reported crime of the province.	Average price of food-grain (common rice) for the rupee.
				S. CH.
1888	110,357	112,006	222,363	19 0
1889	119,656	117,407	237,063	15 15
1890	117,443	116,554	233,997	17 7
1891	128,472	119,072	247,544	16 8
1892	146,185	121,624	267,809	13 1
1893	137,898	121,490	259,388	13 11
1894	140,902	118,070	258,972	14 9
1895	136,777	125,685	262,462	16 12
1896	147,433	129,439	276,872	13 3½
1897	185,061	125,770	310,831	9 6

There was in cognizable crime an increase of 37,628 cases and in non-cognizable crime a decrease of 3,669 cases. Both were the natural outcome of the abnormally high prices which prevailed throughout the year. The increase in cognizable crime consisted largely of petty offences against property. It was noticed in the Resolution on the Annual General Administration Report of the Jail Department that the small proportion of persons previously convicted showed that many people belonging to the non-criminal classes of the population had been driven into crime by the universally prevailing high prices. For the decrease in non-cognizable crime the trite but reasonable explanation may be given, that in a season of scarcity and pressure the people refrain in many cases from incurring the expense of prosecuting in the Courts.

23. The incidence of crime, both cognizable and non-cognizable, and the proportion of crime to population in each Division, are shown in the following statement:—

Division.	Population, 1891.	Cognizable crime.	Non-cognizable crime.	Total crime.	Number of population to each case.	Number of population to each case of cognizable crime.	Number of population to each case of non-cognizable crime.
1	2	3	4	5	6	7	8
Burdwan	7,688,818	27,671	21,436	49,107	156	277	358
Presidency	7,853,595	21,020	18,592	40,[illegible]	192	356	415
Rajshahi	8,019,187	16,909	8,737	25,646	312	474	917
Dacca	9,644,137	23,334	20,101	43,435	226	421	480
Chittagong	4,092,706	8,891	16,036	23,927	170	271	170
Total Bengal ...	37,498,493	98,795	84,202	182,997	204	445	204
Patna	15,811,014	39,146	18,577	57,723	273	403	851
Bhagalpur	8,482,490	23,313	12,428	35,741	240	363	690
Total Bihar ...	24,293,504	62,459	31,005	93,464	260	390	786
Orissa	4,047,353	9,609	6,738	16,347	247	421	600
Chota Nagpur	4,698,792	14,198	8,825	18,023	256	396	1,319
Grand Total ...	70,538,141	185,061	125,770	310,831	230	381	561

24. The following table shows the number of cases declared false, and the result of prosecutions in each of the last five years:—

	1893.	1894.	1895.	1896.	1897.
Number of cases declared to be false ...	6,103	6,634	6,735	6,891	6,141
Percentage of ditto ditto ...	4·4	4·7	4·9	4·6	3·3
Number of cases in which prosecution was instituted	725	695	584	627	600
Percentage of prosecutions resulting in conviction ...	37·2	29·5	33·3	35·2	37·8

The diminution in the percentage of false cases in 1897 is, no doubt, due mainly to the large increase in the number of petty offences against property—a class of cases in which the percentage is always small.

The extraordinarily large number of cases in the Mymensingh district ordered to be excluded from the returns as arising out of a mistake of law or fact calls for enquiry. The Commissioner will be requested to report whether there have been errors in classification, or whether this feature of the returns is due to some local characteristic of the people.

The percentage of cases reported by the police as false but declared by the Magistrate to be true was 8·3 against 8·5 in the previous year. The large number of petty offences against property in which there could be no reasonable occasion for doubt would naturally tend to lower this percentage.

The number of prosecutions for bringing false cases varied from 33 in Midnapore and 30 in Gaya to 2 in Malda and 3 each in Dinajpur and Jalpaiguri. The percentage of successful prosecutions for the Province was 37·02. The use made of the provisions of section 560 of the Code of Criminal Procedure was nowhere large. In Bankura, Jalpaiguri, and Pabna, no compensation was granted under this section. Mymensingh again heads the list in the number of false cases, which was 345. Only eight prosecutions were instituted, in three of which convictions were obtained. The proportion of prosecutions to the total number of false cases for the whole Province shows a slight increase, but is still far short of what is needed for the effectual checking of this crime. The advisability of prosecuting in all such cases in which there is some prospect of success should be always borne in mind by the Magistrates before whom the reports of the cases come.

25. *Abstention from enquiry by the police under section 157, Criminal Procedure Code.*—The following table shows the extent to which use has been made by the police of this section in respect of cases of house-breaking and theft in each of the last four years:—

Division.	Number of cases, house-breaking, serial 36, reported.				Percentage not enquired into.				Number of cases, theft, ordinary (serial 44), reported.				Percentage not enquired into.				Remarks.
	1894.	1895.	1896.	1897.	1894.	1895.	1896.	1897.	1894.	1895.	1896.	1897.	1894.	1895.	1896.	1897.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18

Chota Nagpur	1,078	1,712	2,148	4,364	46·2	30·3	29·9	8·6	2,306	2,019	2,096	2,864	8·7	9·0	5·7	4·4	
Total ...	33,043	32,101	37,378	48,805	29·2	29·5	19·5	12·5	33,401	30,186	33,227	36,783	16·0	15·1	13·9	12·7	

The figures show that in burglary cases particularly attention has been paid to the orders of Government, reiterated in the Resolution of last year, which pointed out the inadvisability of abstaining from enquiry when the offender may be presumed to have had some experience in crime, and the advantage which accrues from a visit to the spot, even when the chance of success appears remote, through the intimation which the bad characters thus receive that the authorities are on the alert and the consequent fear that they may suffer on a repetition of crime. Mr. Henry observes that enquiry might with advantage be refused in a larger number of theft cases. In this observation the experience of the Lieutenant-Governor leads him strongly to agree. When the thefts are petty and there is reason to believe that they are not the work of professional criminals, it is not desirable to press the police to make enquiries. The enquiry ends in nothing, and there is a good deal of needless harassment, which reflects itself in a concealment of crime. The Lieutenant-Governor will be glad if Magistrates will give this matter their attention in the current year. On the other hand, in all cases in which there is reason to believe that such offences were committed by professional criminals, it is [illegible] as desirable that the authority to refuse investigation should be most sparingly exercised. The police are then on the track of men who make their living by theft and burglary, and every clue which gives the smallest hopes of success, must, in the interests of the community at large, be patiently and studiously followed up.

26. *Results of trials.*—The following table shows the number of persons convicted and acquitted in police cases during the last seven years and

the percentage of convictions and acquittals to the total number placed on trial:—

Year.	Convicted—		Total.	Acquitted—		Total.	Total tried out.	Percentage of convictions (column 4 to column 8).	Percentage of acquittals.
	By Magistrate.	By Sessions.		By Magistrate.	By Sessions.				
1	2	3	4	5	6	7	8	9	10
1891	73,559	1,403	75,022	34,552	1,221	35,774	110,796	67·7	32·3
1892	84,008	1,608	85,676	34,444	1,348	35,792	121,468	70·5	29·5
1893	79,922	1,463	81,385	32,644	1,100	33,744	115,129	70·7	29·3
1894	76,443	1,364	77,807	32,534	817	33,351	111,158	70·	30·
1895	72,831	1,537	74,168	31,767	1,020	32,787	106,975	69·3	30·7
1896	76,203	1,628	77,826	31,395	1,102	32,490	110,075	70·5	29·5
1897	87,089	1,747	89,736	31,137	1,345	32,482	122,217	73·5	26·5

On examination of the figures by districts, the best results are again seen in Howrah, where the percentage of convictions was 93·6. The worst results are shown by Jalpaiguri, Rangpur, and Tippera. These figures, however, include cases of local and public nuisances in class VI, which are necessarily very numerous in large towns, like Howrah, and in which the percentage of conviction is always very high. Exclusive of this class of cases, the police arrested 59,887 persons, of whom 38,152, or 63 per cent., were convicted, against 46,558 arrests and 26,909 convictions, or 58 per cent., in the previous year. The number of persons arrested under orders of the Magistrates was 22,104, of whom 6,382, or 29 per cent., were convicted. On these figures Mr. Henry remarks that the police appear to exercise their powers of arrest with better discretion than the Magistracy. It must, however, be borne in mind that, apart from those cases in which the police arrest red-handed, they in all cases have the opportunity of making full enquiry before the arrest of an accused. The Magistrate, on the other hand, does not, as a rule, hear more than the complainant's statement, and in the classes of cases in which he issues process preliminary enquiry by the police is generally undesirable. It is, however, undoubtedly the case that process is frequently issued by Magistrates without adequate examination of the complainant, and this is a defect on which, the Lieutenant-Governor admits with regret, yearly homilies have been preached to the Magistracy with no visible effect. These homilies must, nevertheless, be presistently continued; for careless examination of complainants is a perpetual cause of unnecessary harassment to people needlessly dragged before the Courts. The percentage of persons convicted on commitment to the Court of Session throughout the Province was 56·5 against 58·2 in the previous year. Darbhanga and Jalpaiguri show the best result, while in Singhbhum only 20 per cent. were convicted. The uniformly poor results obtained in the districts of the Chota Nagpur Division call for notice, and should engage the attention of the local officers. So far as they may be due to want of completeness in the preliminary enquiries or delays in the trial of the cases after commitment, there should be prompt remedy.

In the matter of recovering stolen property, the police attained much the same measure of success as in the previous year, the percentage of property recovered to property stolen being 17·9 against 17·2 in 1896.

27. *Analysis of crime by classes.*—The following table shows, class by class, the number of true cognizable cases reported during 1897, and each of the seven preceding years:—

True cases.

	1890.	1891.	1892.	1893.	1894.	1895.	1896.	1897.
Class I ...	2,374	2,705	2,817	2,843	2,892	2,772	2,907	3,918
„ II ...	4,340	4,824	4,666	4,568	4,794	5,146	5,417	5,950
„ III ...	26,086	28,288	38,325	31,453	34,094	33,670	38,764	51,949
„ IV ...	2,210	2,220	2,268	2,082	2,412	2,627	2,271	3,116
„ V ...	36,078	39,841	44,870	43,098	45,393	41,423	45,951	68,452
„ VI ...	38,439	43,903	51,986	47,748	44,684	44,743	45,231	46,535

It will be observed that the increase in crime last year occurred in every class, but was especially marked in classes III and V, which include burglaries and thefts.

28. *Class I.—(Offences against the State and public tranquility).*—In offences relating to coin there was a decrease of 28 in the number of cases reported true. Out of 112 persons sent up for trial in connection with 76 of these cases, 70 were convicted. Forty-eight of the cases related to the uttering and passing of quicksilvered pice, which is usually a petty fraud. There were three cases of counterfeiting and 10 of possessing counterfeit coins or moulds. Offences relating to coin are specially prevalent in the district of Khulna, and

success, creditable to the District Superintendent and his subordinates, was obtained in dealing with them last year. A serious case of wholesale forgery of Government currency notes in a village of the Nadia district was successfully worked out by the Calcutta and the district police.

Rioting cases rose from 2,363 to 3,203 in number, or by 39 per cent. The increase is most unsatisfactory, especially as it occurred in all Divisions. The quarterly returns for the present year show still higher figures as compared with those for the corresponding periods of last year, and it is necessary that the causes of this marked increase should be enquired into and the requisite measures considered and taken. The Commissioners will, therefore, be requested to take up the matter without delay in respect to each district where an unusual number of rioting cases has occurred, and advise the Magistrates as to the preventive and police measures which should be adopted. The Dacca Division again heads the list with 688 cases, the next being the Presidency Division with 563 true cases. The number of cases under section 107, Criminal Procedure Code, was 2,219 and 281, respectively, in the two Divisions. In the Presidency Division the Commissioner thinks that sufficient use was not made of the preventive sections of the Code, and his opinion appears correct. In the Burdwan Division there was a serious riot among mill-hands of the Standard Jute Mill in Hooghly. The increase in rioting in both the 24-Parganas and Khulna was marked. Orders have recently issued directing the gradual reduction of gun-licenses in the latter district, especially in the Morrelganj thana, where guns have been used in riots. Of the numerous riots in the Dacca Division, 12 in Faridpur, 9 in Backergunge, 3 in Dacca, and 2 in Mymensingh were attended with fatal results. In Backergunge it is stated that village headmen have been employed with success for the settlement of petty disputes.

29. *Serious offences against the person.*—The total number of true cases reported under this head was 5,950 against 5,417 in 1896, the increase being 533 cases. The head "Grievous hurt" shows a decrease of 63 cases; and four other heads small reductions, while an increase appears against all the remaining heads, the largest being under the head "Kidnapping." The increase under this head from 316 cases in the previous year to 699 cases in the year under review is explained by Mr. Henry to be due to complaints relating to marriage being preferred as cases of kidnapping, in order to make them cognizable by the police. There were 422 cases of murder of all kinds during the year, or one in excess of the number in the preceding year, and sentence of death was passed on 19 persons, being 2 less than in the previous year.

The result of the special measures taken to deal with the serious increase of murder, especially by gunshot, in Backergunge should be noticed here. The measures have been: increase of the investigating staff, the institution of proceedings for the demand of security for good behaviour from persons credibly believed to be professional assassins or their associates, and, most important of all, the complete disarmament of the district. In 1896, 380 and last year 331 persons were required to furnish security, failing which they were kept in imprisonment. A special report submitted by the Magistrate in April last furnishes the following statistics of murders:—

Year.	True cases.	Convicted.		Acquitted.		Undetected.	Percentage of cases not detected.
		Cases.	Persons.	Cases.	Persons.		
1	2	3	4	5	6	7	8
1892	39	7	11	14	48	18	46·1
1893	54	20	28	25	39	9	16·8
1894	60	17	25	18	32	25	41·6
1895	76	16	24	17	44	42	55·2
Total ...	229	60	88	74	163	94	41·0
Average ...	57·25	15	22	18·5	48·75	23·0	10·2
1896	57	20	39	27	73	10	17·5
1897	30*	8	15	6	14	12	40

* Four cases with five persons were pending trial at the Sessions at the close of the year.

Year.	Murders in which guns were used.			Murders in which guns were not used.			Total.
	Connected with riot.	Connected with robbery or dacoity.	Pure murder.	Connected with riot.	Connected with robbery and dacoity.	Pure murder.	Total of all murders.
1	2	3	4	5	6	7	8
1892	...	...	10	7	...	22	39
1893	2	...	7	7	3	35	54
1894	2	...	14	11	1	32	60
1895	1	...	21	5	...	49	76
Total ...	5	...	52	30	4	138	229
Average ...	2·25	...	13	7·50	1	34·50	57·25
1896	1	1	13	4	...	38	57
1897	...	...	...	...	2	28	30

These figures show that murders by gunshot fell off from 14 in 1894 and 21 in 1895 to 13 in 1896, and that not one was committed in the past year. A marked reduction has simultaneously occurred in ordinary murders, that is, murders other than by gunshot, there having been only 28 cases in 1897 against 38 in 1896, 49 in 1895, 32 in 1894, and 35 in 1893. The anticipation of some people that the withdrawal of guns, while reducing the number of murders by gunshot would increase those committed by other means has thus been falsified, and the measure of disarmament adopted by Sir Alexander Mackenzie has been fully justified by the results. The objection urged against complete disarmament that the people would be deprived of protection against injury to life and crops from wild animals has been met by the supply of Government guns and ammunition to village panchayets, and this expedient has attained its object. The Lieutenant-Governor has much pleasure in recording his appreciation of the energy and judgment displayed in this matter by the District Magistrate, Mr. Beatson Bell, and the District Superintendent, Mr. Ryland, now employed elsewhere. The special Inspectors have also done excellent work.

The attention of the Magistrates is drawn to the remarks of the Inspector-General of Police on the subject of drugging cases. In all such cases prosecuting officers should press for trial under section 394, Indian Penal Code.

30. *Class III*—(*Serious offences against property.*)—The number of cases under this head was 51,949 against 38,764 in 1896, an increase of 13,185 cases or of 34 per cent. having thus occurred. The abnormally high prices of the year doubtless contributed to this increase, the bulk of which (12,504 cases) was under the head of lurking house-trespass or house-breaking. Out of the total of 51,949 cases convictions were obtained in 4,132, or 7·9 per cent. Of 10,720 persons sent up for trial, 6,172, or 57·5 per cent., were convicted. The more serious feature under this head is the very large rise in cases of dacoity. In 1896 there were 328 cases: in 1897 the number rose to 549. After allowance for 135 cases of grain dacoities, which only technically fall under section 395, Indian Penal Code, there still remains the very large increase of 76 cases of professional dacoity. The cases were most numerous in the Chota Nagpur Division, where the number rose from 37 cases in 1896 to 127 cases in 1897. This is undoubtedly in part attributable to the famine, which affected this Division, and drove the lower classes to crime, many of those concerned being inhabitants of the adjoining native States. After Chota Nagpur, Rajshahi shows the worst result. The Lieutenant-Governor is glad to see that the improvement of the village watch is now receiving more attention in that Division. There was also a marked increase in the Bhagalpur Division, for the greater part of which the Santhal Parganas and

Purnea were responsible. Since the beginning of the present year the Purnea district has been the scene of a very great outbreak of dacoity, no fewer than 44 cases having occurred up to the end of June. The matter has been dealt with by the Government, and the Officiating Inspector-General has taken special measures.

In connection with this subject Mr. Henry remarks:—

"It is said, and this is an allegation made by the witnesses examined by the Police Committee appointed in 1837, that the punishment meted out by the Courts is not sufficiently severe to prove deterrent; and having regard to the great terror caused to law-abiding people by the commission of dacoity, and to the heinousness of the offence, that the maximum sentence permissible by law should be more often passed. Of those convicted of dacoity during the past year, 233 were sentenced to imprisonment for three years or less, 212 to periods of between 3 and 5 years; 183 to periods of between 5 and 7 years; 140 to more than 7 years imprisonment; 3 were sentenced to death, and 1 to whipping."

The last year and, to some extent, the preceding year have been exceptional. It remains to be seen, when the returns of the present year are brought under review, to what extent this large increase in dacoity has been due to temporary causes. In any case, it is incumbent on the police to direct their energies specially to the checking of this serious crime, and the Lieutenant-Governor knows that the matter will receive the fullest attention at the hands of the Inspector-General.

31. *Class IV, Minor offences against the person.*—There was an increase from 2,271 to 3,106 offences under this head. The result of prosecutions before the Courts was practically the same as in the previous year, and no remarks on this class of cases are needed.

32. *Class V, Minor offences against property.*—True cases under this head increased from 82,433 in 1896 to 117,564 in 1897, that is, by 35,031, or 43·6 per cent. Theft and burglary account respectively for 13,884 and 12,504 cases out of the increase. The generally petty nature of the crime under the former head is indicated by the fact that in nearly 40 per cent. of the cases, the property stolen consisted of vegetable produce. In burglaries, again, property was reported not to have been stolen in 40·6 per cent. of the cases, while in 24·4 per cent. the value of the articles taken was under Rs. 5. With the return of normal seasons there should be a considerable reduction in this crime from the figures of the past year. Mr. Henry points out that, notwithstanding the large increase in the past year, the incidence of burglary, if reporting is accurate, is still very low compared with the neighbouring North-Western Provinces, where, with a population numbering only two-thirds of that of Bengal, 122,000 cases were registered against 48,782 in this Province.

33. *Class VI, All other cases.*—The total number of cases under this head was 46,128, comprising 33,948 cases of public and local nuisances and 12,180 of all other kinds. There was a decrease of 904 cases under the Arms Act and an increase of 954 cases of bad livelihood. The number of prosecutions for bad livelihood was 4,904, of which over 79 per cent. were successful. The largest number of cases was instituted in Backergunge, and next came Mymensingh, followed by Gaya, Patna, Manbhum, Midnapore, and Champaran. In last year's Resolution the Government commented on the small number of bad livelihood cases tried in the villages of the accused in many districts. The proportion of cases so tried in the past year was very little larger than in the preceding year. The Lieutenant-Governor expects that, the extra work involved by the famine being now over, the orders of the Government in this matter will be more carefully complied with. A local trial is desirable not only with a view to procuring all possible evidence against the accused without harassment of witnesses, but also in justice to the accused himself, who thus has the fullest opportunity of producing any evidence there may be to rebut the allegations of the prosecution. The preventive provisions relating to this class of cases have been enlarged in the new Code of Criminal Procedure by additions to the classes of habitual offenders against whom proceedings could formerly be taken, and their application has been simplified by the empowering of the Courts to deal in the same enquiry with two or more persons if they have been associated in habitual crime.

At the close of the year there were under surveillance 49,499 registered bad characters against 43,810 at the end of the previous year. The system of surveillance has been legalised by the new Code. Rules for working it are under the consideration of this Government, and will be submitted for the approval of the Government of India.

34. *Railway Police.*—The number of cases, cognizable and non-cognizable, reported to the Railway Police during the year was 4,430 against 3,813 in the preceding year. Of these 2,753 cases were declared true, and 1,677 were sent up for trial, resulting in the conviction of 1,918 persons. There were 708 accidents during the year, in which 326 persons were killed, as compared with 626 accidents and 216 deaths in the previous year. Twenty-one cases of obstruction were reported against 32 in the preceding year. In 13 cases prosecutions were instituted, of which 5 ended successfully. Most of the cases were petty.

35. *Working of the Arms Act.*—There was a considerable falling off in cases under the Arms Act, only 1,312 having been instituted against 2,216 in the preceding year. The number of prosecutions varies greatly from year to year, the fluctuations being apparently attributable, partly, to difference of opinion among the Magistrates as to the necessity for severity, and, partly, to the fact that the institution of many prosecutions in one year renders licensees more careful to avoid prosecution in the next year, by applying for renewal in due time. As remarked in last year's Resolution, while it is necessary to insist on punctuality, unintentional omission to apply for renewal of licenses should not be treated with severity. The Lieutenant-Governor trusts that officers have given due attention to the enforcement of the orders for the marking of guns, as they were reminded to do in the same Resolution. Orders will shortly be issued to ensure the more accurate accounting for every license in a district at the end of each year.

36. *Non-cognizable crime.*—The total of non-cognizable crime for 1897, as compared with that for 1896, is shown in the following table:—

	Number of cases.			
	1896.	1897.	Increase.	Decrease.
Class I ...	9,692	9,127	...	565
„ II ...	26	23	...	3
„ III ...	849	721	...	128
„ IV ...	63,164	60,289	...	2,875
„ V ...	11,497	11,931	434	...
„ VI ...	13,879	14,229	350	...
Special laws ...	30,332	29,450	...	882
Total ...	129,439	125,770	784	4,453
		Net decrease	3,669	

There is a total net decrease of 3,669 cases, which occurred principally under class IV, and is due to a very large falling off in the number of cases of assault. In the table showing the percentage of persons actually appearing before the Courts to persons summoned, over 100 per cent. is entered against several districts. If this is due to the inclusion of persons in cases sent up by the police as cognizable and declared by the Courts to be non-cognizable, the practice of including such persons should be discontinued. The percentages should be calculated only for the cases in which complaints are filed before the Courts. In the two districts of Jalpaiguri and Monghyr, the acquittals exceeded the convictions in number. It seems clear that in both districts, and in others also, too little discrimination was exercised in the issue of process by Magistrates who take cognizance of cases on petition of complaint.

37. *Remands.*—The following table compares the percentage of remands in cases sent up for trial by the police in each of the last three years :—

Year.	Percentage of cases disposed of at first hearing.	Percentage of cases remanded once.	Percentage of cases remanded twice.	Percentage of cases remanded thrice.	Percentage of cases remanded four times.	Percentage of cases remanded five times.	Percentage of cases remanded six times.	Percentage of cases remanded more than six times.	Pending.
1	2	3	4	5	6	7	8	9	10
1895	34·8	25·4	15·1	9·9	6·0	3·5	2·2	3·0	2·7
1896	32·1	22·7	15·3	10·5	6·6	3·7	2·2	3·2	3·4
1897	34·5	22·7	15·3	10·4	6·2	3·9	2·3	3·5	·9

The percentages for the past year are, on the whole, creditable to the officers in view of the heavy work due to the famine. In some districts, however, the

proportion of cases disposed of at the first two hearings was very low and the Lieutenant-Governor, while refraining from censure in consideration of the difficulties of the year, trusts that the returns for the current year will show a distinct improvement. The average period of detention of under-trial prisoners has been commented on in the Government Resolution reviewing the Annual Administration Report of the Jail Department.

38. *Reconvictions of old offenders.*—In prosecutions for offences against property, enquiry is made to ascertain whether the offender has been previously convicted of similar offence. Out of 24,970 persons convicted of these offences during the year, the police were successful in proving previous convictions against 3,243, or 12·9 per cent. The percentages of reconvictions proved in 1896 in Bombay and the North-Western Provinces were 8·7 and 15·2 respectively. The percentage of 1897 exceeds any previously attained in Bengal, and the Lieutenant-Governor does not doubt that there will be still further improvement in the coming year. The police can render no better service to the community than by the discovery and removal of professional criminals.

39. *Anthropometry.*—During the year the Central Office in Calcutta succeeded in identifying 492 persons whom the local police were unable to recognize. In the previous three years the number of such identifications was 143, 207 and 334 respectively. Of the identifications effected during the year, a large proportion was obtained by means of finger-prints on the remarkable system originated and perfected by Mr. Henry himself. The favourable report of a Committee appointed to examine this system was noticed in last year's Resolution. Considerable progress has been made in substituting it for anthropometry, and Mr. Henry estimates that in the present year two out of three identifications will be effected by it. The simplicity and certainty of the process give it a very great advantage over the rival system of anthropometry and its aid to the police will be yearly more valuable.

40. *Character of Officers.*—Mr. Henry's excellent work for many years as head of the Police Department in this Province was lately recognized by the bestowal of a decoration. Messrs. Pratt and Masters have filled efficiently the posts of Deputy Inspector-General; and the work of Mr. Showers, as Personal Assistant to the Inspector-General, is again commended by Mr. Henry. The names of the District Superintendents, Assistant Superintendents, and Inspectors mentioned in paragraph 44 of the Report will be noted in the Appointment Department.

ORDERED that copies of this Resolution be forwarded to the Inspector-General of Police, the Commissioner of Police, Calcutta, and to all Commissioners of Divisions, for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

Chief Secy. to the Govt. of Bengal.

RESOLUTION ON THE FINAL REPORT ON THE SETTLEMENT OF THE KOLHAN GOVERNMENT ESTATE IN DISTRICT SINGHBHUM.

REVENUE DEPARTMENT—LAND REVENUE.

RESOLUTION No. 3020.

Dated Calcutta, the 5th September 1898.

READ—

Letter No. 516A., dated the 25th May 1898, and enclosures, from the Board of Revenue, submitting, with their remarks, the Settlement Officer's Completion Report on the settlement of the Kolhan Government Estate in Singhbhum.

The settlement of the Kolhan Government Estate in Singhbhum was commenced in February 1895 and brought to a conclusion in March 1897, the operations being completed within the sanctioned time and at less than the sanctioned expense; the result reflects much credit on the Settlement Officer, Mr. Craven. The final report was submitted in June 1897, but owing to delay in printing and in the correction of the proof, it did not come before the Board until May 1898.

2. The previous settlement of the Kolhan Government Estate was concluded by Dr. Hayes, the then Deputy Commissioner of Singhbhum, for a term of 30 years, with effect from the 1st April 1867. The question of effecting a re-settlement was taken up by Government in 1894, and in Resolution No. 2559 of the 8th May of that year, the Board of Revenue were requested to submit proposals for fresh proceedings, which were received with their letter No. 974A., dated the 6th August 1894. Mr. Grimley, Commissioner of Chota Nagpur, in submitting his recommendations, gave a history of the Kols of Singhbhum, which it is essential to bear in mind in considering the results of a resettlement of their lands, and described their position as follows:—

"Our relations with the Kols of Singhbhum date from 1820. At that time Singhbhum was an asylum for fugitive offenders from the bordering districts of Chota Nagpur, and plundering excursions were frequently made by these people, *Larka* Kols, as they were called, into neighbouring territory. They thus became a thorn in the side of the Raja of Porahat, to whom the whole of Singhbhum was nominally subject, as well as to the Kuar of Seraikella and the Thakur of Kharsawan, who had succeeded in separating themselves from Porahat and acquiring supremacy over a large tract of country. The British Government, wishing to put an end to the plundering excursions, formed relations with the Raja of Porahat and, on his acceptance of certain terms, assisted him and the Seraikella and Kharsawan chiefs in bringing into submission the *Larka* Kols and causing them in 1821 to agree for the first time to pay a rent of 8 annas per 'plough' or yoke of oxen.

"The following is the form of agreement:—

"'*First.*—We acknowledge ourselves to be subject to the British Government and engage to be loyal and obedient to its authority.

"'*Secondly.*—We agree to pay to our chief or zamindar 8 annas for each plough for the five years next ensuing, and afterwards one rupee if our circumstances admit it.

"'*Thirdly.*—We engage to keep the road through our parganas open and safe for all descriptions of travellers, and, if robbery takes place to deliver the thief to justice and account for the property stolen.

"'*Fourthly.*—We will allow persons of all castes to settle in our villages and afford them protection; we will also encourage our children to learn the Uriya or Hindi tongues.

"'*Lastly.*—If we should be oppressed by our chiefs or zamindars, we will not resort to arms for redress, but complain to officers commanding the troops on our frontier, or to some other competent authority.'

"The arrangement, however, turned out to be a farce; for, as events proved, the chiefs failed in bringing the Kols under the influence of their control, and from 1830 to 1836 the latter resisted all attempts to realise rents from them, and waged war on all their neighbours. The British Government then resolved to interfere and to take their territory under its direct control, and thus in 1837, 23 Kol *pirs* or parganas previously belonging to the three chiefs above mentioned, were detached from their estates, and, with four *pirs* taken from Moharbhanj, brought under direct management under the name of the Kolhan. The Kols eventually agreed to pay the rent of 8 annas per plough that had been previously fixed, and the total assessment amounted to Rs. 8,000, the number of villages being 622.

"In 1855, without altering the principle of assessment, but by simply doubling the rate per plough, a net revenue of Rs. 17,418 was obtained, and a settlement for 12 years concluded. The number of villages at this settlement was ascertained to be 786.

Saranda. Nalwa.
Rengra. Kola.

In 1867 a radical change was made in the mode of assessment in all the *pirs*, except the four noted on the margin (in which, owing to the backward state of the cultivators the old system was continued), and with the consent of the Kols it was agreed—

(1) that their lands should be measured;
(2) that the system of assessment per *hal* should be continued, but that the area of land contained in each *hal* should be fixed, and that such area should contain an admixture of 1st, 2nd and 3rd class lands;
(3) that the rate per *hal* should be enhanced from one to two rupees;
(4) that the settlement should be for 30 years.

"Formerly a *hal* of land was a very uncertain quantity, being supposed to contain sufficient land for five maunds of seed to be sown in it—a mode of assessment that was probably suited to the nomadic habits of the Kols, but in 1867 the area of each *hal* was fixed at 12,500 square yards, or at 7 bighas 16 cottahs and 4 chitacks of the standard bigha.

"The rate of Rs. 2 per *hal* assessed in the settlement of 1867 thus gave a little over 4 annas per bigha, or 12 annas per acre. The gross assessment amounted to Rs. 64,828-14, and the net assessment paid to the Government to Rs. 46,247, the difference being paid as remuneration to the Mankis, Mundas and village accountants at the rate of 10, 16⅔ and 2 per cent. respectively.

"More than a quarter of a century has now elapsed since the last settlement, and during this long interval the following important changes have taken place in the district:—

(1) The creation of a Government Forest Department and of large Government forest revenues.
(2) The protection of unreserved forests by the Deputy Commissioner.
(3) The opening of the Bengal-Nagpur Railway.
(4) The influx of a large number of foreigners.
(5) The spread of primary education.

"The reservation of forests by the Government has served to take 523 square miles of the area of the Kolhan out of the occupation of the Kols, and the protection of unreserved forests by the Deputy Commissioner has further restricted the area of cultivation, and thus indirectly served to check the nomadic habits of the people and to bind them within the limits of their villages, so that they have now come to attach a greater value to their lands and learn to bestow more labour and care on their cultivation than they ever did in former times, while unforested culturable wastes, which were previously neglected because it was less troublesome and more profitable to cultivate forest-covered lands, have been brought under cultivation, with the result that there has now been an enormous increase in the cultivated area.

"The railway has opened out the country, and the cultivators have now found that the demand for the products of their lands from other parts of the country is large, and this had led them not only to cultivate their lands with greater care, but to extend the areas of their cultivation. In my crime report for 1893, in accounting for the increase in the number of thefts in the district of Singhbhum, I have remarked how the facilities for export afforded by the railway had taught the people the value of their surplus stores, and led them to prosecute even petty pilferers, who formerly would not have been interfered with. The last census returns show that whereas in 1867, out of a total population of 118,281 in the Kolhan, 93,968, or about 80 per cent., were Kols, in 1891 the population of the Kolhan rose to 229,188 souls, out of whom 163,968, or only 71·5 per cent., were Kols. These figures indicate that during the 24 years between 1867 and 1891, not only has there been a large increase in the population of the Kolhan, but that a large proportion of this increase is due to the influx of non-aborigines from the Tributary States and Orissa. The number of these non-aborigines as found in the census records is 65,220, out of which no fewer than 63,035 are Hindus. The Deputy Commissioner of Singhbhum says that, as the Kolhan is a purely agricultural tract, it is not difficult to conceive how very large must be the cultivation over that of 1867 when there has been so enormous an increase in the population, and it is not surprising that the Kols have improved their cultivation with the examples set them by the careful Uriya Gowala cultivators, who are now so largely scattered among them.

"Primary education, too, has done much towards civilizing the Kols, for instead of the wild and turbulent race of former times, they are now a peaceful and industrious people who give very little trouble to the authorities."

3. In instituting the recent settlement operations one of the first points for decision was whether the country was sufficiently advanced to require a field survey, on which point Sir Charles Elliott had entertained doubts. The measurements at the settlement by Dr. Hayes were made after the native fashion, and only rough *chittas* and sketch maps were prepared, the system having been adopted through fear of possible disturbance consequent on the introduction of foreign ameens; before introducing any innovation it was therefore considered desirable to discuss the matter openly with the people—a

procedure appreciated by them, and in conformity with local traditions and usage. The point was discussed at a conference held between the Deputy Commissioner and the leading Mankis and Mundas, and the proposal to make a cadastral survey and record of rights was unanimously adopted by the people present. At the same time two other important points were brought under discussion: the desirability of assessing the *gora* or uplands which hitherto, by the universal custom prevalent in Singhbhum, had escaped assessment, and the question of reducing the rates of commission paid to Mankis, Mundas and village accountants, which were unusually high. Mr. Grimley personally was in favour of a slight increase on the rates of assessment of *bad* and *bera* (lowlying rice) lands, a method of enhancement to which the people were accustomed and which had been adopted at previous settlements; and with an increase of two annas per bigha on the estimated large increase of the assessable area, anticipated the realisation of a net revenue of Rs. 99,978 even after retaining the commission to Mankis and Mundas at the existing rates. The Kols present at the conference, after some wavering, eventually accepted a light assessment upon *gora* lands, and the question of the reduction of the rates of commission paid was not pressed.

4. The system of assessing only rice lands has hitherto prevailed in parts of Chota Nagpur, the Sonthal Parganas, Angul and other remote primitive regions, and it has everywhere been the policy adopted in recent settlements to get rid of it gradually without exciting discontent and opposition. The system is curious for this reason, that, in order to render the land fit for the cultivation of rice, the tenant has to embank it at his own expense, so as to retain water for irrigating the rice, and, having reclaimed it from jungle and embanked it, he has to pay rent for it; at the same time he may, without payment of rent, cultivate as much upland as he pleases with crops that do not require so much irrigating and need no embanking and little or no outlay on his part. The apparent anomaly is probably due to the facts (1) that the area of land which can be terraced or embanked and rendered fit for rice cultivation in such regions is limited; (2) that, when a man has terraced or embanked a particular plot, it becomes more valuable than unembanked land, and, if he does not pay rent for and so secure an occupany right in it, somebody else will offer rent to the landlord who will oust the original reclaimer of the soil and let the land to another; and (3) that it pays the landlord to encourage reclamation and embankment of such lands, and consequent permanent cultivation, by giving the tenant, who thus incurs an outlay on embankments, the right to cultivate upland or unembanked land free of rent. The right to cultivate uplands free of rent is in fact an incident of the holding of the embanked land at a certain rent. It is part of the consideration for which the tenant reclaims the jungle, turns it into rice lands, and incurs an outlay of labour and money in rendering it fit for profitable cultivation of rice. The system is not, therefore, so unreasonable as it seems at first sight, and great caution was felt to be necessary in suddenly or arbitrarily changing it. As time goes on and population and competition for land and settled cultivation increase, the conditions are gradually reversed. The uplands in the neighbourhood of village sites get manured, the profits arising from them are enhanced, and consequent competition for them encouraged, with the result that in the highly cultivated and thickly populated parts of the country, the uplands round the village sites (the *gora* lands of Chota Nagpur) are found to be paying higher rents than the outlying low rice lands. Concrete examples of the different stages of this process of development may be found in different parts of Bengal, Bihar and Orissa; for example, in the Kolhan rice lands are assessed, and uplands pay nothing; in the north of Darbhanga along the Nepal frontier, rice lands still pay higher rents than the manured areas round the village sites, though the latter do also pay rent, while in the south of Darbhanga and Muzaffarpur, where the population is dense, cultivation intense, and competition for land great, we find the uplands paying far higher rents than the low outlying rice lands. These facts indicate that what may appear at first sight to be anomalous and unreasonable in the agricultural system of the Kolhan and other similar primitive tracts is in reality suited to the requirements of local conditions, that it is the result of the local history, and that innovations on the local system that may on *a priori* grounds appear to strangers to the locality obviously reasonable may strike the

cultivators as harsh and unjust. In the introduction of any innovation in the customary methods of assessment, careful handling was therefore required.

5. Feeling this, Mr. Stevens, who was at the time Member of the Board of Revenue, and had been for several years Commissioner of Chota Nagpur, visited the Kolhan before the survey was begun for the purpose of consulting the local officers and headmen. The results of his visit were recorded in the Board's letter No. 974A., dated 6th August 1894, in which the following recommendations were made, that—

(1) the whole work should be done by a single officer subordinate to the Deputy Commissioner and directly responsible to him, he being in his turn responsible to the Commissioner and to the Board;

(2) if possible, the amins should be entirely Kols, and if a sufficient number of Kols were not available, that the rest should be Santhals;

(3) areas should be calculated, and attestation should be made on the spot;

(4) no attempt should be made at soil rates, soil maps, or any differential or scientific system of assessment, but the existing method of fixing a uniform rate throughout the Kolhan should be continued, the understanding being that each raiyat was to have a fair share of the acknowledged classes of land;

(5) the local bigha of 2,500 square yards should be retained;

(6) no *parchas* should be issued, as being likely to be of no use till the areas had been calculated and the revenue assessed;

(7) all disputes, whether of possession or of boundaries, should be referred for decision to the Mankis and Mundas just as the people themselves would naturally refer them, and only when the village heads failed to decide them should the Superintendent interfere;

(8) the rates of commission to Mankis, Mundas and accountants should remain unchanged;

(9) the police powers of Mankis and Mundas should not be taken away, as it was not desirable to cause discontent by diminishing their status and influence, and consequently their power to decide disputes and collect revenue;

(10) the *gora* lands should not be assessed, or at least the decision to assess them should be postponed;

(11) liberal allowance should be made in the case of holdings found to contain areas in excess of those recorded at the last settlement.

(12) the revenue should be collected in two *kists*;

(13) the question of maintenance of the records should be borne in mind from the first, and the simplest possible method of maintaining them with fair efficiency, should be adopted.

Sir Charles Elliott accepted these recommendations generally, but was of opinion that there were several details as to which the experience gained as the work went on, might lead to some modifications. The method of assessment of *gora* or unembanked lands in particular was to be the subject of a separate report as soon as the Settlement Officer was in a position to submit one.

6. The rate report called for by Government was submitted by the Board after Mr. Stevens had himself paid a second visit to the Kolhan and consulted the local authorities and village headmen, as a result of which he recommended that the old rate on rice lands of 6½ annas per local bigha of 2,500 square yards, *i.e.*, Rs. 2 per *hal* of 12,500 square yards, should be allowed to continue, and that a rate of one anna per local bigha should be imposed for the first time on *gora* lands, in preference to the proposal of the Commissioner, Mr. Grimley, that the rates for rice lands should be raised all round from 6½ to 8 annas per local bigha, and that *gora* lands should be left unassessed as before.

These rates are extremely moderate, involving no enhancement of the old rates on rice lands after a settlement of 30 years, and the imposition on *gora* lands of a nominal rate of only one anna per local bigha, or approximately 2 annas an acre. They were finally agreed to by the Deputy Commissioner, the

Settlement Officer, and the people whom Mr. Stevens had met at Chaibassa, and Sir Charles Elliott in accepting the Board's recommendations issued the following orders:—

(1) that a rate of one anna per bigha should be imposed on *gora* lands;

(2) that the existing rate of rent for *bera* and *bad* lands, viz., 6½ annas per local bigha of 2,500 square yards, or 12 annas an acre, should be maintained;

(3) that in the *pattas* the right should be distinctly reserved to Government to alter the rates of rent at future settlements;

(4) that where Dikkos (foreigners) had been allowed to come into the country by the connivance of the Mundas (village headmen), and without the permission of the Deputy Commissioner, the rate of rent in each case should be left to the discretion of the Settlement Officer to fix;

(5) that a provision should be inserted in the record-of-rights and in the *patta* declaring that the holding was not transferable by gift, sale or mortgage, without the permission of the Deputy Commissioner;

(6) that the headmen should be required, under the penalty of fine and, possibly after repeated neglect, of dismissal, to report such transfers immediately, when they did occur, to the Deputy Commissioner;

(7) that *pattas* should be given to the Mundas and Mankis, each raiyat being furnished with an extract from the settlement rent-roll showing the particulars of his land, *i.e.*, the area, rate, and amount of rent, as they stood at the time of the survey-settlement;

(8) that the police powers hitherto enjoyed by the Mankis and Mundas should not be taken away.

7. Mr. Craven's report gives the results of the recent operations by which effect was given to these orders. The total area of the Kolhan is returned as 1,955 square miles, of which 525 square miles are cultivated, 450 square miles culturable, 217 square miles not culturable, 212 square miles protected forests, 531 square miles reserved forests, and 20 square miles *lakhiraj*. The population has increased during the period of the last settlement from 118,281 in 1867 to 237,320 in 1897. The gross rental has been raised from Rs. 64,828 to Rs. 1,77,300, or by Rs. 1,12,471, of which Rs. 88,388 is due to extension of cultivation of *bad* and *bera* lands, Rs. 17,080 to assessment of *gora* lands, Rs. 6,536 to enhancement of the rents of new foreigners, and Rs. 465 to the assessment of homesteads in the occupation of foreigners. The indigenous residents are allowed to hold their homesteads free of rent. The all-round rate of incidence of the new rents is 8 annas 5½ pies per acre, or 4 annas 4½ pies per local bigha. The rental is subject to a deduction of Rs. 49,772 on account of commission to Mankis, Mundas, and tahsildars or village accountants, at the rate of 10, 16, and 2 per cent. respectively on the gross amount collected. In dealing with the percentages of commission allowed to these headmen and village officials under Dr. Hayes' settlement, it was deemed prudent, having regard to the history of the estate, the primitive and wild character of the Kols, and to the fact that Government was introducing innovations on established customs, to be liberal in minor matters, and not to alter the percentages of commission which had been hitherto given. The area of *bera* and *bad* (rice) lands has increased from 82,427 acres in 1867 to 194,739 acres during the currency of the last settlement, or by 136·3 per cent. The great extension of cultivation on these lands, which involves an outlay by the cultivator on reclamation generally and especially on embankments, indicates that the people are well off, and tends to show also that the lenient policy adopted in the previous settlement (which has been repeated in this) bore good fruit in the past by extending cultivation, and is likely to bear good fruit in the future. The increase of revenue would at first sight appear to be very great, but the settlement is really very moderate. It has been accepted by the people, and the new rents have been realised in full without difficulty. Theoretically

Government would have been entitled to raise the rates on *bad* and *bera* lands largely, on the ground of rise in prices, which amounted to 100 per cent. during the currency of the last settlement, while in fact it has imposed no increase in the old rate for rice lands and has assessed (*gora*) uplands at the nominal rate of one anna per bigha. The nature of the country and people had, however, to be considered, and it was only possible to induce the latter to agree to any innovations in the customary system of assessment, by making proposals which they would be likely to accept as manifestly lenient. The results in this particular case are satisfactory, but the working of the settlement requires at the same time to be closely watched. If experience should show that the tenants cannot pay the large increase of rents now imposed, leniency should be shown in making remissions or reductions in particular cases, but meanwhile the Lieutenant-Governor is pleased to confirm the settlement, which will continue in force for 20 years with effect from the 1st April 1897.

8. In paragraphs 141 to 149 of the Settlement Officer's Report, questions of forest conservancy are discussed, on which the Commissioner and the Board have promised a special report which will be awaited by Government.

9. A question has been raised by the Settlement Officer in paragraph 88 of the Report, as to the desirability of making an attempt by executive order, to put some restriction on the local *Magh* festival, lasting over six weeks, at which drunkenness and licentiousness of every kind are indulged in. At present the festival is observed on different dates in different villages, with the result that the Kols go round from village to village drinking and carousing for the space of about six weeks, and it is therefore proposed to fix by order the same date for all villages, and so to shorten the carnival, as was done with success in the Sonthal Parganas. The Commissioner and Deputy Commissioner are opposed to interference, but the Board consider that the suggestion should not be summarily rejected till the opinion of the Mankis and Mundas has been ascertained. The Lieutenant-Governor, agreeing with the Board, requests that local opinion may be consulted, when, if any action is contemplated, definite proposals should be submitted.

10. Figures are given in paragraphs 135 and 136 of the Report showing the number of sales and mortgages which are ascertained to have taken place since the settlement of 1867. The figures show that while at the last settlement the transfer of holdings to aliens without the consent of the Mankis and Mundas, and the express sanction of the Deputy Commissioner, was considered inadmissible, yet 611 entire holdings were sold, and 1,252 and 1,405 part holdings were sold and mortgaged respectively during the currency of it. In most cases the sales were by verbal agreement and the prices received inadequate, and frequently trivial. With reference to the figures of sales of whole holdings which amount to about 2 per cent., of part holdings comprising about 4 per cent., and of mortgages of part holdings affecting about 4·2 per cent. of the total number of holdings, Sir John Woodburn desires to endorse the following remarks which have been made by the Board :—

"These figures show that, while it should not be difficult to maintain the exclusive character of this estate, with little danger of the people generally falling into the hands of foreign money-lenders, nevertheless the practices to be guarded against have begun, and are in some vogue, and will require the constant vigilance of the local officers, specially now that the indigenous chiefs and heads have begun to forget their tribal allegiance, and are in some instances corrupted into conniving at them."

As already noticed, transfer of land by gift, sale, or mortgage, without the permission of the Deputy Commissioner, has been expressly prohibited by a condition in the *pattas* given at the present settlement, and the headmen have been made responsible for reporting any neglect of these orders.

11. The question of the maintenance of the settlement records of the estate will be dealt with separately. It was originally hoped that the assistance of the Mankis and Mundas would be found sufficient for a system of correction of the records which would be effectual, and at the same time simple and inexpensive. Experience has, however, shown that these men are too illiterate for the work required, and a proposal for a special establishment of amins under a Sub-Deputy Collector, to cost Rs. 6,500 a year, was submitted by the local officers. The Board, however, are not in favour of maintaining

so expensive an establishment for the annual record of extensions of cultivation, the profits of which will go to the village officials. The principal object of Government in maintaining the records corrected up to date is to see that the rules regarding the prohibition of transfers, and sale and settlement of holdings with foreigners, are observed, and this the Board hope to be able to effect at less expense. The Lieutenant-Governor agrees with the Board that this object should be attainable at less expense than is proposed by the local officers, and will await their proposals.

12. In confirming the settlement, the Lieutenant-Governor desires to express his appreciation of the excellent work done by the Settlement Officer, Mr. Craven, who was specially chosen for the work, as his service on settlement work in the Southal Parganas had given him that experience in dealing with aboriginal people which enabled him to gain their confidence and secure their assistance. The result has fully justified the selection. The Lieutenant-Governor also notes with satisfaction the commendation bestowed on the work of Babu J. N. Chakravarti and Babu B. D. Gupta, Assistant Settlement Officers.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette*, and that a copy be forwarded for the information of the Board of Revenue.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secretary to the Govt. of Bengal.

THE MOHINY MOHUN ROY PERMANENT CHARITABLE RELIEF FUND.

No. 4997F., dated Calcutta, the 6th September 1898.

From—FRANK LYALL, Esq., Offg. Under-Secy. to the Govt. of Bengal, Financial Dept.,

To—BABU MOHINY MOHUN ROY.

WITH reference to the correspondence ending with your letter of the 29th August last, I am directed to forward for your information the accompanying copy of a Notification No. 4980F., dated the 5th September 1898, on the subject of the creation of a permanent Charitable Relief Fund for the relief of Hindus and Muhammadans of both sexes who have become destitute by reason of incurable disease, physical infirmity, or extreme old age and who are residents of Bengal.

2. I am to convey an expression of His Honour the Lieutenant-Governor's acknowledgment for your liberality and public spirit. This letter will be published in the *Calcutta Gazette*.

NOTIFICATION.

No. 5452M.—The 30th August 1898.—The following is published for general information.

E. N. BAKER,
Offg. Secy. to the Govt. of Bengal.

WORKING OF THE FIRE BRIGADE IN THE TOWN AND SUBURBS OF CALCUTTA AND IN THE MUNICIPALITY OF HOWRAH FOR THE YEAR 1897-98.

No. 8422, dated Calcutta, the 20th August 1898.

From—A. H. JAMES, Esq., Commissioner of Police, Calcutta,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit, under section 30 of Act IV of 1883, a report on the working of the Fire Brigade in the Town and Suburbs of Calcutta and in Howrah during 1897-98.

2. During the year 63 fires occurred, in each of which the value of the property destroyed exceeded Rs. 50. At 54 of these the Brigade were in attendance, and 8 were extinguished by the out-station manual engines and the residents of the locality.

3. In addition to the 62 serious fires already noted above, 126 small fires occurred—51 in the Town of Calcutta, 62 in the Suburbs, and 13 in Howrah. The Brigade attended 17 of them; the remaining 109 were extinguished by the out-station manual engines and the residents.

The average value of property destroyed at the 126 small fires was Rs. 7-5-7.

The estimated value of property destroyed during the year amounted to Rs. 3,82,605 as against Rs. 1,13,505 in 1896-97.

4. There were no lives lost at fires during the year.

5. There were 8 fires in buildings licensed under Act I (B.C.) of 1893 and Act I (B.C.) of 1894. Property to the value of Rs. 3,09,200 was destroyed.

6. Of the above fires that occurred during the year 7 call for special notice—

I.—On the 7th April 1897 at Baug Bazar, Upper Chitpore Road, 13 tiled huts, 26 stacks of hay and straw and 5 railway wagons on the Port Commissioners' railway lines, containing jute and shellac, were burnt; the fire lasted for 2 days 11 hours and 15 minutes.

II.—On the 7th April 1897 at No. 41-2, Canal West Road, a pucca godown and two large tiled sheds containing jute, grain, &c.; the fire lasted for 15 hours.

III.—On the 23rd November 1897 at No. 116, Cossipore Road, "Victoria Hydraulic Jute Press," a large pucca godown, containing jute; this fire lasted for 27 hours.

IV.—On the 26th December 1897 at Baug Bazar Ghat, 27 boats laden with straw. With great difficulty this fire was extinguished; it lasted for 6 hours and 25 minutes.

V.—On the 9th February 1898, at Gun Foundry Road, "Bengal Hydraulic Press," two large pucca godowns containing jute; this fire lasted for 14 hours and 30 minutes.

VI.—On the 12th March 1898, at Ghoosery, Howrah, "Guzdar's Press," a large two-storied pucca godown containing jute; the fire lasted for 24 hours and 30 minutes.

VII.—On the 19th March 1898 at Rosemary Lane, Howrah, "Howrah Hydraulic Jute Press," a large two-storied pucca godown containing jute; the fire lasted for 12 hours and 20 minutes.

7. During the year three prosecutions were instituted under the Explosives Act. Two defendants were convicted and one acquitted.

8. A memorandum of the fires that occurred and a statement shewing receipts and expenditure on behalf of the Brigade are enclosed.

Memorandum of fires in Town and Suburbs of Calcutta and in Howrah from 1st April 1897 to 31st March 1898.

WEATHER AND CROP REPORT.

For the week ending the 5th September 1898.

Burdwan.—Rainfall at Sadar 7·88, Kalna 3·65, Katwa 2·67, Raniganj 2·25. Weather dull. Transplantation of *aman* over. *Aus* being harvested. More sunshine wanted. Some cattle-disease. Common rice selling as follows:—

	Srs.	
Sadar	11 to 16	per rupee.
Kalna	11½ to 12	
Katwa	12⅞	
Raniganj	13	

Birbhum.—Rainfall at Sadar 2·13, Rampur Hât ·89. Weather seasonable. Sugarcane and lowland paddy not improving. Highland paddy doing very well. Price of common rice at Sadar 13 seers 2 chittaks and at Rampur Hât 13 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Sadar 4·15, Vishnupur 10·75. Weather seasonable. There was sufficient rainfall in the district during the week. Transplantation of *aman* over. Prospects of crops good. Sugarcane doing well. No cattle-disease reported. Fodder and water sufficient. Price of common rice at Sadar 15 seers and at Vishnupur 13¾ seers per rupee.

Midnapore.—Rainfall at Sadar 3·27, Contai 3·11, Tamluk 4·30, Ghatal 3·91. Recent rain has done much good. Prospects of standing crops favourable. Damage by grass-hoppers reported from several thanas. Prices of common rice:—

	Srs.	
Sadar	12	per rupee.
Contai	12 to 12½	
Tamluk	11⅞	
Ghatal	12 to 13	

Hooghly.—Rainfall at Sadar 6·49, Serampore 3·42, Jahanabad 7·33. Transplantation of *aman* is yet going on. Harvesting of *aus* and cutting and steeping of jute commenced. Cattle-disease prevails in places. Common rice sells from 10 to 12 seers per rupee.

Howrah.—Rainfall at Sadar 5·77, Ulubaria 3·46. Weather seasonable. Transplantation of *aman* still going on. Condition of *aus* good. The recent rainfall has much benefited the standing crops. Fodder and water sufficient. Common rice sells at 10 to 12 seers per rupee.

24-Parganas.—Rainfall at Sadar 7·86, Barasat 3·88, Basirhat 7·18, Diamond Harbour 4·23. Weather seasonable. Standing crops doing well. Transplantation of *aman* nearly completed. Harvesting of *aus* and cutting and steeping of jute going on. Cattle-disease reported from Basirhat and Diamond Harbour. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	10 to 12	per rupee.
Barasat	12½	
Basirhat	13¾	
Diamond Harbour	11	

Nadia.—Rainfall at Sadar 2·40, Kushtia 2·05, Meherpur 1·71, Chuadanga 3·82, Ranaghat 5·35. Harvesting of *aus* continues. *Aman* doing well. Common rice selling at 10 to 16 seers per rupee. Fodder and water sufficient. No more cattle-disease reported.

Murshidabad.—Rainfall at Sadar 2·23, Kandi 1·96, Jangipur 1·70. Weather seasonable. Harvesting of *bhadoi* finished. *Aman* plants are thriving. Jute plants are progressing well. State of sugarcane, mulberry, and indigo hopeful. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

	Srs.	
Sadar	12	per rupee.
Kandi	14	
Jangipur	14	

Jessore.—Weather damp with passing clouds and light showers. Rainfall at Jessore 2·49, Jhenida 1·81, Magura 1·37 Narail 5·67, Bangaon 5·18. State and prospects of standing crops good. Harvesting of *aus* still going on. Manufacturing of indigo almost over. Cattle-disease reported from Magura and Narail. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Jessore	12 to 16	per rupee.
Jhenida	13	
Magura	13 to 18	
Narail	17-12¼ chs.	
Bangaon	12 to 13	

Khulna.—Rainfall at Sadar 9·90, Bagerhat 3·58, Satkhira 4·94. Weather cloudy with good showers of rain. Transplantation of *aman* and harvesting of *aus* still going on. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	
Sadar	13 to 16	per rupee.
Satkhira	13	
Bagerhat	14	

Rajshahi.—Rainfall at Sadar 3·45, Nator 2·69. Weather rainy. Prospects of crops good. No cattle-disease. Fodder and water plentiful. Common rice sells from 10 to 17 seers per rupee.

Dinajpur.—Average rainfall 2·24. Weather seasonable. Cutting, steeping and washing of jute in progress. Harvesting of *bhadoi* paddy continues. Transplantation of *aman* nearly finished. No cattle-disease. Fodder and water ample. Rice selling at 14 seers a rupee.

Jalpaiguri.—Weather hot and cloudy. Rainfall at Sadar 2·81, Alipur Duars 5·22. Harvesting of *bhadoi* paddy nearly finished. Transplantation of *haimanti* going on. More rain wanted at Sadar. Cutting of jute commenced in places. Fodder and water sufficient. Price of common rice 8 to 14 seers per rupee.

Darjeeling.—Rainfall at Darjeeling 4·18, Kurseong 3·82, Siliguri ·75. Weather seasonable. *Hills*—Harvesting of *bhutta* and *chhota marua* going on ; *bara marua* being transplanted. *Terai—jamira*, *bhadoi*, and jute being cut; *haimanti* being transplanted. Coarse rice sells as follows :—

	Srs.	
Hills	8 to 11	per rupee.
Terai	13 to 14	

Bhutta sells from 16 to 50 seers per rupee.

Rangpur.—Rainfall at Sadar 1·17, Kurigram ·45, Nilphamari 1·80, Gaibanda ·01. Transplantation of *aman*, cutting, steeping and washing of jute, and harvesting of *aus* are still going on. Prospects fair. Common rice selling at 11 to 14 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 1·29. Transplanting of *aman* going on. Harvesting of *aus* and cutting of jute in progress. Fodder and water sufficient. Common rice selling from 11¼ to 15½ seers per rupee.

Pabna.—Rainfall at Sadar ·90, Sirajganj 1·29. Weather cloudy and rainy. Prospects of crops excellent. Price of common rice 12 to 15 seers per rupee.

Dacca.—Rainfall at Sadar 5·57, Manikganj 4·50, Munshiganj 5·35, Narainganj 4·73. Weather seasonable. Prospects of standing crops good. Harvesting of jute continues. Fodder available. No cattle-disease. Common rice 12 to 15 seers per rupee.

Mymensingh.—Rainfall at Sadar 3·62, Jamalpur 7·52, Netrokona 4·34, Kishorganj 12·7, Tangail 14·14. Weather rainy. Prospects of standing crops good. Supply of fodder and water sufficient. Common rice 10 to 12 seers, and 18 seers 14 chitaks at Netrokona.

Faridpur.—Rainfall at Sadar 4·92, Goalundo 4·93, Madaripur 11·49. Weather seasonable. Prospects of crops good. Steeping of jute has begun. Rice 13 to 14 seers per rupee.

Backergunge.—Rainfall at Sadar ·78. Weather fine. Prospects of crops good. Common rice sells from 10½ to 14 seers (*aman*) and from 14 to 17 seers (*aus*).

Tippera.—Rainfall at Sadar 1·95, Brahmanbaria 2·80, Chandpur 2·12. Weather seasonable. Harvesting of jute and *aus* paddy still continues. Transplantation of *aman* vigorously progressing. Prospects good. Fodder plentiful. Price of rice 10 to 16 seers per rupee.

Noakhali.—Rainfall at Sadar 5·54, Feni 8·34. Harvesting of *aus* and transplanting of *aman* continue. Extent of damage to the crops by excessive rain not yet ascertained. No cattle-disease. Fodder and water sufficient. Price of rice (*aman*) 10 to 13 seers and (*aus*) 13 to 15 seers per rupee.

Chittagong.—Rainfall 4·12. Weather seasonable. *Aus* still being reaped. Cultivation of *aman* continues. Prospects fair. Prices stationary. Water and fodder sufficient.

Patna.—Rainfall at Sadar 4·92, Barh ·55, Bihar 2·08, Dinapur 2·47, Hilsa 4·20, Bikram 3·90. Transplantation of paddy and harvesting of Indian-corn going on. *Bhadoi* and paddy on low lands somewhat damaged by flood. Lands being prepared for *rabi* sowings. Prices slightly risen. In Patna common rice sells at 16 seers a rupee. Fodder and water for cattle sufficient.

Gaya.—Rainfall at Sadar 2·85, Jahanabad 1·99, Aurangabad 1·10, Nawada ·12. *Bhadoi* crops being harvested. Transplanting of paddy over. Prospects favourable. Common rice selling at 14 seers per rupee.

Shahabad.—Rainfall at Sadar 5·67, Buxar 3·05, Bhabua ·38, Sasaram 3·20. Standing crops good. *Bhadoi* crops being harvested. Rice sells at Arrah 14 seers per rupee.

Saran.—Rainfall at Sadar 2·04, Siwan 2·13, Gopalganj 4·34. Weather cloudy with occasional showers. *Bhadoi* crops very good. Transplantation of *aghani* paddy approaching completion. Cattle-disease continues. Average prices are—Common rice 12·11 seers and *makai* 22·2 seers per rupee.

Champaran.—Rainfall at Motihari ·17, Bettiah ·63, Bagaha ·09, Ramnagar 1·08. Weather hot and cloudy. *Bhadoi* crops prospering well. *Sawan*, *kodo* and *makai* in low lands being harvested. *Marua* ripening. Rice transplantation retarded towards Ramnagar, but last two days' general rain has put the operation in full swing nearly everywhere. Price of common rice 11½ seers and of maize 18 seers per rupee. No cattle-disease. Fodder and water ample.

Muzaffarpur.—Weather seasonable. Rainfall at Sadar 1·15, Hajipur 2·28, Sitamarhi nil. Rain urgently wanted in parts of the Sitamarhi subdivision both for the *bhadoi* and paddy crops. In the Hajipur subdivision and in Mahnar and Raghopur outposts *bhadoi* crops somewhat damaged by flood; otherwise prospects good everywhere. No cattle-disease. Prices are—Common rice 11 to 14 seers, wheat 15 to 18 seers, barley 25 seers, *makai* 20 to 25 seers, gram 19 and 20 seers, *rahar* 22 to 24 seers, and *marua* 25 seers per rupee.

Darbhanga.—Rainfall at Sadar nil, Samastipur ·19, Madhubani ·17. Transplantation of paddy completed. In the Samastipur subdivision the harvesting of *marua* and *makai* continues. About one-eighth of the land is reported from Madhubani not to have been transplanted for want of rain. Common rice selling at Sadar 12 seers per rupee.

Mongnyr.—Rainfall at Sadar ·49, Begusarai 3·27, Jamui 6·48. Weather hot and cloudy. Transplantation of paddy still continues, *makai* and *shawa* being harvested in places. Standing *bhadoi* crops doing well, but low-lying *bhadoi* damaged by flood. Common rice sells as follows:—

Sadar	...	...	12 to 14 seers	per rupee.
Begusarai	...	...	11 to 13	„ „
Jamui	...	...	14	„ „

Bhagalpur.—Weather cloudy with frequent showers. Rainfall at Sadar 2·37, Banka 5·49, Madhipura ·34, Supaul ·89. More rain needed to complete transplantation in North Bhagalpur. In South Bhagalpur the rain has been sufficient. Prospects of standing crops continue satisfactory. *Bhadoi* being harvested. Prices slightly improved.

Purnea.—Rainfall at Sadar ·66, Kishanganj 1·22, Araria 1·35. Weather hot and cloudy. Harvesting of *bhadoi* and jute is going on. Transplantation of *aghani* rice in progress. Rain much needed. Cattle-disease reported from Sikti. No fresh case or death from *Kaladukh* reported. Fodder and water sufficient. Common rice (new *bhadoi*) sells as follows:—

Sadar	...	...	16	seers per rupee.
Kishanganj	...	...	21	„
Araria	...	...	21	„

Maida.—Rainfall at Sadar 1·06, Chanchal 1·90, Shibganj 1·18, Gajole ·12. Weather seasonable. Harvesting of *bhadoi* paddy approaching completion. Winter rice coming up well. Steeping of jute not yet finished. Coarse rice selling at 13 seers per rupee. Fodder sufficient.

Sonthal Parganas.—Average rainfall 1·32. Transplantation of winter rice successfully finished. Harvesting of maize and other *bhadoi* crops begun. Subsiding flood enabled *bhadoi* rice to be reaped in Pakour. Outturn of maize in Dumka only 6 to 8 annas because of excessive rainfall. Price of rice 13 to 16 seers, and of maize 18 to 44 seers per rupee.

Cuttack.—Rainfall at Jajpur 1·03, Kendrapara ·93, Banki ·64, False Point ·21. Weather hot and cloudy. *Beali* maturing, and in some places being reaped. Transplantation and weeding of *sajad* briskly going on. Sugarcane, jute, and *arhar* growing. Locusts are reported to have damaged the paddy crops in some places. Condition of cattle generally good, but disease still prevails in places. Fodder and water sufficient. Common rice sells as follows:—

	S.	ch.	
Cuttack	13	2	per rupee.
Jajpur	15	12	
Kendrapara	18	6	
Banki	17	15	

Balasore.—Rainfall at Sadar ·26. *Sarad* being transplanted and weeded. More rain wanted in the Sadar subdivision. Harvesting of jute and *asu* crops commenced. Rice sells at 13 to 18 seers per rupee in the interior, and at 14 and 15 seers at Balasore and Bhadrak respectively. Fodder sufficient.

Angul.—Rainfall at Angul ·13, and at Khondmals during last week 4·05. More rain wanted in Angul. Harvesting of *bhadoi* crops in progress. Sowing of *rabi* commenced. Prices of food-grains stationary.

Puri.—Rainfall at Puri nil, Khurda ·62. Rain badly wanted. Weeding, transplanting, and puddling of *sarad* paddy continue. *Beali* and *mandia* are ripe. Prospects of sugarcane good. Fodder and water sufficient. Cattle-disease reported from certain parts of the district. Common rice sells as follows:—

	Srs.	ch.	
Puri	12	2	per rupee.
Khurda	13	2	per rupee.
Interior of district	13 to 15	2 to 12	per rupee.

Hazaribagh.—Rainfall at Sadar 2·58, Giridi 3·00. Sunshine and rainy. Transplantation still going on in some places. Prospects of *bhadoi* good. Rice 10 to 12 seers per rupee.

Lohardaga.—Rainfall at Sadar 2·13. Sowing of *sergujа* continues. State of standing crops good. Rice sells at Ranchi 11 seers and in the interior from 11 to 16 seers per rupee. Cattle-disease continues. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—Rainfall at Sadar ·96. Weather seasonable. *Kurbi* and *til* being sown. *Sawan* and *gondli* being harvested. Prospects of crops good. Rice sells from 12 to 22 seers per rupee.

Manbhum.—Rainfall at Sadar 5·47, Gobindpur 3·25. Weather seasonable. Prospects of crops good. Cattle-disease reported from thana Manbazar. Fodder and water sufficient. Average price of common rice at Sadar 12 seers and at Gobindpur 11 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 2·18. Prospects excellent. Rice 12 to 16 seers per rupee.

General Summary.—There was good general rain during the week except in parts of North Bihar and Orissa, where more rain is required for the transplantation of the winter rice. Elsewhere transplantation is almost at an end, and the young plants are thriving well. The prospects of the *autumn* crops are generally favourable. Some damage has been done to these crops by floods in low lands in places in Patna, Muzaffarpur, Monghyr and the Sonthal Parganas. Locusts are reported to have damaged the *paddy* crops in some places in Cuttack, and grass-hoppers are still doing damage in Midnapore. *Aus* rice, jute and other early *autumn* crops are being harvested. The price of common rice has fallen in some districts, where the new *aus* crop has come into the market. Cattle-disease is still reported from places.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 6th September 1898.

M. FINUCANE,
Secretary to the Govt. of Bengal.

STOCKS OF RICE IN AND AROUND CALCUTTA.

The average temperature of the corresponding period for 24 years, Surveyor-General's Office		83·8
The extreme variation of temperature		12·7
The maximum temperature		87·8
	Miles.	
The highest velocity of the wind in one hour		12
The mean relative humidity		91
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office		85
	Inches.	
The total fall of rain from 28th August to 3rd September 1898		5·61
The average fall of the corresponding period for 24 years, Surveyor-General's Office		2·06
The total fall from 1st January to 3rd September 1898		45·90
The average fall of the corresponding period for 24 years, Surveyor-General's Office		49·19

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Calcutta, the 5th September 1898.

RESOLUTION ON THE REPORT ON THE CALCUTTA MEDICAL INSTITUTIONS FOR THE YEAR 1897.

MUNICIPAL DEPARTMENT.—MEDICAL.

Calcutta, the 7th September 1898.

RESOLUTION—No. 5677 Medl.

READ—

The report on the Calcutta Medical Institutions for the year 1897.

Read also—

The report for the year 1896, and the Resolution recorded thereon.

THERE has again been considerable delay in the submission of the report, which was not received until the 29th July, though due to Government on the 1st May. The cause of this delay has not been explained.

2. In Calcutta the death-rate rose from 35·7 to 36·1 per thousand, and in Howrah from 37·34 to 38·49. The rates in both instances are lower than in 1895, (when they were 39·6 and 42·84 respectively) but higher than the rates recorded during the preceding six years, 1889 to 1894, which were as follows, viz:—

	Calcutta.	Howrah.
1889	28·7	22·71
1890	29·8	20 62
1891	31·5	18·29
1892	29·6	23·68
1893	29·5	21·41
1894	32·9	25·95

It is noteworthy that the death-rate during the past three years, 1895, 1896 and 1897 has been in Calcutta largely, and in Howrah very largely, in excess of the rates recorded for a number of years previously. The high current rates were referred to in the Reports for 1895 and 1896, but the continuance for a third year of what the Lieutenant-Governor hopes is an exceptional mortality deserves further examination. The matter falls more particularly within the province of the Calcutta Corporation and the Sanitary Commissioner, whose attention will be directed to it. The increase in Calcutta and Howrah has now been maintained for three successive years, and appears to deserve more attention than it has yet received. The Lieutenant-Governor desires that Surgeon-Colonel Hendley will have the present course of mortality closely watched, and that any unusual feature that may attract his notice may be promptly communicated to Government.

The deaths from cholera in Calcutta and Howrah fell from 3,449 and 1,118 to 2,349 and 395, respectively. In all other diseases, however, Calcutta shows an increase of mortality, while in Howrah there has been a considerable diminution in the number of deaths from bowel-complaints and "Other causes." Small-pox prevailed in an epidemic form during the early part of the year, though to nothing like the extent to which it grew in Calcutta in 1895.

3. The numbers of in-door and out-door patients treated during the last two years in the hospitals of Calcutta and Howrah are compared in the following table:—

Name of Institution.	1896.								1897.							
	In-door.			Out-door.		Total number of patients treated both in-door and out-door.	Total number of deaths among in-door patients.	Percentage of deaths among total number of in-door patients.	In-door.			Out-door.		Total number of patients treated both in-door and out-door.	Total number of deaths among in-door patients.	Percentage of deaths among total number of in-door patients.

Grand Total ...	25,617	1,258·52	1,835	258,794	1,975·72	284,441	3,591	14·00	28,955	1,428·16	2,135	260,306	1,784·72	289,761	4,659	16·09

4. The number of out-door patients rose from 258,794 to 260,806. The South Suburban Hospital, which is now styled the Shambu Nath Pandit Hospital, shows the largest increase (11,556), which is attributed to the growing popularity of the institution, under the constant personal supervision of Surgeon-Major A. Leahy. The Shama Charan Law Hospital shows an increase of 2,755, also evidence of growing popularity. The numbers at the Medical College Hospital rose by 967, at the Presidency General Hospital by 169, and at the Howrah General Hospital by 911. The increase in the Medical College Hospital is ascribed to greater sickness among the poorer classes whose undoubted privations from the high prices prevailing during the year under report led to a still more marked increase at the Campbell Hospital. The Mayo Hospital and the Chitpur Dispensary also show a small increase in

the attendance of patients. Against this, the Eden Hospital shows a diminution of 4,621, the Dufferin Victoria Hospital of 2,059, the Sukea Street Dispensary of 730, and the Ezra Hospital of 548. The cause of decrease in the case of the Eden Hospital is reported to be due to errors in calculating the returns of two previous years; old cases having been included among the new patients. The Lieutenant-Governor trusts that steps will be taken in future to prevent the recurrence of such mistakes. The considerable falling off in the number of patients at the Dufferin Victoria Hospital was the necessary consequence of the limited accommodation provided in the present temporary building, and the closure of the institution for a month during repairs. The similar closure of the out-door department of the Ezra Hospital in September accounts for the decrease in that institution.

5. There was an increase of 2,303 in the total number of in-door patients treated, and the daily average attendance rose from 1,238·51 to 1,408·16. The increase of 2,833 at the Campbell Hospital, essentially the hospital of the poor, is the most noticeable, and was caused by the large number of pauper patients who were admitted during the famine. A good deal of overcrowding took place during the later months of the year, though additional shed accommodation for 300 patients was provided. On the other hand, in the Presidency General Hospital, the numbers dropped from 2,836 to 2,391, a fall said to be due partly to the temporary closure of certain wards of the hospital and partly to the unpopularity of the institution. The Lieutenant-Governor trusts that the reconstruction of the hospital and the other reforms under consideration and now almost ripe for introduction will make this institution more popular in future.

6. Including out-door and in-door patients, 177,770 men, 48,981 women and 63,010 children were treated during the year. The total number of men rose by 6,290, and of women by 2,269, while the number of children treated fell by 3,239, the net increase, taking all classes together, being 5,320. The number of Europeans and Hindus treated increased by 242 and 10,159, respectively, while that of Eurasians and Muhammadans diminished by 1,296 and 4,338.

7. Excluding the cases treated in the Eye Infirmary, at which there was one death, due to old age, the death-rate for all the institutions rose from 14·2 to 16·40, the highest mortality recorded for 11 years. This increased death-rate is no doubt correctly attributed to the admission of a large number of persons who came to Calcutta from the famine-stricken districts in a moribund condition. The mortality in the several hospitals varies widely, depending to a great extent upon the class of patients admitted and the condition in which they are brought to the hospital. Thus the death-rate for men ranged from 1·20 at the Police Hospital to 23·07 at the Campbell Hospital, while at the Howrah Hospital, where an unusual number of moribund cases, many of them pilgrims, were admitted, it reached 28·35. Similarly, in the case of adult women, the Dufferin Victoria Hospital shows a death-rate of 63 and the Campbell Hospital of 28·63. The death-rate among men and women was higher than last year in the Campbell, Howrah General and South Suburban Hospitals, where many of the patients were brought for treatment in a very emaciated condition. The returns for these very large hospitals have, of course, markedly affected the total statistics.

8. Small-pox was more prevalent during the year, and the number of patients admitted into hospital suffering from the disease rose from 57 to 218. With the exception of one case, which was taken to the Medical College Hospital for educational purposes, the rest – the majority of which were received from Howrah—were treated at the Campbell Hospital. Of these persons, 146 were unprotected, either by vaccination or inoculation, and 60 of them or 41·09 per cent. died. Of 58 persons who had been vaccinated, 4 or 6·89 per cent. died. In two of these the vaccinal scars were faint. The total death-rate was 29·81 against 22·80 in the previous year.

9. The number of admissions to hospital of persons suffering from cholera was 1,200 against 1,007 in the previous year, and 664 cases proved fatal, giving a death-rate of 55·33 per cent. The increase is most marked in the Campbell Hospital, where many cases from the cooly depôts in Entally were admitted. The attention of the General (Emigration) Department will

be invited to this. Among the patients, there were 36 Europeans and Eurasians, of whom 20 died, being a ratio of 55·55 per cent., the same as in the previous year. The Lieutenant-Governor notices with satisfaction that there was only one case of local origin in the Campbell Hospital against 26 in 1896, notwithstanding the overcrowding of patients in the institution throughout the year. In the Medical College Hospital, which had enjoyed immunity for several years, two local cases occurred. These could not be traced to any defects in the food or sanitary arrangements; and it is noted that at the time the cases occurred, cholera was prevalent in an adjoining bustee.

10. The admissions to hospitals on account of dysentery increased from 7,778 to 8,415, and the death-rate from 27·81 to 33·81. The Campbell, South Suburban and Howrah General Hospitals show a high rate of mortality, dysentery and diarrhœa were the main causes of mortality among the cases from famine-stricken districts. Diarrhœa patients also rose from 8,020 to 9,836, and the death-rate increased from 39·87 to 40·64. Conversely, in the case of malarial fevers, the admissions fell from 48,982 to 46,025, while the death-rate increased from 9·49 to 11·38 per cent. The number of persons treated for venereal diseases increased from 14,216 to 14,523, the more serious cases sharing in the increase. Fifty lepers were admitted into the hospitals during the year against 22 in the previous year, and of these, 35 were dealt with in the Campbell Hospital. There were 27 cases of enteric fever and 869 cases of remittent fever against 23 and 1,075 respectively in 1896. The cases recorded as enteric were more numerous than in any year since 1877, and the Superintendent of the General Hospital, where 22 of the 27 cases were treated, attributes the increase to a tendency to include cases of remittent fever in the category of enteric fever. Of the 27 cases, 26 were Europeans or Eurasians, and only one was a native.

11. The total number of surgical operations increased from 24,067 to 25,745. Death followed in 178 cases, giving a percentage of ·70 against ·73 in the previous year. The largest number of operations was performed at the Medical College Hospital, where the death-rate was ·78 against ·86. The figures for the Presidency General Hospital show a reduction of 27 cases. The Lieutenant-Governor is glad to notice that, in accordance with the remarks recorded by the Inspector-General of Civil Hospitals, on the occasion of his inspection of the hospital, the objectionable practice of using the operating room for dressing surgical cases has ceased. At the Campbell Hospital the majority of the important operations were performed by the Assistant Surgeon. The Lieutenant-Governor agrees with the Inspector-General of Civil Hospitals in thinking that this being a medical school, it is desirable that the Superintendent should perform more surgical operations of importance with his own hands. It is reported that at the Mayo Hospital, where the pupils of a private school attend, the arrangements for teaching them are inadequate. In the absence of any arrangement for the registration of duly qualified medical practitioners in this country, such a defect may have dangerous results, and the Lieutenant-Governor would be glad to receive a further report on the subject, with the views of the Superintendent of the Mayo Hospital. There was a slight increase in the number of operations in the Dufferin Victoria Hospital, viz., from 18 to 31. There were also 1,410 operations in the out-door department of this hospital, but it is reported that details of these operations are not systematically kept. The Inspector-General has doubtless arranged to have these details in future preserved, as without them the figures are useless. The Inspector-General draws attention to the small number of operations performed at this hospital for female diseases, which numbered 15 only during the year under review, and the attention of the Committee will be drawn to the matter. In the Sumbhu Nath Pundit Hospital the number of operations rose from 479 to 2,174. Many of them were of a serious nature. Although there has been some increase in the number of operations at the Howrah General Hospital as compared with the previous year, the Inspector-General is still of opinion that more surgery should be done in this institution. It is reported that the change in the system of recording surgical operations, introduced last year under the orders of the Government of India, is not convenient, since it cannot be ascertained whether medical officers are as active in this important field of work as they ought to be. The Lieutenant-Governor is prepared, if a sufficiently strong case is made out, to recommend

a change in the present system on the Inspector-General of Civil Hospitals pointing out the difficulties and submitting separate proposals on the subject.

12. The total number of women and children admitted at the Eden Hospital as in-door patients fell from 1,579 to 1,535, of whom 220 were Europeans, 501 Eurasians, 701 Hindus and Muhammadans, while 173 belonged to other classes. The death-rate for Europeans and Eurasians was 4·99 and for the others 10·18, the figures for the previous year being 6·47 and 10·50. The mortality among native children was rather high, being 33·64 against 25·36, and is explained by their being brought in, in a moribund condition. Confinement cases decreased from 640 to 616. Of these only 22 proved fatal against 49 in the previous year. There were 24 cases of septicæmia, of which 11 died. None were contracted within the hospital. There were 1,146 operations performed against 3,478 in the previous year. The decrease is attributed to the exclusion from the returns of repetitions in the passing of catheters in the same individual. Of the 13 cases in which ovariotomy was performed, 11 proved successful. His Honour notes with pleasure the success which has attended this difficult operation, as indeed all the operations in abdominal surgery. Brigade-Surgeon-Lieutenant-Colonel Joubert performed almost all the important operations himself.

13. The increase in the number of in-door patients treated during the year in the Shama Charan Law Eye Hospital was nominal, while the number of out-door patients rose from 13,206 to 15,941. There was a diminution in the daily average attendance, which was 158·45 against 161·34, but the number of operations rose from 597 to 1,197, of which 327 were extractions of lens for cataract. Vision was restored in 83·24 per cent. of these cases against 80·40 in the previous year.

14. The Lieutenant-Governor observes with pleasure that the work done by trained nurses at the Medical College, Howrah General, Campbell and South Suburban Hospitals is well spoken of by the Medical Officers concerned. The nursing at the Presidency General Hospital is under the superintendence of the Clewer Sisters, whose devotion to their work is spoken of in high terms of praise. The Superintendent has, however, noted a tendency on the part of the nurses to restrict their work to taking temperatures and administering medicines, relegating their other duties to menial servants. Steps have been taken to check this. The whole question of nursing in this hospital has been under the consideration of a Committee, and much needed reforms both here and at the Eden Hospital will, it is hoped, be introduced before long.

15. The invested capital of the Calcutta and Howrah Hospitals shows a decrease from Rs. 5,96,100 to Rs. 5,92,700. Rupees 600 was invested during the year by the Medical College Hospital, and securities to the face value of Rs. 4,000 were sold by the Howrah General Hospital. The following statement compares the main heads of receipts and expenditure for all the hospitals during the year:—

Income.

	1896.	1897.
	Rs.	Rs.
Opening balance	28,954	33,945
From Government	4,46,699	5,18,580
Local Funds	79,476	66,037
Muncipal „	40,221	41,217
Interest on investments	26,061	25,974
Receipts from paying patients	48,293	50,567
Miscellaneous receipts	3,746	11,131
Subscriptions { Europeans	9,426	10,573
Subscriptions { Natives	3,940	1,543
From sale of medicines not supplied by Government	.....	.....
Total receipts from sources other than Government	2,11,163	2,07,042
Sale-proceeds of Government securities ...	.....	3,880
GRAND TOTAL ...	6,86,816	7,63,447

Expenditure.

	1896.	1897.
	Rs.	Rs.
Establishment	2,63,676	2,68,502
Bazar medicines	5,730	5,791
European „	30,954	41,152
Diet	1,24,312	1,41,662
Miscellaneous charges	1,01,209	1,12,384
Buildings and repairs	1,28,563	1,63,550
Total ...	6,54,444	7,33,041
Invested during the year	2,500	600
Closing balance	29,872	29,806
GRAND TOTAL ...	6,86,816	7,63,447

16. The total income, excluding the opening balance, amounted to Rs. 7,29,502, which exceeds that of the previous year by Rs. 71,630. The cost to Government shows an increase of Rs. 71,881, due to larger expenditure on buildings and repairs, on diet, and on European medicines. Receipts from paying patients show an increase of Rs. 2,274, mainly due to the fact of the Campbell Hospital having received a sum of Rs. 4,575 from the Bengal Branch of the Indian Famine Fund for dieting of patients. Rupees 7,943 were also received from the same fund by the Campbell Hospital for the pauper patients treated in the sheds built by the Calcutta Municipality. There is a reduction of Rs. 13,439 in the receipts from local funds, which is attributed chiefly to smaller receipts from the Hospital Port Dues fund, owing to smaller admissions of seamen in the Medical College, Presidency General and Howrah General Hospitals. There was a slight increase in the receipts from municipal funds and in subscriptions from Europeans, while subscriptions from natives decreased by more than half. The total expenditure rose from Rs. 6,54,444 to Rs. 7,33,041. The amount spent on buildings and repairs increased by Rs. 34,987 owing to quadrennial repairs at the Medical College, and the construction of the out-door department and sheds for the accommodation of extra patients at the Campbell Hospital. There was also an increase both under Diet and Miscellaneous charges. The large increase from Rs. 6,706 to Rs. 11,349 in the expenditure on European medicines in the General Hospital was plainly due to imperfect supervision, there having been eleven Assistant Surgeons in charge of the dispensary during the year. The whole management of this hospital has lately been investigated by a Committee whose report is now under consideration.

17. The Inspector-General has expressed doubts as to the propriety of continuing the appointment of a lady doctor for the Chandney Hospital. The small attendance of female patients does not seem to warrant the retention of a lady doctor, and if the Inspector-General will submit proposals for utilising to better advantage the money that is now spent in this way, they will receive the Lieutenant-Governor's consideration.

18. The construction of a new building for the Presidency General Hospital at an estimated cost of Rs. 22,00,000 has at last been sanctioned. It is impossible to provide so large a sum at once; and arrangements have been made to construct the new buildings gradually, the subsidiary buildings which will be of immediate advantage to the existing hospital being taken up first. In the current year's budget 3 lakhs have been provided, and it has been decided in addition to such construction of the male block as the funds permit, to take up the following works in the first instance and in the following order, viz:—(1) the contagious diseases ward, (2) the main kitchen, including a milk store and dairy, and (3) the steam Laundry and thus provide at once these most necessary appendages to the existing hospital.

The entire work will take some years to carry out, but when complete it will supply one of the most pressing wants of the town. The Committee appointed to state how the existing defects of the hospital can best be remedied, to examine the nursing arrangements, the supply of bedding, &c., and to report on the general system of supervision, and the adequacy of the staff of servants and to suggest rules for management, have only recently submitted their report, which is now under the consideration of Government.

19. Surgeon-Colonel J. H. Newman was Inspector-General of Civil Hospitals throughout the year, and the Lieutenant-Governor takes this opportunity of acknowledging his efficient supervision of the hospitals under his control. Sir John Woodburn's thanks are due to Surgeon-Colonel T. H. Hendley, C.I.E., who took charge on the 9th April, for his clear and concise report.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,
Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE STATISTICAL INFORMATION FURNISHED BY THE BOARD OF REVENUE REGARDING THE STAMP DEPARTMENT FOR THE YEAR 1897-98.

FINANCIAL DEPARTMENT—SEPARATE REVENUE.

Calcutta, the 7th September 1898.

RESOLUTION—No. 6029S.R.

READ—

A memorandum from the Board of Revenue, Lower Provinces, No. 622B., dated the 10th August 1898, submitting statistical information regarding the Stamp Department for the year 1897-98.

The total receipts, charges, and net revenue in 1897-98 under the Indian Stamp Act, I of 1879, and the Court-fees Act, VII of 1870, were Rs. 1,77,59,390, Rs. 5,03,229, and Rs. 1,72,56,161, respectively, against Rs. 1,75,74,296, Rs. 4,96,172, and Rs. 1,70,78,124 in the previous year. The increase in receipts occurred in judicial stamps only, the largest increases having taken place in Calcutta (Rs. 1,23,689), Rangpur (Rs. 33,118), Murshidabad (Rs. 31,251), Bankura (Rs. 27,961), Tippera (Rs. 27,614), Midnapore, (Rs. 25,200), and Jalpaiguri (Rs. 21,501); increased litigation, the higher value of some of the suits, and improved receipts from probate duty, being ascribed as the main causes.

2. A net decrease of Rs. 23,942 occurred in the receipts from the sale of non-judicial stamps. The decrease was shared by all classes of stamps, except impressed sheets, notarial stamps, advocate, vakil, and attorney stamps, and impressed one-anna stamps for cheques, bills, &c. The revenue derived from the sale of impressed sheets, the most important of the non-judicial stamps, amounted to Rs. 35,30,987 against Rs. 34,88,156 in the preceding year. The largest increase (Rs. 27,190) occurred in Midnapore, and is attributed to the execution and registration of a large number of deeds on account of the dearness of food-grains. Midnapore, however, was not a district seriously affected by the famine, and the explanation is therefore open to question. The same explanation is offered of the increases in Shahabad and Darbhanga, where it may be valid. The largest decrease occurred in Mymensingh (Rs. 33,833), but no satisfactory explanation of the falling off is given. The revenue derived from impressed labels or special adhesive stamps which are in use in Calcutta only shows a decrease of Rs. 20,194, or 2·3 per cent. In explanation of this decrease, the Collector of Stamp Revenue remarks that in anticipation of the passing of Act XIII of 1897, which raised the duty on a transfer of lease to that payable for a conveyance, assignments of several tea

estates with their appendages, were accelerated so as to reach completion before the end of 1896-97, thus causing an increase of revenue during that year as compared with the previous year of Rs. 1,11,964. The revenue derived from the sale of receipt or one-anna revenue stamps amounted to Rs. 3,74,606 against Rs. 3,80,946 in the preceding year. The decrease in the sale of foreign bill stamps which was confined to Calcutta and the 24-Parganas, is ascribed to the general tightness of the money-market during the greater portion of the year. The revenue derived from the sale of hundi or bill of exchange stamps amounted to Rs. 86,075 against Rs. 1,24,489 in the previous year. The largest decrease occurred in Calcutta, and it also is attributed to the tightness of the money-market, which affected remittances by hundis to the mufassal.

3. The cases in which deficient duty and penalty were levied by the Civil and Revenue Courts numbered 3,352 against 3,411 in the preceding year, and the amount of duty and penalty realised was Rs. 30,405 against Rs. 34,296 in 1896-97. The falling off is attributed to the fact that in 1896-97 there were four cases of an exceptional nature, in which Rs. 4,296-8 were realised as duty and penalty, while all the cases during the year under report were of the ordinary kind. The number of prosecutions instituted during the year for the infringement of the provisions of the Indian Stamp Act was 1,302, in which 1,267 persons were brought to trial, against 415 cases and 468 persons in the preceding year, and the fines imposed amounted to Rs. 8,566 against Rs. 3,261. It is noteworthy that 874 prosecutions were instituted for default of payment of duty on hundis issued by native merchants in Faridpur, Backergunge, and Dacca and negotiated in Balliaghatta and Ultadingi in the 24-Parganas. Convictions were obtained in 871 of these cases, and fines to the aggregate of Rs. 5,863 were inflicted on the offenders. The amount distributed in rewards was Rs. 6,029-8 against Rs. 1,093-8.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Offg. Secretary to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE ADMINISTRATION OF THE INCOME-TAX DEPARTMENT FOR THE YEAR 1897-98.

FINANCIAL DEPARTMENT.—SEPARATE REVENUE.

Calcutta, the 8th September 1898.

RESOLUTION—No. 5078S R.

READ—

The report of the Board of Revenue on the financial results of the Administration of the Income-Tax for the year 1897-98.

The Board's report is, as usual, a plain statistical review of the working of the Act, showing the proceedings of the assessing staff, the number of assessees, the demand, collections and balances, the proportion of objections and of coercive measures, and the cost of administration. All reference to the sources from which assessable incomes are drawn, and the profits of various forms of business, is advisedly excluded.

2. No change of any importance was introduced during the year under report in the administration of the Income-Tax Act. The following statement compares the financial results during the last two years:—

	1896-97.	1897-98.
Number of persons originally assessed, excluding Government servants ...	112,901	113,625
Number of persons finally assessed, excluding Government servants ...	111,190	111,680
Number of persons finally assessed, including Government servants ...	120,106	121,081
Number of assessees, including Government servants, who paid tax within the year	117,050	117,834
	Rs.	Rs.
Final demand of income-tax for the current year	48,59,582	49,22,207
Final demand of income-tax, including penalties, fines, and arrears ...	50,61,295	51,15,378
Collections of income-tax within the year	47,54,783	48,01,512
Gross receipts	49,15,713	49,46,973
Charges	1,79,599	1,88,447
Percentage of charges on receipts ...	3·7	3·8
Net revenue	47,36,114	47,58,526

The net revenue shows an increase of Rs. 22,412, or ·5 per cent. against an increase of 5·8 per cent. in the previous year. During the last 10 years, the collections of the tax have risen from Rs. 31,20,344 to Rs. 42,81,995, exclusive of the tax on salaries and the interest on Government securities; and the average annual increase, which has been remarkably steady, has been Rs. 1,16,165. The reduction of this normal increment by four-fifths illustrates the check applied to the growing prosperity of the province by the great national calamities of 1897; and it would have been a matter for little surprise had their effects been even more conspicuously reflected in the income-tax returns of the year.

3. There was an increase in the final demand in all the Divisions except the Presidency and Chittagong; while the only districts in which a decrease occurred were Calcutta, Jessore, Dinajpur, Bogra, Backergunge, Chittagong, Patna, Purnea, Hazaribagh, Lohardaga, and Manbhum. It is remarkable that in none of these, except the last three, was there acute famine in 1897, and it is still more striking that all the four North Behar districts—Saran, Champaran, Muzaffarpur and Darbhanga—in which distress was most severe, show an increase both in the final demand and in collections of the tax. The Lieutenant-Governor observes that in the first three of these four districts there was a marked increase in the amount of penalties imposed and collected by district officers, and he

would have been glad had the Board given some assurance that all due lenity was shown in administering the Act in these districts in a year of stress. The largest proportionate increase (49·4 per cent.) in revenue was in Singbhum, and is ascribed to the construction of the railway now in hand, but the tax paid by this district is insignificant. A similar reason is assigned for the increase of 16·6 per cent. in Midnapore. There was a considerable increase in Faridpur and Burdwan, of which no special explanation is given.

The decrease of 9·6 per cent. in Chittagong is attributable to the damage done by the storm-wave and cyclone of October 1897; while in Lohardaga a depression in the lac trade and in the profits of liquor shops is said to account for a falling-off of 8·8 per cent. in receipts. The latter element in the decrease is an indirect result of the famine, which has also led to a marked reduction in the excise settlements for the current year. It is curious that in the neighbouring district of Palamau there was an increase in the demand and collections. The decrease in Bogra and Dinajpur is attributed to the transfer of certain thanas to Rajshahi; but as there is a net decrease in the final demand of the three districts of over Rs. 2,000, the explanation does not seem convincing.

4. *Assessments.*—The districts of Manbhum and Singhbhum, which under Government Order No. 16483R. of 21st March 1893 had been placed under one assessor, were again separated during the year under report, as the arrangement was found unsatisfactory. The staff of assessors was thus increased to 50.

The number of villages (a street in Calcutta is held to be a village for this purpose) visited by these assessors was 75,623 as against 72,220 in the previous year. The increase is ascribed to the Board's order under which the Income-Tax Deputy Collectors took up the assessment in towns, leaving the assessors free to devote all their time to villages.

The most marked decrease (536) in the number of villages visited was in Champaran; and the cause attributed is that for the first six months of the year the assessor was employed on famine work in addition to his own duties. There were also decreases in Malda, Bhagalpur, Noakhali and eleven other districts. In the province as a whole the number of persons finally assessed rose by 490, the chief increases being in Midnapore, Faridpur and Calcutta. In twenty-one districts there was a decrease, which in most cases was due to the exemption of petty traders, who had been hard hit by the prevailing scarcity.

5. *Demands, collections, and balances.*—The original demand, the revised demand, and the percentage of collections from assessees, exclusive of Government servants, is shown in the following statement:—

Year.	Original number of assessees.	Revised number of assessees.	Original demand.	Final demand after revision.	Amount of final demand collected.	Percentage of final demand collected.
			Rs.	Rs.	Rs.	Rs.
1896-97	... 112,901	111,190	44,47,472	43,52,857	42,48,058	97·6
1897-98	... 113,625	111,680	45,19,407	44,02,690	42,81,995	97·3

The outstanding balance, including penalties, costs and arrears was Rs. 1,68,600 as against Rs. 1,42,605 in the year 1896-97. Of this balance, Rs. 1,18,200 are reported to be good and under realization, Rs. 27,997 bad and irrecoverable, and Rs. 22,403 doubtful.

6. *Coercive measures.*—The following table compares for the last three years the coercive measures which had to be taken for the realisation of the tax throughout the province:—

Year.	Number of persons finally assessed.	Distress Warrants.		Distraints.		Sales.	
		Number.	Percentage to col. 2.	Number.	Percentage to col. 2.	Number.	Percentage to col. 2.
1	2	3	4	5	6	7	8
1895-96	108,901	5,636	5·2	2,173	2	317	·3
1896-97	111,190	4,858	4·4	2,142	1·9	337	·3
1897-98	111,680	5,753	5·2	2,173	1·9	357	·3

From this statement it will be seen that coercive measures were more extensively employed than in the previous year.

The most marked increase was in Calcutta, Jessore, and the 24-Parganas. The scarcity of ready money as indicated by the high rate of interest is said to be the cause of this increase.

In Jessore (16·4), Singbhum (12·4), Rangpur (11·4), Bhagalpur (10·9), 24-Parganas (10·7) and Darbhanga (10·6) the proportion of warrants issued to the number of persons assessed exceeded 10 per cent. Darbhanga, Jessore and Singbhum are almost always in this category, and the Lieutenant-Governor would be glad of the Board's opinion whether this is due to causes which cannot be avoided.

The largest number of sales reported by district officials was 57 in Rangpur, 47 in Dinajpur, 27 in Gaya, and 24 in Rajshahi. The three districts first named have for some years had an unenviable prominence in the sale list, and the Board, by whom the explanations offered for these high figures are considered unsatisfactory, have desired the Commissioners of Rajshahi and Patna to call for and examine the records of all cases of sale that occurred in the districts in question, and to enquire whether their prevalence was due to careless assessments. The Lieutenant-Governor awaits a report on the result of these enquiries.

7. *Penalties and costs.*—The demands and realisations under the heads of Penalties and Costs for the year under review, as compared with the previous year, are shown in the following statement:—

Year.	Penalties.		Costs.	
	Demand.	Realisation.	Demand.	Realisation.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
1896-97	26,297	13,572	11,596	8,592
1897-98	31,454	16,675	12,951	9,573

8. The amount collected during the year under report from companies and other employers, who agreed to collect the tax from the salaries of their servants, rose from Rs. 2,87,934 in the previous year to Rs. 3,19,319; while the remission allowed by way of commission to the employers rose from Rs. 9,454 to Rs. 10,371. The Collector of Calcutta is reported to have induced 54 new firms to enter into this contract, and there are indications that the system may be worked to some advantage in Calcutta.

9. *Incidence of the tax.*—Including the tax on the interest on Government securities and the salaries of Government officials recovered by the Accountant-General, Bengal, the incidence of the tax for the whole Province was Re. 1 to every 14·5 persons, as against Re. 1 to every 14·6 in the previous year. Excluding the taxes recovered by the Accountant-General, Bengal, the incidence was Re. 1 to every 16·2 persons as against Re. 1 to every 16·3 in the previous year.

Outside Calcutta the incidence was Re. 1 to every 32·2 persons as against every 33·2 persons in the previous year; and it varied from Re. 1 to every 4 persons in Darjeeling to Re. 1 to every 78 persons in Cuttack.

One person in 36 in Calcutta paid the tax as against one in 37 in the previous year, and its incidence per head was Re. 1 to every ·4 persons; while in the entire Province one person in 637 paid the tax as against one person in 640 in the previous year.

10. The following statement illustrates for the year under review and previous years the distribution of the income-tax, and of the other direct taxes which preceded it, as between Calcutta and the rest of the Province:—

Years.	Act imposing tax.	Number of persons assessed in—			Amount of tax realised in—		
		Calcutta.	Rest of province.	Total of columns 3 and 4.	Calcutta.	Rest of province.	Total of columns 6 and 7.
1	2	3	4	5	6	7	8

* Figures not available.

† Exclusive of the tax on salaries, &c., recovered by the Accountant-General and the tax on the interest of Government securities.

These figures show a steady yearly increase in the amount of Income-tax collected. It will be seen that Calcutta contributes nearly as much as all the rest of the Province.

11. *Expenditure.*—The expenditure incurred in the working of the tax during the year under report rose from Rs. 1,79,599 in the previous year to Rs. 1,88,447.

There was a substantial increase under all the different heads of expenditure (except Commissioner's establishment) for which, however, sufficient reasons have been assigned; the most important being the grant of grain compensation to peons; the increase in the establishment of certain districts moved up into higher classes; and the appointment of a whole-time assessor in Singbhum.

12. *General.*—The system of payment by money-order continues to advance in favour with the public. The Board have decided that there is no necessity to open a sub-treasury in the office of the Collector of Income-Tax, Calcutta. No case of embezzlement was brought to light. Two persons were convicted for personating assessors and illegally collecting tax, while there were four successful prosecutions against persons who resisted the attachment of property by peons and other income-tax officials.

13. The names of the Deputy Collectors specially reported by the Board as having done good service will be communicated to the Appointment Department.

14. In conclusion, the Lieutenant-Governor thanks the Board for their administration of this Department during the year under review.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Offg. Secretary to the Government of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 12th September 1898.

Burdwan.—Rainfall at Sadar 1·72, Kalna ·20, Katwa 2·43, Raniganj 1·67. Weather seasonable. *Aus* being harvested. *Aman* doing well. Some cases of cattle-disease reported. Common rice selling as follows :—

	Srs.	
Sadar	11 to 16	per rupee.
Kalna	11½ to 12	
Katwa	14	
Raniganj	13	

Birbhum.—Rainfall at Sadar 3·24, Rampur Hât 3·08. Weather seasonable. Sugarcane and lowland paddy improving. Highland paddy excellent. Price of common rice at Sadar 13 seers 8 chittaks and at Rampur Hât 13 seers 14 chittaks per rupee. Fodder sufficient.

Bankura.—Rainfall at Sadar ·30, Vishnupur ·39. Weather seasonable. *Aman* and *aus* paddy thriving. Sugarcane doing well. No cattle-disease reported. Fodder and water sufficient. Common rice selling at 15 seers a rupee at Bankura and 14 seers at Vishnupur.

Midnapore.—Rainfall at Sadar ·31, Contai ·04, Tamluk ·05, Ghatal 1·08. Good rain has fallen since the close of the week. Prospects of standing crops favourable. Damage by grass-hoppers reported from several thanas. Common rice selling as follows :—

	Srs.	
Sadar	12	per rupee.
Contai	12 to 14	
Tamluk	12	
Ghatal	12 to 13	

Hooghly.—Rainfall at Sadar ·69, Serampore 1·54, Jahanabad 1·62. Transplantation of *aman* nearly finished. Harvesting of *aus* going on. Cutting and steeping of jute in progress. Cattle-disease prevails in places. Common rice sells from 8 to 12 seers per rupee.

Howrah.—Rainfall at Sadar ·17, Uluberia ·30. Weather hot and cloudy. Transplantation of *aman* still going on. Harvesting of *aus* and steeping of jute commenced. Condition of standing crops good. Fodder and water sufficient. Common rice sells at 10 to 12 seers per rupee.

24-Parganas.—Rainfall at Sadar ·87, Barasat ·04, Basirhat 1·33, Diamond Harbour ·69. Weather seasonable. Prospects of crops excellent. Transplantation of *aman* nearly finished. Harvesting of *aus* and cutting and steeping of jute going on. Cattle-disease reported from parts of the Basirhat and Diamond Harbour subdivisions. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	
Sadar	10 to 12	per rupee.
Barasat	12½	
Basirhat	13¾	
Diamond Harbour	11	

Nadia.—Rainfall at Sadar ·25, Kushtia 4·73, Meherpur 2·75, Chuadanga ·89, Ranaghat 1·12. Harvesting of *aus* continues. *Aman* doing well. Common rice selling at 11 to 16 seers per rupee. Fodder and water sufficient. No fresh cases of cattle-disease reported.

Murshidabad.—Rainfall at Sadar 1·57, Kandi 2·55, Jangipur 3·52. Weather seasonable. *Aman* plants on high land doing very well. Sugarcane and *aman* on low land are not doing well. Prospects of indigo and mulberry hopeful. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	
Sadar	12	per rupee.
Kandi	14½	
Jangipur	14	

Jessore.—Rainfall at Sadar ·57, Jhenida ·71, Magura 1·27, Narail ·08, Bangaon ·73. Weather seasonable. Harvesting of *aus* almost over; that of jute still going on. Manufacturing of indigo nearly completed. No cattle-disease reported. Fodder and water sufficient. Rivers continue to rise slowly. Common rice sells as follows :—

	Srs.	
Jessore	12 to 16	per rupee.
Jhenida	13	
Magura	13 to 20	
Narail	17-12½ chs.	
Bangaon	13	

Khulna.—Rainfall at Sadar 2·74, Satkhira 2·87, Bagerhat ·67. Weather hot and cloudy with occasional showers. Transplantation of *aman* nearly finished. Harvesting of *aus* going on. Fodder and water available. Common rice sells as follows :—

	Srs.	
Sadar	14 to 15	per rupee.
Bagerhat	16	
Satkhira	13 (old) / 21 (new *aus*)	

Rajshahi.—Rainfall at Sadar 3·25, Nator 2·39, Naugaon 4·72. Prospects of crops good. No cattle-disease. Fodder and water ample. Common rice sells from 13 to 22 seers per rupee.

Dinajpur.—Average rainfall 6·10. Weather rainy. Harvesting of *bhadoi* paddy nearly completed. Cutting, steeping, and washing of jute still going on. Transplantation of *aman* on high lands in progress. Prospects of all crops excellent. No cattle-disease. Fodder and water ample. Rice selling at 14 seers a rupee.

Jalpaiguri.—Rainfall at Sadar 17·77, Alipur Duars 19·41. Weather hot and rainy. Harvesting of *bhadoi* paddy nearly finished. Transplantation of *haimanti* paddy going on. Cutting of jute commenced. Rain of the last fortnight has benefited jute and rice. Fodder and water sufficient. Common rice sells from 8 to 15 seers a rupee.

Darjeeling.—Rainfall at Darjeeling 7·93, Kurseong 13·84, Siliguri 20·07. Weather seasonable. *Hills*—Transplanting of *bara marua* going on ; harvesting of *chhota marua* and *bhutta* commenced. *Terai*—Cutting of *jumira*, *bhadoi* and jute, and transplanting of *haimanti* nearly completed ; sugarcane progressing. Coarse rice sells as follows :—

	Srs.	
Hills	8 to 10	per rupee.
Terai	13 to 15	

Bhutta sells from 16 to 50 seers per rupee.

Rangpur.—Rainfall at Sadar 9·79, Kurigram 10·16, Nilphamari 8·54, Gaibanda 8·94. Transplantation of winter rice and cutting, steeping and washing of jute are in progress. Reaping of *bhadoi* nearly over. Prospects fair. Common rice selling at 11 to 14 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 4·58. Transplanting of *aman* continues. Harvesting of *aus* and cutting of jute going on. Fodder and water sufficient. Common rice selling from 11¼ to 16½ seers per rupee.

Pabna.—Rainfall at Sadar 3·47, Sirajganj 3·49. Weather rainy. Prospects excellent. Common rice selling from 10 to 15 seers per rupee.

Dacca.—Rainfall at Sadar ·93, Manikganj ·42, Munshiganj 3·52, Narainganj 3·80. Weather seasonable. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice 10 to 15 seers per rupee.

Mymensingh.—Rainfall at Sadar 3·33, Jamalpur 4·15, Netrokona 3·22, Tangail 3·74, Kishorganj 13·36. Weather showery. Condition of standing crops good. Transplantation of *aman* nearly finished. Common rice 10 to 13 seers 5 chitaks per rupee. Supply of fodder and water sufficient.

Faridpur.—Rainfall at Sadar ·27, Goalundo 2·08, Madaripur 3·44. Weather hot. Prospects of *aman* very good. Jute poor. Rice 13 to 14 seers per rupee.

Backergunge.—Rainfall at Sadar nil. Weather fine. Prospects of crops good. Common rice sells from 10½ to 13 seers (*aman*) and from 15 to 18 seers (*aus*) per rupee.

Tippera.—Rainfall at Sadar ·31, Brahmanbaria ·89, Chandpur ·05. Weather seasonable. Harvesting of jute and *aus* still continues. Transplantation of *aman* vigorously progressing. Prospects good. Fodder sufficient. Price of rice 10 to 16 seers per rupee.

Noakhali.—Rainfall at Sadar 1·20, Feni 3·19. Prospects of standing crops good. Extent of damage by excessive rainfall under enquiry. No cattle-disease. Fodder available. Price of common rice 13 to 18 seers per rupee.

Chittagong.—Rainfall ·94. Weather seasonable. *Aus* still being reaped. Cultivation of *aman* progressing. Prospects favourable. Prices stationary. Water and fodder sufficient.

Patna.—Rainfall at Sadar 3·51, Barh 3·21, Bihar 3·00, Dinapur 4·29, Hilsa 3·57, Bikram 6·43. Transplantation of paddy nearly completed. Harvesting of Indian-corn going on. Fields being prepared for *rabi* sowings. Prices improving. In Patna common rice sells at 16 seers per rupee. Fodder and water for cattle sufficient.

Gaya.—Rainfall at Sadar 3·76, Jahanabad 2·59, Aurangabad 2·79, Nawada 2·28. Harvesting of *bhadoi* in progress. Prospects of paddy favourable. Common rice selling at 16 seers per rupee.

Shahabad.—Rainfall at Sadar 4·24, Buxar 3·21, Dehri 4·98, Sasaram 3·96, Bhabua 3·48. Standing crops good. *Bhadoi* crops being harvested. Rice sells at Arrah 14 seers per rupee.

Saran.—Rainfall at Sadar 5·55, Siwan 9·24, Gopalganj 10·66. Heavy showers fell throughout the week. Harvesting of *bhadoi* crops begun. *Aghani* paddy doing well. Floods may damage *bhadoi* somewhat, but are enabling rice to be transplanted on high lands. Common rice 12 seers 8 chittaks and *makai* 21 seers 14 chittaks per rupee.

Champaran.—Rainfall at Motihari 21·49, Barharwa 10·63, Ramnagar 22·25, Bagaha 9·86. Very heavy rainfall all over district. Sikrahna river overflowed on 9th, and caused highest floods on record here. Floods falling at Sadar, but rising at Bara and Maisi. Railway communication stopped as far as Motipur, as line submerged in places. Raxoul railway bank breached in places. Two hundred and forty-foot brick bridge over Sikrahna spill completely carried away. Large numbers of cattle swept away by floods. Great damage done to *bhadoi* crops and houses. Some loss of life in Segowlie; accurate information not yet received. Bettiah subdivision less affected. Price of common rice risen to 8 seers and maize 14½ seers at Sadar.

Muzaffarpur.—Weather rainy throughout the week. Rainfall at Sadar 9·51, Hajipur 5·53, Sitamarhi 14·30. High floods have done considerable damage to standing crops; otherwise prospects good. No cattle-disease. Prices are—Common rice 11 to 14 seers, wheat 15 to 18 seers, barley 25 seers, maize 22 to 25 seers, gram 20 and 21 seers, *rahar* 22½ and 23 seers, and *marua* 25 to 27½ seers per rupee.

Darbhanga.—Rainfall at Sadar 9·58, Samastipur 8·64, Madhubani 5·52. Weather cloudy with alternate sunshine. Rainfall of the week has done immense good to paddy. Transplantation nearly finished. Harvesting of *makai* and *marua* in progress. Common rice selling at Sadar 12 seers per rupee.

Monghyr.—Rainfall at Sadar 8·77, Begusarai 4·36, Jamui 2·69. Weather cloudy and rainy. Transplantation of paddy nearly over. Harvesting of *makai*, *shama*, and *marua* going on. Standing crops doing well. Tobacco and chillies being transplanted. Lands being prepared for *rabi* crops. No cattle-disease. Common rice sells as follows:—

Monghyr	...	...	13	seers per rupee.
Begusarai	...	...	11 to 13	,, ,,
Jamui	...	...	14	,, ,,

Bhagalpur.—Rainfall at Sadar 5·47, Banka 2·84, Madhipura 3·75, Supaul 5·86. Weather hot and cloudy. Transplantation of paddy still progressing in North Bhagalpur. Harvesting of *bhadoi* continues. Common rice sells at 15½ seers per rupee at Sadar.

Purnea.—Rainfall at Sadar 5·81, Kishanganj 10·76, Araria 4·94. Weather rainy and cloudy. The recent rain has done immense good to *aghani* rice. Harvesting of *bhadoi* paddy going on. Cattle-disease reported from Araria subdivision. Fodder and water sufficient. Common rice (*bhadoi*) sells as follows:—

Sadar	...	...	18	seers per rupee.
Kishanganj	...	...	20	,,
Araria	...	...	20	,,

Malda.—Rainfall at Sadar 7·31, Chanchal 3·18, Shibganj 4·70, Gajole 9·09. Weather cloudy and wet throughout the week. Harvesting of *bhadoi* rice finished. Prospects of winter paddy good. Coarse rice sells at Gomastapur 22 seers per rupee. No want of fodder.

Santhal Parganas.—Average rainfall 4½ inches. Maize and other *bhadoi* crops being reaped. Transplantation of winter rice nearly done. Prospects good. Price of rice 13 to 15 seers, and of maize 19 to 50 seers per rupee. Health of cattle good.

Cuttack.—Rainfall at Jajpur ·12, Kendrapara ·15, Banki ·29. Weather hot and cloudy, but want of rain generally felt. *Beali* maturing, and in some places being reaped. *Sarad* being weeded and transplanted. Sugarcane, jute, and *arhar* are growing. Condition of cattle generally good. Cattle-disease reported from some places. Fodder and water sufficient. Common rice sells as follows:—

		S.	ch.	
Cuttack	...	13	2	per rupee.
Jajpur	...	15	12	
Kendrapara	...	19	11	
Banki	...	16	13	

Balasore.—Rainfall at Sadar 2·57. More rain wanted in the Sadar subdivision. *Sarad* being transplanted and weeded. Harvesting of jute and *aus* crops continues. Rice sells from 14 to 20 seers per rupee in the interior, and at 14 and 18 seers at Balasore and Bhadrak respectively. Fodder sufficient.

Angul.—Rainfall at Angul ·60 and at Khondmals 3·58. More rain wanted in Angul. Harvesting of *bhadoi* crops in progress. Sowing of *rabi* commenced. Prices stationary.

Puri.—Rainfall at Puri ·10, Khurda ·20. Rain insufficient. Good showers urgently wanted. *Beali* and *mandia* harvested. *Laghu* in ear. Weeding and transplanting of *sarad* continue. Prospects of sugarcane, *arhar* and other miscellaneous crops good. Fodder and water sufficient. Cattle-disease reported from certain parts of the district. Common rice sells as follows:—

	Srs.	ch.	
Puri	13	2	
Khurda	13	12	
Interior of district	13 to 15	15 12	per rupee.

Hazaribagh.—Rainfall at Sadar ·20, Giridi 2·90. Sunshine and cloudy. Transplantation of paddy going on. Prospects of *bhadoi* good. Rice selling from 10 to 12 seers per rupee.

Lohardaga.—Rainfall at Sadar ·29. *Sergaja* sowing continues. State of standing crops good. Rice sells at Ranchi 11 seers and in the interior from 11 to 16 seers per rupee. Cattle-disease continues in the interior. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—Rainfall at Sadar 2·36. Weather seasonable. Standing crops in good condition. Rice sells from 13 to 17 seers per rupee.

Manbhum.—Rainfall at Sadar ·37, Gobindpur 4·40. Weather seasonable. Prospects of crops excellent. Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar and Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 1·74. Prospects of crops excellent. Rice 12 to 16 seers per rupee.

General Summary.—There was heavy rainfall during the week in the north of the Province, especially in North Bihar: elsewhere the fall was more moderate. In Orissa more rain is still required. The exceptionally heavy rain in Champaran has caused high floods, and loss of crops, cattle and property is reported. In Muzaffarpur also floods have done considerable damage to the crops. Reports from all other districts are favourable. The transplantation of winter rice is almost over, and the harvesting of the *autumn* crops is proceeding. Prices have risen in Champaran owing to the floods, but in other districts no important change has taken place since last week. Cattle-disease is reported from some districts, but the supply of fodder is everywhere sufficient.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 13th September 1898.

M. FINUCANE,
Secretary to the Govt. of Bengal.

Abstract of the Results of Meteorological Observations taken at the Alipore Observatory in the month of August 1898.

	Inches.	Date.	Hour.
The mean pressure of the month	29·550		
The average pressure of August from 24 years' registers ...	29·598		
The highest pressure in the month	29·748	31st	10
The lowest pressure in the month	29·301	9th	16
The range of pressure	0·447		
	Hours.		
The total number of hours of bright sunshine during the month	101·2		
The maximum possible number of hours of sunshine ...	398·4		
	⊖		
The mean temperature of the month	82·5		
The average temperature of August from 24 years' registers ...	83·1		
The highest temperature in the month	99·4	1st	
The lowest temperature in the month	75·1	30th	
The range of temperature during the month	15·3		
The mean daily range of temperature	8·1		
The greatest range of temperature in one day	11·3	3rd	
	Per cent.		
The mean humidity of the month	90		
The average humidity of August from 24 years' registers ...	86		
	Inches.		
The mean vapour tension of the month	0·998		
The average vapour tension of August from 9 years' registers ...	1·002		
The mean cloud proportion of the month	8·36		
The average cloud proportion of August from 21 years' registers ...	7·97		
	Ins.		
The total rainfall of the month	17·68		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	17·13		
The average fall of August from 48 years' registers ...	13·94		
The greatest fall in 24 hours	2·92	13th	
	Days.		
The number of rainy days in the month	27		
The average number of rainy days in August from 24 years' registers	25		
The mean maximum equilibrium temperature of solar radiation during the month	⊖ 141·1		
The mean difference of sun and air temperatures	54·6		
The greatest sun temperature	155·9	2nd	
The greatest excess of sun over air temperature	68·7	30th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	76·8		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	1·7		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	3·1	2nd	
	Miles.		
The mean movement of the wind per day	120·5		
The greatest movement of the wind in one day	206·0	22nd	
The greatest movement of the wind in one hour	14·0	21st, 8 to 9 p.m. 27th, 10 to 11 a.m.	

The number of hours with winds from each of the 8 points—
N. 9, N.E. 45, E. 29, S.E. 104, S. 213, S.W. 263, W. 54, N.W. 3, Calm 24.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0·6° higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew Standard thermometer, which is the standard of reference at the present Observatory.

G. W. KÜCHLER,

METEOROLOGICAL OFFICE, GOVT. OF INDIA, *For Meteorological Reporter to the Govt. of India.*
Calcutta, the 6th September 1898

The total fall from 1st January to 10th September 1898	46·74
The average fall of the corresponding period for 24 years, Surveyor-General's Office	52·56

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; p, passing temporary showers; t, thunder; ⛅, dew.

RESOLUTION ON THE ADMINISTRATION REPORTS OF THE ALIPORE AND HAZARIBAGH REFORMATORY SCHOOLS FOR THE YEAR 1897.

No. 375P.D.

RESOLUTION.

JAILS.

Dated Darjeeling, the 13th September 1898.

READ—

Letter No. 6637, dated the 28th June 1898, from the Inspector-General of Jails, submitting the Annual Reports on the Alipore and Hazaribagh Reformatory Schools for the year 1897.

Read also—

The Reports for the years 1896 and 1895, and the orders of Government recorded thereon.

The submission of these reports by the Inspector-General of Jails should be expedited in future. They should reach the Government soon after the Annual Administration Report of the Jail Department.

2. The total number of boys in the two institutions on the 31st December 1896 was 529, of whom 201 were in the Alipore and 328 in the Hazaribagh School. The number of boys admitted during the year 1897 was 78 at Alipore and 89 at Hazaribagh, the total at the two Schools being raised to 696 against 695 of 1896. During the year under report, 103 boys were released on expiry of sentence, 34 on attaining the age of 18 years, and 1 by special order of the Government on account of sickness; and 4 died—1 in the Alipore and 3 in the Hazaribagh School. On the 31st December 1897, 554 boys remained—212 in the Alipore and 342 in the Hazaribagh School. Of these 380 were Hindus,

163 Muhammadans, 10 aboriginals, and 1 a native Christian. The daily average number of boys for the year was 190 at Alipore and 344 at Hazaribagh, compared with 215 and 331 respectively in 1896 and 218 and 344 respectively in 1895. The general health of the boys was better than in the preceding year. Though the number of admissions into hospital in both the Schools was larger, the daily average number of sick was smaller, viz., 5·03 in the Alipore School and 1·71 in the Hazaribagh School, against 5·35 and 2·12 respectively in 1896. A large number of dysentery cases occurred at Alipore, but the use of rice-water (*mar*) with a small quantity of salt has since proved a good preventive against the disease, and been also beneficial to the health of the boys, who have generally gained in weight. In the Hazaribagh School there were many cases of fever during the rainy season, which were, however, of a very mild character.

3. *Offences, punishments, and marks.*—It would appear from the following figures that the number of offences committed and punishments awarded has been increasing in the Alipore School since 1894, while in the Hazaribagh School it has decreased:—

Number of offences and punishments.

	Alipore School.	Hazaribagh School.
1894	55	336
1895	83	332
1896	162	271
1897	222	243

This continuous increase in the one School and equally continuous decrease in the other are sufficiently curious; and the systems pursued at the two Schools appear on the papers to be so materially different that the Inspector-General of Jails must make enquiry as to which best fulfils the object of the reclamation of the boys. On a daily average of 190 boys at the Alipore Reformatory, 108 boys were punished, 57 per cent.; on a daily average of 344 boys at Hazaribagh, 148 were punished, 43 per cent. The more serious offences on the list are theft and the destruction of Government property. The proportion of such offences to the total last year was 16 per cent. at Alipore; 46 per cent. at Hazaribagh. Nevertheless, the proportion to the total of the severer punishments, that is by hand caning, whipping and separate confinement, was 39 per cent. at Alipore, but only 14 per cent. at Hazaribagh. At Alipore 28 per cent. of the boys were punished more than once; at Hazaribagh only 16 per cent. It seems to the Lieutenant-Governor fairly certain that a large number of petty offences are not recorded at Hazaribagh, because they are not punished. This is a small matter if the system of punishment for the more serious offences shows a reduction in their number and the maintenance of a superior discipline. But while in Alipore there were 88 serious punishments against 36 serious offences, there were in Hazaribagh only 37 serious punishments against 114 serious offences. Nevertheless, to the daily average of boys the proportion of serious offences was 19 per cent. in Alipore and 33 per cent. in Hazaribagh; and this ratio shows no tendency to diminish. For the years 1892, 1893, 1894, 1895, 1896 and 1897, respectively, it was 17, 15, 45, 33, 33, and 33. The great increase in 1891 was explained by the sudden addition to the numbers in the Reformatory which took place in that year. Young criminals are doubtless, when first caught, less amenable to discipline than they are later, and it is probable that the boys at Alipore belong to classes more habitually and doggedly criminal than the boys at Hazaribagh. But the effects of the sudden access of 1894 should have long since abated, and there is reason to fear, on at least a paper comparison of the two institutions, that the system at Hazaribagh is too lenient.

The average number of boys who earned marks was 179 in the Alipore and 325 in the Hazaribagh School. The system is reported to have worked satisfactorily. The Lieutenant-Governor regrets that he cannot, on the face of the figures he has just reviewed, accept, for the present at least, that assurance. He cannot find that it has had the smallest influence in reducing the more serious offences at Hazaribagh, and the diminution in this class of offence at Alipore seems to be due to much severer forms of punishment than the forfeiture of marks. He would like to be assured that the system of marks is

clearly explained to the boys and thoroughly understood by them. He has found reason to believe that it is certainly not apprehended by the adult convicts of the Central Jails.

4. *Instruction and Gymnastics.*—The instruction in English has been discontinued at both Schools. The educational staff of the Alipore School has been reorganized, and a similar change at the Hazaribagh School is under consideration. The classes will in future be under the inspection of the Education Department. The trades taught in the two Schools have been the same as in the previous years, but a revision is suggested by Dr. Nott, the Superintendent at Hazaribagh. The Lieutenant-Governor will await any proposal that the Inspector-General may wish to submit on the subject. Drill and gymnastics were carried on in both institutions, and these exercises are reported to have done good to the boys. Another teacher qualified to teach gymnastics should, if possible, be engaged at Hazaribagh in the place of the teacher who has resigned.

5. *Character reports of released boys.*—Enquiries were made, as usual, regarding the conduct of the boys released in the preceding year. This is the crux of the whole undertaking. Of the 80 boys released from the Alipore School during 1896, it is reported by the District Magistrates that 43 were well conducted, 16 could not be traced, 7 were in jail, 4 were viewed with suspicion, and 10 were pursuing the trades they learnt at the School. During the same year 76 boys were released from the Hazaribagh School, but information has been furnished in the present report regarding 47 only. The Lieutenant-Governor is greatly disappointed at this failure. There is, indeed, reason to fear, from the absolute identity of the items submitted this year and last year, that there was no enquiry at all. The enquiries as to the conduct of the boys released from Hazaribagh must be at once resumed, and a full report submitted to Government regarding the entire number. Of the number reported on, 36 were well conducted, 4 could not be traced, 2 were in jail, 1 was viewed with suspicion, 3 were pursuing the trades they learnt at the School, and 1 had died. The Superintendent reports that the accounts which he has received of the career of some of the boys released from five to ten years ago tend to show that a fair proportion of the boys who return to their homes and revert to the occupation of their castes after a while become discontented with their position and emigrate to Calcutta or other places, where there is a demand for more intelligent labour, and often do very well. It is, therefore, possible, he thinks, that released boys returned as "not traceable" may be the very boys who have received the greatest benefit from their detention in the Reformatory School, and not those who have returned to a life of crime, as has been generally feared. The Inspector-General will be good enough to get the opinion of the Board of Management at Alipore upon this surmise. The Lieutenant-Governor understands that the boys who are reported by the District Magistrates as well conducted are now resident with their families. He would be glad to know how many of these are following the family trade. He understood that this was the trade boys were, as far as possible, taught in the reformatories, but he has been perplexed by the separate and insignificant item of lads pursuing in freedom the trades taught them in the reformatory schools. It was definitely decided in 1895 that enquiries as to the conduct of boys discharged from the reformatories should be confined to those discharged in the year preceding that of report. The Lieutenant-Governor acquiesces in this decision. It is not desirable that lads who may be doing well should be haunted by the repeated periodical enquiries of the police. This makes it all the more necessary that the one enquiry, which the police do make, should be a complete and thorough one; for in the results of it is concentrated the whole of our information as to the success or failure of our efforts at reform.

6. *Manufactures.*—In the Alipore School the profit from manufactures continues to show a falling off under almost all the heads. The total profits of the two schools were Rs. 9,589-11 and Rs 5,960-0-1 against Rs. 11,189-15-10 and Rs. 4,883-15-10 respectively in 1896. The decrease at Alipore appears to have been chiefly due to the release of 31 of the most skilled artisans on attaining the age of 18, and to the sale at considerably reduced rates of goods which had been in stock for a long time and had deteriorated in value. The chief sources of income continue to be book-binding in the Alipore School and cloth-

weaving and tailoring in the Hazaribagh School. The average earning per head at Alipore was Rs. 42-0-9 and at Hazaribagh Rs. 25-7-7 against Rs. 60-8-5 and Rs. 19-5-7 respectively in the preceding year.

7. *Expenditure.*—The following table compares the expenditure under the several heads in the two institutions during the past two years:—

Heads of expenditure.	Alipore School.				Hazaribagh School.			
	Total cost.		Cost per head.		Total cost.		Cost per head.	
	1896.	1897.	1896.	1897.	1896.	1897.	1896.	1897.

Construction and repairs.	9,097 13 9	12,522 4 7	42 1 6	65 14 6	1,202 12 9	462 5 6	3 14 6	1 5 3

The famine necessarily caused an increase in the cost of diet. The increase under other heads at Alipore is explained in the report and calls for no notice. The larger expenditure on works was incurred on improvements of permanent value. The workshop accommodation was doubled by the addition of a second storey to the old building.

8. *General.*—At present only one boy from Assam is at the Hazaribagh School, and the requirements of that Administration can be met by the existing accommodation. A change was made during the year in the sanctioned scale of diet at Alipore, which now approximates closely to the scale prepared by Dr. Nott. A proposal is under consideration for the amalgamation of the warder staff of the Schools with the warder establishment of the Jail Department. The proposal made last year by the Inspector-General of Jails for the appointment of a matron at each School, chiefly for the purpose of looking after the boys of tender age, has not been approved by the Government. The provision of section 31 (1) of the new Act, which permits the Courts, instead of sending a juvenile offender to a Reformatory, to order him to be discharged after due admonition, or delivered to his parent or guardian or nearest adult relative, on the execution by the parent, guardian or relative of a bond for his good behaviour for any period not exceeding twelve months, will reduce in the future the number of boys confined at the Schools. In accordance with the spirit of this provision, the Lieutenant-Governor, exercising the authority vested in the Local Government by section 14 (*a*) of the Act, has, since the close of the year, directed the release of a number of very young boys from both institutions on security for their good behaviour. The cessation of the famine and the working of the new law have already caused a rapid decrease in the number of boys sent to the Hazaribagh School.

9. The renumbering of the tables proposed by the Superintendent of the Alipore School in paragraph 31 of his report is approved.

Order.—Ordered that a copy of the Reports and a copy of the Resolution be forwarded to the President of the Board of Management of the Reformatory School at Alipore for information and for communication to the members of the Board.

Ordered also that a copy of the Reports and a copy of the Resolution be forwarded to the Inspector-General of Jails for information and for communication to the Superintendent of the Hazaribagh Reformatory School.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,
Chief Secy. to the Govt. of Bengal.

RESOLUTION ON THE WORKING OF THE PURI LODGING-HOUSE ACT DURING THE YEAR 1897-98.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 17th September 1898.

RESOLUTION—No. 360T.—M.

READ—

The reports from the Commissioners of Divisions on the working of the Puri Lodging-house Act, IV (B.C.) of 1871, as amended by Acts II (B.C.) of 1879 and I (B.C.) of 1884, during the year 1897-98, in the various places to which it has been extended.

Read also—

The Resolution reviewing the Commissioners' reports on the working of the Act during the year 1896-97.

Extension of the Act.—During the year the Act was extended to the Ganjam Road in the district of Cuttack, as far as Barang, the present terminus of the East Coast Railway. It was also extended to the town of Midnapore, but too late in the year to permit of much progress being made. It is now in force in the places noted in the margin.

In the Burdwan Division.
1. Garhbeta.
2. Uluberia.

2. *Licensed Lodging-houses.*—There was again a decrease of 156 in the number of lodging-houses, which stood at 1,409 during the year against 1,565 in 1896-97 and 2,066 in 1895-96. The decrease was most marked in the chatties on the Jagannath Road in the districts of Cuttack and Balasore, and in the town of Puri. This was chiefly due to the opening of the East Coast Railway as far as Barang, six miles from Cuttack, with a branch line to Puri. The pilgrims now usually go by the Khurda Road to Barang, and from there by train, with the result that the portion of the Jagannath Road which lies south of Cuttack is going out of use. The completion of this railway, and the construction of a connecting branch of the Bengal-Nagpur Railway will probably affect the route taken by pilgrim traffic, and the local officers should take steps to adjust the operation of the Act in accordance with the new conditions. The decline in the town of Puri is due to the fact that the season was not regarded as auspicious for the purpose of pilgrimage. In Nadia and Gaya the number of lodging-houses rose from 190 and 233 to 202 and 315 respectively.

The total number of lodgers accommodated during the year again fell from 43,105 in the previous year to 36,897. The decrease extended to all places where the Act is in force, except Sitakund and Deoghar, and was most marked in the *chatties* along the Jagannath Road in the three districts of Orissa and the town of Puri. The cause of this has been stated above. There was also a large decrease in Nadia and Gaya, in the latter of which places it is ascribed to the operation of the recent orders raising the space to be allowed for each pilgrim from 16 square feet to 24 square feet with a height of 9 feet. Other causes which accounted for the decrease were the famine, and the measures of prevention against plague adopted at railway stations.

Income.—The total income of the year was Rs. 32,798 against Rs. 34,241 in 1896-97, the opening balance being Rs. 27,776 and the closing balance Rs. 23,798. There was a decrease under the heads "Fees for licensing and regulating lodging-houses" and "Fees for the issue of Health Officers' certificates," due to the fall in the total number of lodgers for whom accommodation was provided during the year. There was also a considerable decrease under the head "Other fees," the only income under that head being Rs. 187 against Puri town. There was, however, an increase of income derived under the heads "Fines" and "Miscellaneous." The increase under the former head is in

many cases said to have been due to the energy of the Assistant Health Officers in bringing to light instances of overcrowding in the lodging-houses. The increase under the latter head was derived mainly from the *chatties* in the Cuttack and Balasore districts, that against Cuttack being due chiefly to the payment by the Bengal-Nagpur Railway of the sum of Rs. 2,058 as compensation for the acquisition of the Gopalpur rest-house. The increase in Balasore is attributed to the fact that "the income derivable from roadside lands increased greatly during the year by annual auction sale." The Commissioner remarks that it is not clear whether this is the result of brisker bidding or of the introduction of a new system of auctioning for one year only. The receipts in 1896-97 were only Rs. 4, but in 1895-96 they were Rs. 1,718. These fluctuations require further explanation. In Gaya the fees were raised from 12 annas to Re. 1 per pilgrim with a view to making good any falling off in receipts that might result from the enforcement of the Government order directing the provision of increased accommodation.

Expenditure.—The total expenditure was Rs. 37,072, against Rs. 40,845 in 1896-97. The decrease was chiefly under the head "Conservancy." Practically the whole of this decrease occurred in Gaya, where the expenditure was reduced from Rs. 9,625 to Rs. 3,448. The closing balance at Gaya is very large, and should be utilized and not hoarded. Under the head "Miscellaneous" Rs. 3,993 was expended, against Rs. 1,072 in the previous year. This increase was chiefly due to the acquisition of land at Sitakund, but the purpose for which the land was acquired has not been stated. The closing balances of all the funds have sunk to Rs. 23,798, against Rs. 27,976 in the previous year. In Sitakund, Gaya and Cuttack, however, they are considerable, and the money might be expended on works of improvement.

Prosecutions.—The number of prosecutions for offences under the Act and bye-laws was 262 against 138 in the preceding year, and the number of persons accused was 253 against 139. The amount of fines recovered also rose from Rs. 1,093 to Rs. 1,323.

Public Health.—The health of the places where the Act was in force is reported to have been generally good during the year, and it is satisfactory to note that no serious epidemic occurred. In Nadia there were seven cases of cholera with six deaths, against 11 cases and eight deaths during the previous year. In Ulubaria there were only seven deaths from cholera, diarrhœa and all other diseases, against ten from cholera alone in the previous year. In Gaya there were 73 deaths from cholera against 26 in the previous year, and altogether there were 101 deaths among pilgrims from all causes, against 87 in the preceding year. In all the places in the Orissa Division there were 148 deaths from cholera. In Deoghar cholera was rife for a time, but the general health of the town was not bad. One hundred and eighteen persons were inoculated with anti-choleraic virus, the example being set by the Subdivisional Officer, Mr. Heard. There was no death from any cause at Sitakund. At Sitakund a new cholera hospital seems to be built every year, the materials of the old one being sold. It is presumed that these are temporary mat and thatch structures; but the arrangement seems extravagant, and it might be well to employ part of the balance in hand in constructing a more permanent building. The following statement shows the statistics of disease and mortality among the pilgrims during the year:—

Disease.	Number of persons admitted into hospital, including those remaining from the previous year.				Number of deaths in the lodging-houses.	Total number of deaths, columns 3 and 6.
	Cured.	Died.	Remaining on 31st March.	Total.

N.B.—This statement does not include the figures for the town of Deoghar, which have not been supplied by the Commissioner of the Bhagalpur Division.

Water-supply.—In Garhbeta the excavation of a well for the supply of good drinking-water, sanctioned in Government Order No. 1913M., dated the 5th May 1896, was completed during the year. The Health Officer reports that another well is urgently required in the interior of the town, where the want of good drinking-water is very badly felt. The Commissioner has the matter under consideration. In Dantun, where the water-supply appears to be good, one masonry well is under construction. In Ulubaria nothing was spent towards the improvement of the water-supply. There is only one good tank in the town, and the want of another is much felt. Mr. Duke, the Magistrate of Howrah, writes that the Lodging-house Committee have initiated a movement in Uluberia for procuring another reserved tank with the help of local subscriptions. In all the places in the Orissa Division the tanks and wells were cleared and properly disinfected. In Puri two earthen ring-wells were sunk close to the mehters' basti in Markundshahi, where the want of drinking-water was much felt, and the construction of masonry wells is said to have been commenced at different localities, in accordance with the scheme sanctioned in Government Order No. 1669M., dated the 22nd March 1898. A tank in the town, the water of which had become very offensive, was filled up with earth, and another was dewatered and thoroughly cleansed. At Sitakund an iron pipe conveying water from the Mandaguni Spring on the Chandra Nath Hill to the temple of Shambhu Nath, was laid at a cost of Rs. 1,260, of which Rs. 1,000 was contributed by Mohanto Kishore Bow. The water of the spring is said to be excellent. Other tanks were also cleared and reserved for drinking purposes. In Nadia most of the people obtain their drinking-water from the sacred stream of the Baghirathi, on the bank of which the town is situated. The municipality spent a sum of Rs. 994 in sinking two masonry wells.

8. On the whole the Act appears to have worked satisfactorily and without friction during the year, and the local officers generally have taken an interest in its administration.

ORDER.—Ordered that a copy of this Resolution be submitted to the Government of India, in the Home Department, and that copies be forwarded to the Commissioners of the Burdwan, Presidency, Chittagong, Patna, Bhagalpur and Orissa Divisions for information.

Ordered also that a copy of the Resolution be communicated to the Sanitary Commissioner and to the Sanitary Board, and that the Resolution be published in the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT OF THE CIVIL VETERINARY DEPARTMENT, BENGAL, FOR 1897-98.

REVENUE DEPARTMENT—AGRICULTURE.

Calcutta, the 16th September 1898.

RESOLUTION—No. 3158.

READ—

The Annual Report of the Civil Veterinary Department, Bengal, for the year 1897-98.

Letter No. 1899A., dated 26th August 1898, from the Director of the Department of Land Records and Agriculture, submitting the Report.

THE report which was due to Government on the 1st June, and which was submitted by the Superintendent of the Civil Veterinary Department to the Director of Land Records and Agriculture on 2nd May, was not received from the latter until the 27th August. The delay was probably in the printing. The report might have been very much shortened by more systematic arrangement, and a great deal of unnecessary matter was inserted in the appendices, defects which the Director of Land Records will set himself, in consultation with the Superintendent, to put right before the next report is undertaken. Some of the subjects mentioned do not find a fitting place in an Annual Administration Report, and should have been dealt with in special reports. These are, however, defects which will not recur, and the Lieutenant-Governor hastens to recognize the spirit and energy which have led to notable improvements in every branch of the work.

2. *Bengal Veterinary Institution.*—The hostel attached to the institution at Belgatchia, affording accommodation to a maximum of fifty students, was opened during the year, and at the end of the session all the students were resident within it. The Lieutenant-Governor notices with pleasure the improvement in discipline which is reported to have followed, as also the success attending Captain Raymond's efforts to foster a spirit of activity and manliness among the boarders, by the encouragement of riding and gymnastics and the exercise of a firm but sympathetic control. Sanction has recently been given to the lease of a considerable area of land adjoining the hostel which will afford ample space for the recreation of the students, and for the accommodation of animals forming the subject of experiment or requiring isolation.

Fifteen students continued their studies in the lower course throughout the year, and were all successful in the examination for promotion held in March 1898. The examination continued to be held by the Superintendent, the proposal that it should be conducted by the Board of Examiners having fallen through. At the final examination 15 candidates presented themselves, of whom 14 passed. The results show a considerable improvement on those of the preceding year, when out of 14 candidates, 9 only were successful. The difficulty of imparting a thorough practical knowledge during a course of two years nominally, but which with vacations, &c., is barely a year and a half, is again represented; the extension of the course to three years is still under the consideration of the Government of India.

Twenty stipends paid by Government were awarded to students during the year, and six stipends were contributed by various District Boards and held by their nominees. The Superintendent draws attention to the regrettable failure of Muhammadan students, and to the necessity for the exercise of care on the part of District Boards in the distribution of their nominations. A statement is annexed to the report, showing the subsequent history of the 35 passed Veterinary Assistants whom the institution has turned out, from which it appears that 14 are in permanent employ, 2 obtained permanent posts which they subsequently resigned, 5 are in private practice, 2 have found temporary work, and 2 have been more or less lost sight of; 4 are undergoing further training, and the remaining 6 are but newly passed and have not yet settled down. It will be seen therefore that the prospects of employment offered to the students are excellent, while the field of possible employment is still but slightly trenched on.

3. *Infirmary for animals.*—The number of animals treated as in-patients at the Veterinary Hospital rose to 714, and as out-patients to 325, in comparison with 479 and 248 respectively in the preceding year. The increase is satisfactory, and while indicating the growing appreciation of the institution, is most beneficial in extending the experience of the students by the exhibition of the treatment of actual cases. The death-rate among the cases treated fell from 12·3 to 8 per cent., while the percentage of recoveries from rinderpest rose from 20 per cent. to 50 during the year under report. Captain Raymond remarks that with the number of rinderpest and glanders cases admitted, and the fact that so many cases are not sent until their condition is hopeless, there must always be a tendency for the death-rate to be high. 272 operations were performed as compared with 166 during 1896-97. A revised scale of fees for the treatment of cases in the hospital was sanctioned after the close of the year, and its effect on the number of admissions should be especially noticed, after experience has been gained of its working. The number of horses shod at the forge decreased from 368 to 307, the change of regiments at Dum-Dum being suggested as the cause. Enquiries for the purpose of ascertaining whether it would be worth while to engage a European farrier to teach men sent from the districts, met with no favourable response.

4. *Veterinary Dispensaries.*—The working of the Sitamarhi dispensary continued to be encouraging, nearly double the number of cases in the previous year being treated. While the Veterinary Assistant went out to treat epidemics in the villages, and the more well-to-do and educated availed themselves of the dispensary, the ordinary cultivator brought in practically no cases. Some improvements were made in the Patna dispensary, though others still appear possible. A new dispensary at Dumraon has been opened by the liberality of the Maharani, and others are in contemplation at Gaya, Dacca, and Muzaffarpur, by the Court of Wards as Manager of the Hatwa Estate, and by Mr. Toomey, of the Kanti Indigo Factory in Muzaffarpur. A donation of Rs. 20,000 was offered some time ago to establish a veterinary hospital at Howrah, but the proposal was referred for further consideration, and has not as yet been resubmitted in a complete form.

5. *Outbreaks of contagious disease.*—Only 25 cases of glanders were admitted into the institution at Belgatchia during the year, but Captain Raymond expresses a suspicion that the disease is far more prevalent in Calcutta than these figures would appear to indicate. The two principal diseases in the town are foot-and-mouth disease and rinderpest. The mortality from the former is small (about 2 per cent. of the cases attacked), but indirectly in the temporary loss of the use of the animals, the results are more serious. From rinderpest Captain Raymond estimates no less than 16,757 animals have died during the last four years, involving a loss of some 3½ lakhs of rupees, taking an all-round value of Rs. 20 per head. The necessity for embodying further powers to deal with epizootic disease in the Calcutta Municipal Bill, is under the consideration of Government.

A severe outbreak of glanders in North Bihar led to the extension of the Glanders and Farcy Act, XX of 1879, to the districts of Muzaffarpur, Champaran, and Saran, and the appointment of three Special Veterinary Assistants in addition to the Superintendent of the Civil Veterinary Department and his staff, as Inspectors under the Act. Detection of the disease by the use of mallein was adopted, the Planters' Association contributing towards the cost. The operations are still in progress.

Rinderpest and foot-and-mouth disease appeared to a greater and less extent in most districts, those of Mymensingh, Bhagalpur, Midnapore, Nadia, and Burdwan suffering most severely from the former disease, and Palamau, where the number of cases reported amounted to 22,562, from the latter. Veterinary Assistants were engaged to deal with outbreaks of disease in the districts marginally noted, and in the Municipalities of Dacca and of Baranagar in the 24-Parganas. In the Resolution of last year special attention was drawn to the necessity for the communication of prompt information of outbreaks of disease by District Officers to the Superintendent of the Civil Veterinary Department. The latter has been in correspondence with District Collectors as to the

Birbhum, Rangpur, Darbhanga, Dacca, Gaya, Midnapore, Cuttack, Manbhum, Saran, 24-Parganas, Angul, Darjeeling, Bhagalpur, and Muzaffarpur.

possibility of officers in charge of thanas sending information to him direct. There appear to be practical difficulties in the way, and the subject is reported to be under the consideration of the Director of Land Records and Agriculture, but the Lieutenant-Governor does not consider there should be undue delay in communicating information through the District Officers, were the matter treated with the urgency it deserves.

6. *Experiments on the subject of Dr. Koch's system of inoculation against rinderpest.*—Captain Raymond has given a full and detailed account of the experiments undertaken by him in the demonstration of Dr. Koch's system of inoculation against rinderpest. The value of the results achieved has already been recognised, and the Lieutenant-Governor desires to thank Mr. Toomey, of the Kanti Factory, Muzaffarpur, for the valuable assistance rendered by him to the Veterinary Department in the matter.

7. *Cattle Fairs and Shows.*—Captain Raymond was unfortunately prevented by the stress of his other duties from visiting all the important cattle fairs held during the year. The Lieutenant-Governor recognises that this was unavoidable, though in view of the influence of these gatherings in the spread of epizootic disease, it was to be regretted.

8. *Horse, Mule and Cattle Breeding.*—At the request of Sir Alexander Mackenzie, Captain Raymond was requested to make special enquiries into the possibility of improving the breed of the ordinary country pony. These enquiries are said to be in progress, but the whole subject of horse-breeding in the province has fallen behind, and its revival will be a matter of time and difficulty. The attempt to introduce mule-breeding into Shahabad has not so far met with much success. Babu Hardhyan Sing, Vice-Chairman of the Buxar Municipality, is reported to have offered assistance, but the arrangements do not seem to have worked altogether smoothly.

In the matter of cattle-breeding, the Lieutenant-Governor regrets to observe the statement by Captain Raymond that further experience tends to confirm his previously expressed opinion that the breed of cattle is degenerating. The experiment of sending bulls from Tirhut to the lower districts of Bengal has not proved a success, and a falling off in the Hissar bulls imported for use in Tirhut is also reported. It is now suggested that Bengal should undertake the breeding of bulls to meet her own requirements, and the old Pusa Stud Farm in the Darbhanga district is mentioned as a likely locality for the purpose. The detailed proposals are still under the consideration of the Director of Land Records and Agriculture, and have not as yet been submitted to Government.

9. *Financial and General.*—The expenditure of the Civil Veterinary Department during the financial year amounted to Rs. 45,096, and receipts from fees to Rs. 4,988.

Captain Raymond was on tour for a period of 171 days, and to meet the difficulties involved in carrying on much of his work during his absence from Calcutta, a proposal has recently been submitted to the Government of India for the appointment of a Personal Assistant to him.

The Lieutenant-Governor desires to express his thanks to Captain Raymond for the zealous energy he has brought to bear in the discharge of his duties and for the excellent results attained. All round there has been advance. The students of the Veterinary College are better taught; qualified practitioners are being turned out in increasing numbers; employment is ready for them as fast as they are ready for employment; progress is being made in the diagnosis and treatment of disease; and support and encouragement are being received on all sides to the work of the Department. Thanks are also due to Mr. Lyon for his supervision of the Department as Director of Land Records and Agriculture, and to the Committee of Management of the Bengal Veterinary Institution.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secretary to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 19th September 1898.

Burdwan.—Rainfall at Sadar 8·70, Kalna 3·75, Katwa 3·94, Raniganj 3·39. Weather rainy. *Aus* being harvested. Prospects of *aman* good. Common rice selling as follows:—

	Srs.	
Sadar	12 to 16	per rupee.
Kalna	11½ to 13	
Katwa	14	
Raniganj	14	

Birbhum.—Rainfall at Sadar 4·63, Rampur Hât 5·34. Weather cloudy and rainy. Prospect on the whole good. Price of common rice at Sadar 13·8 seers and at Rampur Hât 14·8 seers per rupee. Fodder sufficient.

Bankura.—Rainfall was general during the week: at Sadar 4·07, Vishnupur 3·37. Weather generally cloudy and rainy. Prospects of crops excellent. Fodder and water sufficient. No cattle-disease reported. Common rice selling at 15 seers a rupee at Bankura and 14 seers at Vishnupur.

Midnapore.—Rainfall at Sadar 4·13, Contai 3·87, Tamluk 7·12, Ghatal 7·02. The rain has done much good. Prospects of standing crops favourable. Damage by grass-hoppers reported from some thanas. Common rice selling as follows:—

	Srs.	
Sadar	12	per rupee.
Contai	12 to 13	
Tamluk	12¾	
Ghatal	12 to 14	

Hooghly.—Rainfall at Sadar 3·82, Serampore 3·22. Transplantation of *aman* finished. Harvesting of *aus* and cutting and steeping of jute are still going on. Cattle-disease prevails in places. Common rice sells from 10 to 12 seers per rupee.

Howrah.—Rainfall at Sadar 2·90, Uluberia 3·04. Weather hot with showers almost every day. Transplantation of *aman* still going on. Harvesting of *aus* and steeping of jute continuing. Fodder and water sufficient. Common rice sells from 10 to 12 seers per rupee.

24-Parganas.—Rainfall at Sadar 3·60, Barasat 2·56, Basirhat 5·85, Diamond Harbour 4·49. Weather hot, rainy and cloudy. Prospects of crops good. Transplantation of *aman* finished. Harvesting of *aus* and cutting and steeping of jute still going on. No cattle-disease except at Diamond Harbour, where it has nearly abated. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	10½ to 12	per rupee.
Barasat	12½	
Basirhat	14-11 chs.	
Diamond Harbour	11	

Nadia.—Rainfall at Sadar 5·63, Kushtia 4·16, Meherpur 3·11, Chuadanga4 ·59, Ranaghat 4·19. Harvesting of *aus* almost over. *Aman* doing well. Common rice selling at 11 to 16 seers per rupee. Fodder and water sufficient. No cattle-disease reported. Rivers rising.

Murshidabad.—Rainfall at Sadar 5·84, Jangipur 4·64. Weather seasonable. Harvesting of *bhadoi* is still going on; average outturn is estimated to be 12 annas. *Aman* plants are thriving. Prospects of mulberry and sugarcane hopeful. Cutting of jute has commenced. No cattle-disease reported. Fodder and water sufficient. Common rice sells at Sadar 14 seers and at Jangipur 15 seers a rupee.

Jessore.—Rainfall at Sadar 3·20, Jhenida 2·30, Magura 3·46, Narail 2·22, Bangaon 2·71. Weather seasonable. Harvesting of *aus* and jute going on. *Aman* plants doing well. River at the point of overflowing. Manufacturing of indigo over. No cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Jessore	12 to 17	per rupee.
Jhenida	17	
Magura	16 to 20	
Narail	17-12¼ chs.	
Bangaon	13	

Khulna.—Rainfall at Sadar 3·10, Satkhira 2·40, Bagerhat 4·85. Weather cloudy. Transplantation of *aman* nearly finished. Harvesting of *aus* going on. Prospects good. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	14 to 19	per rupee.
Bagerhat	14	
Satkhira	14 to 21 (new *aus*)	

Rajshahi.—Rainfall at Sadar 2·03, Nator 2·93, Naugaon 6·59. Prospects of crops good. No cattle-disease. Fodder and water plentiful. Rice selling from 11 to 16 seers per rupee.

Dinajpur.—Average rainfall 4·75. Weather cloudy and rainy. Harvesting of *bhadoi* paddy completed. Cutting, steeping, and washing of jute still going on. Transplantation of *aman* completed on low lands. Fodder and water ample. Rice selling at 15 seers per rupee.

Jalpaiguri.—Rainfall at Sadar 11·82, Alipur Duars 9·51. Weather hot, but the last three days rainy and cool. Harvesting of *bhadoi* paddy almost over. Transplantation of *haimanti* paddy rapidly going on. Jute is being reaped. Fodder and water sufficient. Common rice sells from 8 to 14 seers a rupee.

Darjeeling.—Rainfall at Darjeeling 17·05, Kurseong 15·70, Siliguri 13·25. *Hills*—*bara marua* and *haimanti dhan* progressing; *bhutta* being harvested. *Terai*—harvesting of *bhadoi* and jute nearly completed; *haimanti* being transplanted. Coarse rice sells as follows:—

	Srs.	
Hills	8 to 11	per rupee.
Terai	13 to 16	

Bhutta sells at Darjeeling 17 seers and at Kalimpong 50 seers per rupee.

Rangpur.—Rainfall at Sadar 5·32, Kurigram 4·68, Nilphamari 6·55, Gaibanda 2·71. Transplantation of winter rice and cutting, steeping and washing of jute still going on. Prospects fair. Common rice selling at 10 to 14 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 6·06. Transplantation of *aman* continues. Harvesting of *aus* and cutting of jute going on. Fodder and water sufficient. Common rice selling from 10½ to 15½ seers per rupee.

Pabna.—Rainfall at Sadar 4·14, Sirajganj 2·06. Prospects of crops excellent. Price of rice 10 to 15 seers per rupee. Some cattle-disease.

Dacca.—Rainfall at Sadar 3·04, Manikganj 2·62, Munshiganj 3·12, Narainganj 3·74 Weather cloudy with high wind. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice 12 to 15 seers per rupee.

Mymensingh.—Rainfall at Sadar 3·20, Netrokona 5·28, Tangail 3·06, Jamalpur 3·85, Kishorganj 1·49. Weather seasonable. Harvesting of *aus* finished and that of jute continues. Prospects of *aman* good. Common rice sells at 12 to 14 seers per rupee. Supply of fodder and water sufficient.

Faridpur.—Rainfall at Sadar 4·84, Goalundo 3·57, Madaripur 2·36. Weather rainy and high winds, but no damage done to crops. Prospects good. Rice 13 to 14 seers per rupee.

Backergunge.—Rainfall at Sadar 4·86. Weather fine. Prospects of crops good. Common rice sells from 10½ to 14½ seers (*aman*) and from 15 to 20 seers (*aus*) per rupee.

Tippera.—Rainfall at Comilla 4·03, Chandpur 2·80, Brahmanbaria 2·21. Weather seasonable. Harvesting of *aus* nearly over. Jute is still being reaped. Prospects of *aman* fair. Fodder sufficient. Price of common rice 10 to 16 seers per rupee.

Noakhali.—Rainfall at Sadar 5·81, Feni 7·64. Prospects of crops and condition of fodder not good for excessive rainfall. About four annas *aus* paddy and *aman* seedlings reported to have been damaged. No cattle-disease. Price of rice (*aman*) 9 to 14 seers and (*aus*) 13 to 20 seers per rupee.

Chittagong.—Rainfall 9·26. Weather seasonable. *Aus* still being reaped. Cultivation of *aman* progressing. Prospects fair. Prices stationary. Water and fodder sufficient.

Patna.—Rainfall at Sadar 5·81, Barh 8·27, Bihar 7·63, Dinapur 7·01, Hilsa 7·10, Bikram 5·57. Harvesting of Indian-corn completed. A heavy downpour of rain accompanied by high east wind damaged paddy plants slightly. Prices almost stationary. In Patna common rice sells at 16½ seers per rupee. Fodder and water for cattle sufficient.

Gaya.—Rainfall at Sadar 6·13, Jahanabad 5·72, Aurangabad 5·13, Nawada 5·65. Harvesting of *bhadoi* continues. Paddy doing well. Common rice selling at 14¾ seers per rupee.

Shahabad.—Rainfall at Sadar 6·28, Buxar 4·69, Bhabua 4·31, Sasaram 3·89, Dehri 3·27. Paddy doing well. *Bhadoi* damaged by flood. Rice sells at Arrah 14 seers per rupee.

Saran.—Rainfall at Sadar 6·66, Siwan 7·98, Gopalganj 7·57. Heavy rain with strong east wind from Tuesday (13th) to Friday (16th). Excessive rain and floods have damaged *bhadoi* crops. Paddy generally doing well, but a good deal has been submerged. Cattle-disease continues. Average price of common rice 12 seers 12 chittaks and of *makai* 23 seers 5 chittaks per rupee.

Champaran.—Rainfall at Motihari 7·09, Bagaha 3·81, Barharwa 7·67. Drizzling rain with strong east wind. Flood has done immense damage to *bhadoi* crops. Prospects of *aghani* rice good except in tracts which have been badly flooded. No agricultural operation at present. Flood subsiding gradually. Owing to inundation many cattle did not get sufficient food. Price of common rice 9¼ seers and of maize 16 seers per rupee at Sadar.

Muzaffarpur.—Heavy rain all over the district. Rainfall at Muzaffarpur 8·75, Sitamarhi 7·47, Hajipur 8·53. Whole district visited by highest flood on record, which has done considerable damage to crops, houses and trees. Railway line between Muzaffarpur and Hajipur and Muzaffarpur and Motihari breached in places and all traffic stopped. Paddy crops washed away in places. Prices are—Common rice 10 to 13 seers, wheat 15 to 18 seers, barley 22½ to 24 seers, maize 22½ to 25 seers, gram 17 to 20 seers, *rahar* 21 to 23 seers, and *marua* 25 to 30 seers per rupee.

Darbhanga.—Weather cloudy and rainy. Rainfall at Sadar 6·46, Samastipur 6·30, Madhubani 9·46. Floods have caused damage to the crops in Darbhanga and Warisnagar thanas. Prospects of paddy in Madhubani favourable. Common rice selling at Sadar 12 seers per rupee.

Monghyr.—Rainfall at Sadar 4·51, Begusarai 6·67, Jamui 7·59. Weather stormy and rainy. Harvesting of *bhadoi* nearly finished. Prospects of standing crops good. Recent rain improves prospect of paddy crop. Transplantation of chillies going on. No cattle-disease. Common rice sells as follows:—

Monghyr	...	...	...	13	seers per rupee.
Begusarai	...	...	...	11 to 13	„ „
Jamui	...	...	...	14	„ „

Bhagalpur.—The weather was cyclonic with heavy showers in the latter part of the week. Rainfall at Sadar 7·83, Banka 5·00, Madhipura 8·82, Supaul 6·89. Transplantation of paddy still continues in North Bhagalpur. Prospects of standing crops continue favourable. Fodder sufficient. Prices stationary.

Purnea.—Rainfall at Sadar 20·98, Kishanganj 8·54, Araria 8·59. Weather cloudy and rainy with strong easterly wind. Transplantation of *aghani* rice going on. *Bhadoi* rice is being harvested. Heavy rain during the week. Cattle-disease prevails in Araria. Three fresh cases and two deaths from *kalazukh* reported. Fodder and water sufficient. Common rice (*bhadoi*) sells as follows:—

Sadar	...	...	...	17	seers per rupee.
Araria	...	...	...	21	„
Kishanganj	...	...	...	18	„

Malda.—Rainfall at Sadar 2·87, Chanchal 5·04, Shibganj 4·45, Gajole 3·32. Weather cyclonic during the middle of the week; latter part rainy and cloudy. Rivers overflooded, but no damage has yet been caused. Winter rice coming up well. Coarse rice selling at 16 seers per rupee in English Bazar. Cattle-pox reported from Manickchak. Fodder sufficient.

Sonthal Parganas.—Average rainfall 5·55; cyclonic weather at begining of week. Harvesting of maize and other *bhadoi* crops almost over. Transplanting of winter rice finished. Prospects good. Price of rice 13 to 15 seers, and of maize 20 to 60 seers per rupee. Health of cattle good.

Cuttack.—Rainfall at Sadar 3·71, Kendrapara 5·79, Banki 2·86, False Point 3·54. Weather rainy and cloudy. *Beali* being reaped and harvested. *Sarad* being weeded and transplanted. Jute and *mandia* being cut. Sugarcane and *arhar* growing. Condition of cattle generally good, but cattle-disease still continues in places. Fodder sufficient. Common rice sells as follows:—

				S.	ch.	
Cuttack	...	...	...	14	7	per rupee.
Jajpur	...	...	...	15	12	
Kendrapara	...	...	...	19	11	
Banki	...	...	...	17	5	

Balasore.—Rainfall at Sadar 7·76. *Sarad* being transplanted and weeded. Harvesting of jute and *asu* crops continues. Sugarcane growing well. Rice sells at 14 to 20 seers per rupee in the interior, and at 14 and 17 seers at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rainfall at Angul 3·88 and at Bissipara 3·09. Weeding of *sarad* paddy continues. Recent rain has done much good in Angul. Sugarcane and cotton thriving. *Bhadoi* crops being gathered. Sowing of *biri* and *maghrusi* in progress. Common rice selling at Angul 20 seers and at Khondmahals 15 seers per rupee. Fodder sufficient.

Puri.—Rainfall at Puri 4·68, Khurda 4·15. Weather seasonable. *Beali* and *mandia* harvested. *Laghu* in ear. Weeding and transplanting of *sarad* continue. Prospects of sugarcane, *arhar*, and other miscellaneous crops good. Fodder and water sufficient. Cattle-disease reported from certain parts of the district. Common rice sells as follows:—

	Srs. ch.	
Puri	... 14 7	
Khurda	... 14 7	
Interior of district	... 13 15 to 18 6	per rupee.

Hazaribagh.—Rainfall at Sadar 8·22, Giridi 5·98. Weather seasonable. Excellent rain during the week. Fair *bhadoi* and full winter crops expected. Rice 10 to 13 seers per rupee.

Lohardaga.—Rainfall at Sadar 5·89. *Serguja* sowing nearly finished. State of standing crops good. Rice sells at Ranchi 9 seers per rupee and in the interior from 11 to 16 seers per rupee. Cattle-disease continues in the interior. Fodder and water sufficient. Grain in stock sufficient.

Manbhum.—Rainfall at Sadar 4·81, Gobindpur 4·99. Weather seasonable. Prospects of crops excellent. Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar 13 seers and at Gobindpur 12 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall 5·41. Prospects excellent. Rice 12 to 16 seers per rupee.

General Summary.—There was heavy rain accompanied by high wind throughout the Province during the week. Heavy floods are reported from the Patna Division, specially from Muzaffarpur and Champaran, and have done considerable damage to the *bhadoi* crops. In some places the rice crop has also been submerged. In Noakhali some damage is also reported from excessive rain. The general prospects of the crops in all other parts of the Province are favourable. The *bhadoi* crops are being rapidly harvested. New *aus* rice and *makai* are selling cheap. In Champaran prices, which rose last week owing to the floods, have fallen slightly. Cattle are generally in good condition, except in the flooded tracts. Some cattle-disease is reported.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF AUGUST 1898.

THE chief feature of the weather over Bengal during August, in contrast to what obtained in July, was the general heavy rainfall in all parts of the province, except the extreme north-east corner, including Cooch Behar, the Duars and part of Jalpaigari, where there was a large deficiency, in some places as much as 20 inches. The average fall during July was generally between 80 and 90 per cent. of the normal, the defect being most marked in North Bengal. Excepting that division, where there was only 87 per cent. of the normal in August, all other parts of the province received a large excess, more especially Orissa and Lower Bengal. Over that large area the excess varied from 33 to 57 per cent. of the normal.

The rainfall which was well maintained throughout the month was due to the frequency of low pressure areas over the land, the occurrence of which is on all occasions favourable for rainfall. Depressions during August form either in the north-west angle of the Bay at no great distance from the Orissa coast, or over Lower Bengal. In the former case the usual line of advance is to the north-west across Orissa and Chota Nagpur, the rainfall being to a large extent confined to the south-western districts. In the second case the rainfall is much more general and continuous. The land depressions are more shallow, slower in movement, and affect the weather over any particular area for a longer time.

The disturbances during the past month were more of the nature of the second class. Though the centre of the cyclonic circulation was on two occasions over the Bay, it was close to the Bengal coast; and as the depressions remained shallow and soon moved over the land, the time for development was not sufficient to give rise to cyclonic storms with strongish winds and rough sea over the north of the Bay. The rainfall was in consequence more heavy and better distributed over the province than if a cyclonic disturbance had passed over Orissa towards the north-west.

The first depression began to form about the 7th, and after remaining shallow and stationary over Lower Bengal and the extreme north of the Bay for two days, it moved towards Bihar, where it filled up about the 11th. The subsequent changes of pressure resulted in a widespread shallow depression over the province between the 12th and 15th, during which period rainfall was heavy and general. The second depression partly over the north of the Bay appeared on the 21st and moved westward more rapidly than the previous one. It originated in Burma and crossed Lower Bengal and the north of the Bay in a direction almost due west.

Though the rainfall was more heavy in places during the passage of this depression, it was not till two or three days afterwards, viz. about the 24th, that the rising pressure in the west, accompanied by a brisk fall in the east or north-east, gave rise to a land depression similar to what occurred about the middle of the month. From the 24th to the 29th it remained over Bengal proper and caused heavy general rainfall in all districts except those in the extreme north-east and the south-west.

At the beginning of August pressure was falling briskly in Burma and rising slowly in Bihar, so that though everywhere below the normal, readings were comparatively low in the east. Winds were more westerly than usual over the Bay, but were more normal in Bengal. A very shallow depression drifted westward over the province on the 2nd and 3rd without perceptibly influencing the general weather conditions, and on the latter date the pressure distribution was fairly normal.

On the 4th a brisk fall of pressure again began in the east or north-east and continued steadily for several days, extending slowly south-westward till on the 7th a shallow depression was shown over the north of the Bay and Lower Bengal. During the 5th and 6th, when pressure was lowest over the central districts of the province, and a cyclonic circulation of light winds prevailed, rainfall was general and sometimes heavy, but after the depression became better defined on the 7th, rainfall was much lighter; and such falls as occurred during the subsequent development of the disturbance were chiefly in the south-western districts.

From the 9th it began to move in a north-westerly direction; on the 11th the central area was in Bihar, and by the 12th it had almost disappeared, but there was still a diffused area of low pressure over Bengal, as shown by the general defect of a tenth of an inch.

The changes on the 13th were of greater importance from the point of view of rainfall than any of those during the previous week. Pressure rose in the west and fell briskly in the east, so that the shallow land depression which was faint on the 12th became well defined on the 13th with a regular cyclonic circulation of winds. Rainfall became general and was heavy over almost the whole province on the 14th. It followed the low pressure area towards the north-west, and was still fairly heavy in Bihar on the 15th, and in the extreme west on the 16th, by which time the depression had almost disappeared. On the 17th the distribution was normal over the whole area, rainfall being light everywhere and scattered in places, especially towards the north.

Pressure continued to rise, and the excess readings recorded between the 17th and 20th were practically the only ones during the month. A fall had by that time begun in Burma,

and another shallow depression moved westward from that area, but with greater speed than before. It was over the north of the Bay and Lower Bengal on the 21st, and was passing out of the province on the 22nd.

Pressure rose rapidly on the 23rd, and the distribution was again nearly normal, but for a short period only, as pressure changes similar to those which occurred on the previous occasion resulted in another shallow land depression. This depression, though developing steadily, was not well defined till the 26th, when the area of lowest pressure was shown over the central districts of the province. The heavy rainfall which had begun in North Bengal on the 25th was much more general on the 26th; and as the depression first moved slowly eastward, then due westward, the heavy rain continued in places for several days. On the 30th the depression had practically left the province, and on the 31st after a rapid rise of pressure in Chota Nagpur the distribution was again normal.

Pressure, as stated above, has rarely been above the normal, and then by only small amounts. On the other hand, it has frequently been below, and at times, during the existence of depressions, by considerable amounts. The means for the month are hence below the normal over the whole province by about ·06 inch. The defect diminishes rather quickly over the head of the Bay, which shows an average gradient for the month considerably steeper than usual over that area. As it was normal in direction, it was favourable for a strong monsoon over the province and for the general and continuous rainfall, which was a marked feature of the month.

Temperature differed very little from the normal on an average for the month. On the whole, the day readings were relatively lower than those for the nights, probably owing to the cloudy weather which obtained with little or no break. In North Bengal, where there was less cloud and rain, mean temperature was about half a degree above the normal; in other parts it was low by similar small amounts.

Rainfall was almost continuous throughout the month, except in some of the outlying districts, where occasional small breaks occurred, while pressure was low over the central parts of the province. The only area of deficient rainfall of any importance is in North Bengal and North Bihar, and includes Jalpaiguri, Cooch Behar and the northern half of Rangpur. There the deficiency ranges up to 20 inches. The actual falls were not so deficient in North Bihar, but when compared with the normal the defect is as large as in North Bengal. As will be seen in a table below, the defect expressed as a percentage of the normal was 60 at Jalpaiguri, 46 at Cooch Behar and 42 at Purnea.

The defect in North Bihar was counterbalanced by the heavy falls in South Bihar, the average fall for the whole division being 1·36 inches above the normal.

In Orissa and Chota Nagpur there was occasionally a deficiency, rarely more than 2 inches, while over South and Central Bengal falls were everywhere above the normal with the exception of a part of the Midnapore district, where there was a small defect.

The comparison of the actual rainfall in the various large divisions of the province with the normal is most accurately and conveniently shown in the form of a percentage. The figures representing the rainfall for the month, calculated in this way, are included in the table below under the heading of August. This table really gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first eight columns giving the actual average rainfalls in each division in each month expressed as a percentage of the normal, while the ninth column gives the total rainfall for the first eight months expressed as a percentage of the normal rainfall for that period:—

Meteorological Divisions.	January.	February.	March.	April.	May.	June.	July.	August.	Actual rainfall of first eight months of 1898 expressed as a percentage of the normal fall for the period.
South-West Bengal ...	120	16	2	64	88	124	82	138	103
North Bengal ...	119	162	6	82	88	114	80	87	92
East ,, ...	177	31	8	34	80	122	88	157	104
Bihar ...	38	200	23	109	100	80	91	147	97
Orissa ...	0	16	0	138	59	75	84	133	90
Chota Nagpur ...	2	116	3	86	47	150	98	109	105

The following table gives full data for comparison of the actual and normal rainfall of the month of August in all districts of the province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past 25 years: the second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district: the third column expresses the ratio of the actual district rainfall of the past month to the normal

rainfall as a percentage: the fourth column states as a percentage how much the district rainfall of the month varied from the normal:—

Percentage Table for August 1898.

Division.	District.	Normal district rainfall for August.	Actual district rainfall for August 1898.	Percentage of actual to normal rainfall.	Percentage excess (+), defect (−).

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	86
	Inches.
The total fall of rain from 11th to 17th September 1898	2·74
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1·98
The total fall from 1st January to 17th September 1898	49·48
The average fall of the corresponding period for 24 years, Surveyor-General's Office	54·54

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; lr, lightning reflection; ≏, dew.

RESOLUTION ON THE REPORT OF THE SANITARY COMMISSIONER, BENGAL, FOR THE YEAR 1897.

MUNICIPAL DEPARTMENT—SANITATION.

Calcutta, the 19th September 1898.

RESOLUTION No. 5762S.

READ—

The Report of the Sanitary Commissioner, Bengal, for the year 1897.

Read again—

The Report of the Sanitary Commissioner, Bengal, for the year 1896, and the Resolution of Government recorded thereon.

THE Report was nearly four months late, but for this the Lieutenant-Governor attaches no blame to the Sanitary Commissioner, who, he is well aware, had entailed upon him, by the supervision and organization of plague precautionary measures, an enormous increase of work. In a note submitted on the 19th of February (printed as Appendix V to his Report), the Sanitary Commissioner has examined the effect of famine and scarcity on the general health of the people as reflected in the birth and death-rates; and he has incidentally noted on the variations in fever, cholera, and dysentery resulting

from dearness of provisions and famine. No statistics of mortality among relief workers, or those on gratuitous relief in the various districts, were available. This is a matter for regret, as valuable inferences might have been drawn. The exceptional healthiness of the year under report is attributed by the Sanitary Commissioner to the abnormal dryness of the preceding year.

2. *Birth-rate.*—The total number of birth registered in Bengal during the year under report was 2,625,844 against 2,703,486 in the previous year; the ratio per mille of population falling from 38·03 to 36·94. With the exception of the Panjab, the rate is higher than in any other province in India. The whole of this improvement has been effected since 1892, before which year the registration of vital statistics in Bengal compared most unfavourably with those of other provinces. Within the province the birth-rate varied from 33·93 in the Patna Division to 42·05 in Orissa. The decrease in the birth-rate is ascribed to the scarcity which prevailed from October 1896 to September 1897, and which lowered the vitality of the people and reduced their fecundity. That the reason assigned is correct has been clearly shown by the statistics of the 15 famine districts.* It appears that in each of these districts, except Nadia and Puri, there was a decrease which varied from 9 per mille in Champaran to 1 per mille in Bhagalpur; while all the districts which escaped scarcity, except Jalpaiguri, Rangpur, Bogra, Mymensingh, Backergunge, Tippera, Noakhali, Chittagong, Gaya, and Singhbhum, show either an increase or no appreciable decrease in the birth-rate. It is to be noted that the districts which form the exceptions are among those which suffered most severely from fever; Jalpaiguri, Rangpur, Bogra, Backergunge, and Noakhali all showing a mortality under this head of over 25 per mille. Patna, the division in which the famine was most severe, returns the lowest birth-rate; while Orissa, which last year occupied the fourth place, heads the list with a birth-rate of 42·05 per mile. Chittagong and Dacca, which last year occupied the first and second places, come next with birth-rates of 39 62 and 39·72, respectively. The high birth-rate which has been consistently returned from the Dacca and Chittagong Divisions ever since the introduction of registration has been ascribed to the fact that Muhammadans (who form 65 and 71 per cent., respectively, of the inhabitants of these divisions) have a more varied and nutritious diet than the Hindus; while widow-marriage, which is permissible by Musalman law, adds to the numbers of their reproductive women. Of the divisions in which Hindus predominate, Orissa and Chota Nagpur return the highest birth-rates, and this is ascribed to the fact that they are furthest from civilization and contain a large number of aboriginal tribes, among whom widow marriage prevails, and who exercise little or no control from prudential motives over the number of children they bring into the world.

Coming to individual districts, Malda (47·40) shows the highest birth-rate, closely followed by Noakhali (44 71) and Murshidabad (44·64); while Calcutta (18·46 again occupies the lowest place—a position it is likely to hold as long as the proportion of males to females continues as it now is, nearly 2 to 1. As compared with the average birth-rate for the five years 1892-1896, 36 out of the 46 districts in the province show an increase—an indication that registration is steadily improving. As in the previous year, 11 towns showed a birth-rate of over 40 per mille, and for the fourth year in succession Jamalpur, with a rate of 52·62, headed the list. Jhalakati, in the district of Backergunge, again shows the smallest number of births, and its rate decreased from 7·61 to 2·11. This is due to the fact that the male population of the town is more than four times as numerous as the female population.

3. *Death-rate.*—The number of deaths registered during the year under report fell from 2,428,830 in the previous year to 2,341,632, giving a proportion of 32·94 per thousand of population as compared with 34·17 in 1896. The decline in the death-rate is stated to have been due to cholera and fever being less prevalent, the mortality from these diseases amounting to 2·76 and 23·62 per mille, respectively, as compared with 3·19 and 24 76 in the previous year. The Sanitary Commissioner has drawn attention to the fact that in the districts

* Shahabad, Saran, Champaran, Muzaffarpur, Darbhanga, Bhagalpur, Santhal Parganas, Hazaribagh, Palamau, Manbhum, Nadia, Khulna, Murshidabad, Bankura, Puri.

where the rainfall was deficient in 1896, the death-rate during 1897 was below the average, arguing that the lesser saturation of the soil produces less malaria, and that for this reason the year succeeding an unusually dry season is generally healthy. This theory is probably well founded, but it cannot be said to be entirely established by the figures given; for though in 10 out of 15 famine districts a deficient rainfall in 1896 was followed by a reduced death-rate in 1897, yet there is no sort of proportion between the shortage of the rainfall and the reduction in the death-rate: while in Murshidabad and Shahabad the facts were exactly reversed. Moreover, in Pabna, where the mortality from all causes, and especially fever, was abnormally high, the Civil Surgeon is quoted by the Sanitary Commissioner without dissent as attributing the high death-rate to the scanty rainfall of 1896. It is probable that the effect of short rainfall on the public health must depend to some extent on the character of the country, and that a dry high-lying district will be differently affected from one of which a large part is covered by swamps and marshes. The matter is well worth considering, and the Lieutenant-Governor will be glad if the Sanitary Commissioner will examine it more fully, analysing the figures of as many years as are available.

In towns the death-rate fell from 36·14 in 1896 to 35·09. The highest death-rate recorded is from Lohardaga (89·59) (an increase of 59·36 over the previous year's rate), while Hazaribagh (78·51 as compared with 38·68 in the previous year), Kotrung (67·00), Chatra (66·30), Daltonganj (61·62) and Buxar (60·91) all return death-rates of over 60 per mille. The increase was due to great mortality from cholera or fever, and in many cases from both. Eighteen towns show a death-rate in excess of the provincial estimate of 44 per mille. Thirteen out of these were situated in famine-stricken districts.

4. *Death-rate in rural areas.*—The death-rate in rural areas fell from 34·07 to 32·83 per mille. The enormously high death-rate of 152·94 in Chakaria (Chittagong) was due to the fact that 5,377 people perished during the cyclone of the 24th October. In 60 rural areas the death-rate exceeded 44 per mille; and where malarial fever got a footing, the death-rates were abnormally high. From a comparison of death-rates in town and rural areas, it appears that the mortality from cholera, dysentery, and diarrhœa was higher in town areas, while fever was more deadly in rural areas. These facts are explained by the crowding together of people in towns, and to the defective drainage and absence of a proper supply of pure drinking-water in the mufassal.

5. *Death-rate by sex and age.*—The death-rate among males fell from 36·98 to 35·87 and that among females from 31·38 to 30·03. The following table compares the mortality according to age during the last two years:—

	In 1897.		In 1896.	
	Deaths.	Ratio per mille.	Deaths.	Ratio per mille.
1	2	3	4	5
Under 1 year	495,648	216·15	509,850	222·34
1 year and under 5 years ...	336,276	42·11	363,126	45·47
5 to 10 years ...	188,060	17·51	192,292	17·91
10 „ 15 „	114,479	14·76	109,524	14·12
15 „ 20 „	114,591	19·47	112,425	19·10
20 „ 30 „	237,537	20·46	244,423	21·05
30 „ 40 „	221,366	21·92	235,542	23·33
40 „ 50 „	189,636	27·76	203,882	29·55
50 „ 60 „	170,585	41·95	178,500	43·90
60 years and upwards ...	273,474	71·24	279,266	72·75
Total ...	2,341,632	32·94	2,428,830	34·17

A most interesting diagram, based on the statistics of the last ten years, showing the average mortality according to sex at all ages of life, has been given. From this it appears that the death-rate at all ages of life was higher

among males than females. On this subject the Sanitary Commissioner writes as follows:—

"It is again noticeable that at all ages of life the death-rate amongst males is greater than that amongst females. Seeing that the female population is larger than the male population, and that both live in almost the same conditions of life, the greater mortality amongst males would seem to be inexplicable. But it is really easy of explanation. It is well known that male children are more difficult to rear than female children, and male adults are more exposed to vicissitudes of climate and accident than females. Hence the mortality amongst them must be greater than amongst females. As regards infant mortality, it is not possible to give any good reason for the great excess of mortality in the first year of life: it would seem that it must depend upon some constitutional difference."

6. *Conviction for non-registration.*—The number of persons convicted for neglecting to register births and deaths was 1,810 as against 1,969 in the previous year, and the amount of fines imposed was Rs. 2,034-2 as against Rs. 2,857-1.

Inspecting officers of the Vaccination Department enquired into 178,528 births and 124,204 deaths, with the result that 3,043 births and 1,944 deaths were found not to have been entered in the thana registers. The omission was duly brought to the notice of the District Police officials, and the defaulting chaukidars are reported to have been either warned or fined. The figures show that registration is still far from being as accurate as it should be. This is especially in the districts of Rangpur, Rajshahi, and Dinajpur, all in the Rajshahi Division.

7. *Death-rate from various causes.*—The following table compares the mortality during the year from the principal diseases with the mortality of the previous year and the average of the decade 1887–1896:—

Causes of death.	In 1897.			In 1896.			Average of past ten years, 1887–1896.		
	Urban.	Rural.	Combined.	Urban.	Rural.	Combined.	Urban.	Rural.	Combined.
1	2	3	4	5	6	7	8	9	10
Cholera	3·76	2·71	2·76	5·14	3·09	3·19	3·65	2·57	2·62
Small-pox	·26	·27	·27	·31	·18	·18	·35	·15	·16
Fever	18·60	23·88	23·62	19·04	25·05	24·76	14·02	20·11	19·81
Dysentery and diarrhœa	3·50	·61	·75	3·22	·54	·67	3·03	·59	·71
Injury	·57	·60	·59	·50	·39	·39	·46	·40	·41
Other causes ...	8·38	4·75	4·92	7·90	4·80	4·95	7·08	3·77	3·93
All causes	35·09	32 83	32·94	36·14	34·07	34·17	28·61	27·63	27·67

The following table compares the mortality for the past two years from the principal diseases in the four great divisions into which the province is geographically divided:—

Causes of death.	Divisions.	In 1897.	In 1896.	Average of ten years, 1887-96.	Increase or decrease as compared with 1896.	Increase or decrease as compared with 1887-96.
1	2	3	4	5	6	7

	Bengal	·72	·80	·69	·08 *I*	·03 *I*
	Bihar	·40	·48	·49	·08 *D*	·09 *D*

The abnormal mortality from cholera in Chota Nagpur is attributed to famine having weakened the general vitality of the people, and thus rendered them more liable to bowel-complaints—a liability enhanced by the nature of the food, consisting chiefly of jungle products, which they were forced to consume to stave off hunger. No doubt had there been a similar source of food-supply in Bihar, the mortality from cholera would have increased there also. Orissa again shows a high mortality from cholera, and indeed all other diseases except fever, which was most prevalent in Bihar and Chota Nagpur.

8. *Influence of high prices on vital statistics.*—The prices of food-grains in 1896 were almost everywhere slightly higher than the average prices during the quinquennium immediately preceding, while in 1897 they ranged in the various districts from 25 to 43 per cent. above normal.

There was an increase of the birth-rate in 19 districts and a decrease in 26, while the death-rate fell in 28 districts and rose in 18. The influence of high prices has a much greater effect on the birth than on the death-rate, and it is to this cause that the Sanitary Commissioner ascribes the general decrease in the former rate. He points out, however, that the full effect of high prices in diminishing the birth-rate cannot be looked for till the statistics of next year appear, as in the majority of births registered during the year conception must have taken place before the pinch of scarcity began to be felt. This is illustrated by the diminution in the birth-rate during October, November, and December 1897 in the three famine districts of Muzaffarpur, Darbhanga, and Palamau.

9. *Cholera.*—The mortality from this disease during the year under report was less than in 1896, but rather greater than in the decennial period 1887–96; the proportion of deaths per mille falling from 3·19 to 2·76. It visited 29,776 villages, or 2,316 more than in the previous year. It is possible that the failure of the mango crop, which seemed so unfortunate at the time, was really a blessing in disguise, and may have contributed to the low death-rate under this head.

The mortality was highest in Puri (9·57), while in Chittagong, Lohardaga, Manbhum, Palamau, Cuttack, Hazaribagh, Backergunge, and Faridpur, it exceeded 5 per mille. Puri invariably suffers severely from this disease, which was epidemic in Khurda and Banpur thanas from May to August. There were two serious outbreaks in Chittagong, the latter of which is ascribed by the Civil Surgeon to the cyclone. He remarks:—

"After the cyclone of the 24th October many of the tanks became polluted by branches and leaves of trees being blown into them and decaying. Added to this, the price of food in the affected areas temporarily rose very high, and people seemed to make up for the deficiency of the ordinary food—rice, vegetables, and *dál*—by consuming an excessive quantity of the dried bad-smelling fish which is so much used in the district, but which taken in moderate quantities does not seem to be productive of any harm. Taken in large quantities, however, it appears to produce diarrhœa and other disturbances, and must

predispose the consumers to the invasion of cholera. It was most prevalent in November and December in those parts of the district in which the effects of the cyclone were most severe."

The Civil Surgeons in the other districts attribute the various outbreaks to a polluted water-supply, the deterioration of which in certain districts is ascribed to the upheaval, during the earthquake of 12th June, of the beds of tanks, wells, and small streams. In 15 districts wells were disinfected with lime or permanganate of potash. No definite results are reported from five of these districts, but the reports from the others show that disinfection was attended by beneficial results. The statistics of Ranchi town, which are interesting, are reproduced and commended to the attention of District Officer and municipal authorities. This experience has been strongly corroborated in other Provinces:—

Similar statistics were received from Midnapore, Bogra, Mymensingh, Saran, Cuttack, and Palamau. Surgeon-Captain Vaughan was in charge of anti-cholera inoculation work up to the 3rd August, when he was succeeded by Assistant Surgeon Gopal Chundra Mukerjee. The total number of persons inoculated was 10,950, the great majority of whom were treated in Purulia (town and cooly depôts), Ranchi, and Hazaribagh. No deductions of a conclusive nature have been drawn, but it is reported that such indications as there are go to prove the efficacy of the operation. The subjects were mostly coolies recruited for employment on the Assam tea-gardens, and it is reported that a complete and accurate record of the results is shortly expected from the Assam Government. The seasonal incidence of cholera was most intense in March, April, and May in Bengal, while in Bihar, Orissa, and Chota Nagpur it was highest in June, July, and August.

10. *Small-pox.*—The total number of deaths from small-pox rose from 13,388 to 19,655, or by nearly 50 per cent., the ratio per mille being ·27 against ·18 in the previous year. The highest death-rates were in Shahabad (1·97), Puri (1·95), and Gaya (1·21). In Shahabad the prevalence of the disease is attributed to the large number of unprotected labourers who came to the district during the famine in search of work. In Puri infection is said to have come from the adjoining district of Ganjam in the Madras Presidency. The highest mortalities recorded from towns were Bhadreswar (3·00), Serampur (2·36), Howrah (1·68), and Bhabhua (1·66). Three rural areas in Shahabad recorded a death-rate from small-pox of over 4 per mille. No deaths from small-pox occurred in the Jalpaiguri district.

11. *Fever.*—Taking one year with another, about three-fourths of the whole number of deaths from all causes are ascribed to fever. It has often been pointed out that this is partly due to the ignorance of the reporting chaukidars, who cannot be expected to classify the causes of death with accuracy; but even if full allowance is made for this, it is abundantly clear that fever claims more deaths than any other disease.

During 1897 the number of deaths from this cause fell from 1,760,225 in the previous year to 1,679,132, the death-rate being 23·62 as against 24·76. This improvement is ascribed to the exceptional healthiness of the first four months of the year. The following table compares the death-rate of 1897 with that of 1896 and with the average of the ten years 1887–1896:—

No.	District.	Ratio per 1,000 of population in—			Increase or decrease as compared with 1896.	Increase or decrease as compared with 1887-96.
		1897.	1896.	Average of ten years, 1887-96.

The excessive mortality in Pabna is ascribed by the Civil Surgeon to the scanty rainfall of the previous year and the natural conditions of the district. The latter factor is constant, and cannot be the *causa causans* of the great recent increase. The former explanation, on the other hand, is at variance with the Sanitary Commissioner's theory referred to in paragraph 3 above. In the adjacent districts of Rangpur and Dinajpur also fever was prevalent in excess of the decennial average, though less severely than in 1896. In Hazaribagh the high fatality is ascribed to the inability of the people, in their weakened condition, to fight against the disease which, in September, became very widespread. The remarks of the Civil Surgeon of Faridpur on the high fever mortality in that district are given below:—

"All the conditions necessary for the production of malaria are to be found here in abundance, and to these may be added another factor which is every year gaining ground,—I mean the steeping jute in every available pool or stagnant water. There is hardly a village—hardly a house, which does not go in for this trade, and the result is that not a village is to be found which is not surrounded by stagnant water of a very objectionable smell, thickened and turned black by repeated steepings of jute.

"On comparing the statistics of the last ten years, it will be observed that mortality from fever has been steadily on the increase. Thus in 1887 we had only 16,024 deaths from it, 20,026 deaths in 1888, 22,287 deaths in 1889, 25,220 deaths in 1890, 31,368 deaths in 1891, 41,790 deaths in 1892, 40,558 deaths in 1893, 37,638 deaths in 1894, 43,144 deaths in 1895, and 48,056 in 1896. I have no doubt that the imperfect system of recording vital occurrences in former years will go some way to explain this vast difference; but when the mortality from fever in 1897 exceeds that of 1887 by three times its number, I think it is impossible to disguise the fact that the health of the district has been steadily deteriorating."

This is a striking opinion. The practice, to which unhealthiness and mortality are here attributed, is not peculiar to Faridpur, and the Lieutenant-Governor will be obliged if the Sanitary Commissioner will draw the attention of Civil Surgeons in all jute-districts to these figures, and invite them to consider the effect on the health of their districts of the practice in question.

12. *Sale of quinine.*—The total number of parcels of quinine, each containing 102 five-grain pice packets, sold during the year fell from 31,867 to 27,915. The decrease was partly due to fever having prevailed to a less extent during the year under report, and partly to the people being unable on account of the high price of food-grains to spare money for the luxury of medicine. This result was anticipated in last year's resolution, but with the return of prosperity, a renewal of the demand for quinine may be expected. Out of the 17 districts which returned a fever death-rate higher than in 1896, eight districts purchased larger quantities of quinine. During the five months when the mortality from fever was highest, the sale of quinine was also largest.

13. *Other causes.*—The number of deaths from dysentery and diarrhœa recorded during the year rose from ·67 per mille to ·75. The increase was due to the fact that on account of the prevailing scarcity the poorer classes were forced to live on herbs, roots, leaves of trees, and other unwholesome food. The highest death-rates were returned from Lohardaga (4·96), Calcutta (4·72), Puri (4·08), Howrah (3·97), and Darjeeling (3·86). All these places, except Lohardaga, figure habitually in this list. The deaths from all causes other than those already mentioned were 350,180 as against 352,036 in the previous year.

14. *Expenditure on Urban Sanitation.*—The following statement compares the total expenditure incurred by municipalities on sanitary purposes during the two financial years 1895-96 and 1896-97:—

Heads of Expenditure.	Total Expenditure.		Difference.	
	1896-97.	1895-96.	Increase.	Decrease.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
1. Conservancy, including establishment, road-watering, latrines, &c.	9,21,519	8,88,026	33,493	...
2. Drainage	1,21,060	1,49,559	...	28,499
3. Water-supply	5,44,984	9,96,441	...	4,51 457
4. Disposal of the dead ..	11,781	11,171	610	...
5. Markets and slaughter-houses	15,975	38,513	...	22,538
6. Treatment of the sick ...	3,32,653	3,02,792	29,861	...
7. Vaccination	19,912	19,737	175	...
8. Other sanitary works ...	66,380	23,638	42,542	...
Total ..	20,34,264	24,30,077	...	3,95,813
Construction and maintenance of roads	4,36,684	4,16,051	20,633	...
Total, including roads ...	24,70,948	28,46,128	...	3,75,180

The increase in expenditure under the heads "Conservancy," "Treatment of the sick," and "Other sanitary works" was satisfactory. The decrease under "Drainage," "Water-supply," and "Markets and slaughter-houses" was

due solely to reduction in capital outlay. The only large work completed during the year was the extension of the Bhagalpur water-works at a cost of Rs. 2,70,955, whereas the Howrah water-works, which were carried to completion in 1896-97, had cost Rs. 8,46,247. The ordinary expenditure under these heads showed a considerable increase. The number of municipalities which spent no money on original sanitary works rose from 28 to 37, while only 15 municipalities as against 17 in the previous year devoted more than 10 per cent. of their income to works under this head. The Sanitary Commissioner draws attention to the fact that the important towns of Raniganj, Hooghly, Bhadreswar, South Suburbs, Berhampore, Noakhali, and Bettia undertook no new sanitary works. This is a disappointing record, which it is trusted will not recur. In spite of attention having been drawn last year to the fact that Dacca, which for many years past has been in an insanitary condition, had spent only 4·28 per cent. of its income on original works of sanitary improvement, its expenditure this year has further declined to only 2·40 per cent. The Municipal Commissioners have, however, applied for a loan of Rs 30,000, and the Lieutenant-Governor trusts that immediately on its receipt effective action will be taken to improve the conservancy of the town.

15. A statement comparing the death-rates before and after the introduction of drainage or water-supply schemes in the various important municipalities which have been able to carry out these large projects has been given; and though owing to the defects in registration which obtained in former years the figures are not conclusive, they generally show that all water-supply schemes have been followed by a material decrease in the death-rate. The only exception is Nasirabad; but in this town the completion of the scheme was contemporary with the transfer of the registration of deaths to the police, which resulted in the recording of many deaths that had previously escaped record. In the case of drainage works the figures are much less conclusive, but on the whole they afford no reason to doubt the sanitary efficacy of well considered schemes.

16. In Form XI, which appears for the first time in the present report, the Sanitary Commissioner has given an elaborate account of the chief sanitary defects to be found in each of the 147 municipalities in Bengal. These are expressed in various ways, but they may all be summed up in six words,—bad water-supply,—bad drainage,—bad conservancy. Their causes may be reduced to two, viz., insufficient funds and the absence of resolute and well directed efforts for their eradication. There is no short cut to sanitary perfection; but a steady advance may be hoped for if the members of Municipal Boards will take to heart and steadfastly follow the counsel which has been pressed on them again and again, viz., to develop their resources to the utmost, to devote as large a part as they can afford to the prosecution of sanitary improvements, and to discharge their duties undeterred by public hostility or private friendship.

17. *Urban and Rural Sanitation.*—The total amount from all sources spent on sanitary works in urban and rural areas during the year under report was Rs. 20,99,335 as against Rs. 17,61,776 in the previous year. Of this sum, Rs. 5,31,594 was spent in towns, as compared with Rs. 11,25,633, while Rs. 15,67,741 was spent in rural areas as against Rs. 6,36,143. The Lieutenant-Governor has observed with pleasure that the value of works of sanitary improvement carried out by private individuals showed a marked advance from Rs. 4,94,131 in 1896 to Rs. 11,67,469 in 1897. The greater part of this large sum was spent in the excavation of tanks, including a sum of Rs. 1,57,770 spent in constructing seven bunds in Darbhanga; and the works constructed, apart from their effect on the water-supply of the province, must have been of appreciable value as a source of employment to the labouring classes in a year of famine.

18. *Precautions against plague.*—A great part of the Sanitary Commissioner's time was occupied in perfecting and supervising arrangements to protect the province against the advance of plague. Inspection stations and observation camps for the examination of passengers coming by rail from infected areas in Western India were established at Khana Junction on the East Indian

Railway, and at Katihar, Damukdia, and Khurda Road on other lines. These worked for various periods ranging from a year to 15 months. The total number of passengers examined was 1,181,792, of whom 17,994 were detained for observation. Of these 7 died, but in no case was plague the cause of death. The expenditure incurred amounted to Rs. 2,01,696, of which three-fourths were spent at the principal camp at Khana. Since the close of the year the first three have been closed, being superseded by new camps at Chausa on the East Indian Railway, Mairwa on the Bengal and North-Western Railway, and Chakradharpur on the Bengal-Nagpur Railway. The Khurda Road camp on the East Coast Railway is still working.

The Epidemic Diseases Act, III of 1897, became law on the 4th February 1897. This Act empowers the Government of India, and by delegation the Local Government, to take measures and prescribe regulations to prevent the outbreak and spread of any dangerous epidemic disease, including plague, and to determine the incidence of the cost of such measures. No time was lost in making use of the wide and summary powers which the Act conferred upon Government. The first Regulation issued under the Act was published on the 10th February, and entrusted to the Medical Board (which had been constituted in the manner described in paragraph 15 of the Resolution on the Sanitary Commissioner's Report for 1896) the duty of preventing the outbreak and spread of plague in Bengal, and directed all Municipal Corporations throughout the province to carry into effect the measures prescribed by the Medical Board for that purpose, the cost being made chargeable to Municipal Funds Subsequently, a series of Regulations was published from time to time providing, among other matters, for the inspection of persons travelling by rail or steamer, for the inspection of ships leaving the port, so as to give effect to the requirements of the Venice Convention, to prevent the advent of plague (1) in Calcutta, (2) in towns and cantonments in the interior, and (3 in mufassal areas, and to stamp it out if it should make an appearance. These were modified and amended from time to time according to the teachings of experience gained for the most part in other parts of India. Eventually, on the 10th November 1897, an important Regulation, No. 9 of that date, was issued in supersession of previous orders, and bringing together all the rules for dealing with plague in municipal towns, including Calcutta, and in mufassal villages. The Medical Board was largely expanded by the addition of a number of medical officers, and further representatives of the non-official public, and was renamed the Plague Commission. Provision was made for the appointment everywhere of local plague authorities with plenary powers, and for the definition of their duties; and rules were laid down to secure the prompt detection of cases of plague as they occurred, for their removal to hospital, for the segregation of persons who had been in contact with the sick, for the provision of family and caste hospitals, for the evacuation and disinfection of infected dwellings, and for the disposal of the dead. Provision was also made for a number of subsidiary matters of minor importance. This Regulation has, since the close of the year, been expanded by a series of separate Regulations dealing with the mufassal; but in respect of Calcutta it is still in force, and the experience gained since the outbreak of sporadic plague on the 16th April has shown in the Lieutenant-Governor's opinion that it is well adapted for its purpose. The events since the 16th April belong to the history of the current year, but it may be stated that nothing has occurred to cast doubt on the soundness and propriety of the principles on which the Regulation was based, and in particular that the provisions for the construction of private caste and family hospitals, for the treatment of individual families and of special classes of the community, have secured the co-operation of the people and have been attended by marked success.

19. *Sanitary Board.*—Under the orders of Government the Sanitary Board prepared a water-supply scheme for the Garden Reach Municipality estimated to cost Rs. 50,000, and a scheme to remodel the Darjeeling water-supply at a cost of Rs. 1,10,000. Want of funds has unfortunately rendered it impossible to carry out either of these projects at present. At the request of the Commissioners of the Patna Municipality, a scheme for flushing the roadside drains at a cost of Rs. 56,000 was also prepared, and administrative sanction to execute

a portion of it has been accorded. The Berhampore water-works scheme, which was sanctioned by Government last year, is now under construction, and it is reported that satisfactory progress is being shown. Experiments were made to ascertain whether a supply of drinking-water could not be obtained for the Patna Municipality from wells sunk in the old bed of the river Sone. The results were satisfactory, so far as they went; but before pronouncing on the scheme finally, the Board have called for a map of the town and other information, which have not yet been supplied them. The Board had various other schemes under consideration and were consulted by Government on several matters of sanitary importance.

20. *Inspections.*—The Sanitary Commissioner spent 160 days on tour, and most of his time was taken up in organizing plague camps and taking other precautionary measures against the spread of plague.

Of the Deputy Sanitary Commissioners, Dr. Deare spent 38 days on tour and Dr. Peck 27. The latter was in ill-health most of the year. During the latter half of the year there was no Deputy Sanitary Commissioner.

21. The Sanitary Commissioner again acknowledges the assistance he has received from Mr. Price, his Personal Assistant; and the Lieutenant-Governor desires to thank Surgeon-Major Dyson for the energy, intelligence and self-possession which he brought to bear, not only on the administration of his Department, but on the work of organizing precautionary measures against the spread of plague.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Offg. Secretary to the Govt. of Bengal.

NOTIFICATION.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

THE following papers, referred to in the statement made by the Hon'ble Mr. Risley at the Council Meeting of the 13th August, 1898, on the subject of the pollution of the River Hooghly, are hereby published for general information:—

F. G. WIGLEY,
Offg. Asst. Secy. to the Govt. of Bengal.

The 26th September, 1898.

REPORT ON THE QUESTION OF THE POLLUTION OF THE BALLY KHAL AND THE HOOGHLY.

I.—THE BALLY KHAL AND ITS WATER ABOVE THE MILLS.

I have at various times visited the khal and gone up its banks as far as about a mile or two above the mills. The alleged sources of pollution above the mills have been put down as follows:—

(*a*) *Casting corpses into the khal.*—This undoubtedly does occasionally take place; but I do not think it occurs to any great extent either in the way of human bodies or the carcases of animals being cast into the Bally khal water or in the way of the former being stacked in the channel.

(*b*) *The open-air visits by the people in its neighbourhood.*—This varies a great deal at different times in the year, owing to the fact that there are comparatively fewer people living near the khal in the months from 15th May to 15th November, during which time brick-making is practically stopped. But during the brick-making season Messrs. Bull's people employ a great many workmen in the brick-fields adjoining the khal, and there is no question about it. There is a certain amount of soiling of the ground about in these parts. But it must be remembered that during those months of brick-making there is little or no rainfall, and the khal is a tidal one, so that, as its banks are always more or less in a soft soppy condition, the actual open-air defæcation that does take place, in so far as Messrs. Bull's work-people are concerned, occurs in comparatively dry weather and some distance from the banks. Besides the brick-field labourers, there are various bustis on the banks; and if the vicinity of these be examined at any time, it will be noticed that the actual banks of the khal are much the same as with any other tidal creek with villages near. *Cæteris paribus* there should be a great deal more contamination during the brick-making season. Does an analysis of the water show this? Reference to the results of analysis in the appended table shows as follows:—Taking the water above the mills effluent in January 1897 in the full height of the brick-making season, we find, comparing the averages of five analyses in the brick-making season, and five when Bull's brick-fields are not working, that every single form of impurity, except nitrogen, as nitrates and nitrites, is greater during the brick-making season, and the albuminoid ammonia is very high at this time. For chlorine, the highest figure here is 11 parts per 100,000, or roughly about 8¼ grains per gallon taken at high tide. *While the brick-fields are not working*, the other three figures for chlorine are all relatively larger *during the brick-making season*, and the average is a little fallacious on account of the one high observation; but the general chlorine level is so high as to lead one to suspect some special source of contamination,* inasmuch as the other impurities are not as high in proportion. It would appear, therefore, in spite of the average result, that undoubtedly the water of the khal above the mills is in a contaminated condition, and that contamination exists both in the non-working season and also in the working season, and appears to be increased during the working season. The nitrogen, as nitrites and nitrates, is very small—only about one-tenth of what may be found in tolerably good water, and the explanation seems to be that most of the contaminations are washed into the stream while yet recent or fairly recent. It is not clear that the contamination is mainly from *excreta*, and the chlorine is, I think, more probably largely from sea-water brought up by the tide. For comparison of the results of analysis for chlorine of this khal water with the Hooghly water at Konnagar (the latter made by Mr. W. R. Criper, of Messrs. D. Waldie and Company, quite independently and without any knowledge on his part of the present enquiry) will show that this is quite a feasible explanation, especially having regard to the fact that there is more tendency to stagnation in the winding khal than in the broad Hooghly, and that Bally is some three miles lower down the river and nearer the sea than Konnagar. Having regard,

* *Vide infra.*

then, to the fact that the khal is washed out twice a day by the Hooghly water, it is not surprising that there should be a large amount of chlorine in it. And if we examine the figures for chlorine in the khal *above the mills*, we find that they vary from 0·05 to 11·0, *i.e.*, as 1 to 22, while, if we examine this further, we find that the variations in chlorine in the Hooghly for over three years* are so great that the only explanation of the variations in the khal being so great as 1—22 is that they depend on those in the river, and to some unknown degree they will be affected by the fact that some chlorine passes into the khal water in the effluent from the Bally Paper Mills; but this will be unequal and a varying factor, because some only and not all of it is carried up the khal by the in-coming tide; but having regard to the high figures for albuminoid ammonia it would be perhaps safe to presume that some appreciable proportion of the chlorine is also due to animal contamination—probably faecal matter, and urine.

* *Vide* tables attached.

Having regard to these facts, I should say that the water half a mile up the khal above the mills is distinctly a contaminated water, and contaminated largely by animal refuse and animal excreta.

(*c*) *Jute-steeping is an alleged cause of pollution* of the water above the mill. But jute-steeping is not done, and *cannot* be done, in tidal creeks, and it is not done up the Bally khal as far as I can find out. Further, jute-steeping is only done from about the end of August to the end of November (but here I am open to correction). Anyway it is not done all the year round, and this I think we may dispose of as of no practical consequence, as there is no trace of any result of it—even if done—in any of the analyses made. What applies to the khal in its upper reaches applies to contaminations reaching it through its feeders. So that to sum up, we may say that there is evidence above the mills of distinct contamination of the khal water by animal refuse, and probably as a result of the habits of the people on its banks, but also probably attributable largely to the brick-makers.

II.—The Bally Khal Water below the Outlet of the Mills.

It is an old complaint that the Bally mills make the khal water undrinkable, and certainly a casual inspection supports this idea, and the fact that the brown discolouration due to the effluent of the Paper Mills reaches at times far down the khal with the ebb tide carrying it down is no doubt a very strong argument. Then, again, there are the Bone Mills which only take up a certain amount of water for their engines and have no effluent, and lastly there are the latrines of the two mills, both latrines on the banks, but neither of them draining into the khal and both well kept and tended by their respective Municipalities. It is true that at one time the Bone Mills built a wall which directed the stream against the Paper Mills banks of the khal, and ended by the Paper Mills latrine being undermined and falling bodily into the khal. But that is now ancient history, and the latrines are in good order and satisfactory. Practically, then, the only sources of contamination worth considering are the effluents from the Bally Mill and possible contamination from the Bally and Uttarpara Municipalities. Now this mill's effluent contains varying quantities of materials derived from the chemicals used in paper manufacture and refuse from the grass used in making the pulp. The main chemicals used are alumina ferric, caustic soda, lime, country ochre, bleaching powder and resin. The result of analysis is practically all one has as a guide, and the appended table of 15 analyses speaks for itself and declares clearly that the water below the mills is undoubtedly considerably more contaminated than that above them. Free ammonia and nitrogen as nitrites and nitrates are the only items in which the water below the mills is poorer, and this is rather to be expected than otherwise. To take the contaminations *seriatim*—

1. *Total solids.*—These are greater, and are probably partly from solid matters from the mills and partly in a much greater degree from their being probably a larger amount of silt of all kinds in the water the nearer one gets to the mouth of the khal.

2. *Chlorine.*—Here the difference in the general average is probably derived in the main from the two figures, 6·5 and 13·0, and this excess is due to the presence of a larger amount of sea-water from the tides in the Hooghly, because the differences in the other individual observations are not nearly in the same proportion. Of course a proportion of the excess must be due to the chlorine passing in in the mill's effluent, but that, I think, is a very small proportion, and not amounting to 0·81 parts per 100,000, and it is also possible that some of it is due to the mills employés urinating on the banks, and this latter offence, although severely punished in the Paper Mills, is, I fancy, of more frequent occurrence than is supposed.

3. The free ammonia may be disregarded.

4. The albuminoid ammonia is in marked excess below the mills, the difference amounting to 0·0154 parts per 100,000, which is certainly a largely increased contamination. But a portion of this is, if I mistake not, due to the fact that a portion of the municipal drainage from Uttarpara passes into the khal by a large drain which passes in through the Bone Mills premises, while a portion of Bally also drains into the khal just above the foot-bridge.

5. The nitrites and nitrates may be disregarded as being altogether in such small quantity.

III.—Conclusions.

To sum up. The water below the mills is certainly more contaminated than above them.

Who is responsible for this? The Paper Mills or the Bone Mills or the Uttarpara and Bally Municipalities?

1. The Paper Mills effluent consists mainly of a thick brown liquid from the boiler-house, and is the refuse from boiling grass (for paper pulp) with caustic soda, and it contains mainly soda, silicates of sorts, and resin, and a certain proportion of grass fragments. Added to this is some refuse from the Paper Mills chemical-house. In this chemical-house the only materials used are bleaching powder, Sutna lime, caustic soda and country ochre.* The refuse washings from the chemical-house contain certain quantities of these chemicals, but not much, as they are all very valuable in the manufacture of paper, and every effort is made to prevent waste. There is therefore nothing in all this that would give nitrogen for albuminoid ammonia. The total intake of water of the mills is put down by Mr. Munro at 1,750,000 gallons, and Mr. MacHattie, the present manager, gave me to understand that the old mills gives off about 300,000 gallons of effluent, and if the new mill gives off more even, let us allow 750,000 gallons daily for effluent from boiler-houses and chemical-houses, and we get some $\frac{750,000}{6·23}$ = 12,070·6 cubic feet of effluent, which is poured into the khal not at once, but by degrees and mostly at night. A great part goes into the Hooghly at once when let out at night; the rest is carried up and down the khal for all the way the tide can take it, *i.e.*, for about 10,500 feet (two miles) of its extent. This entails an enormous amount of dilution, especially when we consider that the tidal rise in the khal is one of from 5 to 12 feet, and the extent to which this may be regarded as a nuisance is a matter of opinion one way or the other. It does not in itself appear to me to constitute a serious danger to health, and in any case it does not account for the amount of albuminoid ammonia in the water below the mills which appears as the result of analysis.

* The alumina ferric mentioned already is used in the settling tanks to clear the water drawn from the khal before it is used in manufacture.
J. C. V.

2. The Bone Mills have no effluent except the water from their engine-house; but a few boat-loads of bones come up the khal, and I have no doubt some bones drop into the water, but not many. I have visited the Bone Mills in all three times now, and I cannot say I think that they are responsible for the increase in albuminoid ammonia below the mills.

3. The Uttarpara Municipality inspection will show that there are at least four drains of considerable magnitude which drain into the khal. One of these drains a large part of the Municipality lying adjacent to the Bone Mills, and several privies are situated very close to it. This drain goes right into the khal, and passes into it through the Bone Mills premises. A second and a third drain parts of the Municipality between the Bone Mills and the foot-bridge, and pour their contents into the lagoons in the brick-fields below the mills and between the foot-bridge. These lagoons communicate *directly* with the khal. A fourth drain comes along the east side of the road leading from the foot-bridge to the municipal office, and empties into two filthy *dobas* behind the post office. On the banks of these are latrines, and the overflow from these *dobas* goes directly into the khal just below the foot-bridge by a channel some 25 yards long, and on the bank of the channel is another latrine, and a big house-drain also opens straight into it. Further, there are two latrines at least in the brick-fields below the mills, and *these are placed absolutely on the water's edge* and about 200 yards apart, being respectively some 200 and 400 yards below the mills. Opposite the lower of these two latrines a large drain from the Bally Municipality pours into the khal, and a little way within the Bally Municipality boundary there is a latrine on the bank next the water and just above the foot-bridge. So that we have above the foot-bridge one large drain from Uttarpara going into the khal *through* the mills; between the mills and the foot-bridge *from Uttarpara* two latrines *on the bank* and two large drains from the Municipality. *From Bally* one latrine and one very large drain which, I know, drains a very large part of Bally, and below the foot-bridge a large drain from Uttarpara. These sources of contamination are all fairly close to the place below the mills from which the samples of water were drawn. As there is very little of the khal from below the mills to the river, the in-coming tide must take all this filth well up the khal, and we naturally have it most evident below the mills. It would appear, therefore, that the most serious contamination, which is evidenced by the albuminoid ammonia, is probably from municipal latrines on the banks and municipal drains opening into the khal below the mills.

So much then for the contamination of the water below the mills and the share taken in producing this contamination by the two mills and the two municipalities.

Now from what point of view are we to look at the contamination of the khal water, and how is it to be remedied? Undoubtedly the most dangerous contamination is from the excreta, &c., from the drains and latrines and from open-air visits. Albuminoid ammonia in such very large amount as 0·504 in water, which is only some 400 yards from the river and gets the full benefit of tidal scourings, shows how very great the contamination from these sources is, and besides this contamination, the boiler-house liquid from the mills

would appear to be no more harmful than so much coffee or chocolate infusion. This boiler-house liquid is very valuable, and the mills are now putting up a considerable amount of plant by which the whole of the boiler-house liquid will be utilized *in* the mill. As it is, there are two large cinerators at work, evaporating it down, and the resulting sludge is burned down to recover the soda as ash, and in this way a very large saving in expenditure is effected. There are times, no doubt, when this brown liquid from the mills going down the khal is felt to be a nuisance, but the samples I have taken and which others have taken were drawn when it was flowing into the khal.

I do not understand that I am called upon in this report to state more than the facts and the deduction to be drawn from them. I have myself been so struck with the chlorine results in the khal above and below the mills as detailed in the first part of this report that I was led to enquire into the condition of the Hooghly water itself, and that on the ground that the khal is twice a day scoured out, filled and emptied by the Hooghly water.

For my figures I am indebted to the kindness of Mr. W. R. Criper, of Messrs. D. Waldie and Company, who very generously placed all his observations at my disposal. A careful study of chlorine variations in the Hooghly will, I fear, tend very much to shake one's faith in any conclusion declaring the mills really responsible for the chlorine variations in the khal water. For the rest, the khal water is already contaminated a long way above the mills (especially as shown in the observation at the bund near the Patibagan marked non-tidal in the table, and No. 5 of 27th January 1897 in the Chemical Examiner's analyses attached), and contaminated perhaps to a dangerous extent. Whatever dangers to health may arise from the use of the khal water by the inhabitants of Bally exist already above the mills in the upper reaches of the khal, and the undoubted fact that these dangers are largely increased in the khal water below the mills is, in my opinion, due not to the mills themselves in any appreciable degree, but to the existing arrangement of latrines and drainage, not only in the Bally Municipality itself, but also in the neighbouring Municipality of Uttarpara across the water.

J. C. S. VAUGHAN, SURGN.-CAPT.,
Deputy Sanitary Commissioner, Western Bengal Circle.

CAMP CALCUTTA,
The 22nd June 1898.

N.B.—H. T.=High tide and L. T.=Low tide.

No. 4267, dated Calcutta, the August 1898.

From—Surgeon-Major H. J. Dyson, F.R.C.S., Sanitary Commissioner for Bengal,
To—The Secretary to the Government of Bengal, Municipal Department.

In compliance with the request contained in Government order No. 4893S., dated the 10th instant, received yesterday, I proceeded at once to Tittaghur to enquire into the alleged pollution of the river Hooghly by the jute mill which has recently been established there. The mill in question is apparently the Standard Jute Company's mill, of which Messrs. Bird and Company, of Calcutta, are the Agents. There is at present no discharge of "waste" from the mill into the river. Last year refuse was discharged into the Hooghly; but as soon as the practice was complained of, it was, I am informed, stopped. The waste is now mixed with cinders and used for filling up spoil pits along the railway, which connects the mill with the Tittaghur railway station. This is not a nuisance to any body. There is also a bamboo and mat palisade along a portion of the foreshore of the mill which has been cut away by the river. Into this space some portion of the refuse from the mill is also thrown, but it does not and cannot pass into the river. I noticed no discolouration of the water in the vicinity. Two pucca drains connect the mill with the river. These are used for the carrying away of storm-water only from the mill premises and hot water from the mill engines. This instead of being a nuisance is an advantage, for it acts as a steriliser. I am of opinion, after careful personal investigation, that no unwholesome waste from the Standard Jute Mill now passes into the river Hooghly.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE ADMINISTRATION OF THE SALT DEPARTMENT FOR THE YEAR 1897-98.

FINANCIAL DEPARTMENT—SEPARATE REVENUE.

Darjeeling, the 21st September 1898.

RESOLUTION—No. 277T.F.

READ—

The Report of the Board of Revenue on the Administration of the Salt Department for the year 1897-98.

IN Bengal the administration of the Salt Department has a widely different significance from that which attaches to the same term in the other great maritime provinces of Madras and Bombay. This is due to the fact that in the two latter provinces there is little or no import of foreign salt from over sea, the whole salt-supply of the people being provided by local manufacture, either by Government agency, or under an excise system of licenses. Thus in Madras the quantity of salt imported by sea during 1897-98 was only a little more than 12½ lakhs of maunds (of which almost all came from Bombay), whereas the quantity manufactured locally exceeded 64 lakhs of maunds, of which about three-fourths were produced under the excise system, and about one-fourth was manufactured by Government. Similarly, in Bombay during the same year, only a little over 8,000 maunds of foreign salt were imported by sea, while the quantity manufactured locally exceeded 103⅓ lakhs of maunds. In Bengal the facts were very different. The imports by sea exceeded 122 lakhs of maunds, while the quantity manufactured locally under Government supervision was relatively insignificant, being only 1,62,351 maunds in all. In Madras and Bombay, foreign salt, whether regarded as an item of the public food-supply or as a source of revenue, is almost a negligable quantity, and the local product is all-important. In Bengal these proportions are completely reversed.

2. This material difference in local conditions accounts for the small scale on which the Salt Department has for many years been maintained in Bengal. For that Department is concerned only with locally manufactured salt. Salt imported by sea is treated as falling within the province of the Customs Department, in respect both of the collection of revenue and of the arrangements for bonding, while its distribution after it has passed beyond certain very narrow limits is left to the operations of private trade, subject to little or no Government control. In order to make their report complete, the Board have, as usual, given information regarding the imports of foreign salt, the sources of its supply, the revenue derived from it and the arrangements for bonding, but these are really outside the province of the Salt Department proper, whose operations are confined to Orissa and a narrow fringe of country bordering the Bay of Bengal.

3. The chief administrative change during the year was the retransfer, with effect from the 1st October 1897, of the administration of the Orissa Salt Department from Madras to Bengal. The charge of the Department has been entrusted to the Commissioner of Excise, Bengal, who has been vested with necessary powers under the Indian Salt Act of 1882, which is in force in that Division. A scheme was also submitted to the Government of India for remodelling the administrative and preventive staff for the suppression of the illicit manufacture of salt in Orissa, and for creating a similar staff for the Sundarbans and other saliferous tracts in the coast districts of Bengal. The

sanction of the Supreme Government has not yet been received to the scheme, but in the meantime arrangements were made, with the help of such establishment as could be spared from Orissa, to effect a saline survey of the villages in the saliferous tracts of the 24-Parganas, where illicit manufacture on an extensive scale has always been rife. Another tentative step, pending the passing of the new Salt Bill now before the Bengal Council, was the extension of the Northern India Salt Act, XII of 1882, and the rules framed under it for Orissa, to the saliferous districts of Bengal, the object of the measure being to confer on Salt officers the powers of arrest, search, and seizure which, under the Bengal Act, VII of 1864, can only be exercised by the Police. During the year Government decided to stop the manufacture of salt at its factories at Tua and Gurubai, on the Chilka Lake, a step rendered necessary by the fact that large stocks had accumulated in consequence of the opening of the East Coast Railway, which facilitated the import of Ganjam salt and enabled it to undersell Chilka Lake salt in spite of successive reductions in price. The establishment of private bonded salt warehouses at places other than customs ports is steadily gaining favour, and the Board remark that native bonders are following the lead of Messrs. Turner, Morrison and Company, who are extending their operations in various districts. Three new golas, built by the Port Commissioners at the Kidderpore Docks to hold 9 lakhs of maunds of salt, were appointed public warehouses for the storage of bonded salt, and were formally opened on the 1st December 1897 in time to relieve the Sulkea golas of much of the strain caused by the large increase in bonding during the last quarter of the year. The situation of these golas gives steamers an advantage over the golas at Sulkea, for when discharging full cargoes of salt into bond, they can be moored alongside the golas, and can discharge salt on to the pontoons, whence it can at once be carried by coolies into the golas.

4. The following statement shows the receipts and charges of the Salt Department including those connected with imported salt during each of the last six years :—

Note.—The figures for 1897-98 are subject to revision, as the Accountant-General's final figures are not yet available. The inclusion of the same items under both "Imperial" and "Provincial" is due to the fact that under the new Provincial contract, the receipts and charges of the Salt Department are treated as wholly Imperial.

After rising steadily for three years, the receipts last year showed a decrease amounting to Rs. 4,94,637 or 1·9 per cent., as compared with those of 1896-97. The decrease in import duty is attributed by the Board to smaller clearances owing to the famine. The revenue from excise salt also shows a marked falling-off owing to reduced sales of salt at the Government factories in Orissa, the opening of the East Coast Railway having facilitated the import of Ganjam salt on a larger scale and at smaller cost into that province. There was also a considerable decrease in the proceeds from rent of ware-houses owing to many of the golas having remained unoccupied during the greater part of the year. In the last quarter of the year, however, the importations were heavy, and as the low prices stimulated bonding and checked deliveries, the golas were filled. The decrease in expenditure is mainly due to economy effected in the administration of the Orissa Salt Department on the retransfer of that Department from Madras to Bengal. Three new cutters at an aggregate cost of Rs. 4,300, were constructed during the year under review for preventive and search work in the Sunderbans, where no effective work can be done except by water.

The Salt Trade.

5. The following statement shows the fluctuations in the volume of the salt trade in Bengal during the last ten years, excluding salt imported by land from Ganjam and the Upper Provinces, on which duty is not paid in Bengal :—

The stock of salt in the golas, which at the commencement of the year had stood at 14¾ lakhs of maunds, rose at the close of the year to nearly 34½ lakhs of maunds. Besides this quantity, there were 2,31,956 maunds against 2,05,829 maunds, lying afloat in the port of Calcutta, ready to be sold direct to purchasers.

Imports.

6. The combined imports into Calcutta and Chittagong show a net increase of 40,01,554 maunds or 48·6 per cent. over those of the previous year, the increase having occurred in both the ports. In Calcutta the increase was contributed to by all the exporting ports, except Ras Rawayah and Linga, the increase from the United Kingdom being the largest and amounting to about 47 per cent. On this point the Collector of Customs observes:—

"The increased importation of Liverpool salt was due to the action of the *Salt Union* in sending out a larger quantity of salt to compete with the crushed salt from Aden and the Red Sea, and they succeeded in doing so as the high rate of exchange was in their favour and they were able to obtain plentiful and cheap freights from England. The result of this increased importation was to send down the prices of salt, and to check the sale of crushed salt in favour of Liverpool and Hamburg salt."

The marked increase in the imports into Chittagong from 55,206 maunds in 1896-97 to 6,57,325 maunds during the year under review is ascribed by the Collector to "smaller importation in the previous year, and to a cargo of 52,458 maunds of Hamburg salt received during the year." Hamburg salt had not been imported into this port for five years. Shipments of salt were received from the following countries:—

		1895-96.	1896-97.	1897-98.	Percentage of quantity imported for each group in 1895-96.	Percentage of quantity imported for each group in 1896-97.	Percentage of quantity imported for each group in 1897-98.

The Board say that group III in this table comprises "Egyptian and other non-European ports beyond the Suez canal," while group IV is intended for "Eastern ports other than Indian, including the Egyptian ports this side of the Suez Canal." It is not understood how Mozambique and Madagascar come into group III, and the Board will be requested to clear up the matter.

From a statement furnished in the report showing the clearances of Liverpool, Hamburg, and crushed salts during the past five years, it appears that there was an increase in the clearances of Liverpool and Hamburg salts with a corresponding decrease in the consumption of crushed salts from Aden and the Red Sea. The Collector of Customs is, however, of opinion that the trade in crushed salts is only temporarily checked, and that it will probably revive when the prices of Liverpool and Hamburg salt, which are at present low owing to the action of the *Salt Union* already referred to, take an upward course.

Clearance of salt.

7. Excluding 13,810 maunds of Madras salt cleared free of duty in Calcutta, duty was paid on 52,02,818 maunds cleared from shipboard against 43,11,475 maunds in the previous year, while the clearances from bond fell from 55,49,433 to 45,15,621 maunds. On the whole, the total clearances of all kinds, including those of Bombay and Madras salt (6,00,832 maunds) and of excise salt (17,047 maunds) fell from 1,04,77,213 maunds to 1,03,36,318 maunds during the year under review. These figures do not include 2,000 maunds which were imported for the manufacture of glazed stoneware, and were passed free of duty, having been rendered unfit for human consumption by the admixture of tar.

Consumption of salt.

8. Deducting from the above clearances, the excess of exports from Bengal by land and river over the imports by the same routes, amounting to 6,30,180 maunds, and adding 33,697 maunds of saltpetre brought into use, the balance of salt left for consumption in the Province rose from 97,33,739 maunds in 1896-97 to 97,39,835 maunds in 1897-98. The rate of consumption per head was the same as in the previous year, viz., 5 seers. In those saliferous districts of Bengal (excluding Orissa) which are within Salt Law limits, there was a net decrease of 22,428 maunds in the consumption of licit salt, and the average consumption per head fell from 4 seers 14 chitaks to 4 seers 12 chitaks. The lowest rates again prevailed in the 24-Parganas (4 seers) followed by Chittagong (4 seers 11 chitaks) and Khulna (4 seers 12 chitaks). The decrease which occurred in all the saliferous districts, except Midnapore, Backergunge and Noakhali, is attributed to the scarcity which prevailed during a great part of the year. In Orissa the consumption per head rose from 4 seers 13 chitaks to 4 seers and 14 chitaks.

9. The price of salt was generally lower than in the previous year, the decrease being due to more abundant supplies. The average wholesale price (exclusive of duty) of 100 maunds of Liverpool salt, purchased from the ship's side in the port of Calcutta, fell from Rs. 96-0-9 to Rs. 80-4-3; while the selling price, exclusive of duty, which in 1896-97 had varied from Rs. 124-3 to Rs. 71-15-8, ranged during the past year between Rs. 97-12 and Rs. 63-1-1. This reduction is probably due in some degree to competition with Aden and Red Sea salt. The average wholesale price, inclusive of duty, at the twelve chief marts of Bengal, fell from Rs. 3-13-9 to Rs. 3-12-8 per maund. The corresponding average, based on the wholesale prices of all the districts in Bengal, also fell from Rs. 3-15-6 to Rs. 3-14-11 per maund.

Inter-provincial trade.

10. The total imports from Madras and the Upper Provinces of duty-paid salt rose from 5,15,969 to 6,09,213 maunds during the year, the increase being due partly to larger importations from Ganjam, and partly to the substantial increase in the supply drawn by Bihar from the Upper Provinces. The exports from Bengal to Assam and Northern India fell from 10,64,101 to 9,37,584 maunds. On the other hand, there was an increase of 66,129 maunds in the exports to Nipal, Sikkim, Tibet and Bhutan, and of 1,707 maunds in the exports to the Central Provinces, Madras, Rajputana, and Central India. The net result was an excess of exports over imports of 6,30,180 maunds against an excess of 7,82,105 maunds in 1896-97.

Working of the Salt Laws and Rules.

11. The number of cases in which contraband salt was attached, including cases that occurred in the Orissa districts, fell from 1,082 to 1,032 during the past year, but the quantity of salt confiscated rose from 702 maunds to 747 maunds. On an average 34½ seers of salt were attached and 28½ confiscated in each case as against 28¾ seers and 26¾ seers respectively in the previous year. In one case 150 maunds of salt were attached, as it was found that the manji was travelling by a route different from that specified in his rowana. As, however, it was ascertained that the route described was wrong, the salt was released. In Orissa the number of cases in which salt was confiscated fell from 725 to 569, and the quantity confiscated from 587 to 538 maunds. The total number of cases instituted in the Courts throughout Bengal was 904 against 905 in the preceding year. The large decrease of 123 cases in Orissa is attributed by the Board to the fact that after the rain that fell in July and August, people became immediately engaged in agricultural operations, while the promising prospects of crops at the end of October removed all incentive to crime; and it is noteworthy that of the cases that did occur in Orissa during the year under review, almost 90 per cent. were detected in the first quarter before the famine came to an end. The cases sent up for trial with evidence of illicit manufacture in the Orissa districts numbered 366 against 486 cases in the preceding year. Altogether there were 1,051 seizures and 57 unsuccessful searches in the salt-bearing tracts in Bengal during the year against 1,097 and 86 respectively in the previous year. Of 1,017 persons apprehended, 971 were convicted. Rewards were disbursed to the amount of Rs. 3,446. It is

satisfactory to note that the number of unsuccessful searches fell from 86 to 57; the seizures in 1896-97 and 1897-98 being respectively 1,097 and 1,051.

Salt in Orissa.

12. As usual, a separate portion of the Board's Report deals with the administration of the Salt Department in Orissa, which, as noticed above, has been retransferred to the Government of Bengal. The receipts of the Orissa Salt Department fell from Rs. 1,25,213 to Rs. 46,160, and the expenditure from Rs. 1,45,263 to Rs. 1,15,482. The decrease in receipts is attributed by the Board to the fall in the sale of locally-manufactured salt, owing chiefly to the greater facilities offered by the East Coast Railway for the cheap introduction of Madras salt into the district of Puri, which formerly depended for its supply on the local factories. The Board, however, point out that if the duty realised on the imported salt consumed in Orissa be added to the receipts from the locally manufactured salt, the total revenue would amount to Rs. 18,58,737, and the proportion of charges to aggregate revenue would be 6·21 per cent.

13. *General.*—The results of the saline survey undertaken by the staff deputed from Orissa to the 24-Parganas tend to confirm the belief that illicit manufacture is very prevalent in parts of that district. Mr. MacMillan writes from enquiry and personal observation :—

"I should say that illicit manufacture was indulged in by all classes. . . . . We have come across extensive and large scrapings, and I myself personally saw near Champahati . . . . . a large gang, consisting of about 60 men, women, and children, removing salt-earth in baskets, bags, and carts."

One camp found five large filters which were destroyed; and Mr. Platts writes that during the short period of six weeks that the Salt officers were at work, their activity "led to the discovery of other evidence of cumulative value tending to prove the unrestricted prevalence of illicit transactions."

After the close of the year officers of the Salt Department were empowered to make searches and effect arrests. In one of their first raids the villagers turned out *en masse* and assaulted the search party, consisting of 3 Assistant Inspectors, 5 Sub-Inspectors, a Police Sub-Inspector, 2 Constables, and 23 peons, several of whom were severely wounded. The case is still under trial.

14. The thanks of the Lieutenant-Governor are again due to the Board for their administration of the Department.

By order of the Lieutenant-Governor of Bengal,

E. N. BAKER,

Offg. Secy. to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 26th September 1898.

Burdwan.—Rainfall at Sadar 2·83, Kalna 2·54, Katwa 4·64, Raniganj 7·71. Weather seasonable. *Aus* being harvested. *Aman* doing well. Floods have done some damage in Katwa. Common rice selling as follows:—

	Srs.	
Sadar	12 to 16	per rupee.
Kalna	12 to 13	
Katwa	14	
Raniganj	14½	

Birbhum.—Rainfall at Sadar 4·72, Rampur Hât 6·13. Weather hot and cloudy. Prospects of paddy crops favourable. Price of common rice at Sadar 15 seers and at Rampur Hât 14·8 seers per rupee. No want of fodder.

Bankura.—Rainfall at Bankura 3·78, Vishnupur 5·97. Weather—latter part of the week fair. *Bhadoi* paddy is being harvested. Prospects of winter rice excellent. Sugarcane doing well. Fodder and water sufficient. No cattle-disease reported. Common rice sells at 16 seers per rupee at Bankura and 14 seers at Vishnupur.

Midnapore.—Rainfall at Sadar 5·76, Contai 3·21, Tamluk 4·50, Ghatal ·68. Prospects of standing crops favourable. Damage by grass-hoppers reported from several thanas. Prices of common rice:—

	Srs.	
Sadar	12	per rupee.
Contai	10 to 13	
Tamluk	12½	
Ghatal	13 to 15	

Hooghly.—Rainfall at Sadar 1·85, Serampore 2·34, Jahanabad 1·98. Harvesting of *aus* and cutting and steeping of jute are still going on. Cattle-disease prevails in one thana. Common rice sells from 10 to 12 seers per rupee.

Howrah.—Rainfall at Sadar 2·03, Ulubaria 5·70. Weather hot. Transplantation of *aman* still going on at Ulubaria. Harvesting of *aus* and steeping of jute still continuing. Weather generally very favourable. The recent flood in the Rupnarayan has caused some damage to the standing crops in outpost Bhatora of the Ulubaria subdivision, which, however, occurs every year. Fodder and water sufficient. Common rice sells at 11½ to 14 seers per rupee.

24-Parganas.—Rainfall at Sadar 2·65, Barasat 2·45, Basirhat 1·09, Diamond Harbour 2·18. Weather seasonable. Transplantation of *aman* finished. Harvesting of *aus* and cutting and steeping of jute going on. Prospects good. Cattle-disease still lingering in thana Mathurapur and a few cases of cattle-pox reported from places in thana Hosanabad. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	11 to 12	per rupee.
Barasat	12½	
Basirhat	14 1/16	
Diamond Harbour	12 5/11	

Nadia.—Rainfall at Sadar 3·28, Kushtia 3·12, Meherpur 4·07, Chuadanga 2·09, Ranaghat 1·26. Harvesting of *aus* almost finished. *Aman* in danger of being submerged in places on account of heavy rain. Common rice selling at 11 to 15 seers per rupee. Fodder and water sufficient. No cattle-disease reported. Rivers high.

Murshidabad.—Rainfall at Sadar 3·84, Jangipur 7·11, Kandi 3·61. Weather seasonable. Harvesting of *bhadoi* nearly finished; average outturn estimated to be 12 annas. *Aman* plants on low lands damaged by flood in parts, but those on high lands doing well. Cutting of jute going on. Prospects of sugarcane and mulberry seem to be good in the Jangipur subdivision. Water sufficient, but fodder insufficient in places. No cattle-disease reported. Common rice sells at Sadar and Jangipur 14 seers and at Kandi 16 seers a rupee.

Jessore.—Rainfall at Sadar 4·68, Jhenida 3·42, Magura 3·63, Narail 1·88, Bangaon ·39. Weather cloudy and rainy at the beginning and clear at the end of the week. Harvesting of *aus* paddy and jute nearly finished. *Aman* paddy doing well, but *chhotna aman* with short stems on low lands in the Magura subdivision has been submerged here and there. Cattle-disease reported from Bangaon thana only. Fodder and water sufficient. Rivers rising slowly. Common rice sells as follows:—

	Srs.	
Jessore	12 to 17	per rupee

Khulna.—Rainfall at Sadar ·41, Bagerhat ·72, Satkhira 2 26. Weather fair with slight rain. Transplantation of *aman* almost over. Harvesting of *aus* going on. Prospects good. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	
Sadar	16 to 17	per rupee.
Bagerhat	15	
Satkhira	15	
	21 (new *aus*)	

Rajshahi.—Rainfall at Sadar 3·93, Nator 6·61, Naugaon 6·37. Prospects favourable. Rain has done some damage to ganja nurseries and paddy on low lands in Naugaon. No cattle-disease. Fodder and water available. Rice sells from 11 to 24 seers per rupee.

Dinajpur.—Average rainfall 4·01. Weather seasonable Cutting and steeping of jute continue. Transplantation of winter rice nearly finished. Fodder and water ample. Rice sells at 15 seers a rupee.

Jalpaiguri.—Rainfall at Sadar 2·20, Alipur Duars ·60. Weather seasonable. Harvesting of *bhadoi* finished. Transplantation of *haimanti* nearly finished. Cutting of jute going on. Fodder and water sufficient. Common rice sells from 8 to 15 seers a rupee.

Darjeeling.—Rainfall at Darjeeling 10·59, Siliguri 1·30. Weather seasonable. *Hills*—*haimanti* being harvested; *bhutta* and *bara maruá* flourishing and promise well. *Terai*—harvesting of *bhadoi* and jute and transplanting of *haimanti* nearly finished; sugarcane doing well. Coarse rice sells as follows :—

	Srs.	
Hills	8 to 11	per rupee.
Terai	13 to 14	

Bhutta sells at Darjeeling 20 seers and at Kalimpong 50 seers per rupee.

Rangpur.—Rainfall at Sadar 2·22, Kurigram 1·80, Gaibanda 2·69, Nilphamari 2·65. Transplantation of winter rice and cutting, steeping and washing of jute still going on. Prospects fair. Common rice selling at 11 to 14 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 4·54. Transplanting of *aman* nearly finished. Harvesting of jute going on. Fodder and water ample. Common rice selling from 12 to 16¼ seers per rupee.

Pabna.—Rainfall at Sadar 3·92, Sirajganj 2·31. Weather cool. Crop prospects excellent. Price of rice 10 to 16 seers per rupee.

Dacca.—Rainfall at Sadar ·93, Manikganj 2·00, Munshiganj 1·65, Narainganj 1·80. Weather seasonable. Prospects of crops good. Fodder available. No cattle-disease. Common rice 12 to 15 seers per rupee.

Mymensingh.—Rainfall at Sadar 3·72, Kishorganj 4·38, Tangail 2·32, Netrokona 3·90. Weather showery with occasional storms. Crops are doing very well. Health of cattle good. Fodder and water ample. Rice selling at 12 seers per rupee. Netrokona reports 14¾ seers per rupee.

Faridpur.—Rainfall at Sadar 1·66, Goalundo 2·59, Madaripur ·93. Weather seasonable. Prospects good. Rice 13 to 14 seers per rupee.

Backergunge.—Rainfall at Sadar 2·94. Weather fine. Prospects of crops good. Common rice sells from 11 to 16 seers (*aman*) and from 15 to 18 seers (*aus*) per rupee.

Tippera.—Rainfall at Comilla ·62, Brahmanbaria 3·68, Chandpur 1·50. Weather seasonable. Jute is still being reaped. Harvesting of *aus* and transplantation of *aman* almost over. Prospects fair. Fodder sufficient. Price of common rice 10 to 16 seers per rupee.

Noakhali.—Rainfall at Sadar 3·64, Feni 3·42. Prospects of standing crops fair. No cattle-disease. Condition of fodder not good. Price of rice stationary.

Chittagong.—Rainfall 2·27. Weather seasonable. *Aus* still being reaped, and *aman* cultivated. Prospects fair. Prices stationary. Water and fodder sufficient.

Patna.—Rainfall at Sadar 8·01, Barh 4·91, Bihar 7·31, Dinapur 7·93, Hilsa 9·5, Bikram 3·88. A heavy downpour of rain accompanied by east winds damaged paddy plants and houses. Prices risen slightly. In Patna common rice sells at 14¼ seers a rupee. Fodder and water for cattle sufficient.

Gaya.—Rainfall at Sadar ·88, Jahanabad 3·84, Aurangabad ·47, Nawada 2·71. *Bhadoi* harvest nearly finished. Prospects of paddy favourable. Common rice selling at 14½ seers per rupee.

Shahabad.—Rainfall at Sadar 4·00, Buxar 3·48, Sasaram ·59, Bhabua ·69, Dehri ·06. Standing crops good. *Serah* being harvested in Sassaram. Rice sells at Arrah 14 seers per rupee.

Saran.—Rainfall at Sadar 3·09, Siwan 8·12, Gopalganj 8·50. Weather cloudy with occasional showers from Monday (19th) to Wednesday (21st). Harvesting of *bhadoi* continues. Flood water slowly subsiding. Both *bhadoi* and paddy have suffered from floods, but paddy on high lands doing well. Average price of common rice 13·8 seers and of *makai* 25·12 seers per rupee.

Champaran.—Rainfall at Motihari ·93, Bettiah 2·46, Barharwa 2·46, Bagaha 3·16, Ramnagar 3·18. Weather hot, but cloudy at times. *Bhadoi* being harvested everywhere. Prospects of paddy crop improving. Flood nearly subsided. Cattle-disease in Rajghat outpost. Fodder sufficient. Price of common rice (new) 12 seers and of maize 20 seers per rupee.

Muzaffarpur.—Rainfall at Sadar 3·63. Weather seasonable. Flood water subsiding. Considerable damage done to crops. Prices are—Common rice 11 to 13 seers, wheat 16 to 18 seers, barley 25 seers, maize 22 to 30 seers, gram 16 to 20 seers, *rahar* 20 to 21 seers, and *marua* 25½ seers per rupee.

Darbhanga.—Rainfall at Sadar 5·39, Samastipur 4·18, Madhubani 4·24. Weather hot. Floods subsiding, but considerable damage done to crops in Sadar, Warisnagar, Roserah and Banipatti thanas. Prospects fair generally in Madhubani. Common rice selling at Sadar 11 seers per rupee.

Monghyr.—Rainfall at Sadar 8·23, Begusarai 15·35, Jamui 6·96. Weather stormy and rainy in the beginning of the week, but latterly clear and fine. Harvesting of *bhadoi* crops nearly completed. The excessive rain and flood have done considerable damage to the standing crops in the Begusarai subdivision and Gogri thana. No cattle-disease. Common rice sells as follows:—

Monghyr	...	...	...	13 seers per rupee.
Begusarai	...	...	...	11 to 13 „ „
Jamui	...	...	...	14 „ „

Bhagalpur.—Weather cloudy and stormy in the first part of the week, but fair and clear in the latter part. Rainfall at Sadar 7·60, Banka 7·70, Madhipura 12·84, Supaul 8·24. Crops doing well. The recent floods in Madhipura and Supaul may do some damage, the extent of which cannot be estimated just yet. No cattle-disease except to a limited extent at Protapganj. Fodder sufficient except in flooded tracts. Prices nearly stationary.

Purnea.—Rainfall at Sadar 6·47, Kishanganj 11·35, Araria 8·20. Weather rainy with strong easterly wind. Harvesting of *bhadoi* paddy finished. Transplantation of winter paddy nearly finished. Heavy rain flooded all low-lying tracts. Cattle-disease still reported from Araria. Fodder and water sufficient. Common rice (*bhadoi*) sells as follows:—

Sadar	...	...	...	17 seers per rupee.
Kishanganj	...	...	...	17 „
Araria	...	...	...	21 „

Malda.—Rainfall at Sadar 7·67, Shibganj 4·05, Gajole 8·85. Weather cloudy and rainy during the first part of the week; latter part seasonable. Rain has done much good to the winter paddy, the prospect of which is excellent. Common rice selling at 15 seers per rupee in English Bazar. Fodder ample.

Santhal Parganas.—General and heavy rain average 5·60. Prospects of winter rice excellent. No great damage done. Prices—rice 14 to 15 seers, and maize 20 to 50 seers per rupee. Some cattle-disease reported and glanders among Dumka ponies; steps being taken to check this.

Cuttack.—Rainfall at Sadar 2·11, Jajpur 3·05, Kendrapara ·87, Banki 1·97, False Point 2·07. Weather hot and cloudy. *Sarad, arhar* and sugarcane growing. *Beali, mandia* and jute being harvested. *Biri, kolthi* and *mug* being sown. Condition of cattle generally good, but disease still provails in places. Common rice (new) sells as follows:—

				S.	ch.	
Cuttack	...	...	...	17	8	per rupee.
Jajpur	...	...	...	19	11	
Kendrapara	...	...	...	19	11	
Banki	...	...	...	21	0	

Balasore.—Rainfall at Sadar ·45. *Sarad* being transplanted and weeded. Harvesting of jute and *asu* crops continues. Slight damage to *asu* crop in Sadar and to *surad* crop in Bhadrak from floods. Sugarcane thriving well. Cattle-disease reported from one village. Rice sells at 14 to 20 seers per rupee in the interior, and at 14½ seers and 17 seers at Balasore and Bhadrak respectively. Insect pest (*jhitika*) damaging crop. Fodder and water sufficient.

Angul.—Rainfall at Angul 3·13 and Khondmals 7·04. Weeding of paddy progressing. Sugarcane, cotton and *rabi* thriving. *Beali* and early crops being reaped. Common rice selling at Angul 20 seers and at Khondmals 13½ seers per rupee. Fodder and water sufficient.

Puri.—Rainfall at Puri 1·41, Khurda 2·45. *Beali* and *mandia* harvested. *Lighu* ripening. *Sarad* being re-weeded. Prospects of sugarcane, *arhar*, and other miscellaneous crops good. Fodder and water sufficient. Cattle-disease reported from certain parts of the district. Common rice sells as follows:—

	Srs.	ch.	
Puri	14	7	per rupee.
Khurda	14	7	per rupee.
Interior of district	14 to 18	2 to 0	per rupee.

Hazaribagh.—Rainfall at Sadar 4·62, Giridi 3·50. Weather seasonable. Prospects of crops good. Rice 10 to 13 seers per rupee.

Lohardaga.—Rainfall at Sadar 2·09. *Sergunja* sowing finished. *Gora dhan* being harvested. State of standing crops good. Rice sells at Ranchi 11 seers and in the interior from 11 to 16 seers per rupee. Cattle-disease continues in the interior. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—Rainfall ·60. Weather hot. *Makai*, *burai*, and other *bhadoi* crops are being harvested. Standing crops doing well. Rice sells from 12 to 23 seers per rupee.

Manbhum.—Rainfall at Sadar 2·51, Gobindpur 3·55. Weather seasonable. Prospects of crops on the ground are excellent. Cattle-disease not reported. Fodder and water sufficient. Average price of common rice at Sadar 13 seers 9 chittacks and at Gobindpur 12 seers per rupee. Supply sufficient.

General Summary.—There was generally heavy rain during the early part of the week, but since then the weather has turned fine and settled over the Province. The change is favourable, and the floods are gradually subsiding. The *bhadoi* crops are being rapidly harvested, but in the north of Bihar they have suffered considerably from the floods. In Midnapore grass-hoppers are still doing damage to the crops in several thanas, and in Balasore an insect-pest is said to have appeared. The price of common rice in some districts showed a slight fall. The fodder-supply is generally sufficient except in the flooded tracts. Some cattle-disease is still reported.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,

The total fall from 1st January to 24th September 1898	53·04
The average fall of the corresponding period for 24 years, Surveyor-General's Office	57·27

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; ≤, lightning; ≏, dew.

FIRST REPORT ON THE BHADOI CROPS IN BENGAL, 1898.

THE following is published for general information.

M. FINUCANE,

The 1st October 1898. *Secy. to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

First Report on the bhadoi crops in Bengal, 1898.

THE present report reviews the present condition of all the *bhadoi* or rainy-weather crops. The most important *bhadoi* food-crops are *bhadoi* paddy, maize, and millets. Among *bhadoi* non-food crops, the chief are jute, indigo, and cotton. Separate reports are published for these non-food crops, and no special note is taken of them, therefore, in this report. The cultivation of *bhadoi* paddy prevails chiefly in Bengal Proper and Orissa, and maize and millets occupy large areas in Bihar and Chota Nagpur.

The figures of normal area have been revised by District Officers, but the returns still show a marked tendency on the part of local officers to take these areas as maxima rather than normal areas. A percentage notation of outturn has been adopted under instructions received from the Government of India. Under this system of notation 100 represents the normal outturn per acre.

2. *Character of the season.*—In April, the rainfall was deficient over the whole of Bengal Proper, and especially in East Bengal. It was practically normal in Chota Nagpur and Bihar, and slightly above the normal in Orissa. In May, it was a little below the normal in almost all parts of these Provinces. In June, the rainfall was considerably above the

average in Bengal Proper and Chota Nagpur, and it was evenly distributed, but in Bihar and Orissa it was in defect. In July, the rainfall was below the normal. In August, it was in excess of the normal everywhere except in parts of North Bengal and North Bihar.

In the first week of September, there was good general rain throughout the Province, excepting parts of North Bihar and Orissa. In the second week of September, heavy rain fell in the north of the Province, especially in North Bihar; elsewhere the fall was moderate. In the week ending 19th September, heavy rain fell throughout the Province, accompanied by high wind. The excess of rain this month has caused high floods, which are reported to have damaged the crops considerably in Patna, Muzaffarpur, Champaran, Darbhanga, Monghyr, and the Sonthal Parganas. Floods are also reported from Midnapore, Murshidabad, Shahabad, Saran and Bhagalpur. In Noakhali, some damage has also been reported lately from excessive rain. Locusts are reported to have slightly damaged the paddy crops in Cuttack, and grasshoppers have done, and are still doing, considerable injury to the paddy crops in Midnapore.

3. *Area cultivated.*—According to the revised estimates shown in column 5 of the appended statement, it will be seen that the total normal area under *bhadoi* crops amounts to 15,296,000 acres. Of this, 11,888,000 acres are occupied by food-crops and the rest by non-food crops. From column 7 of the same statement, it will also appear that the total area under all *bhadoi* crops during the current year amounts to 16,197,600 acres against 16,111,300 acres estimated to have been sown with the same crops last year. There is thus an increase in area of 86,300 acres or ·5 per cent. during the present year, which is nominal. The increase in *bhadoi* food-crops, amounting to 267,100 acres (2 per cent.), is more noticeable, and is due to the extended cultivation of *aus* paddy in preference to jute—a result brought about by the low prices of jute and high prices of paddy prevailing last year, which induced many cultivators to grow the latter crop in preference to the former.

The above estimates, it must be understood, are only approximate and are not based on actual field measurements.

4. *Character of the crop.*—From the appended statement it will be seen that, taking all the *bhadoi* crops together, 10 out of the 45 districts of these Provinces, viz., 24-Parganas, Bogra, Noakhali, Saran, Champaran, Muzaffarpur, Darbhanga, Bhagalpur, Cuttack, and Manbhum, return crops above the normal (100 per cent.), 30 districts return crops which are estimated to be between 75 per cent. and the normal, and the rest return crops less than 75 per cent. of the normal. On the whole, the season this year has not been quite as favourable as that of last year, and the outturn for the whole Province of all *bhadoi* crops taken together is at present roughly estimated from about 90 to 95 per cent. of the normal. It may be necessary hereafter, in the final report, to modify this estimate in view of the damage being done now to the crops by floods and insect pests.

N. N. BANERJEI,
Asst. Director of the Dept. of Land Records and Agriculture, Bengal.

(Countersigned.)
P. C. LYON,
Director of the Dept. of Land Records and Agriculture, Bengal.

CALCUTTA,
The 27th September 1898.

Preliminary Forecast of the Bhadoi Crops of Bengal 1898.

1	2	3	4	5	6	7	8	9	10	11
DISTRICT.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Names of *bhadoi crops.*	Approximate normal area under each specified *bhadoi* crop in acres.	Approximate area *last year* under each specified *bhadoi* crop in acres.	Estimated area *this year* under each specified *bhadoi* crop in acres.	Taking 100 to represent the normal outturn per acre, how much represented outturn last year?	Taking 100 to represent the normal outturn per acre, how much will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Bankura ...	1,677,440	643,800	*Bhadoi* paddy	21,900	22,000	21,300	100	112	The total area under *bhadoi* crops is almost the same as that of last year. The outturn may now be roughly estimated as given in column 9. The normal area in column 5 has been revised.	
			Bajra	300	900	900		75		
			Mandua (or *marua* or *ragi*).	1,100	1,000	1,100		75		
			Indian-corn (maize) ...	3,600	3,500	3,400		62		
			Other *bhadoi* cereals and *bhadoi* pulses.	8,400	8,500	8,700	87	75		
			Other food-crops (*e.g.*, vegetables).	700	800	800		98		
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, sunn hemp, mulberry, &c., &c.).	8,600	8,800	9,100		100		
			Total ...	46,100	45,500	45,300	94	97		
Midnapore ...	3,392,800	2,111,500	*Bhadoi* paddy	107,300	112,700	166,800	81	57	The decrease in the area under cultivation is due partly to want of rain during the sowing time in some parts of the district and partly to sudden floods. The outturn is likely to be small on account of the lands remaining submerged by the flood and partly owing to damage caused by grasshoppers.	The damage done to crops by grasshoppers is the subject of special enquiry.
			Bajra	6,100	6,000	6,000	62	75		
			Mandua (or *marua* or *ragi*).	2,000	2,000	2,000	68	60		
			Indian-corn (maize) ...	21,200	18,000	18,000	75	75		
			Other *bhadoi* cereals and *bhadoi* pulses.	48,700	47,000	45,900	64	62		
			Other food-crops (*e.g.*, vegetables).	23,300	22,800	19,500	72	55		
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, sunn hemp, mulberry, &c., &c.).	91,800	92,700	90,900	70	54		
			Total ...	300,400	301,800	290,600	73	68		

Hooghly ...	1,667,300	702,200	*Bhadoi* paddy	46,000	58,000	47,000	85	75	Owing to deficient rainfall, a smaller area than that reported last year has been brought under cultivation, and the outturn for the same reason is expected to be shorter.	
			Indian-corn (maize) ...	100	100	100	88	75		
			Other *bhadoi* cereals and *bhadoi* pulses.	2,500	2,700	2,600	69	65		
			Other food-crops (*e.g.*, vegetables).	3,000	3,500	3,300	81	68		
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, *sunn* hemp mulberry, &c., &c.).	28,700	36,500	35,000	91	79		
			Total ...	80,300	98,800	88,000	85	72		
24-Parganas ...	1,344,640	1,088,900	*Bhadoi* paddy	108,700	108,500	122,100	80	106	The increase in area sown with *bhadoi* paddy this year and the reduction in the area under non-food crops are due to the extended cultivation of paddy in preference to jute. The outturn is favourable owing to seasonable rainfall.	
			Other *bhadoi* cereals and *bhadoi* pulses.	3,000	2,600	2,600	65	75		
			Other food-crops (*e.g.*, vegetables).	4,900	5,200	5,400	75	96		
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, *sunn* hemp, mulberry, &c., &c.).	42,000	40,700	23,300	75	100		
			Total ...	158,600	157,000	153,400	79	104		
Nadia ...	1,759,160	1,305,000	*Bhadoi* paddy	276,300	331,700	412,400	81	89	The increase in the area sown, as well as in the outturn, is due to seasonable rainfall.	Doubtless paddy has been largely grown this year in preference to jute.
			Indian-corn (maize) ...	1,000	100	100	62	65		
			Other *bhadoi* cereals and *bhadoi* pulses.	45,200	29,800	30,000	75	70		
			Other food-crops (*e.g.*, vegetables).	20,900	16,200	15,200	81	80		
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, *sunn* hemp, mulberry, &c., &c.).	107,800	89,400	70,700	81	87	The decrease in the area sown with non-food crops is due to the difficulty in steeping jute and to the closing of some indigo factories.	The reported difficulty in steeping jute will be further enquired into.
			Total ...	451,200	267,200	528,400	80	87		

1	2	3	4	5	6	7	8	9	10	11
District.	Total area of district in acres.	Total area in district estimated to be under cultivation in acres.	Names of *bhadoi* crops.	Approximate normal area under each specified *bhadoi* crop in acres.	Approximate area *last year* under each specified *bhadoi* crop in acres.	Estimated area *this year* under each specified *bhadoi* crop in acres.	Taking 100 to represent the normal outturn per acre, how much represented outturn *last year*?	Taking 100 to represent the normal outturn per acre, how much will represent this year's outturn?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Murshidabad	1,373,440	963,500	*Bhadoi* paddy	229,700	218,700	230,200	79	79	The increase in the area sown this year with *bhadoi* paddy is due to seasonable rainfall. The final figures may, it is thought, show that the quantity of paddy (coarse) reaped was less than that estimated last year. The increase both in the area and outturn of other food-crops is due to timely rainfall.	
			Indian-corn (maize) ...	200	200	350	73	75		
			Other *bhadoi* cereals and *bhadoi* pulses.	2,200	1,900	1,900	81	82		
			Other food-crops (*e.g.*, vegetables).	6,600	7,300	8,200	79	80		
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, sunn hemp, mulberry, &c., &c.).	83,200	80,600	82,450	68	73		
			Total ...	323,600	307,300	323,000	76	78		
Jessore ...	1,872,000	1,116,800	*Bhadoi* paddy	361,800	323,200	370,500	51	99	Estimates of area have been revised. The good outturn of all *bhadoi* crops is due to seasonable rainfall.	
			Other *bhadoi* cereals and *bhadoi* pulses.	16,600	8,400	16,500	81	93		
			Other food-crops (*e.g.*, vegetables).	26,700	16,900	24,700	91	92		
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, sunn hemp, mulberry, &c., &c.).	56,800	49,700	36,000	98	65		
			Total ...	461,900	398,200	443,400	91	86		

Khulna ...	3,108,943	870,800	*Bhadoi* paddy	56,400	61,600	76,500	84	108	There has been an increase in the cultivation of *aus* paddy owing to the timely rainfall. A bumper crop is expected if climatic conditions continue favourable. *Aus* has to a great extent taken the place of jute.
			Other *bhadoi* cereals and *bhadoi* pulses.	3,200	3,200	4,500	89	88	There has been an increase under this head owing to the decrease in the cultivation of non-food-crops.
			Other food-crops (*e.g.*, vegetables).	3,700	.....	3,700	.....	75	
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, *sunn* hemp, mulberry, &c., &c.).	29,800	25,400	15,200	83	65	There has been a decrease in the area under non-food crops owing to want of rain at the sowing season, and in a great many cases, jute has given way to *aus* paddy.
			Total ...	93,100	89,600	99,900	84	98	
Rajshahi ...	1,660,160	1,217,000	*Bhadoi* paddy	119,800	119,600	159,700	87	105	The increase in the area and outturn of *bhadoi* paddy is due to good and seasonable rain. The fall in the price of jute last year induced cultivators to put a larger area under *bhadoi* paddy than under jute.
			Other food-crops (*e.g.*, vegetables).	1,900	1,100	1,200	87	100	
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, *sunn* hemp, mulberry, &c., &c.).	111,700	82,800	65,400	81	79	The decrease in the area under other non-food crops is due to the contraction of the area under jute.
			Total ...	233,400	203,500	216,300	85	93	
Dinajpur ...	2,324,080	1,627,800	*Bhadoi* paddy	(*a*) 123,400	135,000	(*b*)146,000	81	(*c*)109	(*a*) The normal areas shown in column 5 have been revised.
			Jowar	7,000	7,000	7,000	75	75	(*b*) The increase in area is due to the scarcity of the last year which induced the people to sow *bhadoi* paddy to a large extent.
			Mandua (or *marua* or *ragi*).	7,000	7,000	7,000	100	100	
			Other food-crops (*e.g.*, vegetables).	100	100	100	75	75	(*c*) Timely rainfall this year is the cause of the better outturn.
			Other non-food-crops (*e.g.*, jute, indigo, *bhadoi til*, *sunn* hemp, mulberry, &c., &c.).	99,100	90,000	(*d*)80,000	100	100	(*d*) Owing to the high price of paddy and the low price of jute last year, *bhadoi* paddy was largely shown on jute lands.
			Total ...	2,43,600	239,100	240,100	98	100

On account of insufficient and untimely rain, a large area was not sown with *bhadoi* paddy, hence there is a decrease in the area shown in column 7. The season has been very favourable for indigo.

FINAL REPORT OF THE JUTE CROP FOR 1898.

THE following is published for general information.

REVENUE DEPT., *The 3rd October 1898.*

M. FINUCANE, *Secy. to the Govt. of Bengal.*

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Final Report on the Jute crop for season 1898.

Explanatory.—The original date for the publication of the final jute report was fixed for the 1st of September. In order to meet the wishes of the Bengal Chamber of Commerce, the date has been postponed to 1st October. The present report deals with the condition of the crop up to the middle of September and is compiled from information received from the 26 important jute-growing districts. The little jute that is grown outside these districts has been left out of consideration.

2. *Character of the season.*—The character of the season up to the middle of June was briefly described in the preliminary forecast of the jute crop issued on the 30th of June 1898. The rainfall in January was in excess of the normal in most of the jute-growing districts. In February, it was deficient in all jute-districts except in parts of North Bengal and in Malda. In March and April, the rainfall was also generally deficient. In May, it was slightly below the normal in most parts of the Province. In June, it was above the average in Bengal Proper, and in defect in Orissa; and in July it was below the normal. In August, the rainfall was above the normal everywhere except in parts of North Bengal. In September, the rainfall has been heavy in most parts of these Provinces.

3. *Area cultivated.*—In the preliminary forecast, the area cultivated during the present year was shown as 1,670,100 acres. The total area as now estimated by District Officers in the returns appended to this note amounts to 1,624,400 acres. The difference is due to a revision of figures in the districts of Jessore, Rangpur, Faridpur, Backergunge, Purnea, and Cuttack. The decrease in the area previously estimated is most noticeable in the districts of Rangpur and Faridpur. The area cultivated last year, as shown in column 3 of the appended returns, amounted to 2,151,600 acres. The decrease as compared with the area cultivated this year—*vide* column 2 of the statement—is considerable, amounting to 527,200 acres (*i.e.*, 24·50 per cent.) and is due, as has been already explained in the preliminary forecast, partly to the unfavourable character of the season at the time of sowing, and partly to the low prices of jute prevailing last year, and to the high price of food-grains, in consequence of which some lands which usually grow jute have been utilized for the cultivation of paddy.

4. *Character of the crop.*—On comparing the estimates of outturn for last year and this year, as given in columns 7 and 8 of the appended statement, it will be seen that out of the 26 districts from which jute reports have been received 15 districts, including such important districts as Rajshahi, Jalpaiguri, Rangpur, Bogra, Pabna, Dacca, Faridpur, Tippera, and Purnea, report worse crops for this year than for last year; four districts report equal crops, and seven, inclusive of Mymensingh, report better crops. It is thus clear that the crop this year is inferior to the one which was harvested last year.

Out of the 26 districts, only one reports a crop above the normal, and in that district, Cuttack, the area under jute is very small. Six districts, Burdwan, Hooghly, 24-Parganas, Dinajpur, Backergunge, and, Bhagalpur, report normal crops; 13 districts report crops estimated between 75 per cent. and the normal; and 6 districts, inclusive of three important districts, Jalpaiguri, Bogra, and Faridpur, report crops less than 75 per cent. Taking the 11 most important jute-growing districts, it will appear from a comparison of the present and preliminary jute reports that in 3 districts the prospects of the crop have improved since the issue of the first forecast; in 3 districts there has been no change, and in the remaining 5 districts they have deteriorated.

On the whole, the jute crop of the present season, which has been grown in the restricted area described above, may be finally estimated at 88 per cent. of a normal crop. In the notation formerly used, this would have been described as a 14-anna crop.

5. *Gross outturn.*—In the preliminary forecast of last June, the gross outturn was estimated at 48 lakhs of bales. Considering the revised estimates of area and outturn now received from District Officers, this estimate must now be somewhat reduced. It must not be forgotten, however, that of late years there has been a natural expansion in the cultivation of jute. Allowing for this and for a tendency sometimes observed on the part of District Officers to under-estimate, it seems probable that the total outturn will reach 46 lakhs of bales. It is to be noted that this is a smaller outturn than any that has been estimated by this Department in the past five years, but attention must be again drawn to the fact that the above is at best only a rough estimate, based on the best information available to this Department. The district returns are published in full, and those who are interested in the trade are in a position to make such deductions from them as their experience may suggest.

N. N. BANERJEI,

Assistant Director of the Dept. of Land Records and Agriculture, Bengal.

Countersigned.

P. C. LYON,

Director of the Dept. of Land Records, and Agriculture, Bengal.

CALCUTTA,
The 1st October 1898.

Final Report on the Jute Crop of Bengal, 1898.

District.	Acreage— Of current year's crop (1898).	Of previous year's crop (1897).	Average of four preceding years (viz., 1893 to 1896).	Percentage by which column 2 exceeds (+) or falls short of (—) area in— Column 5.	Column 6.	Taking 100 to represent the normal outturn per acre, how much will represent this year's outturn (1898)?	Taking 100 to represent the normal outturn per acre, how much represented out turn last year (1897)?	Outturn in bales of 400 lbs. Estimated yield of current year, i.e., of area in column 2.	Yield of previous year, i.e., of area in column 3.	Average of four preceding years (viz., 1893 to 1896).	Percentage by which column 9 exceeds (+) or falls short of (—) outturn in— Column 10.	Column 11.	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Burdwan ...	Acres. 11,600	Acres. 11,000	Acres. 10,900	.....	+ 0·92	100	110	33,000	36,300	23,800	—9·09	+41·63	There was want of rain at the time of sowing. The recent excessive rain has done some damage in places. The outturn is now expected to be normal.	
Midnapore ...	11,500	13,300	10,600	— 11·28	+11·32	75	86	25,000	34,300	21,100	—18·37	+32·70	Owing to delay in the breaking of the monsoon, the area brought under cultivation this year is smaller than that of last year. For the same reason, the outturn will probably be lower.	
Hooghly ...	13,900	14,500	11,400	—4·14	+21·93	100	100	41,700	43,500	25,100	—4·14	+66·14	The outturn has been as expected at the time of submitting the preliminary forecast.	
24-Parganas ...	30,000	300	37,000	—25·56	—18·92	100	100	90,000	120,900	80,600	—25·56	+11·66	The sowing of the jute crop was retarded owing to the absence of early rains. The area under the jute crop this year is less than that of the preceding year. This is due to the low prices of jute prevailing last year and to the high price of rice, in consequence of which some lands which usually grow jute have been cultivated with aus paddy.	

District.	Acreage— Of current year's crop (1898).	Of previous year's crop (1897).	Average of four preceding years (viz., 1893 to 1896).	Percentage by which column 2 exceeds (+) or falls short of (—) area in— Column 3.	Column 4.	Taking 100 to represent the normal outturn per acre, how much will represent this year's outturn (1898)?	Taking 100 to represent the normal outturn per acre, how much represented outturn last year (1897)?	Outturn in bales of 400 lbs. Estimated yield of current year, i.e., of area in column 2.	Yield of previous year, i.e., of area in column 3.	Average of four preceding years (viz., 1893 to 1896).	Percentage by which column 9 exceeds (+) or falls short of (—) outturn in— Column 10.	Column 11.	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
Nadia	Acres. 26,600	Acres. 31,800	Acres. 46,000	—16·35	—42·17	80	88	63,500	84,000	110,000	—24·05	—42·00	The decrease in the area sown is due to the appearance of seasonable rain and to the difficulty experienced last year in steeping jute.	
Murshidabad ...	16,600	17,000	22,800	—2·35	—27·19	83	75	41,300	38,200	46,800	+8·12	—11·79	The decrease in the area sown this year is due to the high price of paddy last year, which induced cultivators to sow paddy on jute lands.	
Jessore	18,100	28,500	34,600	—36·49	—47·69	71	100	36,600	65,500	77,300	—54·65	—50·06	The difference between the estimated area under jute for both this year and last year, as shown in the present report and the preliminary forecast, is due to more reliable information having been received since the submission of the preliminary forecast. This year's outturn has been much affected by want of rain at and soon after the time of sowing.	
Khulna ...	14,600	21,600	26,600	—32·87	—29·61	70	88	30,400	57,600	51,800	—46·66	—41·31	The acreage and outturn this year have fallen short of those of last year owing to the fall in the price of jute last year and to late rainfall this year.	

Rajshahi ...	100,200	127,600	103,200	— 21·47	— 2·91	78	94	234,700	359,800	231,600	—34·82	—16·73	The cheap rate at which jute was sold last year resulted in the decrease in area this year. The outturn estimated in the preliminary forecast (80 per cent.) has been reduced to 78 per cent. on account of the damage done to the crop by flood and rain.
Dinajpur ...	75,000	90,000	101,900	—16·66	—26·39	100	100	225,000	270,000	205,000	—16·66	—16·65	The price of jute having been very low last year, the crop was not sown extensively this year.
Jalpaiguri ...	63,800	77,400	64,000	—17·58	—0·31	80	94	114,800	218,300	153,000	—47·41	—24·27	The decrease in area under cultivation this year is due to the fall in the price of jute last year. The decrease in outturn is due to excessive rainfall at sowing-time and also to deficient rainfall at the time of steeping and washing.
Darjeeling (Plains).	1,600	2,330	2,500	—31·43	—36·00	50	113	2,400	7,500	5,750	—68·23	—57·89	The decrease in area and outturn this year is due to excessive rainfall at the time of sowing.
Rangpur ...	182,000	240,000	279,900	—24·17	—34·97	81·8	88	446,600	633,600	714,200	—29·52	—37·44	The decrease in the area sown this year is due to the dull market of last year. The area shown in the first forecast of the current year's crop was [illegible] [illegible] Heavy rain since the submission of the first forecast hindered the growth of the plants.
Bogra	40,000	100,000	93,800	—60·00	—57·35	73	100	87,600	300,000	215,600	—70·80	—59·37	The extremely dull market for jute and the high price of paddy during the preceding year induced the cultivators to grow the latter crop on larger areas than the former. Heavy rain since the submission of the first forecast hindered the growth of the plants.
Pabna	103,800	135,800	146,400	—25·05	—29·09	80	100	240,100	415,700	474,320	—40·05	—45·17	Late rains of flood water and seasonable rain in June and July have caused a better outturn than was expected before.

District.	Acreage— Of current year's crop (1898).	Of previous year's crop (1897).	Average of four preceding years (viz., 1893 to 1896). 1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
	Acres.	Acres.	Acres.											
Dacca	132,400	192,700	193,700	−31·29	−31·65	95	120	377,300	693,700	432,100	−45·61	−12·68	The area sown with jute has been considerably reduced this year owing to the low price of jute and the high price of food-grains last year and to the want of sufficient rain at the time of ploughing and sowing. It is feared that the outturn of jute will be much smaller this year than in 1897.	
Mymensingh ...	427,500	552,700	550,000	−9·99	−9·54	90	86	1,343,200	1,456,100	1,413,700	−7·94	−4·93	The outturn is expected to be better than that shown in the preliminary forecast, as the condition of the crop has improved owing to favourable rainfall since then.	
Faridpur ...	70,000	86,000	86,700	−19·60	+23·46	60	100	126,000	258,900	202,900	−51·16	−37·96	The decrease in area in column 2 is partly due to the dulness of the jute market last year and partly to the want of timely rain at the sowing season this year. The decrease would have been still greater had not there been an increase of area under this crop in the Goalundo subdivision, according to the revised statistics taken by the Local Police. This year's area estimated in the preliminary forecast was apparently very high and has been revised after careful consideration.	

Backergunge ...	7,800	10,000	10,000	−25·00	−25·00	100	104	32,500	30,000	32,000	−25·00	+2·27	Recent enquiries have caused some alterations to be made in the figures of area. Copious rain since the submission of the first forecast has improved the outturn.
Tippera ...	118,800	236,500	229,700	−49·77	−48·28	85·4	100	304,400	709,500	646,700	−57·10	−52·92	The decrease in area in column 2 is partly due to want of rain at the sowing season and partly to the low prices of jute last year and to the high prices of paddy, which induced many cultivators to grow the latter crop in preference to jute.
Noakhali ...	3,500	3,300	4,200	+6·06	−28·57	82	78	8,600	7,700	10,300	+11·69	−16·50	The outturn will probably be higher than that of last year owing to better rainfall.
Bhagalpur ...	22,400	22,400	21,700	...	+3·23	100	94	67,200	63,200	63,000	+6·33	+6·68	Favourable rainfall accounts for the increase in outturn and area.
Purnea ...	35,000	61,000	73,800	−42·62	−52·51	94	100	98,700	183,000	211,000	−46·07	−53·22	The area under cultivation this year as shown in the first forecast had to be revised. Owing to the low price of jute last year, people substituted *bhadoi* paddy in place of jute, and hence the area under this crop is less than that of last year. Owing to deficient rain, the outturn is below the normal.
Malda	20,000	25,000	34,400	−20·00	−41·86	87·5	75	53,500	56,200	74,000	−6·58	−29·05	Owing to sufficient rainfall, the outturn is better than last year's.
Cuttack ...	5,600	5,400	4,600	+3·70	+21·74	110	100	18,500	16,200	9,800	+14·20	+88·78	Owing to seasonable rainfall, a larger area has been sown this year than in the last year. The area shown in column 2 differs from that shown in column 5 of the first forecast, as a further area of 200 acres has since been found to have been brought under cultivation. The current year's outturn was estimated 100 per cent. in the first forecast, but the favourable rainfall has caused an improvement.
Balasore ...	2,500	2,800	2,600	...	+7·69	97	94	8,100	7,900	5,700	+2·52	+42·11	
Total ...	1,624,400	2,151,600	2,167,700	−24·50	−25·06	85	94	4,153,800	6,119,200	5,619,000	−32·89	−26·09	

The average rate of yield per acre is estimated by the Collector as 800 lbs. The general rate of 1,200 lbs. has been applied by this Department, and the figures in columns 9, 10, and 11 are based on this rate.

RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE DACCA DIVISION FOR THE YEAR 1897-98.

GENERAL DEPARTMENT—MISCELLANEOUS.

Dated Darjeeling, the 3rd October 1898.

RESOLUTION.—No. 3027.

READ—

The Annual General Administration Report of the Dacca Division for the year 1897-98.

MR. HARE was in charge of the Division for the greater part of the year, though Mr. Toynbee was Commissioner for the first three months, and Mr. Savage, by whom the present report is submitted, joined just before its close. The Division was exceptionally fortunate, in so far that there were no changes of District Officers, nor of Subdivisional Officers in 7 out of 12 subdivisions.

2. *Tours and Inspections.*—Mr. Hare's tours as Commissioner extended over 100 days, the repairs to public buildings damaged by the earthquake forming a special subject of enquiry. In accordance with the orders of Government, the duration of tours of Collectors was fixed by the Commissioner and of Subdivisional Officers by the Collector. Among Collectors, the tour of Mr. Beatson-Bell in Backergunge, which is reported to have been especially useful, alone came up to and exceeded the term laid down, but the deficiencies in other districts were small. Among Subdivisional Officers, the tours in four instances were short, and that of the Subdivisional Officer of Kishorganj in Mymensingh noticeably so, covering 54 days only as against 90 days prescribed. All the necessary inspections appear to have been made with the important exception of that of the wards' office in the district of Dacca, which the Collector did not inspect. In the districts of Dacca and Mymensingh the Subdivisional Officers made no inspections of their own offices in several cases.

3. *Weather and Crops: Material Condition of the People: Public Health.*—The average rainfall of the Division amounted to 72 inches, in comparison with the short fall of 59·9 inches in the preceding year and a mean of 72·3 inches for the five years ending 1896-97. It was, moreover, well distributed, and the outturn of the different crops was in consequence as good as in any year on record. The Divisional average outturns of the principal crops are reported to have been as follows:—*aus* rice, 16 annas; *aman* rice, 18 annas; jute, 15 annas; and pulses, 13 annas. The damage done by the earthquake to the standing crops in the district of Mymensingh was estimated at 2 annas. For ordinary cultivators the year opened badly. The rice crop of 1896-97 had been poor; and the jute crop of 1897-98, though good, did not fetch high prices. Excellent *bhadoi* crops reaped in June to August 1897, the jute crop reaped in August-September, and a bumper rice crop, harvested in November and December, however, during the second half of the year under report, are stated to have restored them to their usual state of well-being. Among the poorer middle class, the day-labourers, and those dependent upon small fixed incomes, high prices caused hardship, which deepened in places into distress during the first half of the year; while among the more well-to-do, the slackness of trade and the damage wrought by the earthquake prevented the year as a whole being regarded as one of prosperity. Prices, though lower than in the preceding year, by no means returned to normal rates, and continued to rule high. The effect on wages was practically nil, but the demand for labour after the earthquake caused a temporary rise at the head-quarter stations of Dacca and Mymensingh.

The reported death-rate for the Division remained the same as in the previous year—32·2 per mille. The variations in the reported death-rates from 43·8 per mille in Backergunge to 25·5 per mille in Mymensingh show defects

in registration, and little importance can therefore be attached to the figures. As an instance, the birth-rate recorded in the areas within which registration is compulsory in the district of Backergunge, is reported to have been as low as 16·9 per mille. There was a decrease in the number of persons vaccinated, which is attributed partly to fewer outbreaks of small-pox and partly to the fact that less remained to be done among the Ferazi Muhammadans, among whom vaccination had met with great success in the previous two years. The experiment of selling quinine in rural areas through panchayats was tried in Faridpur and Backergunge.

The expenditure by District Boards and municipalities on the improvement of the water-supply, which in 1896-97 amounted to Rs. 75,437, rose to Rs. 1,03,979 during 1897-98, the increase being most noticeable in the case of the District Boards of Mymensingh and Backergunge, and the municipalities of the Dacca district. Enquiries made in the district of Backergunge show the existence of 19,460 tanks reported as wholesome and 41,597 as unwholesome, which on the basis of census figures, would give an average of one tank of drinkable water to 110 persons and to ·18 square miles of area.

4. *Manufactures: Trade and Commerce.*—The steam jute-presses in the Division decreased from 21 to 18, while hand-presses increased from 5 to 8. There is a steam flour and oil mill at Dacca and an oil mill at Jhalakati, in the district of Backergunge, the value of the outturn from which in oil and oil-cakes is reported to have been over two and-a-half lakhs. The manufacture of soap at Dacca continues, and that of quack remedies and real drugs is reported to be an apparently lucrative business. The position of the gold and silver-smiths is said to have slightly improved.

The earthquake of 12th June 1897 did serious damage to the rivers in the interior of the district of Mymensingh, causing many to silt up, and the destruction caused to the roads seriously interfered with wheeled traffic during several months.

The importation of rice and paddy into the Division by rail fell off from 13,43,315 maunds during 1896-97 to 5,20,470 maunds during the year under report, though the exports by rail remained practically stationary. The export of rice to Calcutta, though prices ruled high and the crop was exceptionally good, showed an increase only from 27 lakhs of maunds in 1896-97 to 28 lakhs of maunds in 1897-98, against 34 lakhs in 1895-96. It is reported that more rice now goes north to Assam than formerly. The export of jute revived considerably, and amounted to 1,43,00,000 maunds exported to Calcutta, against 1,07,00,000 maunds in the previous year, and 817,000 cwts. despatched from Narainganj to Chittagong, as compared with 655,000 cwts. during 1896-97. In this connection the result of the enquiry instituted in Mymensingh, that the probable average annual consumption of raw jute for domestic purposes per head of the population of the district is 2½ seers, is noticeable. During the year 352 vessels entered and 368 cleared the port of Narainganj, as compared with 308 and 317 in the previous year; the increased trade in jute, salt, and rice, the obvious reason. This trade was practically entirely with Chittagong. The value of the imports decreased slightly from Rs. 2,69,818 to Rs. 2,56,995, but that of the exports rose from Rs. 53,18,523 to Rs. 57,82,979.

5. *Joint-Stock Companies.*—Loan offices exist in all the districts of the Division, and seem generally to be in a fairly flourishing condition. The Lieutenant-Governor is glad to observe that most of the bogus companies referred to in previous years' reports have disappeared.

6. *Civil Justice.*—The number of suits instituted and disposed of rose from 134,500 and 136,652 in the previous year to 135,307 and 138,067 respectively. Of the cases instituted, 55 per cent. were for recovery of money, 35 per cent. for realisation of rent, and 10 per cent. for declaration of title. Rent suits were most numerous in Backergunge and least so in Dacca. There is a satisfactory improvement in the promptitude with which witnesses were examined; only 9·7 per cent. in the superior Courts and 10·6 before Munsifs being detained over two days as compared with percentages of 16·3 and 12·3 during 1896. Mymensingh shows the worst results in this respect, 15·6 per cent. of the witnesses in Munsifs' Courts having been detained over two days

on an average throughout the district, and in one instance it is observed that no less than 71 per cent. of the witnesses were so detained at Kishorganj. The attention of the District Judge will be called to the matter.

7. *Crime: Police: Criminal Justice.*—Cognisable crime showed an increase during the year from 18,707 to 21,649 cases, while non-cognisable cases fell from 22,690 to 19,986. These fluctuations are attributed to the prevailing high prices, with the usual result of an increase of petty theft, and a diminution of trivial complaints, which are more of a luxury than a necessity. A change in the preparation of returns of cognisable cases, adopted in this year's report, has tended to increase the number of cases shown as cognisable. Organized and serious crime showed a satisfactory decrease except in Faridpur, where dacoities rose from 3 to 12 during the year under report. An interesting chart has been prepared showing the variations in gun-shot and other murders in the district of Backergunge, in order to illustrate the results of the measures adopted in 1896 for the disarmament of the district, which the Commissioner describes as "more speedily and thoroughly effective than its warmest advocates ever expected." The manner in which murders, otherwise than by guns, have decreased in exact parallel proportion to gun-shot crimes, supports the Commissioner's contention that the check put on the latter has removed the encouragement to violence which had been fostered by the knowledge of the immunity from detection which ordinarily accompanied it. During the year 1897 there was a complete absence of gun-shot murders, the figures for the three previous years having been 14, 23, and 12 respectively. Thirty-two thousand six hundred and sixty-eight persons were actually brought to trial during the year. Of these, close upon one-third were in the district of Mymensingh alone. More than one-fourth were tried by Honorary Magistrates, but for whose valuable assistance the Stipendiary Magistrates would have found difficulty in coping with the work. The proportion of witnesses detained over two days in the Courts of Stipendiary Magistrates in the Division generally is low, and has remained now for three years practically stationary, amounting to 4·6 per cent.; but it is not satisfactory that the percentage in Faridpur, where the total number of witnesses examined was least, should have risen to 8·5, and in the case of one Magistrate was as high as 34. Of the police cases disposed of, 10·1 per cent. were remanded six times and over; here, again, the percentage (14·6) being largest in Faridpur.

Honorary Magistrates examined considerably more witnesses than in the previous year,—16,568 in comparison with 11,126—and the proportion detained over two days (11·3) remained practically the same, and is still too high. The proportion of police cases tried by Honorary Magistrates, that were postponed six times and over, was as high as 21·4 per cent.; such cases are not, as a rule, suitable for disposal by a Bench.

The number of cases declared false fell from 1,268 in the preceding year to 799. This cannot, however, be attributed to increased vigour in the institution of prosecutions for the offence, only 49 cases having been instituted, of which 15 ended in conviction. Mr. Savage, in explanation both of the number of cases declared false and the small percentage in which a conviction was either attempted or secured, observes that many of such cases usually possess an element of truth, distorted and variegated it may be by perjury and exaggeration, but still distinguishable.

Five hundred and forty-three persons were brought to trial in the Courts of Sessions, of whom 60 per cent. were convicted. The results were poorest in Mymensingh and Faridpur, where the numbers acquitted were in excess of those convicted. The exercise of more care in making committals appears to be called for. Rs. 99,585 were imposed as criminal fines during the year, and there was an outstanding balance at the commencement of the year of Rs. 39,761. The total collected and remitted amounted to Rs. 1,07,023, leaving a balance of Rs. 32,322 still to be recovered. The balances in the districts of Dacca and Mymensingh are very heavy, noticeably at the Sadar stations (Rs. 10,773 and Rs. 5,139 respectively). The Magistrates will look into this at once. A similar state of things at the subdivisions of Munshiganj, Kishorganj, and Madaripur also calls for attention.

The Commissioner is of opinion that the working of the police has been on the whole efficient, and thinks there are signs of distinct improvement in recent years. Mr. Savage, who, from his long experience as District Magistrate in Backerguuge and elsewhere, is specially competent to form a sound opinion on this point, observes :—"It is impossible for any one who has watched the working of the police to be blind to the fact that there has been and still is much bribery and bad work; but the black sheep in the force have always been in the minority, and there are not wanting signs that the steps taken in recent years to improve the condition of the force are having the hoped for effect. The district reports show considerable improvement in work and conduct. The number of complaints brought against police officers has decreased, and in no case has any heinous offence been proved against them." With the extension of the system of *daffadars*, more use may still be made of the village chaukidars. The latter system is in full working order in Backergunge, but there has been some misunderstanding in its introduction in the other districts. Rupees 12,731 were paid during the year as rewards to chaukidars, but the balances at the disposal of all the District Funds at the close of the year show that there was still room for more to have been done in this direction, and the Lieutenant-Governor would be glad to see the reward fund liberally dispensed. It was meant to encourage quick and intelligent work among the local watchmen, who are the real detectives of the province, and the value of it has been proved to the hilt. The good service medals, which have been given from the fund in some districts, have been found a most useful stimulus, and the Lieutenant-Governer commends the plan to those Magistrates who have not yet adopted it.

8. *Land Revenue and Cesses.*—There are in all 28,435 estates borne on the revenue-rolls of the different districts, on which the current demand of the year amounted to Rs. 35,65,341 and arrear demand to Rs. 1,57,667. The total collections were Rs. 35,58,516, and a sum of Rs. 30,214 was remitted, the balance outstanding at the close of the year amounting to Rs. 1,34,278. The standard of the current collections fixed in permanently-settled estates, or 99 per cent. of the current demand, was reached in all districts with the exception of Backergunge, where, owing to a default in payment by an estate under the management of the Court of Wards, the percentage was very slightly short of the standard being 98·92 only. The percentage of arrear collection on arrear demand was also satisfactory. In temporarily-settled estates and estates under direct management, the current collections compared with the prescribed standard were as follows:—

District.	Percentage of current collections on current demand.	
	Temporarily-settled estates.	Estates under direct management.
Standard	95·	90·
Dacca	86·2	72·6
Mymensingh	95·0	91·1
Faridpur	71·4	76·7
Backergunge	91·1	98·8

As was the case last year, in Mymensingh alone were the prescribed standards reached in both classes; the collections in Backergunge fell but little short, and showed an improvement on those of the previous year. The collections in Faridpur showed a falling off from those of the previous year: the proportion in Dacca was about the same. The Lieutenant-Governor would again draw attention to the bad results attained in the districts of Dacca and Faridpur in temporarily-settled estates leased to farmers. A similar deficiency was observed last year: since then the collections in Faridpur have improved somewhat, but are still poor; those in Dacca have deteriorated. In Dacca the necessity for coerceive measures which took time, and in Faridpur the dilatory working of the Certificate Department, are the alleged excuse. The Lieutenant-Governor is unable to accept either of the reasons given as completely satisfactory. There is no class of estates in which short collections are less excusable than in estates leased to farmers. If the farming system does not secure prompt payment of the revenue, it ceases to have any merits whatever,

and should be abolished as soon as possible. The collections in estates under direct management were good in Backergunge and Mymensingh, but fell far short of the prescribed standard in Dacca and Faridpur; the low price of jute and the insufficiency of the collecting establishment are assigned as the causes in Faridpur; but the jute crop, though the prices were low, was a bumper one, and the low prices affected all districts and not alone Faridpur; while the cost of management was 6 per cent. on the demand against 5 in Backergunge, where the current demand was realised almost in full. The Lieutenant-Governor, therefore, is constrained to agree with the Commissioner that laxity of supervision by the Collectors in these districts was the true cause, and hopes that they will see to it that arrears are realised fully and punctually in full in the coming year. Eight thousand six hundred and ninety-three estates, shares of estates, and tenures became liable for sale for default as compared with 8,975 in the previous year. The figures quoted in the Resolution of the previous year were incorrect, as there was a mistake in the defaults reported from Backergunge. In only 409 cases did the default actually end in sale, and it is noticeable that the sales were fewest in Mymensingh (38), where the number of defaults (1,069) was greatest.

A sum of Rs. 20,205 was spent in estates under direct management on miscellaneous agricultural improvements. Of this, Rs. 8,661 were spent on the improvement of the water-supply and Rs. 3,179 on drainage and embankments. The outlay on agricultural and sanitary improvements represents 4 per cent. on the current demand and is satisfactory.

The percentages of current collections on the current demand on account of the road and zamindari dâk cesses were 85·69 and 96·12, respectively. The collections were again poorest in Faridpur (76·9 per cent.). Mr. Savage remarks—and the Lieutenant-Governor agrees with him—that the road-cess collections generally are not satisfactory, and point to laxity in the arrear collection department. Partial scarcity is said to be the cause of short collections, but the brunt of the scarcity was felt in the previous year, when the percentages of collections on the demand were better than in the year under review, the latter half of which yielded bumper crops.

One hundred settlements, yielding a net increase of revenue of Rs. 11,527, were concluded during the year, and 162 cases were pending at the close of the year. Of these, 29 cases in Dacca, 7 in Faridpur, and 11 in Backergunge were instituted more than a year ago. The Lieutenant-Governor hopes that these cases may be promptly disposed of.

His Honour observes with satisfaction a marked improvement in the disposal of certificate cases, to the necessity for promptly disposing of which attention was drawn last year. The number instituted was fewer, being 13,214 only, in comparison with 17,473 filed during 1896-97, but whereas the balance of cases pending at the close of that year was 7,116, of which 1,796 had been pending over six months since their institution, the corresponding figures at the close of the year under review were 4,418 and 126 only. Of the former, Mymensingh is responsible for 2,568.

The disposal of partition cases continues to be unsatisfactory. Four hundred and seventy-six cases were pending at the beginning of the year and 137 were instituted in the course of it. Of these, 187 cases were disposed of and 426 left pending at its close, of which 214 have been pending for over two years. It is reported that a proposal has been made for the appointment of an Additional Special Deputy Collector at Dacca, where 233 cases were left pending; no such proposal has yet been received by Government. The difference in the cost per acre of partitions between Dacca (5 annas 7 pie), and Mymensingh (Re. 1-0-6), which was noticed last year, still continues. Special enquiry is promised. The Lieutenant-Governor hopes that the Commissioner will give special attention to this branch of the administration in the current year, and that he will see that the new Partition Act is carefully and intelligently worked, with the result of shortening and cheapening the proceedings.

9. *Estates under the management of the Court of Wards.*—Of the five estates under the charge of the Court of Wards, one (Talipabad in the Dacca district) was released during the year. With the completion of the survey and record of

rights in the Kanakshar estate, Faridpur, these operations have now been finished in all the estates under the Court. The percentage of collections on the total demand was 81·4 per cent., and of remissions, 5·1 per cent. The outstanding balance at the close of the year was reduced from Rs. 58,532 at the commencement of the year to Rs. 30,681 at the close. A sum of Rs. 16,600 was expended in improvements, of which Rs. 14,933 was in the Dakhin Shabazpur estate; and Rs. 22,509 was expended on "miscellaneous works." The total rental of the estates under the Court of Wards was Rs. 1,66,000. Under the order of Government conveyed in the Resolution of the 9th October 1896, the expenditure on sanitary and agricultural improvements should have been Rs. 49,000, *i.e.*, 3 per cent. on the rental; and the failure to expend up to that amount, especially in a year of partial distress during the earlier months of it, should be explained. As regards the estates under the management of the Court generally, Mr. Savage remarks that, "peace now reigns where before the estates came under the Court's management, there was constant war."

10. *Excise: Stamps: Income-tax.*—The excise revenue, notwithstanding the high prices prevailing, amounted to Rs. 9,03,785, which, though slightly less than the figures of the preceding year, is still in excess of that of previous years. The stamp revenue, fell off, both under the heads of judicial and non-judicial stamps from Rs. 29,50,087 to Rs. 28,09,792. There was a marked decrease of 118 cases in the number of instances detected of insufficiently stamped and unstamped instruments. The decrease is attributed to a better observance of the law. Prosecutions for breaches of the law, however, increased from 56 during 1896-97 to 70, and out of 80 persons brought to trial, 75 were convicted.

The income-tax demand showed an increase of Rs. 9,685 and 358 assessees, which is ascribed to a careful revision of assessment. The increase has, however, only slightly more than compensated for the decrease in the previous years. The collections were satisfactory and little recourse was necessary to coercive measures. The incidence of the tax varies from Re. 1 to 26 persons in Dacca to Re. 1 per 34 persons in Faridpur.

11. *Railways: Public Works, and Communications.*—The gross receipts of the Dacca Section of the Eastern Bengal State Railway amounted to Rs. 5,56,220 in comparison with Rs. 4,93,205 in the previous year. The heavy crop of jute and an increase in passenger traffic are among the causes assigned. The Mymensingh-Jamalpur and Jamalpur-Jagannathganj extensions are being rapidly pushed on and it is hoped to open the whole line by the end of March 1899. It is expected that the extension to Faridpur will be finished by next cold weather.

Serious damage was done to the Government buildings in the Division by the earthquake of 12th June 1897, and a temporary new division of the Public Works Department was opened to supervise their repairs. The expenditure on repairs prevented the undertaking of many original works. The repair of 17 miles of new district roads and 37 miles of new village tracts were undertaken during the year and an expenditure of Rs. 1,10,263 was incurred on new works and of Rs. 1,29,284 on repairs. There are 319 ferries in the Division under the management of Government and the various District Boards and Municipalities. In Mymensingh the earthquake rendered fordable many ferries previously farmed by the District Board, with a consequent loss of income.

12. *Education.*—The number of schools teaching the standards of the Education Department decreased by 465—from 8,897 to 8,432—and the number of pupils attending them, from 236,302 to 229,073. This decrease is attributed to the high prices of the last two years. The numbers of pupils given in the Commissioner's report represent those who were at school on the last day of the year, *i.e.*, 31st March. It is difficult to understand why this should be greater on the 31st March 1897, when distress was greatest, than on the 31st March 1898, after harvesting of excellent crops with high prices. It may be that when children once cease to attend schools it is difficult to get them to return; but however this may be, the Lieutenant-Governor hopes that lost ground will be regained in the current year. In addition, there were 3,629 private institutions *tols*, *maktabs*, &c., with 37,585 pupils. The number of

girls' schools decreased from 1,139 to 1,042 and their pupils from 14,631 to 13,198. There are some 6,000 girls reading in boys' schools The percentage of boys of a school-going age to boys actually at school fell from 33·8 in the previous year to 32·9, and of girls, similarly, from 2·8 to 2·6. The expenditure on education, however, increased by Rs. 42,606, of which Rs. 11,988 were contributed from public sources.

The Survey School at Dacca lost heavily in pupils, the numbers on the rolls falling from 324 to 190. No explanation has been offered. The Industrial School at Barisal was narrowly saved from collapse. The Lieutenant-Governor regrets to observe that the number of Muhammadans under instruction was less by 3,403 than in the previous years, and that while Muhammadans constitute 65·3 per cent. of the total population of the Division, the proportion borne by them to the total school population is 50 per cent. only. With a view of encouraging Muhammadan education at Barisal and of recognising the efforts already made by the local community in this behalf, Sir John Woodburn has recently sanctioned a grant of Rs. 5,000 towards the construction of a hostel in connection with the Zilla School.

13. *Dispensaries and hospitals.*—The number of dispensaries in the Division is now 85, or 6 more than in the previous year, with 552,971 patients attending them. In Backergunge alone there was an increase of 40,000 patients over the preceding year. The Lieutenant-Governor is glad to observe that the income from private subscriptions has risen from Rs. 59,471 during 1896-97 to Rs. 66,168 during the year under report.

14. *Local Self-Government institutions.*—The working of the District Boards is unanimously commended by the different District Officers, and the reports on the different Municipalities are, on the whole, favourable. Some improvement has been made in the administration of the Dacca Municipality, but more remains to be done in the improvement of the sanitary condition of the town.

15. *Employment of Muhammadans.*—In the Resolution on the report of the previous year, special attention was drawn to the necessity for an equitable distribution of appointments between Hindus and Muhammadans in view of the large proportion borne by the latter to the general population. The Commissioner reports that the interests of the community are kept in view, but that the backward state of education among the Musalmans will long render it impossible to give them a share in the public service in proportion to their numbers. In fact, the proportion of appointments held by them has decreased from 26·4 to 25·5 per cent. The following classification of different public offices, and the proportion of Muhammadans holding them, is significant:—

Office.		Total number of posts.	Number of posts held by Muhammadans.	Percentage of posts held by Muhammadans to total number of posts.
Subdivisional Officers	...	12	3	25
Rural Sub-Registrars	...	58	34	58·61
Honorary Magistrates	...	274	53	19 3
Jurors and Assessors	...	2,118	297	14·02
Deputy Inspectors of Schools	...	7	2	28 5
Sub-Inspectors of Schools	...	22	1	45·4
Members of District Boards	...	104	15	14·4
,, of Local Boards	...	196	44	22·4
,, of Municipalities	...	225	36	16

16. *Conduct of Zamindars.*—The names of Nawab Sir Khajeh Ahsanullah, Bahadur, K.C.I.E., and of Raja Rajendra Narain, Rai Bahadur, of Joydebpur, of Dacca, are specially mentioned by the Commissioner as instances of public-spirited and liberal zamindars, who live among their tenantry and are ever willing to assist any good work. In other districts favourable reference is made to the names of Babu Hem Chandra Chaudhri of Ambaria in Mymensingh, and of Syed Muazzum Hossein, Khan Bahadur, of Shaistabad, in Backergunge, but the Lieutenant-Governor regrets to observe that, under the example of some of the leading men, absenteeism is reported to be becoming a growing evil in Eastern Bengal. The principal land-holders with few honourable exceptions (among

Extracts from the Annual General Administration Report of the Dacca Division for the year 1897-98.

* * * * *

III.—WEATHER AND CROPS.

20. The average rainfall of the year was 72·0, against 59·9 in the previous year and 72·3, the average of the five years ending 1896-97. It was, on the whole, well distributed, and as a consequence the crops were all round as good as in any year of which we have a record. Had it not been for the earthquake, which, as Mr. Roe, Collector of Mymensingh, reports, damaged to the extent of two annas the standing crops (*aus* and jute), and for some high floods, the returns would have shown bumper crops. As it is, the crops have been—*aus* rice 16 annas, *aman* rice 18 annas, jute 15-anna crop, and pulses 13-anna crop—a very material improvement on the preceding year.

* * * * *

V.—MATERIAL CONDITION OF THE PEOPLE.

26. The past year will be long remembered by all whose food-supply depends on the purchasing power of the rupee as a year of high prices and hardship, which here and there deepened into distress. All who depend for subsistence on small money incomes, the *Bhadralok* who have no land, clerks and muharrirs, artisans and day-labourers, and all who depend upon them must have felt the pinch of poverty more than in any previous year within living memory. The richer classes too cannot look back with pleasure on a year in which trade has been slack, the calls of charity have been many, and the earthquake has caused them serious losses. To the cultivators also, the great bulk of the population, the prospect cannot have been a cheerful one for the first half of the year. A poor winter crop in 1896-97 had left them with little surplus stock for sale, and the jute crop, though a good one, sold at very low rate. To them, however, the second half of the year brought compensation, and a good *bhadoi* crop, followed by a bumper rice crop, with prices still above the normal, restored the Eastern Bengal raiyat to his usual state of well-being. Indeed, in spite of all the drawbacks of the year, all the Collectors in general speak of it as one of prosperity.

Mr. Shirres writes that the people of his district (Dacca) are "exceedingly well off."

Mr. Harris of Mymensingh says:—

"On the whole the year under review was more prosperous than the preceding one."

Mr. Temple says of Faridpur (in which district there was considerable distress in some parts):—

"Two points have struck me very forcibly:—

(1) The ease with which the average cultivator tided over the long period of high prices.

(2) The immediate disappearance of the distress early in November, when the earliest *aman* was reaped and the cultivators were assured of a good crop."

And of Backergunge Mr. Bell, the Collector, writes:—

"The material condition of the people has on the whole been excellent. The district has escaped famine, plague, earthquake, and cyclone. The middling crop of 1896-97 has been followed by a huge crop in 1897-98, and all along the peasantry have obtained first-rate prices for their produce."

* * * * *

VII.—PRICES OF FOOD AND LABOUR.

34. The prices of all articles of food were very high during the year under report, particularly those of rice, gram, and wheat, the result of the failure of the main harvest of the preceding year.

35. The price of common rice in the last six years in the last fortnight of March was—

	Srs.	Chs.
1892-93	11	11½
1893-94	11	8¾
1894-95	17	11
1895 96	13	12
1896-97	9	4¼
1897-98	11	14¼

36. The wages of labour during the year under report were practically the same as in the previous year, except for some time after the earthquake of 12th June 1897, when they rose considerably at the district and subdivisional head-quarters of Dacca and Mymensingh, owing to the great demand for labourers. The high prices of food-grains did not affect price of labour.

* * * * *

IX.—TRADE AND COMMERCE.

43. There was no change in the trade routes or trade centres of the Division during the year under report, except that many of the rivers which run through the interior of the district of Mymensingh, including the old Bhahmaputra, have, since the earthquake of the 12th June 1897, become almost impassable during eight months of the year. The principal roads of that district also suffered very considerably from the earthquake, and for several months wheeled traffic was practically impossible.

44. The principal articles of import into this Division are European piece-goods, cotton twists, rice, paddy, gram and pulse, molasses, sugar, salt, lime, timber, corrugated-iron, kerosine oil, potatoes and conch shells.

45. There is nothing special to note about the importation of any of these articles during the year under report, except that in consequence of the very great damage caused by the earthquake to the lime-producing districts of Sylhet and Cachar, a much smaller quantity of lime came to this Division than in previous years from those quarters, and the demand being abnormal the price ruled very high.

46. The chief articles of export from this Division are jute and rice. The Collector of Mymensingh, which is noted for its trade in jute, says that there was an exceptionally good crop of jute during the year under report, but export was much retarded by the damages done to the several trade routes of that district by the earthquake.

47. Backergunge produces most of the rice for export from this Division, and in the season there is a brisk trade by steamers, flats and large boats to Calcutta as well as to Assam. The outturn this year was exceptionally good, and is estimated at 2,59,88,700 maunds, against 1,73,25,800 maunds in the previous year; but though prices ruled high, the export to Calcutta by the canals amounted to 27 lakhs of maunds only, against 23 lakhs of maunds in 1896-97 and 34 lakhs of maunds in 1895-96. The comparatively small exportation to the westward is attributed to the fact that more rice now goes north towards Assam than formerly.

48. Gram and pulse, linseed and mustard seed are also largely exported from this Division. Dacca manufactures, such as plain and striped muslins, kasidas, jamdanis, plain dhutis and chadars, also form somewhat important articles of export from this Division. Country-made striped cloth called

charkhana of a fine quality is manufactured on a small scale in the Sadar subdivision of the Faridpur district and exported to the neighbouring districts.

49. Of the other articles of export, mention may be made of hide, dried fish and ghee from Mymensingh, fish from Faridpur, and cocoanut, betel nut, and *sundari* wood from Backergunge.

50. The outturn of cocoanut and betel-nut was somewhat short during the year under report. The price of the former rose to Rs. 38 per thousand, and that of the latter to Rs. 10 per maund from Rs. 20 per thousand and Rs. 8-8 per maund respectively in 1896-97.

51. Rupees 25,000 worth of *sundari* wood is reported to have been exported from this district during the year under report.

52. There was no appreciable change in the export of other articles, and they do not seem to call for any remark.

53. As reported in previous years, a large portion of the trade of this Division is carried on by means of large country boats, which do not pass through any registering centres, and it is therefore not possible to arrive at any correct estimate of its extent. The statistics supplied to the District Officers by the Railway authorities, however, give us an accurate idea of that part of the trade of the Division which is carried by rail. We have also accurate statistics of the trade of the Custom port at Narayanganj, the most important centre of trade in this Division, which has a large trade with Chittagong Coast ports and Calcutta, both by water *viâ* the Sunderbans or the Eastern Canal and by rail *viâ* Goalundo.

54. *Rail-borne traffic.*—The following two tables, A and B, compare the import and export traffic by rail of each district of the Division as well as that of the Division during the year under report with that of 1896-97. Figures for the trade carried on between one district of this Division with another have been excluded from the divisional figures shown in columns 10 and 11 of the tables.

Rail-borne traffic.

Total	27,17,088	28,30,912	2,26,284	82,243	1,07,19,430	1,42,80,954	2,20,835	32,562	44,970	54,601	2,15,851	3,80,446

Trade of the port of Narayanganj.

56. During the year under report 352 vessels of 42,370 tons burden entered the port as against 308 vessels of 41,324 tons in the previous year. The number of vessels cleared also rose from 317 of 39,294 tons in 1896-97 to 368 of 43,211 tons in the year under report. The increase is attributed to an increased trade during the year in jute, salt and rice.

Of the vessels that entered the port, 92 with cargo and 249 in ballast were from Chittagong, 9 in ballast were from Coconada, and 2 in ballast were from Masulipatam. Of the vessels that cleared, 366 were with cargo and 2 in ballast, and all of them went to Chittagong.

The following statement compares the total trade of the port in 1897-98, with that of 1896-97:—

	1896-97.	1897-98.
1	2	3
	Rs.	Rs.
Imports ...	2,69,818	2,56,995
Exports ...	53,18,523	57,82,979
Total ...	55,88,341	60,39,974

Thus there was an increase in the total trade of the port in spite of a slight falling off in the import trade.

The statistics of the import trade of the port for the past two years are compared in the following table:—

Articles.	1896-97.		1897-98.		Remarks.
	Weight.	Value.	Weight.	Value.	
1	2	3	4	5	6
		Rs.		Rs.	
Salt ...	Tons 4,092	1,16,087	Tons 10,682	...*	* The value of 7,159 tons of salt was not given in the special pass. Hence the total value of the salt could not be ascertained. The value of the remaining quantity of salt was Rs. 92,320.
Cotton ...	Cwt. 4,318	38,860	Cwt. 3,128	21,950	
Rice and paddy ...	„ 10,760	42,677	„ 19,849	1,05,127	
Jute ...	„ 271	2,403	„ 1,021	8,102	
Kerosine oil ...	Gallon 70,667	24,040	...	...	
Timber ...	Tons 297	21,020	Tons 237	11,003	

The increase in the importation of salt is due to the opening of a new bonded warehouse by Babu Kishori Mohan Ray. The decrease in cotton is due to the late cyclone at Chittagong in October 1897, after which no cotton came from that port. The increase in rice and paddy was due to the short local crops. Kerosine oil apparently is no longer imported by ships to the port.

The following table compares the export trade of the year under report with that of the previous year:—

Articles.	1896-97.		1897-98.		Remarks.
	Weight	Value.	Weight.	Value.	
1	2	3	4	5	6
		Rs.		Rs.	
Chalk and lime ...	Cwt. 6,314	3,770	Cwt. 5,803	3,590	
Jute	,, 655,622	50,16,714	,, 817,339	55,24,172	
Salt	Tons 92½	10,775	Tons 18	2,000	
Gram	Cwt. 641	2,070	Cwt. 221	1,343	
Pulse	,, 6,334	17,260	,, 1,554	8,661	
Rice	,, 966	3,542	,, 5,587	31,435	
Metals (iron) ...	.....	.....	,, 36	450	
Oil (other kinds) ...	Gals. 360	570	Gals. 176	500	
Kerosine	,, 208,345	1,13,553	,, 156,310	83,750	
Ghee	lbs. 2,466	1,075	lbs 287	128	
Mustard	Cwt. 10,366	54,770	Cwt. 8,247	42,324	
Other kinds of seeds ...	,, 14	80	,, 27	202	
Sugar	,, 147	1,615	,, 202	1,130	
Tobacco	lbs. 598,438	31,363	lbs. 627,646	43,153	

The increase in jute was due to the crop being the largest on record, and to the export in the previous year having come to a complete stop owing to the high rates of discount ruling in Calcutta. The other variations are attributed to differences in the prices ruling at Narayanganj and Chittagong.

* * * * * * *

XIII.—CRIME.

62. The year 1897 was a year of high prices and hard times, which had the usual effect on crime—increase of cognizable cases (particularly of petty thefts) and decrease of non-cognizable cases, which are often a somewhat expensive luxury. The figures for the Division are—

	1896.	1897.	Increase.	Decrease.
Cognizable ...	18,707	21,649	2,942	...
Non-cognizable	22,690	19,986	...	2,704

It must be noted, however, that part of the increase shown under cognizable is due to the change made in the preparation of the returns, which has led to the entry under reported cognizable offences of cases which, though originally brought under a cognizable section, are subsequently found to come under a non-cognizable section or to be cases of mistake of law or fact. The fluctuations in the figures of the different districts are remarkably in proportion to the extent to which distress was felt. In Faridpur, where special measures were necessary to relieve the distress, the figures for cognizable offences show a rise of 38·0 per cent. as compared with 1896, while those for non-cognizable show a decrease of 22·4 per cent. In Dacca, where the distress was less pronounced, the increase of cognizable cases is 27·5 per cent. and decrease of non-cognizable 4·3 per cent. Mymensingh with but little distress has 13·3 per cent. increase in cognizable, and 14·1 per cent. decrease in non-cognizable, and Backergunge, where distress was practically non-existent, shows only a fraction (⅕th per cent.) increase in cognizable and 8·3 per cent. decrease in non-cognizable. It is satisfactory to find that, notwithstanding the general increase in cognizable crime, there has (except in Faridpur, where true dacoity cases rose from 3 in 1896 to 12 in 1897) been a decrease in organized and serious crime both against property and person, which bears testimony to the general efficiency of the administration in a year of exceptional difficulty. Vigorous and judicious use of sections 107 and 110, Criminal Procedure Code, has contributed much to the success in Backergunge, Mymensingh, and Dacca, and to an undue hesitation to take action under the latter section must to some extent be ascribed the comparative failure in Faridpur.

In connection with serious offences against the person the most remarkable variation is in Backergunge, where the disarmament has been more speedily and thoroughly effective than its warmest advocate ever expected. Murders by gunshot have entirely ceased. The hired midnight assassins have been deprived of both their guns and their occupation and, what is more, the encouragement to violence, which the knowledge of the almost complete immunity enjoyed by them afforded, has been removed and other murders have decreased in proportion. A copy of a very interesting chart drawn up by the Magistrate of Backergunge, which is given below, shows an inter-relation between these two classes of crime which is too constant to be accidental, and which gives good ground for hoping that gunshot murders having ceased, other murders will in the future be few and far between.

BACKERGUNGE.

Chart of murders and gunshot murders in the district for four years ending 1897.

XIV.—POLICE.

63. The regular police force in the Division in the year 1897 was made up of 4 District Superintendents of Police, 4 Assistant Superintendents, 23 Inspectors, 221 Sub-Inspectors, 137 Head Constables, and 1,881 constables—a small force to keep the peace, restrain bad characters, and bring to justice criminals among 10 millions of people in the four most turbulent districts of Bengal and (*pace* critics who, judging hastily from the misconduct of a few, condemn the whole body) on the whole an efficient one, as is proved by the manner in which crime has been dealt with (*vide super* section XII). It is impossible for any one who has watched the working of the police to be blind to the fact that there has been and still is much bribery and much bad work, but the black sheep in the force have always been in the minority, and there are not wanting signs that the steps taken in recent years to improve the condition of the force are having the hoped-for effect. The district reports show general improvement in work and conduct; the number of complaints brought against police officers has decreased, and in no case has any heinous offence been proved against them.

During the year it was found necessary to post special police forces at Karotia in Mymensingh and at Haturia in Backergunge to prevent disturbances likely to arise from rival claims to estates, and in Backergunge eight men were appointed special constables for two months in a turbulent village called Harinafullia.

The rural police number 19,761 in the Division. Of these, about one-half are Mussulmans and the other half chiefly low-caste Hindus. Efforts have been made in some districts to recruit Hindus of a higher caste, but without much success, and it is doubtful whether the want of success in this direction is to be regretted. High-caste men make better daffadars than chaukidars, and it would be as well to recruit them as daffadars only. The large village and daffadari system is in complete working order in Backergunge, and the Magistrate of that district is well satisfied with it. In Mymensingh, Dacca, and Faridpur the principle of the "large village" has been misunderstood; the "villages" will have to be re-arranged, and it will be some time before these three districts will reap the full advantage of the new system.

The Chaukidari Reward Fund has in general been properly administered, and the considerable sum of Rs. 12,731 has been paid in rewards. In all districts, however, the fund at the end of the year had a large sum to credit, and everywhere more might be done towards granting rewards for general good conduct.

The chaukidars have in general worked well throughout the year, and there is no doubt they are a much more useful body of men than they were 20 or even 10 years ago, but I am not satisfied that in any of the districts of the Division as much is done to make use of them as might be. With good daffadars as a link between him and the chaukidar, any Sub-Inspector worth his salt should know everything that goes on in his *elaka*, and neither riot nor dacoity should take him by surprise.

XV.—CRIMINAL JUSTICE.

64. There were 33,997 persons actually under trial in the Division during the year. Of these, 32,668 were tried, and of those tried 19,333, or 59 per cent, were convicted.

Judging from the number of persons under trial, the courts had most work in Mymensingh (10,994 under trial) and least in Faridpur (7,226). Backergunge stands second with 8,423, and Dacca third with 7,354. Of the persons tried during the year, 9,351, or more than one-fourth of the total, were tried by Honorary Magistrates, of whom there are in the Division 272, and who constitute 37 benches. Of course the cases made over to Honorary Magistrates are, as a rule, cases of a petty nature, which can be completed at one sitting; but making every allowance for this, it is clear that if it were not for the Honorary Magistrates, the Stipendiary Magistrates would never be able to cope with the work. As a rule the District Magistrates speak well of the work done by the Honorary Magistrates, but in some instances complaints are made of irregular attendance and unnecessary adjournments—defects which careful supervision will remove.

In the various courts of session 543 persons were tried during the year, of whom 326 were convicted and 217 acquitted. The number of persons acquitted in the Sessions Courts exceeded the number convicted in both Mymensingh and Faridpur, but in Dacca and Backergunge the percentages of conviction were 70·7 and 76·3 respectively.

The number of cases declared false by the courts is only 799, against 1,268 in the preceding year. The decrease is, however, not due to steps taken to check the institution of false cases (for in only 49 cases were proceedings taken against the complainants, and only 15 of the complainants were convicted), but to change in method of classification. As a matter of fact, it is improbable that one-fourth of the 799 cases declared false were really false cases, *i.e.*, cases without some substratum of truth. The more closely cases are scrutinised the more is it found that charges which at first sight seem false are in substance true, but have a fringe of exaggeration around them, and it is the want of proper scrutiny in the initial stage which leads to the large number of cases declared false and the extremely small number in which those who are thought to have brought false charges are convicted. It is sometimes hastily assumed that it is extremely difficult to prove a false case is false, but the fact is that in general a false case can easily be proved to be false, and that seeming failures are not failures at all, because the original charges made were substantially true. This is the real explanation of the constantly recurring phenomenon of a large number of false cases (so-called) and lamentation over the small number of convictions for the institution of such cases.

It is unsatisfactory to note that there has been an increase in the number of remands in police cases. The number of A forms remanded 6 times or more rose from 68 in 1896 to 104 in 1897 in Dacca; in Mymensingh the corresponding numbers are 86 and 135 and in Faridpur 55 and 135.

Backergunge alone shows an improvement, the figures being 72 and 71.

* * * * * * *

XVIII.—ATTACHED ESTATES INCLUDING COURT OF WARDS.

*(1) Talipabad estates in Dacca.
(2) Kanakshar estate in Faridpur.
(3) Dakhin Shabazpur estate.
(4) Lucas and other estates.
(5) K. M. Roy and other estates in Backergunge.

79. At the commencement of the year under report there were 5* properties under the management of the Court of Wards in this Division, of which one (Talipabad estates) was released during the year under report. No new estate was taken charge of during the year.

The survey and record of rights of the Kanakshar estate in Faridpur commenced in 1895-96 have been completed during the year, and the final report will shortly be submitted for confirmation. Survey and record of rights of the other estates were completed in previous years.

The total arrear and current demand of all the estates under the management of the Court of Wards for the year under review was Rs. 2,30,358, of which Rs. 1,87,738, or 81·4 per cent., was realized and Rs. 11,825, or 5·1 per cent., remitted as irrecoverable, leaving a balance of Rs. 30,681 at the close of the year.

The net revenue of the estates after payment of land revenue and rent to superior landlord was Rs. 94,076, Rs. 559 was spent in payment of debts, Rs. 34,029 in management, Rs. 42,514 in maintenance, Rs. 16,600 in improvements, and Rs. 22,509 in miscellaneous works. The surplus, including the cash balance of the preceding year, amounted to Rs. 60,196.

The condition of the tenants on the whole was satisfactory: there was no friction between them and the managing agency and the management has in every estate been successful. Mr. Beatson Bell, Collector of Backergunge, in which district the largest of the estates lie, reports:—

"The condition of the tenants was prosperous on account of the excellent harvest and its high price. The plague of the betel-nut trees has practically disappeared. It is satisfactory to find that no estate in this district is now in what I may call the 'Register of bad characters,' the outstanding balance being in every case less than 25 per cent. of the current annual demand."

I may add that peace now reigns where before the estates came under the Court's management there was constant war.

* * * * * * *

XXIII.—RAILWAY AND OTHER PUBLIC WORKS.

85. The gross receipts derived from the Dacca section of the Eastern Bengal State Railway during the 12 months ending 31st March 1898 amounted to Rs. 5,56,220, against Rs. 4,93,205 in the previous 12 months. The increase is ascribed to the exceptionally heavy traffic of passengers during the late Nangalband fair, to the excellence of the jute crop in Mymensingh, and also to the opening of the Assam-Bengal line of railway, which has improved communication between Chittagong, Comilla, Chandpur, Naraingunge, Dacca, and Mymensingh.

No new line of railway was opened in the district of Dacca during the year under review, but the project of a railway from Sealo to Munshiganj has been revived. The earth-work on the Mymensingh-Jamalpur extension of the Dacca section of the Eastern Bengal State Railway has been completed, and rails are being laid as rapidly as possible; on the Jamalpur-Jagannathganj extension the earth-work is more than half-finished. The whole line is expected to be open by the end of March 1899. It is believed that the line might be profitably extended to the borders of the Garo Hills. The extension of the Eastern Bengal State Railway line to Faridpur will, it is expected, be completed by the next cold weather.

A new division of the Public Works Department, with its head-quarters at Dacca, was created temporarily during the year under review for the repair of the heavy damages done to the Government buildings in Dacca and Mymensingh by the earthquake of the 12th June 1897, and all Government works in these two districts, as well as those in Faridpur, were retransferred from the District Boards to this new Public Works division in the latter half of the year. The charge of the public buildings in Backergunge remained with the District Board, and it is reported that work went on smoothly under the supervision of the District Engineer.

86. Other important public works executed during the year were—

In Mymensingh.

(1) The protection of a portion of the western bank of the river Brahmaputra opposite the Collector's kutchery at a cost of Rs. 4,123.

(2) The construction of a first-class mortuary.

In Faridpur.

(3) The construction of the Telegraph office at Rajbari.

In Backergunge.

(4) The subdivisional court-house at Patuakhali.

My office building and residence (both private buildings, but held by Government on long leases), which were badly damaged by the earthquake, were thoroughly repaired during the year. No original work was undertaken after the earthquake, as all the money available had to be devoted to the repairs.

As the hired building which provided accommodation to the Dacca District Board office and the dâk bungalow was badly damaged by the earthquake, the District Board has acquired on thirty years' lease a private building for its office and the dâk bungalow, and has repaired the same. The cost of repairs will be recovered by deduction from the rent of the building.

XXIV.—COMMUNICATIONS.

87. The table below shows the length of roads of different classes in the several districts of this Division:—

Districts.	District Roads.								Village roads.	
	Embanked, bridged and metalled.		Embanked, bridged, but not metalled.		Not embanked and not bridged.		Total.			
1	2		3		4		5		6	
	Miles.	Fur.	Miles.	Fur.	Miles.	Fur.	Miles.	Fur.	Miles.	Fur.
Dacca	7	5	206	0	63	5	277	2	179	4
Mymensingh ...	34	0	525	4	100	4	660	0	1,717	4
Faridpur	11	0	123	1	19	4	153	5	32	6
Backergunge ...	12	6	270	1	.....		282	7	407	2
Total of 1897-98 ...	65	3	1,124	6	183	5	1,373	6	2,337	0
Total of 1896-97 ...	62	5	1,110	3	183	0	1,356	0	2,299	0
Increase or decrease ...	+2	6	+14	3	+0	5	+17	6	+37	2

88. The expenditure on new works was:—

Districts.	Amount spent in—	
	1897-98.	1896-97.
1	2	3
	Rs.	Rs.
Dacca	10,393	11,973
Mymensingh	39,594	50,268
Faridpur	5,011	9,827
Backergunge	55,265	43,646
Total ...	1,10,263	1,15,714

The most important works on which the above sums were spent were the improvement of the railway feeder roads—Tangi to Kaligunge in the district of Dacca, and Balipara to Shibgunge in Mymensingh, and metalling station ghat road in Faridpur.

89. The expenditure on works of repair was:—

Districts.	Amount spent in—	
	1897-98.	1896-97.
1	2	3
	Rs.	Rs.
Dacca	26,430	25,578
Mymensingh	62,749	38,181
Faridpur	8,969	10,086
Backergunge	31,136	27,747
Total ...	1,29,284	1,01,592

The large increase in Mymensingh was due to expenses incurred in making the roads passable after the earthquake of the 12th June 1897.

90. The subjoined table shows the expenditure on village roads :—

Districts.	1897-98.			1896-97.		
	Original works.	Repairs.	Total.	Original works.	Repairs.	Total.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Dacca ...	958	3,526	4,484	2,494	5,937	8,431
Mymensingh ...	4,093	14,164	18,257	11,395	9,640	21,035
Faridpur ...	2,345	3,976	6,321	3,405	4,623	8,028
Backergunge ...	17,121	21,913	39,034	17,169	18,523	35,692
Total ...	24,517	43,579	68,096	34,463	38,723	73,186

The decrease in Dacca under both the heads "Original works" and "repairs," and in Mymensingh under head "Original works," is explained as due to the transfer of some grants originally made for village roads to water-supply. The decrease in Faridpur has not been explained. In Backergunge short village paths are particularly useful, and expenditure on them must tend much to make the road cess popular.

91. The following statement shows the number of ferries managed by the different bodies in each district:—

Districts.	Under Government management.		Under District Board management.		Under municipal management.		Total.	
	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.
1	2	3	4	5	6	7	8	9
Dacca	2	2	70	60	4	4	76	72
Mymensingh	2	2	179	173	2	1	183	176
Faridpur	...	...	21	21	4	4	21	25
Backergunge	4	4	30	28	5	5	39	37
Total ...	8	8	300	288	15	14	319	310

The steam ferry between Narainganj and Munshiganj continued to be managed by the Dacca District Board, and was let in farm as in the previous years. The receipts amounted to Rs. 5,412 and the working expenses to Rs. 2,837. There was thus a surplus of Rs. 2,575 to meet the cost of depreciation. The Mymensingh District Board suffered considerable loss of income from ferries on account of the upheaval of river-beds by the earthquake of the 12th June 1897, whereby many ferry sites became fordable.

* * * * * * *

XXVI.—EDUCATION.

96. The following statement shows the state of education in the Division during the past year:—

Statement showing the state of Education during the year 1897-98 in the Dacca Division.

Population 9,845,296. Number of boys of school-going age (at 15 per cent. of the male population) 750,819.

Class of Schools.	Number of schools existing at the end of the year.	Number of pupils on the rolls at the end of the year.		Expenditure from—						Cost per head of pupil.	Number of girls in each class of schools.	Remarks.
				Provincial revenues.	District Boards' funds.	Municipal funds.	Fees.	Other sources.	Total.

97. The number of public institutions, which are schools of organised instruction, teaching the various standards prescribed by the Education Department, decreased by 465 from 8,897 to 8,432, and the number of pupils attending them by 7,229 from 236,302 to 229,073. Of the total pupils at school, 213,522 were boys and 15,551 were girls. Besides the public institutions, there were 3,620 private institutions, such as *tols*, *maktabs*, *koran* schools (with 37,585

pupils), which do not teach the departmental standards. There was a loss of 306 schools of this class, but a gain of 98 pupils attending them. High price and scarcity of the past two years affected the educational prospects of all the districts in the Division, those of Mymensingh most severely. Of the boys of school-going age in the Division, 32·9 per cent., and of such girls 2·6 per cent., are actually at school. These percentages in the preceding year were 33·8 and 2·8 respectively.

The total expenditure on education increased by Rs. 42,606, the increase in contribution from public sources being Rs. 11,988, and that from private sources Rs. 30,618. The contribution from public sources formed 30·2 per cent. of the total expenditure; the direct Government expenditure being only 14·1 per cent. There was a slight increase of expenditure from district funds, the municipal expenditure on education remained unchanged, but was redistributed, part being withdrawn from secondary and paid to primary education.

The results of the last University Entrance examination are not yet published. At the middle English scholarship examination 68 per cent. of the competing schools and 58 per cent. of the competing candidates passed. At the middle vernacular examination the percentages of competing schools and candidates were 66 and 37 respectively. These examinations are losing their importance, as they do not qualify a successful candidate for receiving any professional education. Education in vernacular only without English beyond the primary standards is growing less and less popular every day. The primary schools continue to grow in popularity, and they are largely resorted to by cultivating classes, and it does not appear that education up to the primary standards renders a boy unfit or unwilling to follow his father's calling. At the upper primary examination 71 per cent. of the competing schools and 53·5 per cent. of the competing candidates were successful. The corresponding figures for the lower primary examination were 84·1 and 68·5 respectively.

The number of girls' schools decreased by 97 from 1,139 to 1,042 and their pupils by 1,433 from 14,631 to 13,198; there are half as many girls again in boys' schools, which raise the total number of female children under instruction to 19,250.

The Eden Female School in Dacca is the only Government institution for girls; it had 137 girls on its rolls, and cost Rs. 6,486, of which Rs. 5,635 was paid from Provincial revenues. This school, which teaches up to the University Entrance examination, and is also allowed to compete at all lower examinations, sent in candidates for primary examination only, and five girls passed the lower primary examination, one girl from Backergunge passed the middle vernacular examination, 17 girls in the Division passed the upper primary, and 292 the lower primary examination.

There are 7 special schools in the Division; the training school, the survey school, the medical school, and the Madrasah at Dacca are Government institutions. The industrial schools at Mymensingh and Barisal are maintained by District Boards; the former, however, receives a contribution of Rs. 2 00 a year from Rai Jogendra Kissore Roy, zamindar, after whose father's name the institution is called Kasi Kishore Industrial School. There is an unaided homœopathic school at Dacca. The condition of the training school and the medical school remained unchanged. The survey school lost heavily in strength, the number of pupils falling from 324 to 190. The industrial schools are affiliated to the Sibpur Engineering College. The school at Barisal, which was about to collapse, was resuscitated during the year under the advice of the Principal of that College. It had 30 pupils and Mymensingh School only 13. Both the schools are going on fairly well.

The Madrasah at Dacca had 491 pupils, against 471 of the previous year. It is supported by the Mohsin Endowment Fund, and cost Rs. 17,317, of which Rs. 3,332 was raised from fees. The institution is well endowed with scholarships and prizes.

The number of Muhammadans under instruction decreased by 3,403 from 137,060 to 133,657. The Muhammadans constitute 65·3 per cent. of the total population of the Division, but the percentage of Muhammadans at school to total school population is 50·1, which is the same as in the last year. At the lower primary examination the Muhammadans were fairly successful, but at the higher examination they were less successful.

XXVII.—DISPENSARIES AND HOSPITALS.

98. Dispensaries have increased in number from 79 to 85 and patients, indoor and outdoor, from 481,863 to 552,971. The increase is most marked in Backergunge, where alone the increase in patients has been more than 40,000. The increase is chiefly among outdoor patients.

The Dufferin Zanana Hospital attached to the Dacca Mitford Hospital has been completed, and is now being furnished. The Johnson Ward, to be in addition to the Simpson Ward of the Mitford Hospital, which is being constructed by the liberality of Raja Rajendra Narain Roy Bahadur of Bhowal for treatment of women of *bhadra lok* class, is not yet complete.

A new and separate dissecting room for the female students of the Dacca Medical School has been built during the year. At Mymensingh a separate pauper ward has been constructed during the year at a cost of Rs. 2,150 by local subscription.

With the approval and sanction of Government the management of the Mitford Hospital at Dacca has been made over by the Municipal Commissioners to a body of Governors, with the Magistrate as Chairman and the Civil Surgeon as Secretary. This change was made in the expectation of obtaining large private subscriptions and donations. The Municipality will contribute a fixed sum of Rs. 11,000 annually towards the maintenance of the institution.

The total income of the dispensaries during the year was Rs. 1,31,407, against Rs. 1,07,126 in the preceding year; of this, Rs. 66,168 was from private subscriptions, as against Rs. 59,471 of the previous year. The total expenditure was Rs. 1,26,934, against Rs. 1,00,870 of the preceding year.

* * * * * * *

XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

101. The subjoined statement shows the constitution of the District and Local Boards, and the number of meetings held by them during the year under report:—

District and Local Boards.

Name of Board.	Number of Members.			Number of meetings.
	Official.	Non-official.	Total.	
1	2	3	4	5
District Board, Dacca ...	9	20	29	12
Ditto, Mymensingh ...	5	20	25	19
Ditto, Faridpur ...	9	16	25	15
Ditto, Backergunge ...	9	16	25	16
Total ...	32	72	104	62
Local Boards in Dacca ...	1	44	45	30
Ditto in Mymensingh ...	4	60	64	69
Ditto in Faridpur ...	2	31	33	30
Ditto in Backergunge ...	15	38	53	54
Total ...	22	173	195	183

The number of Local Boards which failed to meet once a month was 6 only, against 11 in the previous year.

The constitution of the District Boards of Dacca and Faridpur remained unchanged. The District Boards of Mymensingh and Backergunge were reconstituted during the year of report.

The following statement shows the financial position of the District Boards during the year as compared with the previous year :—

Name of District Board.	Opening balance.		Total income.		Total expenditure.		Closing balance.	
	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Dacca	54,260	54,693	1,85,801	1,81,803	1,71,761	1,82,205	68,300	54,261
Mymensingh ...	40,880	37,624*	3,32,052	3,31,035	3,43,366	3,15,179	28,566	40,880
Faridpur	15,708	110	1,18,003	1,33,236	1,07,121	1,17,638	26,650	15,708
Backergunge ...	99,429	70,288	2,74,418	3,01,113	2,83,494	2,71,972	90,353	99,429
Total ...	2,19,277	1,62,085	9,00,334	9,47,187	9,05,742	8,89,094	2,13,869	3,19,278

As to the working of the District and Local Boards of this Division, I quote the remarks recorded by the Magistrates of districts:—

Mr. L. P. Shirres, Officiating Magistrate-Collector of Dacca, writes:—

"The members of the District Board did their work with zeal and intelligence. The assistance they rendered to the administration was very real and very great. Collectively they possess great commonsense, and help to promote continuity of policy and to prevent rash and wasteful expenditure. The work of the Local Boards has not been equally satisfactory."

Mr. F. R. Roe, Officiating Magistrate-Collector of Mymensingh, writes:—

"I took over charge of the district after the year closed, and I have no personal knowledge of the manner in which the District and Local Boards worked during the year. My predecessor, Mr. Harris, remarks in his note left for the District Board Report that the meetings of the Board have been generally well attended, that there was no tendency to obstructiveness, and that business has been expeditiously conducted. The Local Boards also are said to have shown an interest in the affairs of their subdivisions, and to have made judicious allotments of their funds."

Mr. K. C. De, Officiating Magistrate-Collector of Faridpur, writes:—

"My predecessor, Mr. Temple, has left the following remarks on the working of the District and Local Boards:—

'The Board has worked smoothly throughout the year, and as a consultative body has done good work. I have on several occasions obtained useful local information from the various members. The inclination to do office work, however, is small, and there is room for much more zeal on the part of some members working on certain of the Sub-Committees. I am not an admirer of Local Boards, and my (one) year's experience at Faridpur has in no way tended to alter my opinion. Perhaps their chief business is their supervision of pounds and ferries, and this has certainly not struck me as satisfactory, and this is the more noticeable, as a Special Pound and Ferry Inspector is employed. I have tried to impress upon the Chairmen of the various Local Boards the necessity of supervising the work of the Inspector carefully, and seeing that the neglects which he brings to light are really remedied; but from the report and what I have myself seen, I am afraid pound-farmers in particular are not kept up to the mark as they should be.'"

Mr. Beatson Bell, Officiating Magistrate-Collector of Backergunge, writes:—

"The District Board worked well during the year. I never found them in any way obstructive. The Vice-Chairman, who has recently been honoured by Government with the title of Rai Bahadur, is an excellent man of business."

Union Committees under the Local Self-Government Act have not yet been established in any of the districts of this Division.

102. The constitution of the Municipal Committees of this Division is shown below:—

Municipalities.

Profession or Occupation.	Municipalities in the district of—				Total.
	Dacca.	Mymensingh.	Faridpur.	Backergunge.	
1	2	3	4	5	6
1. Government servants	6	15	6	9	36
2. Ditto pensioners... ...	...	1	...	..	1
3. Zamindars and other landholders ...	8	24	3	8	43
4. Pleaders and mukhtars ...	6	34	13	14	67
5. Merchants, traders, and money-lenders.	7	3	2	10	22
6. Medical practitioners	2	8	...	2	12
7. School-masters and other Government servants.	...	10	1	2	13
8. Unspecified	4	14	5	8	31
Total ...	33	109	30	53	225

The Patuakhali Municipality, in the district of Backergunge, was reconstituted during the year. There was one bye-election in the Dacca Municipality and one in Barisal.

The following statement shows the financial position of the municipalities, district by district, during the year of report, as compared with the previous year:—

Municipalities in the district of—	Opening balance.		Total income in—		Total expenditure in		Balance in—	
	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.	1897-98.	1896-97.
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Dacca	4,031	9,189	2,72,585	2,02,441	2,50,593	2,07,599	26,023	4,031
Mymensingh	24,118	12,472	78,363	96,836	90,650	85,190	11,831	24,118
Faridpur	4,091	1,849	21,902	30,456	25,358	27,713	635	4,091
Backergunge	4,906	2,045	44,718	44,851	41,941	42,500	7,773	4,906
Total ...	37,236	25,655	4,17,338	3,74,582	4,08,542	3,63,002	46,022	37,236

Mr. L. P. Shirres, Officiating Magistrate-Collector of Dacca, writes on the working of the municipalities in his district:—

"The Naraingani Municipality under the able administration of Mr. Wilson continued, as in previous years, to be admirably managed. Since the close of the year the Municipality has had to regret his loss on retirement from business. In Dacca the load of debt improperly contracted was paid off, the administration of the Mitford Hospital was put on a separate basis, the roads were very greatly improved, chiefly through more efficient supervision of repairs, a very little progress was made in the reorganisation of the administration, and something was done towards introducing the central depôt system. On the whole, however, the sanitary condition was substantially the same as before. Better progress has, I am glad to say, been made since the close of the year"

On the working of the municipalities in his district, Mr. F. R. Roe, Officiating Magistrate-Collector of Mymensingh, writes:—

"I saw nothing of the working of the municipalities during the year under report. Mr. Harris has not left a special note on the subject. Judging from my short acquaintance with the municipalities of the district, I am of opinion that on the whole the Committees do fairly satisfactorily what is required of them, but there is a tendency to petty internal intrigue in many of them."

About the municipalities of his district, Mr. K. C. De, Officiating Magistrate-Collector of Faridpur, writes:—

"The Faridpur Municipality is very ably managed by the energetic and public-spirited Chairman, Babu Ambica Charan Mazumdar. The Vice-Chairman, Babu Mathura Mohan Maitra, is also an experienced gentleman, and takes a great deal of interest in the office work. The Chairman and Vice-Chairman of the Madaripur Municipality are newly appointed and utterly inexperienced. The Chairman, however, does not seem to be apathetic, and the Vice-Chairman is very energetic."

Mr. Beatson Bell, Officiating Magistrate-Collector of Backergunge, writes on the working of the municipalities in his district:—

"All the municipalities have done good work during the year. Nalchiti was somewhat dislocated for several months owing to the absence of a Chairman. Mr. Hare left some valuable notes for the guidance of the municipalities in the matter of latrines. Some action has already been taken on his suggestion, but much remains to be done."

On the whole, it seems that District Boards and municipalities have done good work, but that Local Boards are nowhere held in much esteem.

XXXI.—EMPLOYMENT OF MUHAMMADANS.

103. Out of the 12 subdivisions in the Division, 3 are in charge of Muhammadan Deputy Magistrates, and of 58 Rural Sub-Registrars, 34 are Muhammadans. But of 274 Honorary Magistrates, only 53, and out of 2,118 jurors and assessors, only 297 are Muhammadans. There are only 2 Muhammadan Deputy Inspectors and 1 Muhammadan Sub-Inspector of Schools out of 7 Deputy Inspectors and 22 Sub-Inspectors. On the different Local Self-Government Boards, the number of Muhammadans is shown below:—

	Total number of members.	Number of Muhammadan members.	Percentage.
1	2	3	4
District Boards ...	104	15	14·4
Local „ ...	196	44	22·4
Municipal „ ...	225	36	16

The number of Muhammadan ministerial officers has increased by ten during the year, which is satisfactory as far as it goes. In all districts the interests of Muhammadans are kept in view, and they are employed whenever it is possible to employ them with proper regard to the requirements of the public service, but the backward state of education among the Muhammadan community will for long render it impossible to give Mussalmans a share in the public service proportionate to their numbers.

The percentage of the Muhammadan to the Hindu population is 65·6, but the percentage of offices held by the former is only 25·5.

* * * * * * *

XXXVII.—GENERAL REMARKS.

118. The year began under the shadow of famine, and the earthquake of 12th June enhanced the gloomy prognostications. Six months of high price and anxiety were, however, followed by six months of such abundance that at the end of the year nearly all traces of preceding hardships had disappeared.

The life-boat establishment at Goalundo continued to do good work, and saved 141 lives during the year.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS OF THE PORT OF CHITTAGONG FOR THE YEAR 1897-98.

No. 1924Marine.

Government of Bengal.

MARINE DEPARTMENT.

Dated Calcutta, the 4th October 1898.

RESOLUTION.

READ—

The Administration Report of the Commissiners of the Port of Chittagong for the year 1897-98.

The financial position of the Chittagong Port Fund for the past two years is shown in the following statement:—

1	1896-97.	1897-98.
	Rs. A. P.	Rs. A. P.
Opening balance of the year	56,957 9 7	8,709 1 8
Receipts during the year	55,235 2 11	1,09,785 11 6
Total ...	1,12,192 12 6	1,18,494 13 2
Expenditure during the year	98,803 1 8	1,04,983 15 1
Balance at the close of the year	13,389 10 10	13,510 14 1
Total ...	1,12,192 12 6	1,18,494 13 2

Up to the year 1897-98, the Port Commissioners had been including in their budget estimates the receipts and charges of the Chittagong Hospital Port Dues Fund. Under section 50 of the Indian Ports Act, 1889, the accounts of this fund should be kept separate, and this was brought specially to the notice of the Commissioners while sanctioning their estimates for 1897-98. Accordingly, in the estimates of that year, the Commissioners have deducted the balance in hand of the Hospital Port Dues Fund from Rs. 13,389-10-10, the opening balance of the year, reducing it to Rs. 8,709-1-8, as shown in the above statement.

Shipping.

2. The subjoined table shows the number and tonnage of the vessels which visited the port during the year, as compared with the figures of the two previous years:—

1		1895-96.		1896-97.		1897-98.	
		Number.	Tonnage.	Number.	Tonnage.	Number.	Tonnage.
		2	3	4	5	6	7
European vessels trading with foreign ports.	Entered ...	21	38,655	11	21,317	24	40,334
	Cleared ...	19	33,787	11	20,915	17	29,146
British Indian vessels trading with foreign ports.	Entered ...	3	569	3	361	...	...
	Cleared ...	...	...	...	...	...	...
Vessels trading with home ports.	Entered ...	600	211,882	559	179,505	578	176,128
	Cleared ...	620	217,873	548	175,944	592	187,402

3. The total value of the foreign trade during the year is stated to be Rs. 81,50,349, of which Rs. 18,44,229 is under imports. There is an increase of Rs. 6,10,747 in the value of the trade as compared with that of the previous year.

Foreign trade.

4. The total value of the coasting trade is given at Rs. 1,59,76,695 against Rs. 1,42,63,654 of the previous year, showing an increase of Rs. 17,13,041. The increase is due mainly to the import of large quantities of rice from Akyab, Rangoon and Kyaukpyu, owing to the failure of the local crop, and, as regards exports, to larger shipments of specie to Rangoon and Akyab for buying rice for Chittagong.

Coasting trade.

5. The principal articles of trade are shown in the following statement:—

Principal articles of trade.

				1896-97.	1897-98.
Exports	...	Jute	... Tons	31,887	36,613
		Grain	... Tons	2,536	5,206
		Tea	... lbs.	1,130,983	899,590
Imports	...	Salt	... Tons	1,956	24,141
		Mineral oil	... Gals.	960,623	1,339,050

6. The appliances of the port were considerably damaged by the cyclone of October 1897. They have since been repaired, and are now reported to be in good working order.

Port appliances.

The light-house at Kutubdea and the light-keeper's quarters also suffered considerable damage. A third order dioptic light has been ordered from England. In the meantime, a temporary light has been erected. Temporary sheds have also been erected for the accommodation of the light-keeper.

7. The earnings of the steam-tug *Gekko* maintained by the port amounted to Rs. 17,993-12, while the expenditure on maintaining the vessel aggregated Rs. 13,723-6-8. A saving, moreover, was effected by the vessel, amounting to Rs. 16,000, being the estimated value of the services performed for the port, for which no charge was made. Deducting the expenditure from this sum a balance of Rs. 2,276-9-4 is left, which, added to the actual earnings, increased the net earnings on account of the *Gekko* to Rs. 20,270-5-4.

Earnings and expenditure of the steam-tug *Gekko*.

8. The general health of the shipping in the port was good. Eighty-eight seamen were admitted into hospital against 21 of the previous year, of whom one died, 76 were cured, and 11 discharged after receiving medical treatment.

Health of the shipping.

9. The state of the Pilotage Fund is shown in the subjoined table:—

Pilotage Fund.

	1896-97.			1897-98.

10. The working of the Pilot Service during the year was satisfactory. The Lieutenant-Governor notices with pleasure that there was no accident to vessels while in charge of Pilots.

Pilot Service.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, *Col.*, R.E.,
Secretary to the Government of Bengal.

WORKING OF THE BENGAL JUTE WAREHOUSE AND FIRE-BRIGADE ACT IN THE COSSIPORE-CHITPUR AND MANIKTALA MUNICIPALITIES.

No. 5884M.—The 3rd October 1898.—The following report is published for general information in accordance with the provisions of section 41 of the Licensed Warehouse and Fire Brigade Act of 1893.

E. N. BAKER,
Offg. Secy. to the Govt. of Bengal.

No. 87M., dated Calcutta, the 26th August 1898.

From—C. E. BUCKLAND, Esq., C.I.E., Commissioner of the Presidency Division,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit herewith copies of Reports on the working of the Bengal Jute Warehouse and Fire-Brigade Act of 1893 for the year ending 31st March 1898, in the Cossipore-Chitpur and Maniktala Municipalities as received from the Chairmen of those Municipalities.

No. 546, dated Talla, the 5th August 1898.

From—BABU KRIPA NATH DUTT, Chairman, Cossipore-Chitpur Municipality,
To—The Magistrate of the 24-Parganas.

I HAVE the honour to submit the following Report under section 41 of Act I (B.C.) of 1893, of the Jute Warehouses, &c., in the Cossipore-Chitpur Municipality for the year ending 31st March 1898, for submission to the Local Government.

2. During the year under review licenses were granted to 97 jute presses and warehouses, including roperies and fire-wood depôts as detailed below, and the amount of license fees realised was Rs. 12,457-13-6, against Rs. 12,226-8-9, realised during the preceding year, viz.—

		Rs.	A.	P.
12	Jute press-houses	8,660	0	0
75	„ warehouses	3,658	10	6
7	„ roperies	93	0	0
3	Wood depôts	11	3	0
	Mutation fees	35	0	0
97	Total ...	12,457	13	6

There has been no increase or decrease in the number of jute press-houses, but there has been an increase of 7 jute warehouses during the year under review.

3. The following statement shows the receipts and disbursements of the jute license fees during the year under review:—

Receipts.	Amount.	Disbursements.	Amount.
1	2	3	4
	Rs. A. P.		Rs. A. P.
Opening balance on the 31st March 1897.	7,131 2 11	Paid to the Commissioner of Police for the maintenance of Fire-Brigade for the year 1897-98, as per budget estimates.	11,592 0 0
License-fees, &c., realised for the year 1897-98 under Act I of 1893.	12,457 13 6	Paid to the Commissioner of Police for establishment, for 1897-98.	700 0 0
Received from the Commissioner of Police for establishment for assessing new jute warehouses and collecting jute warehouse license fees for 1897-98.	700 0 0	Balance at the hands of the Commissioners on the 31st March 1898.	7,997 0 5
Total ...	20,289 0 5	Total ...	20,289 0 5

4. During the year under review the Commissioner of Police reported that fire broke out in several places within the Cossipore and Chitpur thanas, and the property destroyed was to the approximate value of Rs. 50,148, as detailed below:—

Date.	Locality with the section letter.	Duration of fire.	Approximate value of property destroyed.	Remarks (showing the nature of damage done).
1	2	3	4	5
			Rs.	
9th May 1897 ...	Dhariabagan Road, A Suburbs	5 minutes ...	2	Small portion of a *golpata* hut.
27th October „ ...	Ghughudanga, A „	15 „ ...	5	One *golpata* hut completely burnt.
10th November „ ...	Moti Jheel, A „	5 „ ...	1	Small portion of a *golpata* hut.
23rd „ „ ...	Cossipore Road, B „	48 hours ...	35,000	Jute godown containing jute.
18th January 1898 ...	Moti Jheel, A „	45 minutes ...	15	One *golpata* hut.
9th February „ ...	Gun Foundry Road, B „	14 hours ...	15,000	Jute godown containing jute.
5th March „ ...	Tindal Bagan, B „	1½ „ ...	100	Three tiled huts.
24th „ „ ...	Ratan Babu's Ghat Road, A Suburbs.	30 minutes ...	25	One *golpata* hut.

The accompanying statement gives a list of the jute presses, warehouses, roperies, &c., to which licenses were granted during the year 1897-98.

No. 160, dated Maniktola, the 12th August 1898.

From—The Chairman of the Maniktola Municipality,
To—The Magistrate of the 24-Parganas.

WITH reference to your memorandum No. 1036M. of the 23rd July 1898, I have the honour to submit the following Report on the working of Warehouses and the maintenance of the Metropolitan Fire-Brigade for the year 1897-98, in accordance with the provisions of section 41 of Act I of 1893, as amended by Act I of 1894.

2. The Fire-Brigade Budget for the year under review was prepared by the Commissioner of Police under section 26 of the Act.

3. The proportionate share at 10 per cent. of the estimated amount of Rs. 62,660 payable by this Municipality was accepted by the Commissioners, and they contributed Rs. 627 towards the maintenance of the Fire-Brigade establishment, and the amount was paid in two instalments.

4. During the year under review eight licenses were issued on the jute warehouses, and 82 on the other descriptions of trades, such as dealing in fire-wood, hay, sawing-mill, packing case, *durmah* mats, straw, *golpata* depôts, &c., against 8 and 72 of the preceding year. The total amount realised as fees from both classes of warehouses was Rs. 1,316-10-9, against Rs. 1,256 of the past year.

The Commissioners levy license fees at 6 per cent. per annum on the annual value of holdings, as assessed to the payment of municipal taxes, on jute warehouses, and 10 per cent. on other trades delineated above.

5. Under the Government Notification No. 2833M., dated the 14th August 1893, published in the *Calcutta Gazette* of the 16th idem, most of the traders licensible under section 261 of the Municipal Act for dealing with inflammable articles have come under the operation of the Fire-Brigade Act; therefore the number of warehouse licenses are increasing year after year.

6. As all the owners of warehouses and trades paid their license fees in time, no prosecution was required to be made during the year except one, in which the defendant was acquitted.

7. The jute godowns and fire-wood depôts are mostly situated near the Circular Canal, which forms the western boundary of this Municipality. The Soorah Jute Mills is situated on the north side of the Narcoldanga Main Road in Ward No. 2. This is the only mill for making gunny-bags. There are three ropery business and four establishments where jute strings are made by hand.

8. Jute was imported from the Eastern districts by boats through canals, and also by the Eastern Bengal State Railway.

9. No conflagration took place within the Municipality, and therefore the assistance of the Fire-Brigade was not required.

List showing the Jute Presses, Warehouses, Roperies, Fire-wood and Wood Depôts to which licenses were granted during the year 1897-98 by the Cossipore-Chitpur Municipality.

The 4th August 1898.

WEATHER AND CROP REPORT.

For the week ending the 3rd October 1898.

Burdwan.—Rainfall at Sadar nil, Kalna nil, Katwa nil, Raniganj ·12. Weather fine. *Aus* being harvested. *Aman* doing well. Common rice selling as follows:—

	Srs.	
Sadar	12 to 17	per rupee.
Kalna	13	
Katwa	14½	
Raniganj	15	

Birbhum.—Rainfall at Sadar ·47, Rampur Hât 2·17. Weather hot. Prospects favourable. Price of common rice at Sadar 15 seers and at Rampur Hât 14·8 seers per rupee. Fodder sufficient.

Bankura.—Rainfall at Sadar ·92, Vishnupur ·37. Weather fair and hot. Harvesting of *aus* going on. Winter rice and sugarcane growing well. Fodder and water sufficient. No cattle-disease reported. Common rice sells at Sadar 17½ seers and at Vishnupur 15 seers per rupee.

Midnapore.—Rainfall at Sadar only ·08. Prospects of standing crops favourable Damage by grass-hoppers reported from several thanas. Prices of common rice:—

	Srs.	
Sadar	12	per rupee.
Contai	12 to 16	
Tamluk	12¾	
Ghatal	12 to 15	

Hooghly.—Rainfall at Sadar nil, Serampore ·25, Jahanabad nil. Prospects of *aman* paddy and sugarcane favourable. Cattle-disease prevails in one thana. Common rice sells from 10 to 12 seers per rupee.

Howrah.—Rainfall at Sadar ·03, Ulubaria nil. Weather hot. More rain wanted now or shortly. Transplantation of *aman* over. Harvesting of *aus* going on. Fodder and water sufficient. Common rice sells at 11 to 14 seers per rupee.

24-Parganas.—No rain except at Basirhat ·35. Weather hot. Sky fine and clear. Harvesting of *aus* and cutting and steeping of jute going on. Prospects of *aman* good. Cattle-disease reported from the Choital outpost in the Barasat subdivision. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	11 to 12	per rupee.
Barasat	12½	
Basirhat	14⅞	
Diamond Harbour	12 5/16	

Nadia.—Rainfall at Sadar ·03, Kushtia ·13, Meherpur ·27. Prospects of *aman* good, though slightly damaged in places by flood-water, and somewhat by grass-hoppers in some villages in Meherpur subdivision. Common rice selling at 11 to 15 seers per rupee. Fodder and water sufficient. Cattle-pox at Sailmari in thana Tehatta. Rivers subsiding.

Murshidabad.—Rainfall at Sadar ·06, Jangipur 3·90, Kandi ·10. Weather seasonable. Harvesting of *bhadoi* almost finished; average outturn estimated to be 12 annas. *Aman* plants on low lands damaged by flood in parts; those on high lands doing well. Cutting of jute is still going on. State of sugarcane and mulberry appears to be good. Sowing of *kalai* commenced. Water sufficient, but fodder is insufficient in places. Common rice sells at Sadar 15½ seers, Jangipur 15 seers, and Kandi 16½ seers per rupee.

Jessore.—Rainfall at Sadar 1·19, Jhenida ·25, Magura ·04, Narail ·29, Bangaon ·14. Weather seasonable Harvesting of *aus* paddy and jute over. *Aman* plants doing well. In the Bangaon subdivision, a large portion is under water; *aman* and *arhar*, etc., might be affected if the river continues rising. It is rising slowly. No cattle-disease reported. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	
Sadar	14 to 18	per rupee.
Jhenida	17	
Magura	19 to 20	
Narail	17-12½ chs.	
Bangaon	12 to 13	

Khulna.—Rainfall at Sadar ·26, Bagerhat 1·71, Satkhira nil. Weather seasonable. Transplantation of *aman* and harvesting of *aus* nearly over. Prospects good. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	
Sadar	... 15 to 18	per rupee.
Satkhira	15 / 21 (new *aus*)	
Bagerhat	... 16	

Rajshahi.—Rainfall at Sadar ·14, Nator ·09, Naugaon ·59. Prospects of crops good. Paddy on some low lands in Naugaon submerged. No cattle-disease. Fodder and water available. Rice sells from 12 to 24 seers per rupee.

Dinajpur.—Average rainfall 1·26. Weather seasonable Steeping of jute nearly finished. Transplantation of winter rice completed. Fodder and water ample. Rice selling at 15 seers a rupee.

Jalpaiguri.—Rainfall at Sadar 1·53, Alipur Duars 1·05. Transplantation of *haimanti* paddy nearly finished. Cutting of jute going on. Land is being prepared for tobacco. Fodder and water sufficient. Price of common rice stationary.

Darjeeling.—Rainfall at Darjeeling ·04, Kurseong ·20, Siliguri 2·04. Weather seasonable. *Hills—haimanti dhan, bara marua, kodo* and *phaphur* progressing *Terai*—harvesting of *bhadoi* paddy and jute nearly completed; *haimanti* paddy and sugarcane doing well. Coarse rice sells as follows :—

	Srs.	
Hills	... 8 to 12	per rupee.
Terai	... 12 to 14	

Bhutta sells at Darjeeling 20 seers and at Kalimpong 50 seers per rupee.

Rangpur.—Rainfall at Sadar 2·52, Nilphamari 1·05, Kurigram ·52, Gaibandha 2·46. Transplantation of winter rice and cutting, steeping and washing of jute still going on in places. Prospects fair. Common rice selling at 11 to 14 seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall ·34. Transplantation of *aman* very nearly finished. Harvesting of jute finished. Prospects good. Common rice sells from 11½ to 16½ seers per rupee. Supply of fodder and water sufficient.

Pabna.—Rainfall at Sadar nil, Sirajganj ·68. Weather fine and warm. Crop prospects good. Price of rice 12 to 16 seers per rupee.

Dacca.—Rainfall at Sadar 2·73, Manikganj ·34, Munshiganj 2·60, Narainganj 1·50. Weather hot. Prospects of standing crops good. Fodder available. No cattle-disease. Common rice 12 to 15 seers per rupee.

Mymensingh.—Rainfall at Sadar 2·44, Tangail ·52, Netrokona 3·99, Kishorganj ·80, Jamalpur 1·32. Weather hot. Crops all doing well. Fodder and water ample. Common rice 12 seers per rupee.

Faridpur.—Rainfall at Sadar ·51, Goalundo ·82, Madaripur 2·66. Weather hot. Prospects good. Rice 14 seers per rupee.

Backergunge.—Rainfall at Sadar ·68. Weather fine. Prospects of crops good. Common rice sells from 11 to 15 seers (*aman*) and from 15 to 20 seers (*aus*) per rupee.

Tippera.—Rainfall at Comilla ·55, Brahmanbaria 1·85, Chandpur 1·57. Weather seasonable. Jute is still being reaped. Transplantation of *aman* continues. Prospects of crops fair. Fodder sufficient. Price of common rice 11 to 20 seers per rupee.

Noakhali.—Rainfall at Sadar ·15, Feni 1·45. Weather hot. Prospects of crops good. *Aman* plants are being slightly damaged by insects in Parasuram. No cattle-disease. Fodder available. Price of rice—*Aman* 9 to 14 seers and *aus* 15 to 20 seers per rupee.

Chittagong.—Rainfall ·07. Weather warm. *Aus* crop harvested. Outturn 87·5 per cent. *Aman* still being cultivated. Prospects good. Prices stationary. Water and fodder sufficient.

Patna.—Rainfall at Sadar ·06, Barh nil, Dinapur ·3, Hilsa ·12, Bikram nil. Fields are being prepared for *rabi* sowings. Actual damage done by the floods not yet ascertained, but the rain stopped just in time. Prices stationary. In Patna common rice sells at 15 seers a rupee. Fodder and water for cattle sufficient.

Gaya.—No rain. Paddy crop doing well. *Rabi* lands being prepared. Common rice selling at 14½ seers per rupee.

Shahabad.—Rainfall at Sasaram 1·12. Standing crops good. Weeding of paddy progressing. Fields being ploughed for *rabi* sowings. Rice sells at Arrah 14 seers per rupee.

Saran.—Rainfall at Sadar ·65, Siwan ·08. Harvesting of *bhadoi* nearly over; an abundant harvest converted into a three quarters harvest by floods. Much paddy on low lands lost, but the crop is good on high lands. Ploughing for *rabi* beginning. Average prices—Common rice 13 seers 12 chitaks, and *makai* 24 seers 11 chitaks per rupee.

Champaran.—Rainfall only at Motihari ·37. *Bhadoi* harvesting continues. Prospects of *aghani* good. Flood has subsided. No cattle-disease. Fodder sufficient. Price of common rice 14 seers 15 chitaks and of maize 23 seers per rupee.

Muzaffarpur.—Weather generally fair. Rainfall at Sadar 1·50, Hajipur ·03, Sitamarhi ·17. Flood water subsiding. Standing crops which escaped destruction by flood are improving. No cattle-disease. Prices are—Common rice 11 to 14 seers, wheat 16 to 18 seers, barley 22½ seers, maize 20 to 32½ seers, gram 16 to 18 seers, *rahar* 20 to 21 seers, and *marua* 27½ to 30 seers per rupee.

Darbhanga.—Rainfall at Sadar ·22, Samastipur ·10, Madhubani ·16. Weather hot. Harvesting of *bhadoi* going on. Paddy where not damaged by the late flood is doing well. Portions of Roserah and Warisnagar thanas suffered most. Prospects in Madhubani are good. Common rice selling at Sadar 11 seers per rupee. Difficulty for fodder experienced in places.

Monghyr.—Rainfall nil, Begusarai nil, Jamui ·26. Weather hot during day, but cool at night. Prospects of standing crops good except in parts of Sadar and Begusarai subdivisions, where crops have been damaged by flood. No cattle-disease. Common rice sells as follows:—

Monghyr	...	...	...	13	seers per rupee.
Begusarai	...	...	...	12 to 13½	„ „
Jamui	...	...	...	14½	„ „

Bhagalpur.—Mornings and evenings cool. Rainfall at Madhipura ·21, Supaul ·95. Winter paddy crop seriously damaged in east of Madhipura subdivision; otherwise prospects of standing crops continue favourable. Fodder available. No cattle-disease except at Partapganj in Supaul subdivision. Prices stationary.

Purnea.—Rainfall at Sadar 1·33, Kishanganj ·20, Araria ·38. Weather seasonable. Harvesting of jute going on. Transplantation of winter rice finished. Prospects good. Cattle-disease gradually abating in Araria. No fresh case, but four deaths from *kaladukh* reported. Fodder and water sufficient. Common rice (*bhadoi*) sells as follows:—

Sadar	...	...	...	17	seers per rupee.
Kishanganj	...	...	...	18	„
Araria	...	...	...	21	„

Malda.—Rainfall at Sadar ·64, Shibganj ·60. Weather fair with slight rain. Prospects of winter rice continue satisfactory. Sowing of *kalai* pulse has begun. Coarse rice selling at 16 seers per rupee at English Bazar. Fodder ample.

Sonthal Parganas.—Rainfall about 3 inches. Maize harvest over; outturn at Dumka reported 8 annas; elsewhere full. Sowing of winter crops beginning. Prospects of winter rice excellent. Glanders reported last week not extended. Price of rice 14 to 16 seers, and of maize 40 to 60 seers per rupee.

Cuttack.—Rainfall at Sadar nil, Jajpur nil, Kendrapara ·03, Banki ·25. Weather very hot. Want of rain is being felt. *Sarad, arhar* and sugarcane growing. *Beali* being harvested. *Biri, mug* and *kolthi* being sown. Jute being cut. Condition of cattle generally good, but disease still prevails in some places. Fodder and water sufficient. Common rice sells as follows:—

				S.	ch.	
Cuttack	...	...	...	17	1	per rupee.
Jajpur	...	...	...	15	12	
Kendrapara	...	...	...	19	11	
Banki	...	...	...	21	0	

Balasore.—Rainfall at Sadar ·05. *Sarad* being weeded. Harvesting of jute and *asu* crop continues. Slight damage to rice crops by insect-pest in Soro Circle. Sugarcane thriving well. Rice sells from 14 to 20 seers per rupee in the interior, and at 14½ seers and 17 seers at Balasore and Bhadrak respectively. Rain wanted. Fodder sufficient.

Angul.—Rainfall at Angul ·22. Prospects of crops good. common rice selling at 20 seers per rupee in Angul.

Puri.—No rain. Weather very close and hot. *Beali* and *mandia* harvested. *Laghu* ripening. Re-weeding of *sarad* continues. Prospects of sugarcane, *arhar*, and other miscellaneous crops good. Fodder and water sufficient. Cattle-disease reported from different parts of the district. Rain much wanted. Common rice sells as follows:—

	Srs. ch.	
Puri	... 15 12	per rupee.
Khurda	... 14 7	
Interior of district	... 14 2 to 21 0 (new)	

Hazaribagh.—Weather clear. Rainfall at Sadar ·67, Giridi 0·4. Another shower would do good. Fair *bhadoi* and full rice crop expected. Rice sells at 10 to 13 seers per rupee.

Lohardaga.—Rainfall at Sadar ·24. *Gora dhan*, *urid* and *marua* are being harvested State of standing crops good. Rice sells at Ranchi 13 seers and in the interior from 13 to 16 seers per rupee. Cattle-disease continues in the interior. Fodder and water sufficient. Grain in stock sufficient.

Palamau.—Rainfall nil. Weather hot. *Bhadoi* still being harvested. Standing crops doing well. Rice sells at 14 to 23 seers per rupee.

Manbhum.—Rainfall at Sadar ·83, Gobindpur ·54. Weather seasonable. Prospects of crops on the ground are excellent. Cattle-disease reported from thana Purulia. Fodder and water sufficient. Average price of common rice at Sadar 14 seers 9 chittacks and at Gobindpur 13 seers per rupee. Supply sufficient.

Singhbhum.—Rainfall ·17. Prospects excellent. Rice plentiful from 14 to 16 seers per rupee.

General Summary.—There were light and scattered showers, and the weather throughout the week was clear. This has proved very beneficial, except in Orissa, where the rainfall has been somewhat short. The floods are subsiding, and the crops in the flooded tracts are improving. The harvesting of early rice and other autumn crops is being rapidly completed. The washing of jute is still going on. Lands are being prepared for the *rabi* crops, and the sowing of the earlier pulses has begun. There was a fall in the price of rice in some districts. Cattle are generally in good condition except in some of the flooded tracts, where there is still difficulty in procuring fodder.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 4th October 1898.

M. FINUCANE,
Secretary to the Govt. of Bengal.

The mean pressure of the seven days	Inches.	29·813
The average pressure of the corresponding period for 24 years, Surveyor-General's Office		29·744
The total number of hours of bright sunshine	Hours.	62·4
The maximum possible number of hours of sunshine		83·7
The mean temperature of the seven days	°	83·6
The average temperature of the corresponding period for 24 years, Surveyor-General's Office		83·2
The extreme variation of temperature		13 6
The maximum temperature		90·9
The highest velocity of the wind in one hour	Miles.	13
The mean relative humidity	%	84
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office		84
The total fall of rain from 25th September to 1st October 1898	Inches.	Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office		1·70
The total fall from 1st January to 1st October 1898		53·04
The average fall of the corresponding period for 24 years, Surveyor-General's Office		58·97

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; t, thunder.
